**RE: Proposed Oak Point Transmission Line and Substation Project
Denton County, Texas**

Dear Landowner:

We are sorry that you were unable to attend the public meeting for the proposed Oak Point Transmission Line and Substation Project that was held on May 28, 2015. Many of your neighbors attended, and their interest, concerns, and comments will assist us in routing and locating the line. Although your name was not noticed on the sign-in sheet from the meeting, we are sending you this letter so that you can stay informed about the project.

When final routing is complete, Brazos Electric will apply to the Public Utility Commission of Texas (PUCT) for Certificate of Convenience and Necessity (CCN) approval in order to construct the proposed project. At that time, all property owners affected by the routes and substations selected for submission to the PUCT will again be notified.

Please feel free to visit the website that Brazos Electric set up for the project to view maps and other project-related information, including the packet of information and questionnaire given to attendees of the public meeting:

<http://brazosshare.brazoselectric.com/OakPoint/SitePages/Home.aspx>

Your comments and concerns are important, and we urge you to return the questionnaire or other comments to our office within 10 days.

If you need any further information or wish to discuss the project, please contact me at (469) 647-4866 or christine@coxmcclain.com.

Sincerely,

Christine Polito
Senior Ecologist

**RE: Proposed Oak Point Transmission Line and Substation Project
Denton County, Texas**

Dear Landowner:

On May 14, 2015, we attempted to send you a letter inviting you to the public meeting for the proposed Oak Point Transmission Line and Substation Project that was held on May 28, 2015. Unfortunately, that letter was returned in the mail. We obtained new address information for you, and we hope this letter reaches you.

Although the notice of the public meeting did not reach you, we are sending you this letter so that you can stay informed about the project. Many of your neighbors attended the meeting, and their interest, concerns, and comments will assist us in routing and locating the line.

Please feel free to visit the website that Brazos Electric set up for the project to view maps and other project-related information, including the packet of information and questionnaire given to attendees of the public meeting:

<http://brazosshare.brazoselectric.com/OakPoint/SitePages/Home.aspx>

Your comments and concerns are important, and we urge you to return the questionnaire or other comments to our office within 10 days.

When final routing is complete, Brazos Electric will apply to the Public Utility Commission of Texas (PUCT) for Certificate of Convenience and Necessity (CCN) approval in order to construct the proposed project. At that time, all property owners affected by the routes and substations selected for submission to the PUCT will again be notified.

If you need any further information or wish to discuss the project, please contact me at (469) 647-4866 or christine@coxmcclain.com.

Sincerely,

Christine Polito
Senior Ecologist

June 18, 2015

**RE: Proposed Oak Point Transmission Line and Substation Project
Denton County, Texas**

Dear Landowner:

Brazos Electric plans to construct approximately 5.5 to 9.1 miles of 138 kV double circuit transmission line with single-pole concrete/steel structures from a new five-acre substation to be sited along or near FM 720 in the vicinity of Oak Point in eastern Denton County and proceeding north to one of several proposed tap points along an existing Brazos Electric 138 kV transmission line located southeast of Krugerville in northeastern Denton County. The transmission line right-of-way would be a maximum of 70 feet wide. The proposed project will provide for increased capacity and better continuity of service to Brazos Electric's member cooperative, CoServ and its member customers.

You are receiving this letter because County tax records indicate that you own property on or near one of the possible transmission line routes and we would like to hear your comments on the project. On May 28, 2015, a public meeting was held for the proposed Oak Point Transmission Line and Substation Project, pursuant to a public notice in the newspaper. As a result of initial public input at that meeting, it was determined that some changes to the routes presented at the meeting were advisable. One of these changes may affect your property.

Enclosed you will find a large-scale map showing the latest proposed route alternatives, PUCT flow chart, typical structure, and typical substation, along with slides from a Power Point presentation ran at the public meeting. One of the handouts enclosed is the public questionnaire. Please complete and return within 10 days. Please feel free to visit the website that Brazos Electric set up for the project to view the enclosed exhibits, additional maps and other project-related information:

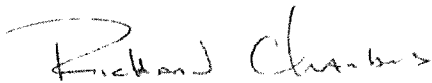

<http://brazosshare.brazoselectric.com/OakPoint/SitePages/Home.aspx>

Your comments and concerns are important. Please feel free to contact me at (254) 750-6369 or rchambers@brazoselectric.com to address your concerns, comments or arrange a meeting to discuss the project. We will be happy to meet with you to answer any questions that you may have.

Written comments and questionnaires may be submitted by using the enclosed self-addressed stamped envelope, mailed to Christine Polito, Cox|McLain Environmental Consulting, Inc., 600 E. John Carpenter Fwy, Suite 380, Irving, TX 75062, or emailed to her at the address below. If you need any further information, please contact me at (254) 750-6369 or rchambers@brazoselectric.com, or contact Christine Polito at (469) 647-4866 or christine@coxmcclain.com.

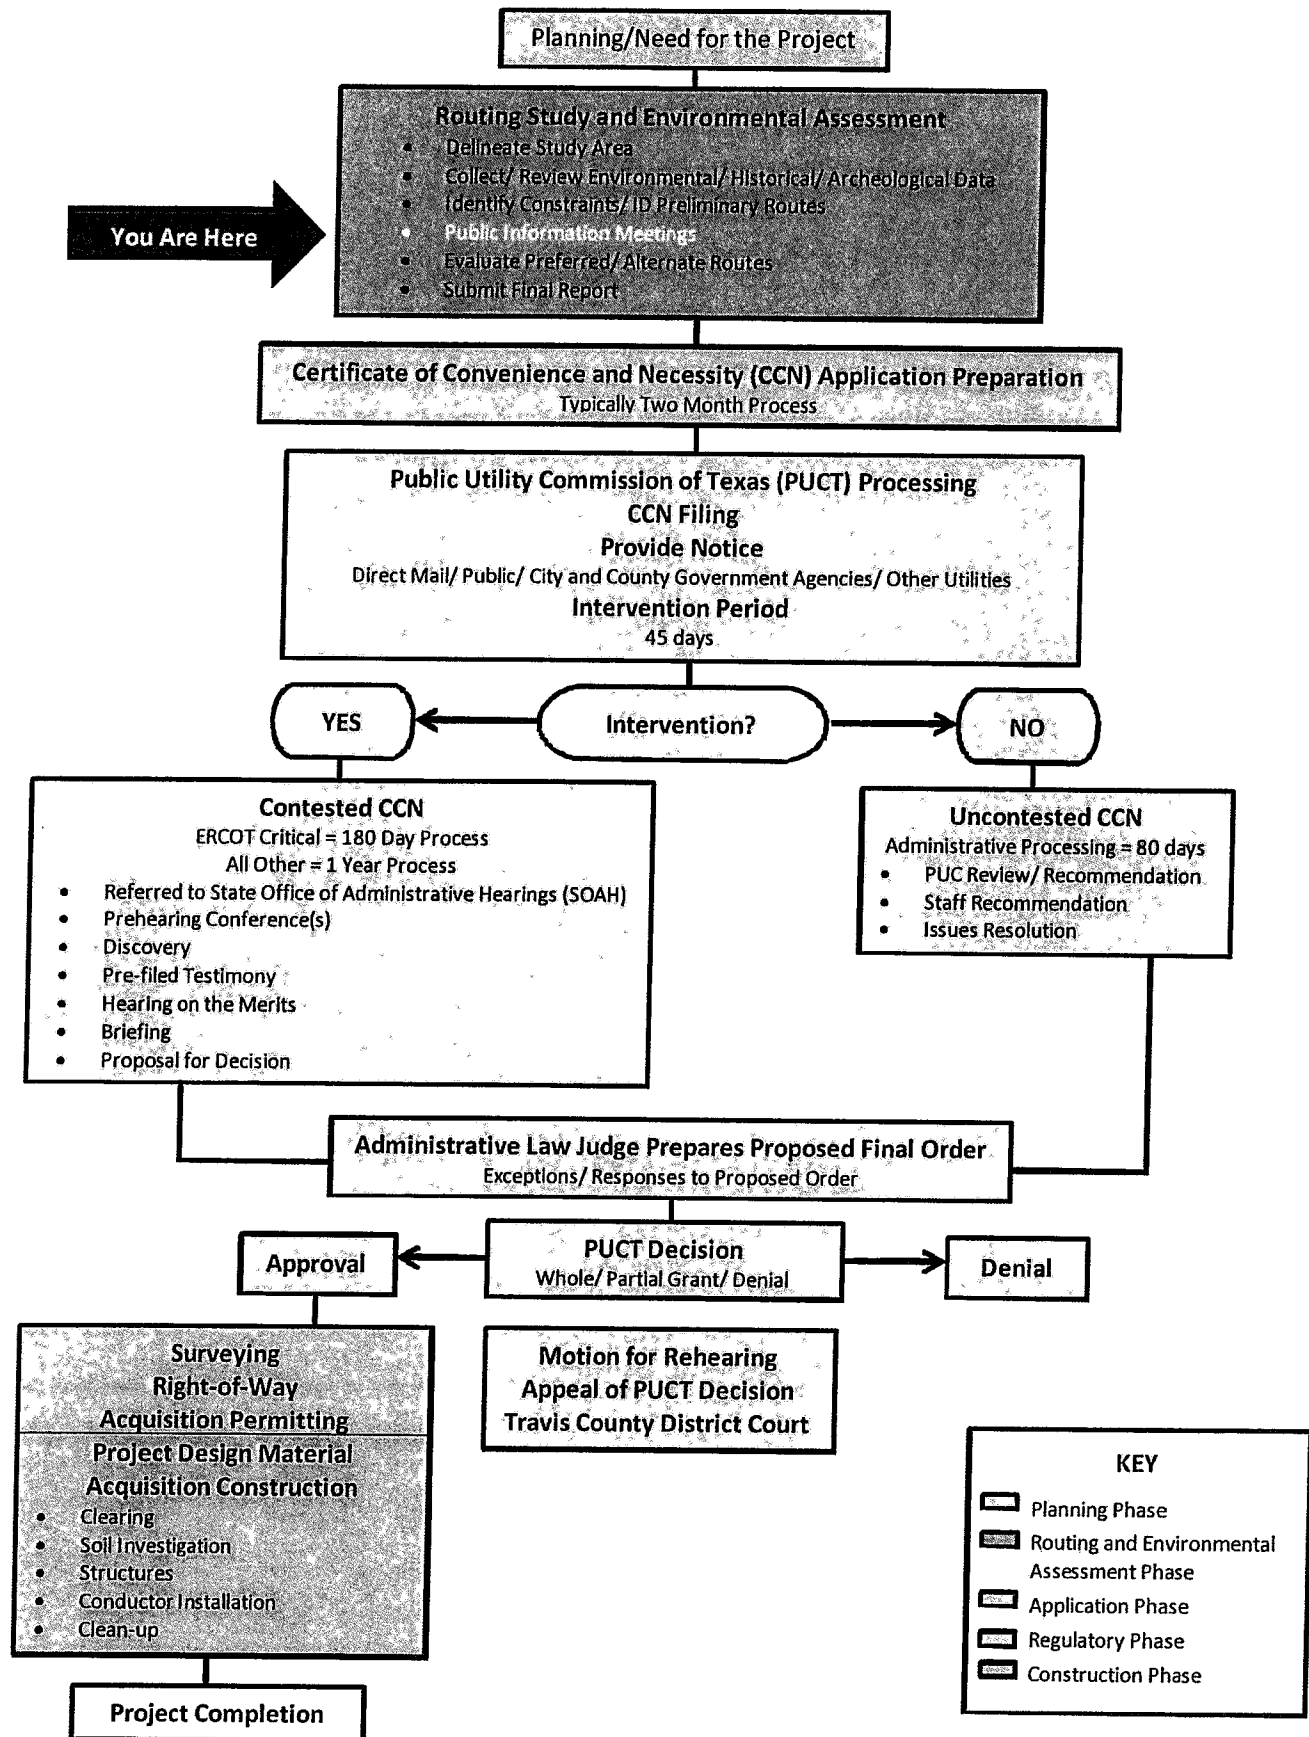

When final routing is complete, Brazos Electric will apply to the Public Utility Commission of Texas (PUCT) for amendment of its Certificate of Convenience and Necessity (CCN) approving construction of the proposed project. Brazos Electric will propose multiple line routes and substation alternatives, using the links or route segments on the attached map, to be submitted to the Public Utility Commission of Texas (PUCT). All routes and route segments are available for selection and approval by the PUCT. When the PUCT submittal takes place, Brazos Electric will notify affected landowners along these alternative routes and will provide information on how to be further involved in the transmission line review process at the PUCT. If approved by the PUCT, only one transmission line route, tap point, and substation will be constructed.

Sincerely,

A handwritten signature in black ink, appearing to read "Richard Chambers". The signature is fluid and cursive, with a large initial "R" and a long, sweeping underline.

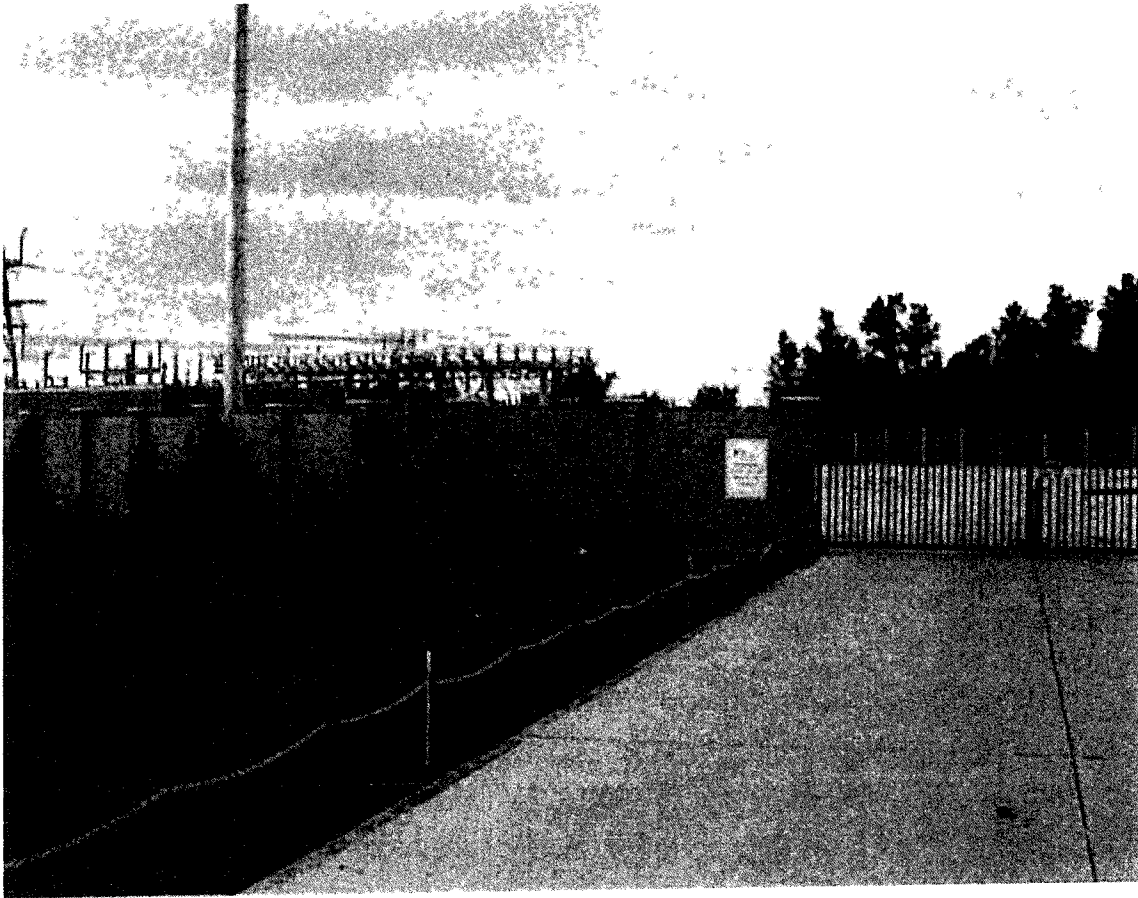

Richard Chambers
Project Regulatory Coordinator

Licensing Process for New Transmission Facilities

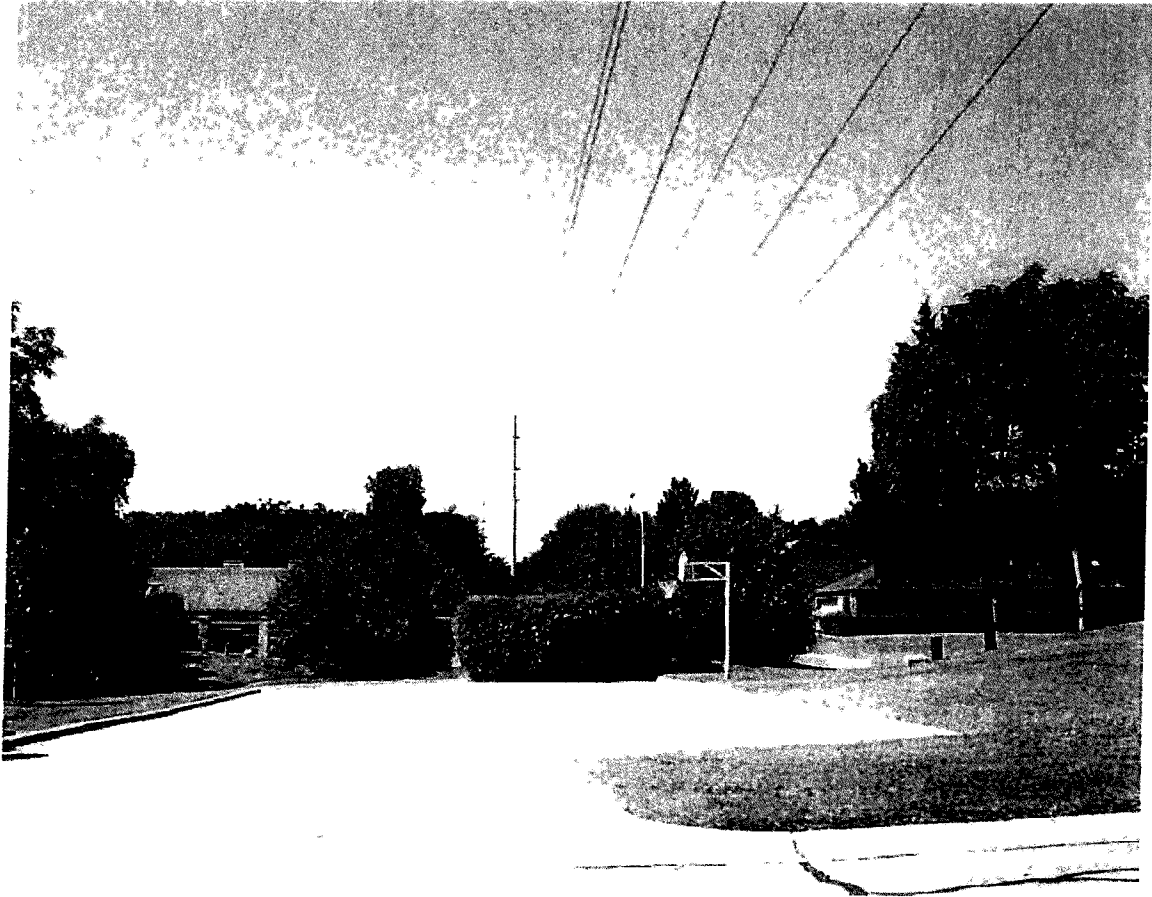

Photographs of Typical Structures

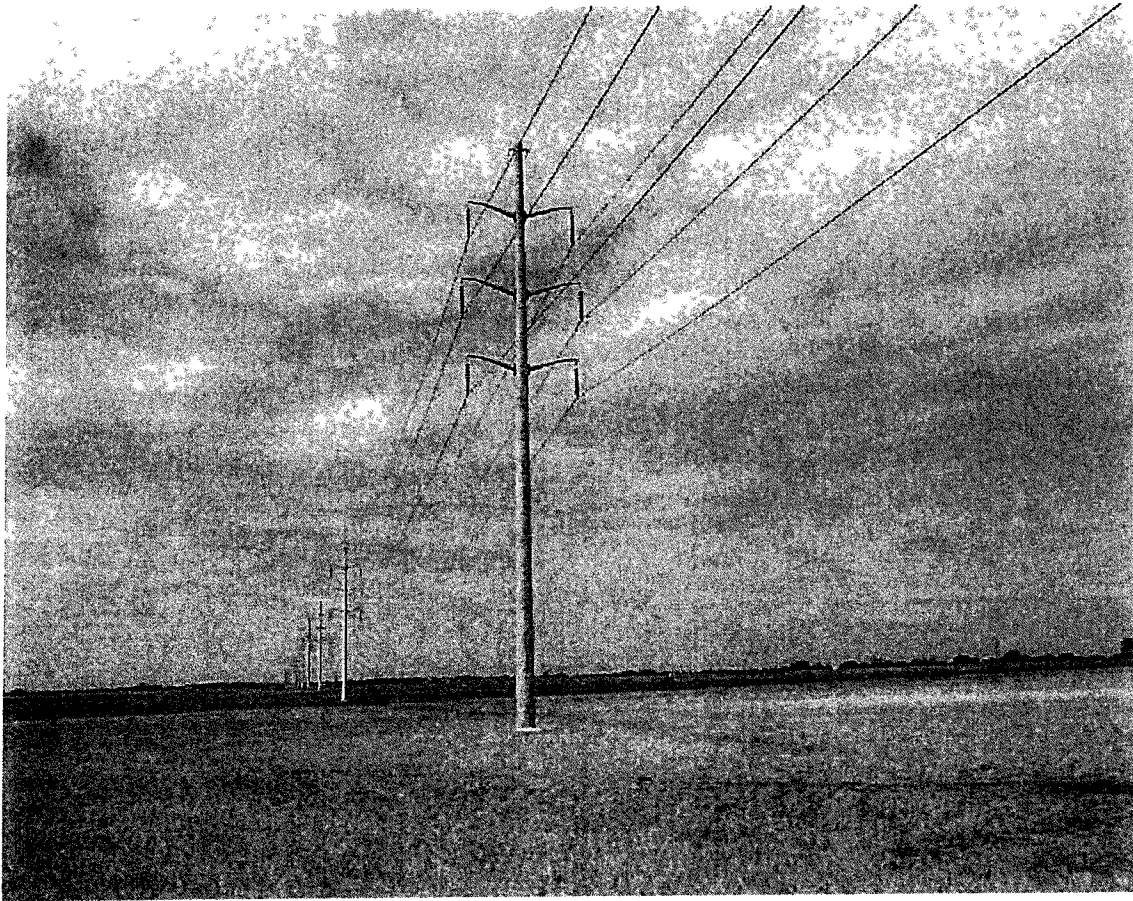

Typical Urban Substation:

Typical Urban Double Circuit Transmission Line Structure:

Typical Rural Double Circuit Transmission Line Structure:

Oak Point Purpose and Need

- The study area is primarily made up of a peninsula surrounded by Lewisville Lake on the East, West, and South, and the area just beyond Fishtrap Road on the North.
- Peak demands in the study area are expected to grow annually at approximately 8%. The historic growth rate was 7.5% from 2007 to 2012.
- The study area's growth shows continued expansion of residential developments, office building complexes, and retail/commercial complexes. Much of this property is already platted, with many developments seeing substantial growth.

Oak Point Purpose and Need – Continued.

- Thirteen existing residential subdivisions are in the study area, representing an additional 1,649 residential lots, with an estimated 1,173 lots in known future developments. Commercial development continues primarily on the Highway 380 corridor. Adjacent areas have also experienced significant growth.
- The summer peak load for these lots is projected to be 226.26 MW, with 165.42 MW being connected by 2019, with Navo Substation at or above capacity even after adding a total of 3 new transformers to the existing substations. ERCOT states that 1 MW serves approximately 200 homes.
- The study area is currently served by the Aubrey and Navo Substations. Because of rapid growth, these substations will soon reach their capacity, and the study area will lack the capacity to meet the projected load.

Summary

Transmission line is going to be designed and constructed as a 138 kV Single Pole, Double Circuit line.

Transmission line will require a 70'-0" (35'-0" each side of centerline) easement.

The transmission line easements will be purchased from the owner of record.

Summary Cont.

There will only be one transmission line and one substation constructed.

The proposed substation will require approximately 5 acres.

Typical transmission line structure height will be 120' above ground. The typical transmission line pole spacing will be 550'.

Tentative Oak Point CCN File Date

Tentative CCN File Date for Oak Point = September 5, 2015

If your property is affected by one of the proposed filed routes and or you have a habitable structure within 300' of a filed route you will be notified via USPS of the filing. The notification will inform you of your options at the PUCT.

To Stay Informed Oak Point Transmission and Substation Project

Please visit the Brazos Electric Power Cooperative, Inc. Internet Home Page and choose “PUC Projects” then navigate to the Oak Point Project.

QUESTIONNAIRE

OAK POINT TRANSMISSION LINE AND SUBSTATION PROJECT

Welcome and thank you for taking the time to attend this meeting. After you have visited the various display stations around the room and talked with the project planners, please fill out this questionnaire. Your responses will help us understand the community's concerns and aid the project team in the route selection process. Again, thank you for your time and interest!

1. In your opinion, has the need for the project been adequately explained?

Yes _____ No _____

If "no", how could we have improved this effort? What did you not understand?

2. Several factors are considered when routing a transmission line, including potential impacts to:

- Residences, businesses, schools, churches, hospitals, nursing homes;
- Cemeteries, parks, and/or recreational areas;
- Commercial radio transmitters, microwave relay stations and similar electronic installations;
- Airports, runways;
- Agricultural areas irrigated by traveling irrigation systems;
- Historical and archeological sites;
- Environmentally sensitive areas, endangered species; and
- Proximity to existing corridors.

- (A) Do you believe that all relevant factors are being considered?

Yes _____ No _____

If "no", please describe which additional factors you would like to see addressed.

- (B) Are you aware of any features not depicted correctly or not shown on the maps? If so, please explain.

3. Which of the following applies to your situation?

- _____ Potential route is near my home
_____ Potential route is near my business
_____ Potential route crosses my land
_____ Other (please describe)

4. Please provide the letter designating the route segment which affects or comes near your property.

Do you live on this property?

Yes _____ No _____

5. Please indicate your preferred end-to-end route utilizing the links identified on the maps.

6. Please list any additional concerns or information here.

7. Please provide the following information (please print):

Name: _____

Street Address: _____

City, State, Zip Code: _____

Phone: _____

Email: _____

THANK YOU FOR YOUR COMMENTS

PLEASE DROP THIS IN THE COMMENT BOX OR RETURN TO THE ADDRESS SHOWN BELOW WITHIN 7-10 DAYS.

Please send it to: Attn: Christine Polito
