

- 8 Other courts have addressed the related question whether § 1926(b) protection is limited to customers receiving service from the particular project being financed by the qualifying federal loan or whether it extends to all customers receiving the type of service financed by the loan. See *Sequoyah County*, 191 F.3d at 1198 n. 5; *Bell Arthur Water Corp. v. Greenville Utils. Comm'n*, 173 F.3d 517, 524 (4th Cir.1999) ("We can find no statutory support for the ... position that the scope of § 1926(b) protection is limited to the geographical area being financed by the loan."). We need not address this issue, since the District's argument focuses only on protection for other types of services, not other projects or areas receiving the same type of service.
- 9 In this case, the USDA loan was both for improvements to the District's sewer system and was secured by sewer revenues. Therefore, we need not decide whether it is the type of service which provides the collateral for the loan or the type of service for which the loan was made that is entitled to protection. Here, the loan was not made to finance a water project, nor did the District's water revenues secure the loan.
- 10 The district court correctly held that the reasonableness of imposing the \$360,000 cost on the developer depends on disputed issues of fact, and is therefore unsuitable for resolution at the summary judgment stage.
- 11 Of course, a rural district does not have unlimited discretion; a rural district has not "made service available" if the rural district's method of providing service amounts to a constructive denial of service. For instance, failing to provide a type of service that is generally accepted in the industry, failing to comply with state law requirements such as health and sanitation codes, or providing unreasonably costly or delayed service each might amount to such a constructive denial of service.
- 12 In the same affidavit in which the District's expert estimated the cost and construction time for a stand-alone treatment facility to serve Castle Rock, the expert averred that a similar facility for Ostrich Lake, one of the remaining six tracts, would cost \$160,000. Other than attaching the affidavit to its response to the City's motion for summary judgment, the District presented no meaningful argument regarding this new proposal to the district court. There is no evidence regarding facilities for the other five tracts.
- 13 The District also argues that the district court erred in dismissing its state law claims without prejudice. The district court did so after finding that Missouri state courts have exclusive jurisdiction over these claims and, alternatively, that it was exercising its discretion to decline supplemental jurisdiction, in part because the state law issues were "novel and complex." See 28 U.S.C. § 1367(c)(1). The District states that it does not challenge the district court's alternative rationale. "We sit to review judgments, not opinions," so the District's disagreement with only one of two alternative reasons for the dismissal of its state law claims leaves us with no reason to decide the question. See *United States v. Dugan*, 912 F.2d 942, 944 (8th Cir.1990). Because the District does not challenge the district court's discretionary decision not to exercise supplemental jurisdiction over the claims, we affirm the dismissal of these claims.

What's a "site"?

A "site" (sometimes called a "regulated entity") is any person or thing that is of environmental interest to the TCEQ. At a "site", one or more regulatory activities of interest to us occur or have occurred in the past. Some examples of sites are:

- Industrial plants, such as the Exxon Baytown Facility
- Small businesses, such as Texaco Gas Station #200 or Elroy's Dry Cleaning & Laundry
- Public facilities, such as the City of Austin's Hornsby Bend Wastewater Treatment Plant

What's a "customer"?

A "customer" owns, operates, is responsible for, or is affiliated with a regulated entity. Examples include:

- Major industrial corporations, such as Exxon USA, Exxon Inc, or Texaco Inc
- Small businesses, such as Karl Redmond dba Karl's Kleaners, which owns several dry-cleaner locations
- Governmental bodies, such as the City of Austin, the United States Air Force, or a municipal utility district
- Individuals, such as Karl A. Redmond, owner of Karl Redmond dba Karl's Kleaners

CITY OF CIBOLO'S SUPPLEMENTS TO APPLICATION

COMES NOW the City of Cibolo (the "City"), by and through its undersigned attorneys of record, and hereby supplements its above-referenced application, which was filed with the Public Utility Commission (the "Commission") on March 8, 2016, to provide the following additional information:

Attachment A: 2015 Annual Drinking Water Quality Report (Consumer Confidence Report)
Attachment B: Safe Drinking Water Information System Report
Attachment C: TCEQ Drinking Water Watch – Water System Summary Sheet
Attachment D: Correspondence and Agreement with the TCEQ designating the City's public drinking water system a "Superior Water System."

The City respectfully requests that Commission grant its application and such other and further relief to which it may be entitled.

Respectfully submitted.

2015 Annual Drinking Water Quality Report

(Consumer Confidence Report)

CITY OF CIBOLO

Phone 210-658-9900

SPECIAL NOTICE

You may be more vulnerable than the general population to certain microbial contaminants, such as *Cryptosporidium*, in drinking water.

Infants, some elderly or immunocompromised persons such as those undergoing chemotherapy for cancer; those who have undergone organ transplants; those who are undergoing treatment with steroids; and people with HIV/AIDS or other immune system disorders can be particularly at risk from infections. You should seek advice about drinking water from your physician or health care provider. Additional guidelines on appropriate means to lessen the risk of infection by *Cryptosporidium* are available from the Safe Drinking Water Hotline at (800) 426-4791.

To learn about future public meetings concerning your drinking water, or to request to schedule one, please call us.

OUR DRINKING WATER IS REGULATED

This report is a summary of the quality of the water we provide our customers. The analysis was made by using the data from the most recent U.S. Environmental Protection Agency (EPA) required tests and is presented in the attached pages. We hope this information helps you become more knowledgeable about what's in your drinking water.

WATER SOURCES: The sources of drinking water (both tap water and bottled water) include rivers, lakes, streams, ponds, reservoirs, springs, and wells. As water travels over the surface of the land or through the ground, it dissolves naturally-occurring minerals, and in some cases, radioactive material, and can pick up substances resulting from the presence of animals or from human activity. Contaminants that may be present in source water before treatment include:

Microbial contaminants, such as viruses and bacteria, which may come from sewage treatment plants, septic systems, agricultural livestock operations and wildlife.

Inorganic contaminants, such as salts and metals, which can be naturally-occurring or result from urban storm water runoff, industrial or domestic wastewater discharges, oil and gas production, mining, or farming.

Pesticides and herbicides which may come from a variety of sources such as agriculture, urban storm water runoff and residential uses.

Organic chemical contaminants, including synthetic and volatile organic chemicals, which are by-products of industrial processes and petroleum production and can also come from gas stations, urban storm water runoff and septic systems.

Radioactive contaminants which can be naturally-occurring or be the result of oil and gas production and mining activities.

Where do we get our drinking water?

The TCEQ has completed a Source Water Assessment for all drinking water systems that own their sources. The report describes the susceptibility and types of constituents that may come into contact with your drinking water source based on human activities and natural conditions. The system(s) from which we purchase our water received the assessment report. For more information on source water assessments and protection efforts at our system, contact CRWA 210-609-0092

ALL public drinking water may contain contaminants.

When drinking water meets federal standards there may not be any health based benefits to purchasing bottled water or point of use devices. Drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the EPA's Safe Drinking Water Hotline (1-800-426-4791).

Secondary Constituents

Many constituents (such as calcium, sodium, or iron) which are often found in drinking water can cause taste, color, and odor problems. The taste and odor constituents are called secondary constituents and are regulated by the State of Texas, not the EPA. These constituents are not causes for health concern. Therefore, secondaries are not required to be reported in this document but they may greatly affect the appearance and taste of your water.

Required Additional Health Information for Lead

If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. This water supply is responsible for providing high quality drinking water but cannot control the variety of materials used in plumbing components. When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 30 seconds to 2 minutes before using water for drinking or

cooking. If you are concerned about lead in your water, you may wish to have your water tested. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available from the Safe Drinking water Hotline or at <http://www.epa.gov/safewater/lead>.

Abbreviations:

NTU – Nephelometric Turbidity Units

MFL – million fibers per liter (a measure of asbestos)

pCi/L – picocuries per liter (a measure of radioactivity)

ppm – parts per million, or milligrams per liter (mg/L)

ppb – parts per billion, or micrograms per liter

ppt – parts per trillion, or nanograms per liter

ppq – parts per quadrillion. Or pictograms per liter

Definitions**Maximum Contaminant Level Goal or MCLG** –

The level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs allow for a margin of safety.

Maximum Contaminant Level or MCL – The highest level of a contaminant that is allowed in drinking water. MCLs are set as close to the MCLGs as feasible using the best available treatment technology.

Maximum residual disinfectant level goal or MRDLG – The level of a drinking water disinfectant below which there is no known or expected risk to health. MRDLGs do not reflect the benefits of the use of disinfectants to control microbial contaminants.

Maximum residual disinfection level or MRDL – The highest level of a disinfectant allowed in drinking water. There is convincing evidence that addition of a disinfectant is necessary for control of microbial contaminants.

Avg. – Regulatory compliance with some MCLs are based on running annual average of monthly samples

ppm – milligrams per liter or parts per million – or one ounce in 7,350 gallons of water

ppb – micrograms per liter or parts per billion – or one ounce in 7,350,000 gallons of water

na – not applicable

Definitions – the following tables contain scientific terms and measures, some of which may require explanation.

Lead and Copper:**Definitions:**

Action Level Goal (ALG): The level of a contaminant in drinking water below which there is no known or expected risk to health. ALGs allow for a margin of safety.

Action Level: The concentration of a contaminant which, if exceeded, triggers treatment or other requirements which a water system must follow.

Lead and Copper	Date Sampled	MCLG	Action Level (AL)	90th Percentile	# Sites Over AL	Units	Violation	Likely Source of Contamination
Copper	09/20/2013	1.3	1.3	0.481	0	ppm	N	Erosion of natural deposits; Leaching from wood preservatives; Corrosion of household plumbing systems.
Lead	09/20/2013	0	15	3	0	ppb	N	Corrosion of household plumbing systems, Erosion of natural deposits.

Regulated Contaminants:

Disinfectants and Disinfection By-Products	Collection Date	Highest Level Detected	Range of Levels Detected	MCLG	MCL	Units	Violation	Likely Source of Contamination
Haloacetic Acids (HAA5)*	2015	20	4.2 - 72.3	No goal for the total	60	ppb	N	By-product of drinking water disinfection.
Total Trihalomethanes (TTHM)	2015	50	7.1 - 178	No goal for the total	80	ppb	N	By-product of drinking water disinfection.
Inorganic Contaminants	Collection Date	Highest Level Detected	Range of Levels Detected	MCLG	MCL	Units	Violation	Likely Source of Contamination
Nitrate [measured as Nitrogen]	2015	2	1.57 - 1.57	10	10	ppm	N	Runoff from fertilizer use; Leaching from septic tanks, sewage; Erosion of natural deposits.
Synthetic organic contaminants including pesticides and herbicides	Collection Date	Highest Level Detected	Range of Levels Detected	MCLG	MCL	Units	Violation	Likely Source of Contamination
Dalapon	2015	2.5	0 - 2.5	200	200	ppb	N	Runoff from herbicide used on rights of way.

Disinfectant Residual Table

The disinfectant residual is not added to the CCR by the Generator so you must manually add it to your CCR. The disinfectant residual is required by §290.272(c)(1). If you use more than one type of disinfectant then you will need to list all of them. Every system in Texas is required to maintain and measure the disinfectant residual in their water, even if you only purchase water.

This report was created on JUL-26-2016
Results are based on data extracted on APR-29-2016

NOTICE: EPA is aware of inaccuracies and underreporting of some data in the Safe Drinking Water Information System. We are working with the states to improve the quality of the data

The tables below list all violations that the state reported to EPA for this water system. Health-based violations are listed first, followed by monitoring, reporting, and other violations

Health Based Violations: amount of contaminant exceeded safety standard (MCL) or water was not treated properly

No health-based violations found. EPA has no record of any health-based violations reported by the state for this water system (Violations within last 10 years are included in this report)

Monitoring and Reporting and Other Violations: system failed to complete all samples or sample in a timely manner, or had another non-health-based violation. A significant monitoring violation means the system failed to take a large percentage of the required samples. Non-significant monitoring violations indicate that the water system failed to take some of the required samples, but did do some of the required sampling.

Research Data: As well as monitoring the levels of drinking water contaminants for which EPA has set standards, EPA, states, and water systems also carry out studies of contaminants that may need to be regulated in the future. For more information about these, please see the [National Contaminant Occurrence Database](#) and the [Microbe and Disinfection Byproducts](#) study database.

Additional Information

In fiscal year 2005 (the last year for which EPA has complete data) based on information reported to EPA by the states, 15 percent of all systems reported a treatment technique violation, 6.1 percent of all systems reported an MCL violation, and 24 percent of all systems reported a reporting/monitoring violation.

Subject: Superior Public Water System (PWS) Recognition
City of Cibolo - Public Water System (PWS) - 0940018
Guadalupe County, Texas

Dear Ms. Jackson:

As a result of the Texas Commission on Environmental Quality's (TCEQ) recent Comprehensive Compliance Investigation (CCI) and review of records concerning the City of Cibolo, it has been determined that the public water system (PWS) meets the TCEQ's Superior Public Water System recognition requirements in accordance with 30 Texas Administrative Code §290.47. This recognition authorizes display of Superior Public Water System signs on highways entering the area served by this public water system. Please note that before installing the signs along the highway rights-of-way, the District Engineer of the Texas Department of Transportation (TxDOT) should be contacted and his approval obtained concerning the proposed sign installation sites.

We are enclosing two copies of an Agreement Form to be signed by the person indicated and returned to this office. My signature will be affixed to this document and one copy returned to you for your files.

In conclusion, we wish to thank you for your diligence and concern regarding the City of Cibolo public water system. If you have any questions or require further assistance, please do not hesitate to contact James Beauchamp in the Public Drinking Water Section at (512) 230-6174 or James.Beauchamp@tceq.texas.gov.

Sincerely,

A handwritten signature in black ink, appearing to read "Gary Chaffin".

AN AGREEMENT

In view of having received a **SUPERIOR PUBLIC WATER SYSTEM** rating in accordance with **TEXAS COMMISSION ON ENVIRONMENTAL QUALITY** standards and in order to create public confidence and to properly advertise the good quality of the drinking water supply of **CITY OF CIBOLO**, the **TEXAS COMMISSION ON ENVIRONMENTAL QUALITY** has granted this permission to install standard highway markers on the recognized highways leading into the area served by **CITY OF CIBOLO**.

On their part, the **OFFICIALS** of **CITY OF CIBOLO** agree to prepare, install, maintain and be entirely responsible for these signs. The **OFFICIALS** further agree to effect the immediate removal of such signs whenever they are advised by the **TEXAS COMMISSION ON ENVIRONMENTAL QUALITY** that the rating of this supply has fallen below the required standards. Should the **OFFICIALS** fail to remove the signs upon notification that the rating of this supply has fallen below the required standards, it is understood and agreed that the **TEXAS COMMISSION ON ENVIRONMENTAL QUALITY** is empowered to effect their removal as though the signs were property of the **COMMISSION**.

In **AGREEMENT OF THE ABOVE CONSIDERATION**, the following parties attach their names to this understanding.

LOCATION

This sign may be erected on all highways entering towns and cities having their public water system designated as "Superior" by the Texas Commission on Environmental Quality and, when erected, shall be maintained in a first class condition as long as the water system continues to meet the requirements for this designation. If the town or city fails to maintain its superior rating, the signs shall be removed at once and shall not be replaced until superior status has been re-established. The sign shall be erected only after the District Engineer of the Texas Department of Transportation or his representative has been consulted as to the location and height of the sign. Usually, the marker will be placed at or inside the limits of the area served by the water system involved and will face incoming traffic.

The sign may be constructed locally according to the Texas Manual on Uniform Traffic Control Devices for Streets and Highways or purchased from a manufacturer of standard traffic signs.

Good morning,

Just received your information & I will be resolve the outstanding violation. If you want copies of the file you can call Austin Central Registry and request for the file to be copied. We purge the file here so anything over 5 years old we remove from our file.

If you have any more questions feel free to give me a call.

Have a bless and awesome day!

P.S. July 4th was awesome, I got to take a nap it was much needed ☺!

Good Morning Stacy,

I hope you had a great 4th of July.

I have attached our water contracts, I hope this will take care of that issue.

I was also wondering if I could get copies of any and all documents to the City of Cibolo regarding Compliance History, Inspections and resolution from Jan2013 to present.
