

Tract III:

R28832, a certain tract of land containing Sixty five and twenty-one hundredths (65.21) acres being the same tract known as 116.46 Acres described in Deed of Trust from Sterling C. Evans, Trustee to Herman Wiedner and wife, Rosie Wiedner, dated August 28, 1944, and recorded in Volume 22, pages 139-140, Deed of Trust records in Guadalupe County, Texas. The said 65.21 acres is out of the William Bracken Survey 65, Abstract 57, Patent No. 335, Volume 3, and is situated about two miles south of the Town of Cibolo, about twenty miles East of the City of San Antonio, less the 3.337 Acres out of Bexar County, now consisting of 61.837 acres out of Guadalupe County, Texas, and being more particularly described as follows:

BEGINNING at an iron pipe on fence line, being the north line of said Herman Wiedner 115.21 Acres Tract for the Northeast corner of said 65.21 Acres, and the Northwest corner of a tract of 50.00 Acres;

THENCE with line of stakes South 30 Deg. 00' East, 1618.78 feet to an iron pipe on fence line on the south line of said 115.21 Acres Tract, the Southeast corner of this Tract and the Southwest corner of a tract of 50.00 acres;

THENCE with fence along the south line of said 65.21 Acres, as follows:

South 60 degrees, 03' West, 1682.51 feet to a steel rod at an angle;

THENCE South 60 degrees, 31' West, 390.80 feet to a steel rod on the east line of a small Cemetery;

THENCE with fence North 29 degrees, 57" West, 25.00 feet to a steel rod, the Northeast Corner of said Cemetery;

THENCE with fence line South 60 degrees, 43' West, 354.19 feet to a steel rod in the center line of Cibolo Creek, the Southwest Corner of said 65.21 acres from which an iron pipe on east bank bears North 60 degrees, 43' east, 13.00 feet;

THENCE up the center of said Cibolo Creek with its meanders, as follows:

North 24 degrees, 36' West, 130.89 feet,

North 49 degrees, 55' West, 139.76 feet,

North 73 degrees, 40' West, 43.15 feet to a steel rod in center of Cibolo Creek from which an iron pipe on east bank bears North 10 degrees, 21' East 14.00 feet;

THENCE with fence on the east side of Creek, North 10 degrees 21' East, 1018.10 feet to a steel rod for a corner;

THENCE crossing said Cibolo Creek, North 60 degrees, 33' East, 1091.07 feet to a point in the center of said Creek, being the south corner of a triangular shaped parcel of land in Bexar County, Texas, containing 2.504 acres;

THENCE with old fence line, North 30 degrees, 10' West, 538.00 feet to an iron pipe, the Northwest corner of said Parcel of land;

THENCE with old fence line along the north line of said Wiedner Tract, as follows:

North 59 degrees, 50' East, at 327.00 feet the center of Cibolo Creek, to a total distance of 440.60 feet to a steel rod at an angle;

THENCE North 60 degrees, 57' East, 303.43 feet to the place of beginning, COMPRISING of 65.21 acres of land, less and save except for 41.0 acres of land, more particularly described in a Warranty Deed dated October 11, 2002, recorded in Guadalupe County, Texas and filed under Volume No. 1762, pages 0474-0477 of the County Deed Records; and

Less 10.719 acres of land, more particularly described in a Warranty Deed, dated October 11, 2002, recorded in Guadalupe County, Texas, and filed under Volume 1761, pages 0597 - 0600 of the County Deed Records.

SCHEDULE 51

GOEHRING PROPERTY

10,000 acres of land out of the Julian Diaz Survey No. 66, Bexar County, Texas, and being 10,000 acres of land out of that certain 112.59 acre tract of land conveyed by A. Matthes to W. H. Muenchow by deed dated Sept. 28, 1945 and recorded in Volume 2162 on pages 119-123 of the Deed Records of Bexar County, Texas and described more particularly by metes and bounds as follows:

FROM A concrete monument in the point of intersection of the East line of F. M. Road 1518 with the North line of the Hale-Trainer Road, at a flare corner; THENCE with the East line of F. M. Road 1518, N. 30° 49' W. 656.80 feet to an iron pin set for the Southwest corner and POINT OF BEGINNING of the herein conveyed 10.00 acre tract;

THENCE with the East line of F.M. Road 1518, N. 30° 49' W. 315.7 feet to an iron pin and corner post in the original North line of the above described 112.59 acre tract, set for the Northwest corner of this 10.000 acre tract;

THENCE with the original North line of the said 112.59 acre tract as fenced, N. 59° 06' E. 1,379.8 feet to an iron pin set for the Northeast corner of this 10.00 acre tract;

THENCE S. 30° 49' W. 315.7 feet to an iron pin set for the Southeast corner of this 10.000 acre tract;

THENCE S. 59° 06' W. 1,379.8 feet to the place of beginning.

However, above described 10^{acres} are subject to easement to the City of San Antonio, Texas, of record in Volume 3361, page 475, Deed Records of Bexar County, Texas.

EXHIBIT B
ANNEXATION SERVICE PLAN

See attached

CITY OF SCHERTZ, TEXAS

ANNEXATION SERVICE PLAN

AREA ANNEXED

Approximately 3,315± acres, less certain properties subject to Development Agreements, located east of FM 1518, south of FM 78, and north of I-10, all in Bexar County, Texas, as shown on the map on file with the City Secretary.

INTRODUCTION

This service plan has been prepared in accordance with Local Government Code Section 43.056. Municipal facilities and services to the annexed area described above will be provided or made available on behalf of the City at the following levels and in accordance with the following schedule.

POLICE PROTECTION

Patrolling, responses to calls, and other police services will be provided on the effective date of the annexation at the same level as provided throughout the City.

FIRE PROTECTION AND FIRE PREVENTION

Fire protection and fire prevention services will be provided on the effective date of the annexation at the same level as provided throughout the City.

EMERGENCY MEDICAL SERVICES

Emergency medical services will be provided on the effective date of the annexation on the same basis and at the same level as provided throughout the City.

SOLID WASTE COLLECTION AND DISPOSAL

Solid waste collection and disposal services will be provided on the effective date of the annexation on the same basis and at the same level as provided throughout the City. However, no obligation exists for the City to provide solid waste collection services to a person who continues to use the services of a privately owned solid waste management service provider.

OPERATION AND MAINTENANCE OF WATER AND WASTEWATER FACILITIES THAT ARE NOT WITHIN THE SERVICE AREA OF ANOTHER WATER OR WASTEWATER UTILITY

Operation and maintenance of water and wastewater facilities that are not within the service area of another water or wastewater utility will be provided on the effective date of the annexation on the same basis and at the same level as provided throughout the City.

OPERATION AND MAINTENANCE OF ROADS AND STREETS

Operation and maintenance of roads and streets will be provided on the effective date of the annexation on the same basis and at the same level as provided throughout the City.

STREET LIGHTING

Street lighting will be made available on the effective date of the annexation on the same basis and at the same level in comparable areas as provided throughout the City.

OPERATION AND MAINTENANCE OF PUBLIC PARKS AND OTHER PUBLICLY OWNED FACILITIES

If any public park, playground, swimming pool, or any other publicly owned facility, building or service is located within the annexed area, it will be maintained on the effective date of the annexation on the same basis and at the same level as similar facilities are maintained throughout the City.

OTHER SERVICES

Other services that may be provided by the City such as planning, code enforcement, animal control, library, park and recreation, court, and general administration will be made available on the effective date of the annexation on the same basis and at the same level as provided throughout the City.

CAPITAL IMPROVEMENTS

The City will make available to the annexed area any necessary water, sewer, street, and drainage facilities within four and one-half (4-1/2) years of the effective date of the annexation unless the construction of the necessary facilities is interrupted by circumstances beyond the control of the city, or unless this period is extended by an arbitration decision. No impact fees will be charged to any developer or landowner within the annexed area except in conformity with Local Government Code Ch. 395. Construction of other capital improvements shall be considered by the City in the future as the needs dictate on the same basis as such capital improvements are considered throughout the City.

UNIFORM LEVEL OF SERVICES MAY NOT BE REQUIRED

Nothing in this plan shall require the City to provide a uniform level of full municipal services in any if the above service categories to each area of the City, including the annexed area, if different characteristics of topography, land use, and population density are considered a sufficient basis for providing different levels of service.

TERM

This service plan shall be valid for a term of ten (10) years.

AMENDMENTS

The plan shall not be amended unless public hearings are held in accordance with Local Government Code Section 43.0561.

Re: Schertz Development Agreement

Dear Property Owner:

One original of your Development Agreement with the City of Schertz is enclosed. In addition, a copy of the file-stamped Development Agreement, that was recorded in the Bexar County Property Records, is also enclosed.

Please do not hesitate to contact me if you have any questions.

Very truly yours,

Katherine A. Tapley

CITY OF SCHERTZ'S SUPPLEMENTS TO APPLICATION

COMES NOW the City of Schertz (the "City"), by and through its undersigned attorneys of record, and hereby supplements its above-referenced application, which was filed with the Public Utility Commission (the "Commission") on May 11, 2016, to provide the following additional information:

Attachment A:	TCEQ Central Registry Detail of the City of Schertz Public Water System/Supply
Attachment B:	Compliance History Report
Attachment C:	2015 Annual Drinking Water Quality Report (Consumer Confidence Report)
Attachment D:	Safe Drinking Water Information System ("SDWIS") Report
Attachment E:	TCEQ Drinking Water Watch – Water System Detail
Attachment F:	TCEQ Drinking Water Watch – Water System Fact Sheet
Attachment G:	TCEQ Drinking Water Watch – Water System Summary Sheet
Attachment H:	Correspondence from the TCEQ relating to the designation of the City's public drinking water system a "Superior Water System"

The City respectfully requests that Commission grant its application and such other and further relief to which it may be entitled.

Respectfully submitted,

LLOYD GOSSELINK ROCHELLE &
TOWNSEND, P.C.

What's a "site"?

A "site" (sometimes called a "regulated entity") is any person or thing that is of environmental interest to the TCEQ. At a "site", one or more regulatory activities of interest to us occur or have occurred in the past. Some examples of sites are:

- Industrial plants, such as the Exxon Baytown Facility
- Small businesses, such as Texaco Gas Station #200 or Elroy's Dry Cleaning & Laundry
- Public facilities, such as the City of Austin's Hornsby Bend Wastewater Treatment Plant

What's a "customer"?

A "customer" owns, operates, is responsible for, or is affiliated with a regulated entity. Examples include:

- Major industrial corporations, such as Exxon USA, Exxon Inc, or Texaco Inc

- Small businesses, such as Karl Redmond dba Karl's Kleaners, which owns several dry-cleaner locations
- Governmental bodies, such as the City of Austin, the United States Air Force, or a municipal utility district
- Individuals, such as Karl A. Redmond, owner of Karl Redmond dba Karl's Kleaners

2015 Annual Drinking Water Quality Report
(Consumer Confidence Report)
CITY OF SCHERTZ
Water System # TX0940003
210-619-1800

Special Notice: *Required language for ALL community public water supplies*

You may be more vulnerable than the general population to certain microbial contaminants, such as *Cryptosporidium*, in drinking water. Infants, some elderly or immunocompromised persons such as those undergoing chemotherapy for cancer; those who have undergone organ transplants; those who are undergoing treatment with steroids; and people with HIV/AIDS or other immune system disorders can be particularly at risk from infections. You should seek advice about drinking water from your physician or health care provider. Additional guidelines on appropriate means to lessen the risk of infection by *Cryptosporidium* are available from the Safe Drinking Water Hotline at (800) 426-4791.

Our Drinking Water Meets or Exceeds All Federal (EPA) Drinking Water Requirements:

This report is a summary of the quality of the water we provide our customers. The analysis was made by using the data from the most recent U.S. Environmental Protection Agency (EPA) required tests and is presented in the attached pages. We hope this information helps you become more knowledgeable about what is in your drinking water.

Water Sources:

The sources of drinking water (both tap and bottled water) includes rivers, lakes, streams, ponds, reservoirs, springs and wells. As water travels over the surface of the land or through the ground, it dissolves naturally-occurring minerals, and in some cases, radioactive material, and can pick up substances resulting from the presence of animals or from human activity. Contaminants that may be present in source water before treatment include: microbes, inorganic contaminants, pesticides, herbicides, radioactive contaminants and organic chemical contaminants.

En Español:

Este informe incluye informacion importante sobre el agua potable. Si tiene preguntas o comentarios sobre este informe en espanol, favor de llamar al tel. (210) 619-1110- para hablar con una persona bilingue en espanol.

Public Participation Opportunities:

To learn about future public meetings concerning your drinking water or to request to a meeting, please call us.

Date: Monday – Friday

Time: 8:00 am to 5:00 pm

Location: 10 Commercial Place, Bldg 2

Phone Number: 210-619-1800

Where do we get our drinking water?

Our drinking water is obtained from two Ground water sources: The Schertz Seguin Well Field water comes from the CARRIZO-WILCOX Aquifer and the Naco Well 1 & 2 water comes from the EDWARDS Aquifer. The Naco Wells are only used when water supply from the Schertz Seguin Well is limited. A Source Water Susceptibility Assessment for your drinking water source(s) is currently being updated by the Texas Commission on Environmental Quality. This information describes the susceptibility and types of constituents that may come into contact with your drinking water source based on human activities and natural conditions. The information contained in the assessment allows us to focus our source water protection strategies. Some of this source water assessment information will be available later this year on Texas Drinking Water Watch at <http://dww.tceq.state.tx.us/DWW/>. For more information on source water assessments and protection efforts at our system, please contact us,

ALL drinking water may contain contaminants:

When drinking water meets federal standards there may not be any health based benefits to purchasing bottled water or point of use devices. Drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the EPA's Safe Drinking Water Hotline at (800) 426-4791.

Secondary Constituents:

Many constituents (such as calcium, sodium, or iron) which are often found in drinking water, can cause taste, color and odor problems. The taste and odor constituents are called secondary constituents and are regulated by the State of Texas, not the EPA. These constituents are not cause for health concern. Therefore, secondaries are not required to be reported in this document but they may greatly affect the appearance and taste of your water.

About the following pages:

The pages that follow list all of the federally regulated or monitored contaminants which have been found in your drinking water. The U.S. EPA requires water systems to test for up to 97 contaminants.

Definitions:**Maximum Contaminant Level (MCL)**

The highest permissible level of a contaminant in drinking water. MCLs are set as close to the MCLGs as feasible using the best available treatment technology.

Maximum Contaminant Level Goal (MCLG)

The level of a contaminant in drinking water below which there is no known or expected health risk. MCLGs allow for a margin of safety.

Maximum Residual Disinfectant Level (MRDL)

The highest level of disinfectant allowed in drinking water. There is convincing evidence that addition of a disinfectant is necessary for control of microbial contaminants.

Maximum Residual Disinfectant Level Goal (MRDLG)

The level of a drinking water disinfectant below which there is no known or expected risk to health. MRDLGs do not reflect the benefits of the use of disinfectants to control microbial contamination.

Treatment Technique (TT)

A required process intended to reduce the level of a contaminant in drinking water.

Action Level (AL)

The concentration of a contaminant which, if exceeded, triggers treatment or other requirements which a water system must follow.

Abbreviations:

NTU- Nephelometric Turbidity Units

MFL- million fibers per liter (a measure of asbestos)

pCi/l- picocuries per liter (a measure of radioactivity)

ppm- parts per million, or milligrams per liter (mg/L)

ppb- parts per billion, or micrograms per liter – or one ounce in 7,350,000 gallons of water

ppt- parts per trillion, or nanograms per liter

ppq- parts per quadrillion, or picograms per liter

na- not applicable

Inorganic Contaminants

Collection Date	Contaminant	Violation	Level Found	MCL	MCLG	Unit of Measure	Source of Contaminant
2014	Barium	No	0.0952	2	2	ppm	Discharge of drilling wasters; discharge from metal refineries; erosion of natural deposits.
2014	Fluoride	No	0.14	4	4	ppm	Erosion of natural deposits; water additive which promotes strong teeth; discharge from fertilizer and aluminum factories.
2015	Nitrate	No	.02	10	10	ppm	Runoff from fertilizer use; leaching from septic tanks; sewage; erosion of natural deposits
2011	Combined Radium 226 & 228	No	1	5	0	pCi/L	Erosion of natural deposits.
2012	Gross Beta Emitters	No	6	50	0	pCi/L	Decay of natural and man-made deposits

Nitrate Advisory- Nitrate in drinking water at levels above 10 ppm is a health risk for infants of less than six months of age. High nitrate levels in drinking water can cause blue baby syndrome. Nitrate levels may rise quickly for short periods of time because of rainfall or agricultural activity. If you are caring for an infant you should ask advice from your health care provider.

Organic Contaminants TESTING WAIVED, NOT REPORTED, OR NONE DETECTED.

Maximum Residual Disinfectant Level

Systems must complete and submit disinfection data on the Disinfection Level Quarterly Operating Report (DLQOR). On the CCR report, the system must provide disinfectant type, minimum, maximum and average levels.

Year Tested	Disinfectant	Average Level	Minimum Level	Maximum Level	MRDL	MRDLG	Unit of Measure	Source of Chemical
2015	Chlorine	1.85	.82	2.50	4.0	<4.0	ppm	Disinfectant used to control microbes.

Disinfection Byproducts

Year	Contaminant	Average Level	Highest Level	Range of Levels	MCL	Unit of Measure	Source of Tested Contaminant
2015	Total Haloacetic Acids	1.0	3.0	0 – 3	60	ppb	Byproduct of drinking water disinfection
2015	Total Trihalomethanes	7.0	13.6	4.5-13.6	80	ppb	Byproduct of drinking water disinfection

"This evaluation is sampling required by EPA to determine the range of total trihalomethane and haloacetic acids in the system for future regulations. The samples are not used for compliance, and have been collected under non-standard conditions. EPA requires the data to be reported here. Please contact your water representative if you have any questions".

Coliform Bacteria

Total Coliform bacteria are used as indicators of microbial contamination of drinking water because testing for them is easy. While not disease causing organisms themselves, they are often found in association with other microbes that are capable of causing disease. Coliform bacteria are more hardy than many disease causing organism; therefore, their absence from water is a good indication that the water is microbiologically safe for human consumption.

*5% of monthly samples are positive-no more than 2 positive samples allowed

=Fecal Coliform or E.Coli MCL: A routine sample and a repeat sample are total coliform positive, and one is also fecal Coliform or E. Coli positive

Year	Contaminant	Highest Monthly # of Positive Samples	Total Coliform MCL	MCLG	Total # of E.Coli or Fecal Coliform Samples	Unit of Measure	Violation	Source of Contaminant
2015	Total Coliform	2.3	*	0	0	Presence	N	Naturally present in the environment
2015	Fecal Coliform	0	=	0	0	Presence	N	Naturally present in the environment

Fecal coliform bacteria and, in particular, E. coli, are bacteria whose presence indicates that the water may be contaminated with human or animal wastes. Microbes in these wastes can cause short-term effects, such as diarrhea, cramps, nausea, headaches, or other symptoms. They may pose a health risk for infants, young children, some elderly, and people with severely compromised immune systems.

Turbidity NOT REQUIRED

Unregulated Contaminant Monitoring Rule 2 (UCMR2)

Unregulated contaminants are those for which EPA has not established drinking water standards. The purpose of unregulated contaminant monitoring is to assist EPA in determining the occurrence of unregulated contaminants in drinking water and whether future regulation is warranted. Any unregulated contaminants detected are reported in the following table. For additional information and data visit: <http://www.epa.gov/safewater/ucmr/ucmr2/index.html>, or call the Safe Drinking Water Hotline at (800) 426-4791.

0940003

Page 4 of 4

2015 Annual Drinking Water Quality Report

Lead and Copper

Year Tested	Contaminant	The 90 th Percentile	# of Sites Exceeding Action Level	Violation	MCLG	Action Level	Unit of Measure	Source of Contaminant
2013	Lead	0	0	No	0	15	ppb	Corrosion of household plumbing systems; erosion of natural deposits
2013	Copper	0.0782	0	No	1.3	1.3	ppm	Corrosion of household plumbing systems; erosion of natural deposits; leaching from wood preservatives

Required Additional Health Information for Lead

"If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. This water supply is responsible for providing high quality drinking water, but cannot control the variety of materials used in plumbing components. When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 30 seconds to 2 minutes before using water for drinking or cooking. If you are concerned about lead in your water, you may wish to have your water tested. Information on lead in drinking water, testing methods and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline or at <http://www.epa.gov/safewater/lead>."

Carrizo-Wilcox Aquifer Water Data- Taken from Schertz Seguin Local Government Corporation CCR #TX0940094

Secondary and Other Constituents Not Regulated (No associated adverse health effects)						
Year Tested	Constituent	Violation	Highest Level Found	Unit of Measure	MCL (mg/l)	Source of Constituent
2013	Bicarbonate	No	118	ppm	N/A	Corrosion of carbonate rock such as limestone
2013	Calcium	No	21.8	ppm	N/A	Abundant naturally occurring element
2013	Chloride	No	28	ppm	300	Abundant naturally occurring element, used in water purification; byproduct of oil field activity
2013	Hardness as CaCO ₃	No	70.6	ppm	N/A	Naturally occurring calcium and
2013	Magnesium	No	3.93	ppm	N/A	Abundant naturally occurring element
2013	Manganese	No	0.0027	ppm	0.05	Abundant naturally occurring element
2013	Nickel	No	0.0014	ppm	0.1	Erosion on natural deposits
2010	pH	No	8.1	units	>7.0	Measure of corrosivity of water
2013	Sodium	No	32.8	ppm	N/A	Erosion of natural deposits; byproduct of oil field activity
2013	Sulfate	No	28	ppm	300	Naturally occurring; common industrial byproduct; byproduct of oil field activity
2013	Total Alkalinity As CaCO ₃	No	97	ppm	N/A	Naturally occurring soluble mineral
2013	Zinc	No	0.0074	ppm	5.0	Moderately abundant naturally occurring element used in metal industry

In the water loss audits submitted to the Texas Water Development Board for the time period of Jan-Dec 2015, our system lost an estimated 36.9 mg of water (4.46%). If you have any questions about the water loss audit please call PWS phone number.

This report was created on AUG-03-2016
Results are based on data extracted on APR-29-2016

NOTICE: EPA is aware of inaccuracies and underreporting of some data in the Safe Drinking Water Information System. We are working with the states to improve the quality of the data.

The tables below list all violations that the state reported to EPA for this water system. Health-based violations are listed first, followed by monitoring, reporting, and other violations.

Health Based Violations: amount of contaminant exceeded safety standard (MCL) or water was not treated properly.

No health-based violations found. EPA has no record of any health-based violations reported by the state for this water system (Violations within last 10 years are included in this report).

Monitoring and Reporting and Other Violations: system failed to complete all samples or sample in a timely manner, or had another non-health-based violation. A significant monitoring violation means the system failed to take a large percentage of the required samples. Non-significant monitoring violations indicate that the water system failed to take some of the required samples, but did do some of the required sampling.

Watersheds (the land areas drinking water comes from): Learn more about the health of this watershed.

Drinking water in your state

Drinking water in general: Visit EPA's Office of Ground Water and Drinking Water web site or call the Safe Drinking Water Hotline (1-800-426-4791). EPA has also prepared information about various regulated drinking water contaminants.

Advanced tools for accessing EPA drinking water data: <https://www.epa.gov/waterdata/drinking-water-tools>

Research Data: As well as monitoring the levels of drinking water contaminants for which EPA has set standards, EPA, states, and water systems also carry out studies of contaminants that may need to be regulated in the future. For more information about these, please see the National Contaminant Occurrence Database and the Microbe and Disinfection Byproducts study database.

Additional Information

In fiscal year 2005 (the last year for which EPA has complete data) based on information reported to EPA by the states, 1.5 percent of all systems reported a treatment technique violation, 6.1 percent of all systems reported an MCL violation, and 24 percent of all systems reported a reporting/monitoring violation.
