Re: Docket Number 45266

Dear Sir or Madam:

This letter and attachments are in response to the Commission's Order No. 2 with a December 18, 2015 deadline for us to cure the two deficiencies in the submission to make the submission administratively complete. I have been in communication with the PUC staff for several weeks, in particular Tracy Harbour, to determine the appropriate documents so this submission can be deemed administratively complete. On December 10, 2015 I provided samples of three maps and the recorded plat which outlines the service area of the exempt utility to Ms. Harbour and I have not been able to get a response from her if these maps are sufficient to satisfy the deficiencies. As such, I'm providing the documents in our best efforts to comply with the Commission Order No. 2. If these are not deemed sufficient to make the submission administratively complete then we request additional time to provide the appropriate information.

I have enclosed the following documents for Docket Number 45266.

- Seven Plat Maps, 11" x 17"
- Seven USGS Maps with enlarged image, 11" x 17"
- Seven USGS Maps with very enlarged image, 11" x 17"
- Seven TREC MUD Boundary Maps, 11" x 17"

The first map (plat) is the clarification of the metes and bounds. Please use the plat as the boundary of the service area. The remaining three maps are to satisfy the second requirement to provide a detailed large scale map. Thank you for your consideration.

Respectfully,  
BD Realty Advisors, LLC

Brad Dill, President
