TO WHOM IT CONCERNS:

I want to thank you for your time and help on this matter. We are trying to get an engineer report, a general layout of plant, detailed map or plat, storage tank exception. Once we have all appropriate prerequisite approvals, we will refile our application for a ccn.

Everytime we thought that we had everything done. But everytime we get one thing done, we are asked to do something else. This is why it is taking so long to get a ccn. This is not our fault.

I am wondering though, after we get an engineer report, a general layout of plant, detailed map or plat, storage tank exception, what else you will require for us to get a ccn?? Perhaps, if we know just what all you are wanting, we could get all of this done at one time, instead of this matter being draw out months and months. And then getting turned down.

THANK YOU,

DANIEL DAKE
