TO WHOM IT CONCERNS:

On January 30, 2017, we were granted a well exception for well 1,2 and 3. On page 3 of 4, paragraph 1 states:

The TCEQ has determined that the submitted information is sufficient to document the construction and capabilities of Well No. 1, Well No. 2 and Well No. 3 and therefore is Granting an exception to the log/well completion data requirement for each of these wells. This well exception was granted by:

Ms. Vera Poe, P.E., team leader

At this current time, we are talking with (PE) Charles Gilliespe about working with us to get a draft as built plan submittal criteria (enclosure 1) that should be used as guidance for the production and submittal of as-built plans for the PWS to the TCEQ plan review team.

At this current time we are asking for 180 days extension for our ccn so that we can have time to get the as-built plan done.

We are currently working on getting an engineer report, a general layout of plant, detailed map or plat, storage tank exception.

Thank you so much for your time and help on this matter. We hope to hear from you soon as we really need the ccn as soon as possible.

THANK YOU,

DANIEL DAKE
