UTIL	LICATION OF MONARCH LITIES I, L.P. TO CHANGE RATES \$ WATER AND SEWER SERVICE \$ BEFORE THE STATE OFFICE OF ADMINISTRATIVE HEARINGS
	REBUTTAL TESTIMONY OF ROBERT L. KELLY
	I. <u>INTRODUCTION</u>
Q.	PLEASE STATE YOUR NAME AND BUSINESS ADDRESS.
A.	My name is Robert L. Kelly. My business address is 1325 N. Grand Avenue, Suite
	100, Covina, California.
Q.	DID YOU FILE DIRECT TESTIMONY IN THIS CASE?
A.	Yes I did.
Q.	PLEASE DESCRIBE THE PURPOSE OF YOUR REBUTTAL TESTIMONY.
A.	The purpose of my rebuttal testimony is to respond to two areas of the testimony of
	Mr. Chris Ekrut on behalf of the Office of Public Utility Counsel's (OPUC)
	specifically, the allocation of gain on sale, adjustments to corporate overhead
	allocations, and affiliated transactions included in rate base. Additionally, I will be
	responding to the testimony of Debbie Loockerman_and Leila Guerrero, who testify
	on behalf of Public Utility Commission (Commission) Staff, regarding allocation of
	gain on sale and adjustments to corporate overhead cost allocation, respectively.
	II. <u>ALLOCATION OF GAIN ON SALE</u>
Q.	OPUC'S WITNESS CHARACTERIZES MONARCH'S POSITION ON GAIN
	ON SALE AS " REQUESTING THAT ITS HISTORICAL UNDER-

RECOVERY SHOULD BE OFFSET BY THE GAIN ON SALÉ,

	EFFECTIVELY FATING DACK THE COMPANY FOR THE UNDER-
	COLLECTED AMOUNTS THROUGH THE FULL ALLOCATION OF THE
7	GAIN ON SALE TO SHAREHOLDERS." IS THIS AN ACCURATE
	PORTRAYAL OF MONARCH'S POSITION ON THE GAIN ON SALE
	ISSUE?"
A.	No. Monarch made clear in its response to request for information from the
	Commission Staff ¹ that "Monarch's application does not include any revenue held
	in abeyance or any costs associated with such revenue." Similarly, Monarch is not
	requesting revenue held in abeyance as a dollar-for-dollar offset to gain on sale.
Q.	THEN PLEASE EXPLAIN THE PURPOSE OF THE ATTACHMENTS TO
	YOUR DIRECT TESTIMONY, RLK-2, "MONARCH I, L.P. REVENUE HELD
	IN ABEYANCE," AND RLK-3, "MONARCH I, L.P. REVENUE HELD IN
	ABEYANCE," EXCLUDING BLUE MOUND.
A.	For the Commission to be able to recognize the equities of this case, I provided those
	two attachments with my direct testimony. Their purpose is not to support what Mr.
	Ekrut has suggested as a dollar-for-dollar offset. The purpose of Attachment RLK-2
	is to address the principle of equity, which is critically important in deciding the
	proper allocation of the Blue Mound and Midway gains on sale, as established in <i>Pub</i> .
	Util. Com'n of Texas v. Gulf States Utilities Co. ² This attachment shows the
	enormous financial burden Monarch has voluntarily absorbed by not seeking full rate
	relief, first in its 2007 rate case (\$2.6 million annually for water and \$.6 million
	Q.

Monarch Response to Staff RFI 2-42 (Apr. 12, 2016).

² See 809 S.W.2d 201, 211 (Tex. 1991) (The Court relies on an analysis of all equities involved, when determining the proper allocation of proceeds.)

1	annually for sewer), then in its 2011 rate case, as amended (\$6.5 million annually for
2	water and \$1.9 million annually for sewer), and then in its 2013 rate case (\$6.2
3 .	million for water and \$1.3 million for sewer).
4 .	Attachment RLK-3 builds on this all-important equity issue, providing an

Attachment RLK-3 builds on this all-important equity issue, providing an estimate of the enormous financial burden since 2008 for all of Monarch as a result of foregoing full rate relief requests. The estimated total burden, excluding Blue Mound, is \$42.3 million, over 11 times the amount of the gain on the Blue Mound sale. Thus, the absorption of over \$42 million by Monarch weighs heavily in its favor when balancing the equities in determining the treatment of the gain on sale.

- 10 Q. DOES MONARCH'S GAIN ON SALE REQUEST CONSTITUTE

 11 RETROACTIVE RATEMAKING AS MR. EKRUT SUGGESTS?
- 12 A. No. Once again, Monarch is not requesting that any revenue held in abeyance

 amounts be offset against the gain on sale to the benefit of Monarch shareholders.
- 14 Q. MR. **EKRUT** LANGUAGE IN POINTS TO MONARCH'S 15 **SETTLEMENT** AGREEMENT, **SAYING** "MOST RECENTLY, COMMISSION CONCLUDED THAT THE RATES AGREED-TO BETWEEN 16 MONARCH AND ITS RATEPAYERS WERE ADEQUATE TO ALLOW THE 17 18 UTILITY TO RECOVER ITS COST OF SERVICE." DOES 19 LANGUAGE NECESSARILY MEAN THAT RATES ALLOWED IN THAT 20 PROCEEDING PROVIDED FOR FULL RECOVERY 21 SERVICE?
- A. No. The language Mr. Ekrut refers to is in the Texas Commission on Environmental

 Quality (TCEQ) Order dated August 7, 2014, in the Monarch-related SOAH Docket

5.

5

6

7

No. 582-14-3381 approving the settlement agreement: "The rate structure agreed to
by the parties, to be effective January 1, 2014 (Phase I) and January 1, 2015 (Phase
II), is just, reasonable and adequate to allow the utility to recover its cost of providing
service, as required by Sections 13.182 and 13.183 of the Code." The reference to
"allow the utility to recover its cost of providing service" in fact cannot be found in
either of the sections of the Water Code that are cited, and in fact cannot be found
anywhere in the Texas Water Code. The Order language cited by Mr. Ekrut is clearly
intended to be perfunctory, and is in no way meant to tie the hands of the
Commission and require it to set rates that necessarily cover a utility's full cost of
providing service.

- 12 RATE CASES, "... MONARCH WAS ABLE TO AVOID SUBSTANTIAL
 13 FINANCIAL REVIEW BY THE REGULATORY COMMISSION"?
- 14 A. The TCEQ's Utility Regulations, 30 Tex. Admin. Code Chapter 291, make no distinction regarding proceedings resolved as a result of settlements versus non-settlements. In fact, it would not be feasible for the TCEQ to try to apply differing standards of review inasmuch as there is no assurance that any case will in fact be resolved by settlement until a settlement is actually reached. Monarch received no preferential treatment by the TCEQ as a result of the prevalence of its rate proceedings being resolved through settlement.

1	Q.	MR. EKRUT SAYS "WHEN A SETTLEMENT IS ACHIEVED AND ISSUES
2		ARE RESOLVED, THE PARTIES SHOULD NOT HAVE TO FACE THE
3	i	EXACT SAME ISSUES AGAIN." IS THAT AN ACCURATE STATEMENT?
4	A.	No. Quite to the contrary, settlements are never binding or precedential in future
5		proceedings. For example, the TCEQ Order dated October 17, 2014, in the Monarch-
6		related SOAH Docket No. 582-14-3381, which superseded the August 7 Order, could
7		not be clearer. Ordering Paragraph 8 provides as follows:
8 9 10 11 12 13 14		Resolution of this docket was the product of settlement by the signatories. Entry of this order consistent with the settlement agreement does not indicate the Commission's endorsement or approval of any principle or methodology that may underlie the settlement agreement. Entry of this order consistent with the settlement agreement shall not be regarded as binding holding or precedent as to the appropriateness of any principle or methodology that may underlie the settlement agreement. ³
16	Q.	MR. EKRUT CONCLUDES THAT " IT IS DISINGENUOUS FOR
17		MONARCH TO CLAIM THAT THE MONIES COLLECTED BY BOTH
18		MONARCH AND TECON DID NOT FUND, EITHER IN PART OR WHOLĖ,
19		THE COST OF PROVIDING SERVICE TO THE BLUE MOUND AND
20		MIDWAY SYSTEMS." HAVE CUSTOMERS IN FACT FUNDED
21		DEPRECIATION OF MONARCH'S PLANT ASSOCIATED WITH THE
22		BLUE MOUND AND MIDWAY SYSTEMS?
23	A.	As I said in my direct testimony, it is unquestionable that Monarch shareholders have
24		borne substantially all of Monarch's financial burden since acquisition, including
25		almost all of Monarch's depreciation.

1

Application of Monarch Utilities I, L.P. for a Change in Water and Sewer Rate/Tariff for Certificate of Convenience and Necessity Nos. 12983 and 20899 in [named counties], Application Nos. 37714-R and 37715-R (TCEQ Docket No. 2014-0413-UCR), Docket No. 42802, Order at 5 (Oct. 17, 2014).

1		In an effort to ameliorate Mr. Ekrut's skepticism about Monarch's revenue
2		held in abeyance, I have taken a different approach with Attachment RLK-1R, based
3		on Monarch's audited financial statements. Attachment RLK-1R compares
4		Monarch's cumulative annual losses since acquisition to its cumulative annual
5		depreciation expense, and concludes that since inception Monarch shareholders have
6		had to absorb cumulatively \$16.8 million of Monarch depreciation.
7	Q.	WHY DOES CUMULATIVÉ LOST DEPRECIATION NOT DECLINE IN 2014
8		AND 2015 WHEN MONARCH EARNED INCOME?
9	A.	Unrecovered depreciation in any year is permanently lost, never to be recovered in
10		future rates.
11	Q.	WHAT IS THE ECONOMIC IMPACT OF LOST DEPRECIATION ON
12		MONARCH AND ITS CUSTOMERS?
13	A.	Unrecovered depreciation has the same economic impact, on both Monarch and
14		customers, as contributed plant; that is, it is as though Monarch contributed \$16.8
15		million of plant that customers will never have to pay for.
16	Q.	DOES THIS MEAN MONARCH IS NOW PROPOSING TO RECOVER A
17		SMALL PORTION OF THIS \$16.8 MILLION IN LOST DEPRECIATION BY
18		ALLOCATING THE GAIN ON SALE TO SHAREHOLDERS?
19	A.	Definitely not. Rather, the point Monarch is making here is that the principle of
20		equity must be considered, given that Monarch has recovered very little of its
21		investment in Monarch, which would include the post-acquisition \$1.1 million
22		Monarch invested specifically in Blue Mound, and that Monarch has suffered
23		consistent losses since acquisition through 2013. In light of this heavy burden

1		absorbed entirely by shareholders, an equitable resolution of this gain on sale sharing
2		issue must result in the gain on sale of Blue Mound and Midway being attributed
3		entirely to Monarch shareholders.
4	Q.	MR. EKRUT ALLEGES THAT " GOING FORWARD, RATEPAYERS
5		WILL BEAR THE BURDEN OF THE SALE OF THE ASSETS. THROUGH A
6		HIGHER UNIT RATE OF SERVICE, RATEPAYERS, NOT
7		SHAREHOLDERS WILL ULTIMATELY FACE LARGER WATER AND
8		SEWER BILLS." ⁴ IS MR. EKRUT CONSISTENT IN HIS TESTIMONY ON
9		THIS POINT?
10	A.	No. Earlier in his testimony Mr. Ekrut concedes that remaining customers are better
11		off after the sale:
12 13 14 15 16 17 18		" avoiding [infrastructure improvements] does represent a benefit to Monarch's remaining customers. Thus, to the extent those costs can be avoided, the ratepayers do ultimately benefit. However, as I testified earlier, the per-unit cost of service to the remaining customers of Monarch has increased due to the Blue Mound and Midway transactions. This impact negates some of the benefit received from Monarch's avoidance of further capital investment as there are now fewer ratepayers left to absorb exiting system cost. ⁵
20	Q.	HAS MONARCH DOCUMENTED THE CUSTOMER IMPACT OF THE
21		AVOIDED BLUE MOUND INFRASTRUCTURE IMPROVEMENTS?6
22	A.	Yes. In response to discovery, Monarch provided the annual increase to customers,
23		including Blue Mound customers that would have resulted from the needed Blue
24		Mound improvements if the disposition of Blue Mound had, not occurred.

⁴ Direct Testimony of Chris Ekrut at 31.

⁵ *Id* at 25 (emphasis added).

⁶ Staff RFI No. 16-4.

1		Attachment RLK-2R shows the calculation of the annual increases to customers that
2		was avoided by the sale of the Blue Mound system.
3	Q.	TURNING NOW TO STAFF WITNESS MS. LOOCKERMAN, MS.
4		LOOCKERMAN CONCLUDES THAT "THE COMMISSION SHOULD
5		INITIALLY ALLOCATE THE PERCENTAGE OF THE ASSETS THAT
6		HAVE BEEN DEPRECIATED TO THE RATEPAYERS BECAUSE THIS IS
7		THE PORTION OF THE ASSETS THAT THEY HAVE "PAID" THROUGH
8		DEPRECIATION EXPENSE." IS MS. LOOCKERMAN CORRECT THAT
9		CUSTOMERS HAVE "PAID" \$1,210,573 AND \$648,271 OF ACCUMULATED
10		DEPRECIATION FOR THE BLUE MOUND AND MIDWAY SYSTEMS,
11		RESPECTIVELY?
12	A.	No. First, customers do not pay "depreciation" in their water bills. Customers pay
13		for water service. Paying for water and wastewater service does not inure customers
14		with interest in depreciation any more than paying water and wastewater bills inure
15		customers with utility employees' salaries.
16		Furthermore, as I said in my testimony, it is unquestionable that Monarch
17		shareholders have borne substantially all of Monarch's financial burden since
18		acquisition, including almost all of Monarch's depreciation. In an effort to ameliorate
19		Ms. Loockerman's skepticism about Monarch's revenue held in abeyance, I have
20		taken a different approach with Attachment RLK-1R. The approach I have taken is
21		based on Monarch's audited financial statements, Attachment RLK-1R, which
22		compares Monarch's cumulative annual losses since acquisition to its cumulative

1	annual	depreciation	expense,	and	concludes	that	since	inception	Monarch
2*	shareho	lders have had	to absorb	cumul	atively \$16.8	8 milli	on of N	Ionarch dep	reciation.

- Q: WHY DOES CUMULATIVE LOST DEPRECIATION NOT DECLINE IN 2014
 AND 2015 WHEN MONARCH EARNED INCOME?
- 5. A. Unrecovered depreciation in any year is permanently lost, never to be recovered in future rates.
- 8 SHARING OF THE GAIN SHOULD BE ADDRESSED IN A FUTURE
 - 9 DOCKET TO BE FILED WITHIN ONE MONTH OF THE FINAL DATE IN

THIS CASE." DO YOU BELIEVE THERE IS ANY GOOD REASON FOR

- DEFERRING RESOLUTION OF THIS GAIN ON SALE ISSUE TO A
- 12 **FUTURE DOCKET?**

- 13 A. No. The amount of the respective gains on sale of Midway and Blue Mound have not
 14 been challenged by anyone in this proceeding. The only disputed issue is whether
 15 there should be a sharing of the gain with customers and if so how much, and the
 16 parties have not expressed any need for further information on that issue. As a result,
 17 there is no basis for deferring resolution of the gain on sale issue to a future
- 18 proceeding.
- 19 Q. MS. LOOCKERMAN DEFINES REVENUE HELD IN ABEYANCE AS "THE
 20 DIFFERENCE BETWEEN REVENUES PROPOSED TO BE COLLECTED IN
 21 MONARCH'S PREVIOUS APPLICATIONS AND THE REVENUES
- PRODUCED BY THE STIPULATED RATES IN THE SETTLEMENTS." IS

- 1 THAT AN ACCURATE DEFINITION AS IT HAS BEEN APPLIED BY
- 2 MONARCH?
- 3 A. No. Revenue held in abeyance, as calculated in Attachments RLK-2 and RLK-3 of
- 4 my direct testimony, is defined as the difference between revenues proposed to be
- 5 collected and the revenues that would be required to recover cost of service.
- 6 III. ADJUSTMENTS TO CORPORATE OVERHEAD COST ALLOCATION
- 7 Q. MR. EKRUT RECOMMENDS THAT THE COMPONENTS OF THE
- 8 PARENT COMPANY'S ALLOCATION FACTOR BE BASED ON TEST
- 9 YEAR VALUES AS OPPOSED TO THE 2012 VALUES MONARCH HAS
- 10 PROPOSED. WHAT ARE THE POSSIBLE RAMIFICATIONS IF MR.
- 11 EKRUT'S PROPOSAL WERE ADOPTED AS THE STANDARD FOR
- 12 CORPORATE OVERHEAD COST ALLOCATION?
- 13 A. It is critically important that Monarch use corporate cost allocation methodologies
- that are consistent with Monarch's California and other affiliates. Otherwise, if a
- non-symmetrical cost allocation methodology is used, corporate costs will be either
- over- or under-recovered from Monarch's customers. Similarly, because Monarch
- and its California affiliate do not file rate cases on the same schedule, care must be
- taken to maintain symmetry to ensure that Monarch uses periods for the underlying
- data that coincide with the periods used in California. Otherwise, again, corporate
- costs will be either over- or under-recovered from Monarch customers.
- 21 Q. MR. EKRUT ALSO CRITICIZES MONARCH'S ALLOCATION
- 22 METHODOLOGY FOR IGNORING THE NUMBER OF CUSTOMERS.

⁷ *Id* at 44.

1	WHY DID	MONARCH N	OT INCLU	DE NUMBER	OF	CUSTOMERS	IN_cITS

- 3 A. As I stated previously, Monarch's California affiliate does not include this factor, and
- 4 it is important to maintain symmetry in the allocation methodologies.
- 5 Q. BESIDE THE ISSUE OF SYMMETRY, IS THERE ANOTHER REASON
- WHY CUSTOMERS SHOULD NOT BE INTRODUCED AS A FACTOR IN
- 7 CORPORATE OVERHEAD COST ALLOCATIONS?
- 8 A. Yes. California has largely dropped customers as a factor in corporate overhead cost
- 9 allocations, mainly because the issue has proved to be so contentious and has
- consumed so much time and resources in rate cases. In the California affiliate's 2012
- rate decision, D.12-04-009⁸ beginning on page 17, there is a lengthy discussion about
- the tortuous wrangling over the customer factor, concluding that "[m]ost problematic
- is the customer count" and that the number of customers should be an irrelevant
- factor in allocating corporate costs.

ALLOCATION?

- 15 Q. MR. EKRUT TAKES EXCEPTION TO APPLYING THE THREE-FACTOR
- 16 METHOD TO ALLOCATE PARENT COMPANY COSTS DOWN PAST THE
- 17 MAJOR BUSINESS SEGMENT (TEXAS UTILITIES), ALL THE WAY TO.
- 18 THE INDIVIDUAL AFFILIATES SUCH AS MONARCH. IS THIS
- 19 APPROACH A JUDGMENT CALL ON THE PART OF MONARCH IN
- 20 DEVELOPING ITS CORPORATE OVERHEAD COST ALLOCATIONS?
- A. No, it is not a judgment call by Monarch. The California Public Utilities Commission
- has been very specific in defining the three-factor allocation methodology as

http://docs.cpuc.ca.gov/PublishedDocs/WORD_PDF/FINAL_DECISION/165160.PDF.

- 1 extending all the way down to the individual business unit, including Monarch. See
- 2 Attachment RLK-3R, Corporate Overhead Cost Allocation Workpaper Supporting
- 3 D.12-02-009.
- 4 Q. WHY SHOULD THE COMMISSION EMPLOY A CORPORATE COST
- 5 ALLOCATION METHODOLOGY THAT WAS ESTABLISHED BY A NON-
- 6 TEXAS JURISDICTION?
- 7 A. As I mentioned previously, if the corporate cost allocation methodology established.
- 8 in the California affiliate's 2012 rate decision, D.12-04-009, 9 is not used here,
- 9 corporate costs will be either over- or under-recovered, not only by Monarch but also
- by all other associated entities nationwide. Mr. Ekrut's recommendation would also
- be contrary to Commission precedent, as the Commission has also determined, as
- recently as this year that it is appropriate to use the allocation methods adopted by
- utilities with business segments in non-Texas jurisdictions. 10
- 14 Q. TURNING NOW TO STAFF WITNESS MS GUERRERO, MS. GUERRERO
- 15 USED THE MOST CURRENT INFORMATION RECORDED IN 2015 AS A
- 16 BASIS FOR CORPORATE COST ALLOCATIONS RATHER THAN
- 17 MAINTAINING CONSISTENCY WITH, THE ALLOCATION
- 18 METHODOLOGY USED IN OTHER JURISDICTIONS. MS. GUERRERO
- 19 RECOMMENDS THAT THE COMPONENTS OF THE PARENT
- 20 COMPANY'S ALLOCATION FACTOR BE BASED ON THE MOST
- 21 CURRENT INFORMATION RECORDED IN 2015 RATHER THAN THE 2012

http://docs.cpuc.ca.gov/PublishedDocs/WORD_PDF/FINAL_DECISION/165160.PDF.

See Application of Southwestern Public Service Company for Authority to Change Rates, Docket No. 43695, Order on Rehearing at 20 (Feb. 23, 2016).

1		VALUES MONARCH HAS PROPOSED. ¹¹ WHAT ARE THE POSSIBLE
2		RAMIFICATIONS IF MS. GUERRERO'S PROPOSAL WERE TO BE
3		ADOPTED AS THE STANDARD FOR CORPORATE OVERHEAD COST
4		ALLOCATION?
5	A.	It is critically important that Monarch use corporate cost allocation methodologies
6		that are consistent with Monarch's California and other affiliates. Otherwise, if a
7		non-symmetrical cost allocation methodology is used, corporate costs will be either
8		over- or under-recovered from Monarch's customers. Similarly, because Monarch
9		and its California affiliate do not file rate cases on the same schedule, care must be
10		taken to ensure that Monarch uses periods for the underlying data that coincide with
11		California. Otherwise, again, corporate costs will be either over or under recovered
12		from Monarch customers.
13	Q.	REGARDING MS. GUERRERO'S TESTIMONY, DO YOU AGREE WITH
14		MS. GUERRERO'S ADJUSTMENT RELATED TO THE CALCULATION OF
1.~		MENT LO LIMIT VINE CA LEDVI L. ME DVIDE DVIDENCE

14 MS. GUERRERO'S ADJUSTMENT RELATED TO THE CALCULATION OF
15 TEXAS UTILITIES' AFFILIATE EXPENSES?
16 A. No. Monarch applied a weighted average calculation in calculating the percentage of
17 East Shared and West Shared overhead applied to each of the areas. Only after the

weighted average is calculated can the total percentage allocated to each utility be calculated. The \$11,776,616 shown on Page 25 Lines 3 and 6 is based on Errata – WP/IV-2 – Adjusted Affiliate Expenses – Parent filed May 23, 2016. However, Errata -WP/IV-2 – Adjusted Affiliate Expenses - Parent filed June 2, 2016 shows the Parent Expenses are \$11,999,618. Using the correct Parent Company Expenses from

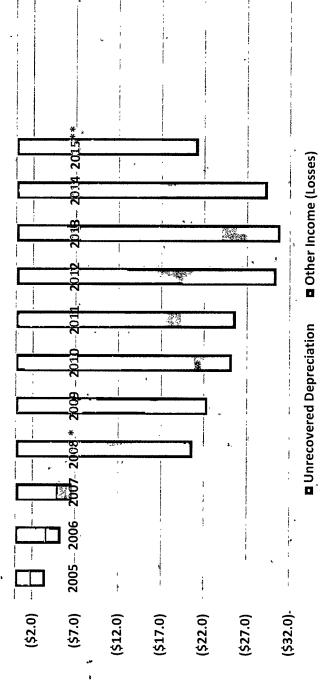

Direct Testimony of Leila Guerrero at 23.

- the Errata schedule filed on 06/02/2016 would change Ms. Guerrero's calculation as
- 2 shown in her Table 10 as shown below:

Account Items	Amount
Total Parent Expenses	\$11,999,618
Multiply by Staff's cost allocated rate	22.60%
Staff's amount Allocated from Parent to Monarch	\$2,711,914
Less:	
Amount Requested in the Application	\$3,417,491
Staff's Recommended Reduction to Miscellaneous Expense - Affiliate - Parent/SouthWest	\$ (705,577)

- In addition, in her Table 8, Ms. Guerrero erroneously excluded known and
- 4 measurables in her calculations.
- 5 IV. <u>AFFILIATED TRANSACTIONS INCLUDED IN RATE BASE</u>
- 6 Q. MR. EKRUT HAS RECOMMENDED AN ADJUSTMENT TO REMOVE
- 7 100% OF THE ECO MARGIN FROM RATE BASE, WITHOUT
- 8 CONSIDERING THE MERITS OF THIS ADJUSTMENT, DO YOU AGREE
- 9 WITH THE ACCURACY OF HIS CALCULATIONS?
- 10 A. No. Mr. Ekrut failed to consider the offsetting reduction in theoretical depreciation
- reserve benefits over Monarch's proposed five-year refund period. Disallowing ECO
- margin assets from rate base would reduce the amount of theoretical depreciation
- reserve benefits by \$883,372 for water and \$58,403 for wastewater. See Attachment
- 14 RLK-4R.
- 15 Q. ARE YOU ADDRESSING THE MERITS OF MR. EKRUT'S ADJUSTMENT?
- 16 A. No. Mr. Profilet addresses this proposed adjustment in his rebuttal testimony.
- 17 Q. DOES THAT CONCLUDE YOUR TESTIMONY?
- 18 A. Yes.

* Includes (\$14.0) charge for goodwill impairment

** Includes \$4.3 gain on sale of Blue Mound and Midway

Attachment RLK-2R

Annual Impact on Cost of Service
