METHOD USED TO ALLOCATE UTILITY CHARGES

Check the box or boxes that describe the allocation method used to bill tenants.

X Occupancy method: The number of occupants in the tenant's dwelling unit is divided by the total number of

The number of occupants in the tenant's dwelling unit is adjusted as shown in the table to the right. This adjusted value is divided by the total of these values for all dwelling units occupied at the beginning of the retail public utility's billing period. Estimated occupancy method: The estimated occupancy for each unit is based on the number of bedrooms as shown in the table to the right. The estimated occupancy in the tenant's lwelling unit is divided by the total estimated occupancy in all dwelling units regardless of the actual	ber of Occupants 1 2 3 >3 >> Number of Bedrooms (Efficiency) 1 2 3	Billing Purposes 1.0 1.6 2.2 2.2 + 0.4 for each additional occupants Number of Occupants for Billing Purposes 1 1.6
