RESPONDING TO COMMISSION STAFF'S ORDER NO.8 AND PROPOSED PROCEDUAL SCHEDULE.

TO WHOM IT CONCERNS:

ON SEPTEMBER 28TH, WE SUBMITTED MORE LAB TESTS AS REQUIRED BY TCEQ, MIKE MCDEVITT. ATTACHED PAGE IS THE TEST THAT WE SUBMITTED. EVERY TIME WE THINK WE HAVE COMPLETED EVERY THING THAT HAS BEEN ASKED OF US TO DO, SOME THING ELSE IS ADDED. WE ARE TRYING VERY HARD TO TAKE CARE OF THIS MATTER. WE WERE TOLD THAT IT WILL TAKE 2 MONTHS 10-1-2016 BEFORE THE TESTS ARE COMPLETED. PLEASE BEAR WITH US. THIS IS NOT OUR FAULT. HAD WE KNOW BACK WHEN WE DID THE FIRST SET OF TESTING MONTHS AGO, WE WOULD HAVE GOTTEN THESE TEST DONE THEN. WE WERE NOT TOLD OF THIS TESTING TIL SEPTEMBER 1, 2016. AS SOON AS WE RECEIVE THE RESULTS FROM PACE LAB, WE WILL SEND YOU AND TCEQ A COPY AND HOPEFULLY THIS WILL BE ALL THAT HAS TO BE DONE TO GET THE WELL EXCEPTION GRANTED.

THANK YOU,

DANIEL DAKE

Subject: Radiological Testing

Daniel,

As per our telephone conversation of this afternoon, the table below indicates the radiological constituents that need to be analyzed, and their maximum contaminant level.

MCL	Constituent	MCL	Constituent	MCL	Constituent	MCL	Constituent
15 pCi/l	Gross Alpha	50 pCi/l	Beta Particles	30 µg/l	Uranium Mass	5 pCi/l	Radium 226/228

(pCi/l=pico curies per liter, µg/l=micrograms per liter)

If you have any questions, let me know.

Michael McDevitt, P.E.
