- service issues. After leaving the TCEQ, I have been retained on at least twenty additional
- 2 CCN and/or rate related projects for various clients.

3 II. SCOPE AND PURPOSE OF TESTIMONY

- 4 Q. In connection with SOAH DOCKET NO. 473-17-0119, what are your
- 5 responsibilities?
- 6 A. I was retained by Double Diamond Utilities Company, Inc. in October 2016 to update
- 7 asset inventories for two water systems and two wastewater systems.
- 8 Q. What is the purpose of your testimony?
- 9 A. I will present testimony concerning my professional opinion on the original cost of the
- water and wastewater assets as of December 31, 2015.
- 11 Q. Have you ever testified as an expert witness in contested matters before the
- 12 Commission or other level of Court?
- 13 A. Yes. I have provided testimony for contested matters which are listed below.
- In the matter of the City of Pearland, Texas (SOAH Docket Nos. 582-98-0994 and 582-98-1977)
- In the matter of AquaSource Development Company regarding Briar Creek Subdivision in Travis County (SOAH Docket No. 98-1479-UCR)
- In the matter of Hays v. Frankford Properties in the 72nd District court in Lubbock, Texas
- In the matter of Creedmoor-Maha Water Supply Corporation (SOAH Docket No. 582-00-0546)
- In the matter of the City of Fort Worth (SOAH Docket No. 582-00-1092)
- 20 In the matter of Woodcreek Utilities, inc. (SOAH Docket No. 582-00-1469)
- In the matter of City of Crandall (SOAH Docket No. 582-00-1479)
- In the matter of Mustang Water Supply Corporation and the Town of Little Elm (SOAH Docket No. 582-01-1618)
- In the matter of The City of Midlothian and City of Cedar Hill (SOAH Docket No. 582-02-1618)
- In the matter of the City of Prosper (SOAH DOCKET NO. 582-03-1994)
- In the matter of East Medina Special Utility District (SOAH DOCKET NO. 582-04-1012)
- In the matter of the Petition of Collin Count Municipal Utility District (SOAH DOCKET NO. 582-04-2699)
- In the matter of AquaTexas, Inc. for a water and wastewater tariff change and rate increase
 (SOAH DOCKET NOS. 582-05-2770, 582-05-2771, 582-05-3745, 582-05-4181, 582-05-4182,
 582-05-4184)

1 • In the matter of Cease and Desist Petition Of Wax Mid, Inc. Certificate of Convenience and 2 Necessity (CCN) No 11966 against The City Of Midlothian, CCN No. 11706 In Ellis County, 3 Texas (SOAH DOCKET NO. 582-06-1029, TCEQ DOCKET NO. 2006-0487-UCR). 4 In the matter of the City of Georgetown, Certificate of Convenience and Necessity No. 12369 in 5 Bell, Burnett and Williamson Counties, Texas (SOAH DOCKET NO. 582-14-3380, TCEQ 6 DOCKET NO. 2014-0437-UCR). 7 ■ In the Matter of Metal Coaters Operating, L.P., V. L. W. Kohlmeyer, LWK-MPOH Liquidating, 8 Inc., et al. 189th Judicial District, Harris County, Texas, Cause No. 200405898. 9 In the Matter of Travis County, TX and the State of Texas, v. Rodman Excavation, Inc. and 10 Coldwater Development, Ltd. For erosion assessment and repair, TCEQ DOCKET NO. 2007-11 1198-WQ-E. 98TH Judicial District, Travis County, Cause NO. D-1-GV-07-002293. 12 • In the Matter of the City of Frisco, TX om the Matter of the Formal Complaint of ADC West 13 Ridge, L.P. and Center for Housing Resources, Inc. Cause No. 473-16-4619, PUC Docket 45870 14 In the Matter of USOR Site PRP Vs. A&M Contractors, Inc., et al. Civil Action No. 4:14-cv-15 2441 in US District Court Southern District, Houston Division (Declaration). 16 17 Q. What topics are you going to discuss in your testimony? 18 I will present asset listings for the water and wastewater assets used to serve two Double A. 19 Diamond Utilities Company, Inc. systems: The Cliffs and White Bluff. 20 Ο. Do you have any attachments to your testimony? 21 A. Yes. I have the following exhibits as attachments to my testimony for The Cliffs and 22 White Bluff utility systems. 23 a. Resume/CV (Ex DDU-5A) 24 b. Asset table (DDU-5B) White Bluff Water 25 c. Asset table (DDU-5C) The Cliffs Water 26 d. Trending Study (DDU-5D) White Bluff Water 27 e. Trending Study (DDU-5E) The Cliffs Water 28 f. Asset table (DDU-5F) White Bluff WW 29 g. Asset table (DDU-5G) The Cliffs WW 30 h. Trending Study (DDU-5H) White Bluff WW 31 Trending Study (DDU-5J) The Cliffs WW 32

33

1		III. <u>TESTIMONY</u>
2	Q.	Please explain your responsibilities regarding the water and wastewater assets for
3		two utility systems
4	A.	My first task was to review prior rate base work completed for the applications filed by
5		Double Diamond Utilities in 2008 and 2009.
6		My second task was to request all invoices for capital items since the 2008 and 2009
7		filings. My third task was to merge the asset listing created as of 12/31/2007 with the list
8		of invoiced items since 2007. I updated each systems' asset listing. I updated the
9		trending study completed to remove the fencing for The Cliffs Water system that had
10		since depreciated from the original 2008 filing.
11		Per the 2008 filing, I had trended two wells, a ground storage tank and a portion of the
12		linework for White Bluff Water System. I trended two ground storage tanks and a
13		portion of the linework for The Cliffs Water System.
14		Per the 2009 filing, I trended a package wastewater plant, grinder pumps, and linework
15		for The Cliffs Wastewater Treatment Plant and system and grinder pumps and linework
16		for White Bluff Wastewater Treatment Plant and system.
17		For all four systems, I made a determination of used and useful for each utility asset. As
18		part of that determination, I reviewed all invoices and the most recent compliance
19		investigations. I updated the asset listings to remove replaced assets and those assets that
20		had depreciated out.
21		Finally, I reviewed and updated service lives for each asset. I provided the asset data to
22		Mr. Joyce in spreadsheets that included a summary of each asset, service life, date of
23		installation and original cost for each system.

1	Ų.	what documents did you review to complete your work?
2	Α.	I reviewed the following documents:
3		1. Prior Double Diamond Utilities rate base files
4		2. Capital Items invoiced 2008-2015
5 6		3. Compliance Investigations for both The Cliffs and White Bluff Water and Wastewater systems
7 8	Q.	Why did you trend linework for both The Cliffs and White Bluff Water and
9	V.	Wastewater?
10	A.	Based on review of the footage of linework for both The Cliffs and White Bluff Water
11		and Wastewater Systems and a comparison to the trended original costs, invoices were
12		not available to account for the linework in its entirety. Therefore, I took the trended
13		original cost and subtracted the value of the invoices in receipt and depreciated the
14		remainder. The costs subtracted are shown in duplicate at the bottom of each trended
15		data summary for completeness.
16	Q.	Why did you trend grinder pumps and lift stations for both wastewater systems?
17	A.	Based on review of invoices and receipts for tap fees, DDU had expenses greater than the
18		tap fee assessed. Therefore, I trended the cost of the grinder pump and receiving station
19		as well as the current \$2,500 tap fee to construction timelines. The tap fee was trended
20		back in the exact same fashion as the current costs for the grinder pumps and receiving
21		stations and capitalized for 20 years to reflect the capital outlay of DDU.
22		
23		

Q. What date did you use for installation dates?

A. Utilizing a conservative approach, I used a date in which construction data was made available for each of the systems. I used 1985 for The Cliffs and 1991 for White Bluff.

4 Q. What is a trending study?

A.

A.

A trending study is used to estimate costs of the asset at the date of installation. The process starts with a current cost at the time of review and assessment (12/31/2007). Based on the type of asset, for example, linework versus ground storage tanks, an index value is assigned for today's cost and for the date of installation. The indices provide a reliable guide to determine appropriate changes in costs since the date of installation. By multiplying the current cost to the indices given per year (current and date of installation), an estimated original cost can be calculated. For Double Diamond Utilities, requests for current costs were made to the current suppliers used by Double Diamond Utilities Companies, Inc. Additional current costs were researched on-line. With current costs, I utilized the Handy Whitman Indices to trend back the current costs to the approximate date of installation.

16 Q. Is the trending study used in 2008 and 2009 still applicable to the current filing?

Yes, trending uses indices set annually. The calculation of original cost was completed using the installation dates presented above and a date of 12/31/2007 to determine the appropriate multiplier for calculation of an original cost. The indices change annually according to economic measures and industry changes. Inherent to the use of indices, a current cost in 2015 numbers and the corresponding index number will result in a similar original cost calculation.

IV. CONCLUSION

2 Q. What is the conclusion of your asset inventory to	tasks?
--	--------

1

11

- 3 I have provided the results of my tasks in the form of spreadsheets. DDU-5B presents A. 4 asset inventory for White Bluff Water. DDU-5C is the asset inventory for The Cliffs 5 Water. The trended original cost of those items trended for White Bluff Water are shown 6 in DDU-5D and for The Cliffs Water in DDU-5E. Wastewater assets for the White 7 Bluff Wastewater Treatment Plant and System are presented in DDU-5F. DDU 5-G 8 presents the wastewater assets for The Cliffs Wastewater Treatment Plant and System. 9 The trended original cost of those items trended for White Bluff Wastewater is shown in 10 DDU-5H and for The Cliffs Wastewater in DDU-5J. The assets listed on these
- 12 Q. Please provide the original costs for each system.
- 13 A. For The Cliffs Water System, the original cost, including those items trended, is \$1,612,545.

spreadsheets are all used and useful to the operations of their respective utility systems.

- For White Bluff Water System, the original cost, including those items trended, is \$3,791,956.
- For The Cliffs Wastewater System, the original cost, including those items trended, is \$1,017,634.
- For White Bluff Wastewater System, the original cost, including those items trended, is \$2,847,336.

V. RATE CASE EXPENSES

Q. What invoices have you submitted to Double Diamond Utilities Companies, Inc. for the water and wastewater asset inventory presented above?

- I have invoiced Double Diamond Utilities Companies, Inc. as of July 18, 2017 for the
- water asset inventory study and water rate case work \$15,646.65.
- 3 Q. What do you estimate your costs to be for the remainder of this proceeding?
- 4 I estimate a remaining cost of \$6,000 for preparation and three days of hearing.
- 5 Q. Does this conclude your direct, prefiled testimony?
- 6 A. Yes, it does, but I reserve the right to supplement this testimony during the course of the
- 7 proceeding as new facts arise or new information becomes available to me.

EXHIBIT DDU-5A

Victoria Richards Harkins, Ph.D., P.E., President Harkins Engineering, Inc., 3300 Lost Oasis Hollow, Austin, Texas 78739

Education:

- B.A. Biochemistry, Texas Tech University, 1992
- M.S. Civil Engineering, Texas Tech University, 1995
- Ph.D. Civil Engineering, Texas Tech University, 1998

Professional/Technical Affiliations:

- Texas State Board of Professional Engineers Professional Engineer No. 87733
- Oklahoma State Board of Professional Engineers Professional Engineer No. 20957
- Member of American Society of Engineers
- Diplomate Water Resources Engineer American Academy of Water Resources Engineers
- Texas Tech University Civil Engineering Academy Member
- Texas Tech Civil and Environmental Engineering Advisory Council

Awards/Recognitions:

- Texas Tech University
 Distinguished Engineer,
 2014
- American Society of Civil Engineers Texas
 Outstanding Civil
 Engineering Award, 2012
- American Council of Engineering Companies Texas Gold Medal/Eminent Conceptor, 2011
- American Council of Engineering Companies National Recognition Award, 2011

Fields of Experience:

Dr. Victoria Richards Harkins is currently a private engineering consultant in Austin, Texas. Dr. Harkins provides project management and engineering services for small, private, and multi-million dollar projects which included water and wastewater engineering, environmental engineering including water quality and soil contamination and remediation, and general civil engineering projects. Dr. Harkins has several years of experience in environmental site investigations, regulatory compliance, and environmental engineering including soil, subsurface soil, surface water, groundwater and solid and hazardous waste.

- In the Matter of USOR Site PRP Vs. A&M Contractors, Inc., et al. Civil Action No. 4:14-cv-2441 in US District Court Southern District, Houston Division (Declaration)

Selected Environmental Experience:

Environmental Information Document (EID)/Environmental Assessment, City of Grand Prairie, Texas: Dr. Harkins was the project manager for the development and prosecution of an EID/EA as required as part of the NEPA process for submittal to the USACE for easement related to a large wastewater line. The EA focused on resources: soil, water, air, biological, cultural resources, land use, aesthetics, hazardous, toxic, and radioactive materials, socioeconomics, geology, and vegetation. The analysis included the evaluation of surface and ground water; biological resources of plant and wildlife species, terrestrial communities, wetlands, and freshwater aquatic communities; cultural resources (Archeology); and socioeconomic factors that could potentially affect the citizens of Ellis County, Texas. Consideration was made to the affected environment as it exists currently as well as impacts to such under four different alternative project scenarios. The Finding of No Significant Impact was issued.

Affected Environment, EID, LCRA SAWS Water Supply Project, - Matagorda Bay Health Study, Austin, Texas: Dr. Harkins served as task leader for data inventory, acquisition, evaluation and management of physical, chemical, hydrological, biological data for the Matagorda Bay and all the connecting and minor bays as part of a project team for the development of an Environmental Information Document/Environmental Assessment of the large water resources project. Data was evaluated for its period of record, quality, format, and accessibility for all water quality and biological parameters of Matagorda Bay to establish the current existing status of the bay for future consideration of potential project alternatives.

Nationwide Permit No. 12, City of Grand Prairie, Texas. Dr. Harkins served as the project manager for the development and acquisition of a Nationwide Permit for the location and construction of a large collection system through Waters of the United States. The permit application included address of current conditions, waters of the US, historic properties, threatened and endangered species, wetlands, wildlife, noise, and use characteristics. The permit was secured.

Hamilton Pool Hamilton Creek and Davis Creek Assessment and Remediation, Travis County, Austin, Texas: Dr. Harkins was the project manager for a detailed creek assessment and natural pond remediation due to point source pollution upstream due to failure of on-site erosion control measures and insufficient best management practices. As a result, large and repetitive stormwater runoff events led to the discharge of sediment laden stormwater. Thus, large amounts of silt have been deposited in the creek and in Hamilton Pool. A detailed project assessment was completed. Remediation design has been completed. Restoration activities included a crude clean-up and a combination of crude and wash-down method. Clean-up of the pool was conducted using divers and high pressure filter presses with a return of treated water to maintain water level vegetative benches.

Water Quality Assessment and Remediation, Austin, Texas: Dr. Harkins was the field manager for a natural pond remediation due to point and non-point source pollution upstream. The project contained many sensitive biological and ecological factors. Remediation encompassed a pump and treat system with careful return of treated water. Project assessment included a detailed assessment of the current water quality, nutrient loadings from sediments (in the pool and upstream), background concentrations, and comparable water quality concentrations. A detailed literature review has been completed as well as an extensive field assessment. The project met its goals and was successfully completed.

Water Quality and Streambed Assessment and Restoration, Hays County, Texas: Dr. Harkins was the project manager to assess a streambed affected by upstream development activities. Point and non-point source pollution entered a contributing stream affecting a large subdivision downstream. Results of the assessment have been presented, and remediation alternatives were presented.

Oil and Gas Assessment and Remediation, Texas: Dr. Harkins is currently the project manager to provide professional civil and environmental engineering and consulting services related to environmental oversight, and representation for a private client for response to oil and gas contamination of the clients' private property due to the pipeline transfer of refined and unrefined petroleum product. Dr. Harkins has conducted an independent assessment of the remediation of a refined product spill from a ruptured pipeline into shallow groundwater on the property including an analysis of groundwater data, product recovery efforts, and overall remediation effectiveness. This review demonstrated the pipeline company had overstated the effectiveness of remediation. Dr. Harkins established a remediation endpoint based on recovery data, developed a groundwater monitoring well network for the site, and provided continued recovery recommendations to the TCEQ.

Metals Assessment, Sampling and Remediation Alternatives: Dr. Harkins also conducted a creek and lake assessment from previous metals contamination. Dr. Harkins has also completed an on-site sampling of a recent discovery of a petroleum product spill during pipeline assessment and repair. Dr. Harkins is also project manager for the placement and installation of several groundwater monitoring wells to test for the presence and potential restoration of petroleum related discharge.

Water Quality Pond Assessment and Wastewater Reuse, Austin, Texas: Dr. Harkins served as field manager for a project to assess the applicability of using treated wastewater effluent as make-up water for a stormwater quality pond/detention pond. An extensive literature review was completed and field analysis and prototype studies were scoped. Field studies were designed to test the pond's ability to treat the potentially higher levels of nutrients and other potential contaminants.

Environmental Assessment, Vista and Encantada, Llano County, Texas: Dr. Harkins was a project manager for a surface water pond water quality investigation for potential herbicide, pesticide, and other potential contaminants of concern as part of a due diligence for a property transfer.

PCB Contamination and Remediation, Houston, Texas: Dr. Harkins served as a project manager of a multi-million-dollar remediation of an industrial site in Texas contaminated with PCBs, heavy metals and total petroleum hydrocarbons. Work has included: delineation of the contamination profile, site surveys, groundwater assessment, remediation design, on site management, soil samples, and contractor bid and oversight. The site was accepted into the VCP program of the TCEQ. Dr. Harkins completed all the site delineation, remediation design and managed first hand all field work. Remediation was accomplished via excavation and disposal with concrete pad for final overlay. Post closure documentation has been provided to both the TCEQ and EPA for completion. A release of liability has been awarded by the TCEQ.

Site-Wide Ecological Risk Assessment (ERA), Pantex/BWXT, Amarillo, Texas: Dr. Harkins served as the field manager for the sample collection requirement for additional data needed to support the ERA. Tasks include coordination with Pantex personnel, organization of sampling crews, sampling, QA/QC and reporting requirements. Both surface water and sediment samples were collected at five separate playas at approximately 18 sites per playa to represent potential points of exposure and biologically active zones.

Riparian Restoration, New Braunfels, TX Landa Lake: Dr. Harkins served as a project manager providing environmental restoration a part of a habitat enhancement for the endangered species, the Riffle Beetle and Fountain Darter. Work has included sediment removal, riparian restoration, erosion control, and re-vegetation.

Phase II Environmental Site Investigation: Total Petroleum Hydrocarbons and BTEX Contamination, Possum Kingdom, Texas: Dr. Harkins served a project manager for a Phase II environmental site investigation for a currently planned development. The site has a history of oil and gas production with a resulting contamination around well heads and storage tank embankments.

Water Quality Modeling, The Tidelands, Port O'Connor, Texas, Dr. Harkins completed a water quality study of a proposed subdivision located northwest of Port O'Connor, Texas. Modeling of the subdivision was done to ensure adequate dissolved oxygen levels in the far reaches of the subdivision. Parameters included sediment oxygen demand, aerations, dispersion, biochemical oxygen demand, tides, meteorological factors, surface water runoff, temperature, etc.

Water Quality Modeling, Beachside Development, Seadrift, Texas, Dr. Harkins completed a water quality study of a proposed subdivision located along San Antonio Bay, Texas. Modeling of the subdivision was done to ensure adequate dissolved oxygen levels in the far reaches of the subdivision. Parameters included biochemical oxygen demand, tides, meteorological factors, benthic demand, surface water runoff, temperature, etc.

Water Quality Modeling, The Sanctuary, Port O'Connor, Texas, Dr. Harkins completed a water quality study of a proposed subdivision located along Matagorda Bay, Texas. Modeling of the subdivision was done to ensure adequate dissolved oxygen levels in the far reaches of the subdivision.

Water Quality Modeling, Seadrift, Texas, Dr. Harkins was project manager for a water quality model of a proposed subdivision near Seadrift, Texas located along Espiritu Santo Bay. Initial data collection was completed for model development including biochemical oxygen demand, tides, meteorological factors, benthic demand, surface water runoff, temperature, etc. Alternatives for subdivision design were completed with related water quality effects being addressed.

Water Quality Modeling, Copano Bay Development, Dr. Harkins completed a water quality study of a proposed subdivision located along Copano Bay, Texas. Modeling of the subdivision was done to ensure adequate dissolved oxygen within the proposed channel lengths. Parameters included biochemical oxygen demand, tides, meteorological factors, benthic demand, surface water runoff, temperature, etc.

Environmental Site Assessment (ESA), Jonestown, Texas, Texas, Dr. Harkins performed a Phase I environmental site assessment for a commercial property used for boat storage, off-site storage, a small mobile home park, and vacant land. The ESA was completed in accordance with all applicable ASTM standards.

ESA, Possum Kingdom, Texas, Texas, Dr. Harkins performed a Phase I environmental site assessment for a large undeveloped ranch land planned for a large multi-family, marina and estates development. The site had numerous oil and gas production facilities. The ESA was completed in accordance with all applicable ASTM standards.

ESA, **San Marcos**, **Texas**, Dr. Harkins performed a Phase I environmental site assessment for a commercial property for a previous auto restoration and salvage operations. The ESA was completed in accordance with all applicable ASTM standards.

ESA, **Austin**, **Texas**, Dr. Harkins performed a Phase I environmental site assessment for a land development project. The ESA was completed in accordance with all applicable ASTM standards.

ESA, Buffalo, Texas, Dr. Harkins performed an ESA compliant with (Texas Department of Housing and Community Affairs, Real Estate Division, Real Estate Analysis Rules, 1.35) and ASTM Practice E 1527-

09. Assessment included a site reconnaissance and area survey which included a detailed physical observation of the property, interviews with identified person(s) familiar with the property's history, and inquiries to the appropriate public agencies in an attempt to determine if past practices or current conditions at the site may have caused an environmental impact on the property, a 50-year chain-of-title and environmental lien search was performed and reviewed to assess historical ownership of the property, review of available historical aerial photographs, federal, state, and local regulatory agencies enforcement and permitting records were reviewed for evidence of prior contamination on the property or in the vicinity of the property, a review was completed of state and federal environmental databases for areas of environmental concern within the recommended American Society for Testing and Materials (ASTM) radius of the property, a review of USEPA Radon Zone Information, a review of TCEQ Drinking Water Database, and a review of HUD guidelines for Noise Assessment Study triggers.

ESA, Buffalo, Texas, Dr. Harkins performed an ESA compliant with (Texas Department of Housing and Community Affairs, Real Estate Division, Real Estate Analysis Rules, 1.35) and ASTM Practice E 1527-09. See description above.

ESA, Taft, Texas, Dr. Harkins performed an ESA compliant with (Texas Department of Housing and Community Affairs, Real Estate Division, Real Estate Analysis Rules, 1.35) and ASTM Practice E 1527-05. See description above.

ESA, West Columbia, Texas, Dr. Harkins performed an ESA compliant with (Texas Department of Housing and Community Affairs, Real Estate Division, Real Estate Analysis Rules, 1.35) and ASTM Practice E 1527-05. See description above.

ESA, Three Rivers, Texas, Dr. Harkins performed two ESAs compliant with (Texas Department of Housing and Community Affairs, Real Estate Division, Real Estate Analysis Rules, 1.35) and ASTM Practice E 1527-05. See description above.

Selected Water and Sewer Utility Experience:

Engineer V, Texas Commission on Environmental Quality (TCEQ), Austin, Texas. Dr. Harkins was a senior engineer for the Water Supply Division of the TCEQ for over four years. Dr. Harkins' team processed over 300 certification applications a year and over 75 ratemaking applications per year. Dr. Harkins served as a legislative resource and provided testimony for a variety of legislators as well as numerous committee hearings at the Capitol.

Plans and Specifications, TCEQ, Austin, Texas: Dr. Harkins reviewed and approved/disapproved over 300 design plans and specifications submitted by public water supply systems in the State of Texas. The review consisted of technical design, capacity calculations and compliance for distribution water lines, ground storage tanks, elevated storage tanks, hydropneumatic tanks, and service pumps and public drinking water wells with well pump capacities. The review was made to ensure compliance with the requirements of TCEQ's Chapter 290 Rules and Regulations for Public Drinking Water Systems and the Texas Health and Safety Code.

Expert Witness, Wholesale Rate Appeal, City of Gladewater, Texas. Dr. Harkins provided expert testimony related to a wholesale water and wastewater rate appeal. As a governmental entity, a rate may be changed without state approval. The water and/or wastewater recipient may file an appeal with the State for review. At such time, evidence must be provided that the rate is fair and justifiable. Dr. Harkins assisted in settlement negotiations through SOAH arbitration.

Outside City Customer Appeal, Parker County, Texas. Dr. Harkins was retained by the Parker County Communities Coalition to provide professional engineering services as related to a rate increase made by the City of Willow Park. Dr. Harkins will provide a professional opinion on the reasonableness of the rates set for outside city customers as well as an opinion of the expenses used to determine the rate established.

Expert Witness, Certificate of Convenience and Necessity (CCN), City of Royse City, Texas. Dr. Harkins was retained to assist the City of Royse City in a contested hearing related to the utility's ability to provide continuous and adequate service and amend its current CCN for water service and to obtain a sewer CCN.

Expert Witness, Certificate of Convenience and Necessity, City of Prosper, Texas. Dr. Harkins was retained to provide expert witness testimony for the City of Prosper related to the City of Prosper's CCN. Dr. Harkins has testified as to the City of Prosper's ability to serve as well as address each of the required criteria to amend a CCN.

Expert Witness, Certificate of Convenience and Necessity, City of Midlothian, Texas. Dr. Harkins provided expert witness testimony for the City of Midlothian related to the City of Midlothian's CCN and its service area.

Expert Witness, Certificate of Convenience and Necessity, East Medina County Special Utility District, Medina County, Texas. Dr. Harkins was retained to assist the District in a contested hearing related to the utility's ability to provide continuous and adequate service and amend its current CCN for water service. Dr. Harkins testified as to the District's ability to serve as well as address each of the required criteria to amend and obtain a CCN.

Certificate of Convenience and Necessity, City of Midlothian, Texas, Dr. Harkins was retained by the City of Midlothian to prepare and prosecute a CCN amendment for a large development within the city's corporate limits as well as address a potential cease and desist request.

Certificate of Convenience and Necessity, Towns of Annetta, Annetta South, Annetta North, Hudson Oaks and Aledo, Texas. Dr. Harkins is currently retained by the Parker County Cities Coalition to provide professional engineering services as related to a sale, transfer, merger application made by the City of Willow Park.

Certificate of Convenience and Necessity Transfer and Cancellation, Houston, Texas. Dr. Harkins was retained by BCWK to complete a wastewater transfer, public water system transfer, and CCN cancellation for a privately-owned water and wastewater system.

CCN Amendment Application, Mission, Texas. Dr. Harkins provided professional consultation services for the City of Mission and its application to certificate additional wastewater service area.

Water and Wastewater Service Extension Policy, Austin, Texas. Dr. Harkins made an in-depth review of a water and wastewater supply corporation service extension policy regarding the applicable rules and regulations of the TCEQ and made recommendations for changes and/or improvements.

Certificate of Convenience and Necessity, City of Royse City, Texas. Dr. Harkins has provided and continues to provide the City of Royse City professional services related to the City's CCN which includes address of neighboring utilities. Dr. Harkins has assisted and prepared several CCN amendments, STMs, and related petitions including decertification applications for the City.

CCN Application and Decertification, Harvest Hills Treatment, LTD. Guadalupe County, Texas. Dr. Harkins was the project manager for a new CCN application and decertification from Green Valley SUD. Dr. Harkins presented and prosecuted the petition. Decertification was successful.

CCN Decertification, Keralla Development, Royse City, Texas. Dr. Harkins was the project manager for a large acreage petition for expedited release of a CCN. Dr. Harkins prepared the petition with all the required documentation for decertification to obtain service from an adjacent provider. Decertification was successful. Dr. Harkins also assisted in the determination of monies due as a result of the decertification.

CCN Decertification, Red Wolf Golf Resort, Humble, Texas. Dr. Harkins was the project manager for a large acreage request for expedited release from a CCN. Dr. Harkins presented and prosecuted the petition. Decertification was successful.

CCN Decertification, City of Cibolo, Texas. Dr. Harkins was the project manager to assist the City with potential decertification of a large acreage from a CCN.

Expedited Release, City of Midlothian, Texas. Dr. Harkins completed a petition to the Texas Public Utility Commission for the release of a 120 acre tract from a current CCN holder. Decertification was granted.

CCN Application and Dual Certification, City of Josephine, Texas: Dr. Harkins assisted the City of Josephine with water extension and water utility service which includes permitting and address of neighboring utility issues.

CCN Planning and Decertification, City of Mclendon-Chisholm, Texas. Dr. Harkins provided professional consulting services to the City of Mclendon-Chisholm with regards to development of City water and wastewater sources which included applications for water permits, wastewater permits, CCN applications and CCN decertifications from adjacent and overlying CCNs.

Capital Improvement Planning, Town of Annetta, Parker County, Texas. Dr. Harkins is currently the project manager for the development of long term planning for the Town of Annetta including 5, 10, and 20 year projections for land use, population projections, water use demand, and development of additional water supplies. The long-term planning includes term capital assets to be used for financial budgeting.

Capital Asset Planning, City of Cibolo, Texas. Dr. Harkins was the project manager for the asset inventory and costing of a large water purveyor. Trending and asset inventories will be used to determine the cost of replacement and cost for sale purposes.

Selected Water and Wastewater Rate and Asset Evaluation Experience

Expert Witness, Wholesale Water Rate Appeal, Manor, Texas. Dr. Harkins provided professional engineering services for a master district and three sub districts for a wholesale rate appeal. Work included detailed capital assets inventory, used and useful review, depreciation expense, and developer/customer aid in construction contributions.

Water and Wastewater Utility Inventory, Texas. Dr. Harkins was the project manager for the development of a detailed water and wastewater utility asset inventory as well as completing a trending study to determine costs at installation as well as depreciation values used for rate making procedures.

Victoria Richards Harkins, Ph.D., P.E. Page 9 of 11

Water Rate Analysis and Application, Cleburne, Texas. Dr. Harkins completed a water rate analysis as well as an asset inventory for the prosecution of a water rate application with the TCEQ for a multisystem public water utility.

Water Rate Analysis, Granbury, Texas. Dr. Harkins provided professional engineering services to a private water company that serves potable water service to three subdivisions in Hood County, Texas. Services include asset inventory, rate applications, and potential litigation support.

Water and Wastewater Rate Analyses, Manvel, Texas. Dr. Harkins provided expert professional services for water and wastewater rate applications which included a detailed water and wastewater capital assets inventory and trending analysis.

Expert Witness, Water and Sewer Rate and Tariff Change Application, Austin, Texas. Dr. Harkins provided expert witness testimony for the largest rate case filed with the State of Texas. The applicant provides service to 50,000 connections in the State of Texas. Dr. Harkins testified on the just and reasonability of the rates, the substantially similarity issues for consolidated systems, used and useful requirements for items to be included in rate base, basic rate design, and all discovery and other formal requirements of the application as it proceeded through the State Office of Administrative Hearings.

Water Rate and Tariff Change Application, Lake Whitney, Texas. Dr. was the project manager for a rate change application filed with the TCEQ for eleven water systems located in central Texas. Dr. Harkins' was overall responsible for the creation and prosecution of the application as well as providing supporting documentation as required for the application. Dr. Harkins provided detailed information for the systems' capital assets.

Wholesale Rate Review, City of Port Lavaca, Texas. Dr. Harkins assisted in the data collection, review and evaluation of a wholesale water contract for potable use between City of Port Lavaca and the Guadalupe Blanco River Authority.

Water Resources/Civil Experience:

Groundwater Production and Treatment, Town of Annetta, Parker County, Texas. Dr. Harkins is currently the project manager for the design of a groundwater treatment plant including three groundwater wells, two storage tanks, piping, chlorination, and related appurtenances. Water distribution modeling will be used to establish the initial network and all future additions.

Groundwater Production and Treatment, City of Hudson Oaks, Parker County, Texas. Dr. Harkins provides general water and wastewater engineering services for the City. Work has included regulatory compliance, design and installation of groundwater wells, provisional wastewater assessment, and water quality assessment, etc.

Groundwater Assessment, City of Fairview, Collin County, Texas. Dr. Harkins provided an assessment for the development of potential groundwater sources to supplement the City's water sources to meet current and future demands of the City.

Groundwater Production and Treatment, Lower Colorado River Authority, Burnet County, Texas. Dr. Harkins served as the project manager of a groundwater well design, installation and development project for a public water supply. In addition, the project involved a study of the localized groundwater to assess the potential for development of additional ground water supplies and the feasibility of obtaining service from a neighboring utility.

Victoria Richards Harkins, Ph.D., P.E. Page 10 of 11

Groundwater Assessment, Private Country Club, Austin, Texas, Dr. Harkins was the project manager for the development and acquisition of potable water supply for a new planned subdivision and golf resort. Tasks include conceptual planning, water source development and development.

Water and Wastewater Utilities Audit, City of Italy, Ellis County, Texas. Dr. Harkins completed a detailed and comprehensive audit of the city's water and wastewater utilities and management. A final report with models and templates was provided.

Groundwater Production and Treatment, City of Italy, Ellis County, Texas. Dr. Harkins served as the project manager for the design, construction and completion of a groundwater well, piping and related appurtenances for the City of Italy. Dr. Harkins completed and provided the required documentation for the application of a grant to assist in funding the new well.

Emergency Action Plans, Large Private Ranch, Texas. Dr. Harkins is the project manager for civil engineering services related to the Texas Commission on Environmental Quality Dam Safety Program for a private client. A total of six lakes are located within the project site, five of which are impounded by earthen dams and one impounded by a concrete dam. Tasks have included dam breach analysis modeling. Three EAPs have been submitted for TCEQ approval and prosecution. In addition, Dr. Harkins is currently assisting in two major dam modifications to re-route spillway flow and decrease dam height and flood storage.

Selected Wastewater Permitting Experience:

New Wastewater Treatment Plant, Town of Annetta, Texas. Dr. Harkins serves as the project manager for several modifications to the Town of Annetta's WWTP including modification to the pond receiving effluent, contact chambers, and digester. Dr. Harkins designed, permitted, and installed a new 164,000 gallons per day wastewater treatment package plant.

Wastewater Permit Renewal, Austin Independent School District, Austin, Texas: Dr. Harkins served as the project manager of a wastewater permit renewal for a package plant with a storage lagoon and onsite irrigation for disposal.

Wastewater Treatment Plant Major Modification, Flagship Emerald Point Marinas, Lake Travis, Texas: Dr. Harkins served as the project manager for an on-site wastewater treatment plant modification as well as an additional 10,000 gpd WWTP.

Wastewater Treatment Facilities, Village at Northlake, II, Jonestown, Texas. Dr. Harkins served as the project manager for a wastewater treatment plant design, construction and permitting for a pending light commercial and hotel development.

Water Quality Modeling of Lake Dunlap (New Braunfels Utilities), New Braunfels, Texas: Dr. Harkins was the field manager for a large multi year water quality study for the processing of a large wastewater treatment plant permit renewal with studies completed to assess nutrient limitations, flow changes and downstream conditions. Dr. Harkins conducted an eighteen-month water quality sampling project. The scope of the project was to collect surface water samples in order to obtain information to assist in determining whether nutrient limitations on point source discharges from NBU's wastewater treatment plants (WWTPs) will prevent the growth of excessive aquatic vegetation in receiving waters, as provided by the Texas Commission on Environmental Quality (TCEQ) regulations at 30 TAC 307.4(e). As part of the water quality study numerous water quality studies related to point and non-point source loadings entering Lake Dunlap from the Comal and Guadalupe were evaluated to determine the impact of point and non-point source nutrient loadings on Lake Dunlap.

Victoria Richards Harkins, Ph.D., P.E. Page 11 of 11

Wastewater Permit Renewal, Private Subdivision, Austin, Texas: Dr. Harkins served as the project manager for an on-site wastewater treatment plant permit renewal with the TCEQ. Service is provided by a package plant with drip irrigation.

Wastewater Treatment Facilities, Village at Northlake, II, Jonestown, Texas. Dr. Harkins served as the project manager for a wastewater treatment plant design, construction and permitting for a light commercial and hotel development.

Wastewater Permit Renewal, Flagship Emerald Point Marinas, Lake Travis, Texas: Dr. Harkins served as the project manager for a wastewater treatment plant permit renewal for an on-site wastewater treatment plant utilizing a large in-ground treatment plant and low-dose pressure drain fields.

Wastewater Permit Renewal, Austin Independent School District, Austin, Texas: Dr. Harkins was the project manager of a wastewater permit renewal process as well as a study of alternatives for future service.

Wastewater Permit Renewal, Town of Annetta, Texas: Dr. Harkins served as the project manager for a wastewater treatment plant permit renewal.

Wastewater Permit Renewal, City of Lago Vista, Texas: Dr. Harkins served as the project manager for a wastewater treatment plant permit renewal for a large wastewater treatment plant permit modification to increase use of treated wastewater irrigation and golf course irrigation.

Wastewater Permit Renewal, BCWK, L.P., Houston, Texas: Dr. Harkins served as the project manager for a wastewater treatment plant permit renewal for a large wastewater treatment plant permit with discharge into nearby water courses.

Wastewater Permit Renewal, Austin Independent School District, Austin, Texas: Dr. Harkins was the project manager for the closure and decommissioning of an on-site wastewater treatment plant for a package plant with a storage lagoon and on-site irrigation for disposal.

Wastewater Permit Renewals, City of Corpus Christi, Texas: Dr. Harkins is currently the project manager for permit renewals for three large municipal wastewater treatment plans with discharges into a variety of receiving water bodies with multiple permit effluent requirements, WET, mixing zones, nutrients, DO, etc.

SOAH DOCKET NO. 473-17-0019 PUC DOCKET NO. 46245

I. POSITION AND QUALIFICATIONS

2 Q. PLEASE STATE YOUR NAME AND BUSINESS ADDRESS.

A. My name is Jay Joyce. My business address is Expergy[®], 3838 Oak Lawn Avenue, Suite
 1000, Dallas, Texas, 75219.

5

1

6 Q. WHAT SERVICES DOES EXPERGY OFFER?

A. Founded in 2008, Expergy provides expert consulting services to the energy and utility industries. These services include utility rate design, cost allocation, cash working capital studies, depreciation and valuation studies, rate case assistance, expert testimony, and other related consulting services.

11

12

Q. WHAT IS YOUR POSITION WITH EXPERGY?

13 A. I am president of the firm. My client responsibilities include preparing and presenting
14 analyses relating to pricing and rate design matters, cost of service and revenue
15 requirement issues, cash working capital studies, customer and weather normalization,
16 and other gas, electric, water, and sewer related matters.

17

18 Q. BRIEFLY DESCRIBE YOUR QUALIFICATIONS.

19 A. I graduated from the University of Texas in 1986 with a Bachelor of Business
20 Administration degree in Finance. In 1989, I earned a Master of Business Administration
21 degree from Southern Methodist University. While at Southern Methodist University, I
22 was employed by Reed-Stowe & Co. as a Senior Consultant. My responsibilities at

1

SOAH DOCKET NO. 473-17-0019 PUC DOCKET NO. 46245

Reed-Stowe	included	developing	and	presenting	analyses	and	testimony	concern	ning
revenue requ	irements,	cost allocation	on, a	nd rate desi	gn for wa	ter, s	ewer, gas,	electric,	and
cable utilities	S.								

In 1995, I joined the Management Consulting division of the Dallas office of Deloitte & Touche LLP (now Deloitte Consulting) as a Manager. In 1997 I was promoted to Senior Manager. My responsibilities included project management for a wide range of utility-related projects including merger and acquisition analyses, merger synergy analyses, cost of service studies, management audits, cash working capital studies, and preparation of expert testimony before various commissions, courts, and other governmental authorities.

In January 2003, I resigned from Deloitte to join Management Applications Consulting ("MAC"), a small Pennsylvania professional services firm specializing in utility rate matters. In 2004, four professionals, including several MAC partners and myself, formed Alliance Consulting Group, a professional services firm headquartered in Dallas and focused on the utility industry. In December 2008, I sold my interest in the Alliance partnership, and I launched my own consulting firm, Expergy. Exhibit DDU-6A is my resume which provides additional detail.

15

16

17

19 HAVE YOU PREVIOUSLY TESTIFIED AS AN EXPERT WITNESS? Q.

20 Yes. I have previously testified before, or submitted written testimony to, the Public A. 21 Utility Commission of Texas ("PUCT" or "Commission"), the Public Utilities 22 Commission of Ohio, the Arkansas Public Service Commission, the Railroad

2

SOAH DOCKET NO. 473-17-0019 PUC DOCKET NO. 46245

1		Commission of Texas, the Public Service Commission of West Virginia, the Texas
2		Commission on Environmental Quality, the Virginia State Corporation Commission, the
3		U.S. District Court for the Northern District of California, and the Superior Court of
4		Fulton County, Georgia. Exhibit DDU-6B provides a listing of utility proceedings in
5		which I have appeared as an expert witness, participated as an expert, or made formal
6		presentations in utility matters.
7		
8	Q.	ON WHOSE BEHALF ARE YOU TESTIFYING IN THIS PROCEEDING?
9	A.	I am testifying on behalf of Double Diamond Utility Company ("DDU" or "Company").
10		
11		II. <u>PURPOSE OF TESTIMONY</u>
12	Q.	WHAT IS THE PURPOSE OF YOUR TESTIMONY?
13	A.	I was retained by DDU to assist in preparing applications for changes in the water
14		and sewer rates of White Bluff ("WB") and The Cliffs ("TC"), including completing
15		the schedules contained in the PUCT's Class B Rate/Tariff Change Application ("Rate
16		Filing Package"). The purpose of my testimony is to describe my analyses and the
17		supporting data for the water and sewer rates requested in this case.
18		
19	Q.	WHAT IS THE BASIS FOR SETTING UTILITY RATES?
20	A.	Utility rates are based the costs of providing service, including a fair return on invested
21		capital. Representative levels of the various components comprising a utility's cost of
22		providing service—operation and maintenance expenses ("O&M"), administrative and

1		general expenses ("A&G"), taxes other than income (e.g., payroll and property taxes),
2		depreciation expense, return on invested capital (calculated as a percentage rate of
3		return applied to rate base), and income taxes—are determined and then summed to
4		calculate revenue requirements. These revenue requirements are then divided by
5		representative billing determinants to calculate unit rates that are included in a utility's
6		tariff.
7		
8	Q.	HOW ARE REPRESENTATIVE LEVELS OF THE COMPONENTS OF A
9		UTILITY'S COST OF PROVIDING SERVICE USUALLY MEASURED?
10	A.	In most jurisdictions, including Texas, the determination of a utility's revenue
11		requirements begins with a historical period, which serves as a "test year". Actual
12		financial and customer billing data from a utility's books and records during the test year
13		provide the foundation for the rates.
14		
15	Q.	HAVE YOU DEVELOPED THE REQUESTED RATES FOR THE WHITE
16		BLUFF AND THE CLIFFS SYSTEMS IN THIS MANNER?
17	A.	Yes. The requested water and sewer rates are based on operating expenses, invested
18		capital, capital costs, and billing determinants recorded on The Cliffs' and White Bluff's
19		books and records for calendar year 2015.
20		
21	Q.	HAVE YOU PREPARED ANY EXHIBITS IN SUPPORT OF YOUR
22		TESTIMONY?

- 1 A. Yes. The Rate Filing Packages for The Cliffs (Exhibit DDU-1) and White Bluff (DDU-
- 2 2) were prepared by me or under my direct supervision and control. Exhibits DDU-6A,
- DDU-6B, DDU-6C, DDU-6D, DDU-6E, DDU-6F and DDU-6G are attached to this
- 4 testimony and were also prepared by me or under my direct supervision and control.

6 Q. DO YOU SPONSOR OR CO-SPONSOR ANY SCHEDULES IN THE

7 **COMPANY'S APPLICATION?**

- 8 A. Yes, I do. I sponsor all of the schedules in the Company's Rate Filing Package (Exhibits
- 9 DDU-1 and DDU-2) as well as the work papers and other supporting documentation used
- to prepare those schedules.

11

12 III. SUMMARY OF REQUIRED REVENUE REQUIREMENT VERSUS THE REQUESTED REVENUE REQUIREMENT

14 15

Q. WHAT IS THE APPROPRIATE REVENUE REQUIREMENTS FOR DDU?

16 A. The required revenue requirements and resulting revenue increases are shown below:

TABLE 1 - SUMMARY OF REQUIRED REVENUE REQUIREMENT								
	WB Water	WB Sewer	TC Water	TC Sewer				
Required Revenues	\$ 704,733	\$597,999	\$ 453,576	\$327,424				
Revenues Under Present Rates	\$ 481,754	\$417,117	\$ 371,260	\$217,528				
Increase Required	\$ 222,979	\$180,882	\$ 82,317	\$109,895				
Percentage Increase	46%	43%	22%	51%				

18

19

17

Q. ARE THESE THE REVENUE REQUIREMENTS THAT DDU IS REQUESTING

20 IN THIS DOCKET?

1 A. No.

2

- 3 Q. CAN YOU PLEASE SUMMARIZE THE REVENUE REQUIREMENT DDU IS
- 4 REQUESTING BE APPROVED BY THE COMMISSION.
- 5 A. Table 2 below presents the summary of requested revenue requirements.

TABLE 2 - SUMMARY OF REQUESTED REVENUE REQUIREMENT								
	WB Water	WB Sewer	TC Water	TC Sewer				
Requested Revenues	\$573,531	\$576,642	\$ 424,391	\$316,104				
Revenues Under Present Rates	\$481,754	\$417,117	\$ 371,260	\$217,528				
Increase Requested	\$ 91,777	\$159,525	\$ 53,131	\$ 98,576				
Percentage Increase Requested	19%	38%	14%	45%				

6 7

- 8 Q. WHY ARE THE REQUESTED REVENUE REQUIREMENTS LOWER THAN
- 9 THE ALLOWABLE REVENUE REQUIREMENTS?
- 10 A. DDU management has elected to treat certain assets as though they were contributed by
- "a developer" and not by DDU. Although I disagree with this approach to ratemaking
- since the requested revenues will not recover the cost to provide service, I have
- nonetheless adjusted the rate base to reflect the asset reduction elected by DDU
- 14 management.

15

- 16 Q. WHAT IS THE EFFECT OF DDU MANAGEMENT'S EXCLUSION OF THIS
- 17 PORTION OF USED-AND USEFUL ASSETS?
- 18 A. The effect of this adjustment is shown below in Table 3.

SOAH DOCKET NO. 473-17-0019

TABLE 3 - EFFECT OF ASSET EXCLUSION ON REVENUE REQUIREMENT INCREASES								
WB Water WB Sewer TC Water TC Sewer								
Required Increase	•	\$180,882	•	\$109,895				
Requested Increase	\$ 91,777	\$159,525	\$ 53,131	\$ 98,576				
Reduction in Requirement	\$(131,202)	\$ (21,357)	\$ (29,186)	\$ (11,319)				
Percentage Reduction	-59%	-12%	-35%	-10%				

IV. APPLICATION PROCESS

3 4 5

6

7

8

9

10

11

12

13

A.

Q. HOW DID YOU GO ABOUT OBTAINING THE DATA USED AS THE BASIS

FOR THIS RATE APPLICATION?

I requested that The Cliffs and White Bluff provide me with their calendar year 2015 statements of income, detailed trial balances, payroll records, audited financial statements, and other financial data. These documents reflect the revenues and expenses of The Cliffs and White Bluff systems for the test year. I also obtained monthly billing records for each utility to determine billing units with which to develop rates. Dr. Victoria Harkins, witness for DDU, provided me the results of her asset study which identified all utility assets used-and-useful to White Bluff's and The Cliffs' ratepayers.

14

15

Q. WHAT WAS YOUR NEXT STEP?

16 A. Having obtained test year financial and billing information from the books and records of
17 The Cliffs and White Bluff, I next obtained the Instructions for the Rate/Tariff Change
18 Application for Class B Investor-owned Utilities – Water and/or Water and sewer
19 ("Instructions") and the Rate Filing Package from the Commission's website.

7

20

SOAH DOCKET NO. 473-17-0019 PUC DOCKET NO. 46245

Q. HOW DOES DDU KEEP TRACK OF THE COSTS INCURRED TO OPERATE

2 AND MANAGE THE CLIFFS AND WHITE BLUFF SYSTEMS?

A. Almost all of the costs relating exclusively to The Cliffs or White Bluff are directly assigned to the applicable entity. A few common costs are pooled and allocated among entities, including The Cliffs and White Bluff, through a central cost allocation. A detailed description of the process by which common costs are assigned to White Bluffs and The Cliffs is discussed in DDU witness Tim Grout's testimony.

V. RATE BASE

O. WHAT IS RATE BASE?

Rate base is also referred to as invested capital and is the amount of investment on which a utility is allowed the opportunity to earn a fair rate of return. The rate of return is applied to the rate base. Rate base normally consists of the net investment in assets used to provide service, less adjustments for non-investor supplied capital. The largest component of rate base is net plant in service, which is the original cost of property, plant, and equipment at the time it was dedicated to public use less accumulated depreciation. Also included in rate base is a cash working capital allowance, with any non-investor supplied capital serving to reduce rate base. Components included in the Commission's rules for determining the rate base are as follows (condensed from TAC 16 § 24.31(c)(2)):

(A) Original cost, less accumulated depreciation, of utility plant, property, and equipment used by and useful to the utility in providing service. For any utility plant which has no historical records for verification purposes, the original cost of plant and equipment allowed in the cost of service is usually estimated by trending studies or

8

SOAH DOCKET NO. 473-17-0019 PUC DOCKET NO. 46245

1	other means. Original cost is the actual money cost, or the actual money value of any
2 3	consideration paid other than money, of the property at the time it was dedicated to
	public use, whether by the utility that is the present owner or by a predecessor. Asset
4 5	may be booked in itemized or group accounting. Accumulated depreciation is the
6	accumulation of recognized allocations of original cost, representing recovery o
7	initial investment, over the estimated useful life or remaining life of the asset Utility property funded by explicit customer agreements or custome
8	Utility property funded by explicit customer agreements or custome contributions in aid of construction such as surcharges may not be included in original
9	cost or invested capital; and
10	(B) A working capital allowance to be composed of, but not limited to the
11	following:
12	(iii) a reasonable allowance for cash working capital. The following shall
13 14	apply in determining the amount to be included in invested capital for cash working capital:
15	(I) Cash working capital for water and sewer utilities shall in no
16	event be greater than one-eighth of total annual operations and
17	maintenance expense, excluding amounts charged to operations and
18	maintenance expense for materials, supplies, fuel, and prepayments.
19	(II) For Class C utilities, one-eighth of operations and maintenance
20	expense excluding amounts charged to operations and maintenance
21	expense for materials, supplies, expenses recovered through a pass
22	through provision or through charges other than base rate and gallonage
23	charges, prepayments will be considered a reasonable allowance for
24	cash working capital.
25	(III) For Class B utilities, one-twelfth of operations and maintenance
26	expense excluding amounts charged to operations and maintenance
27	expense for materials, supplies, expenses recovered through a pass
28	through provision or charges other than base rate and gallonage
29	charges, and prepayments will be considered a reasonable allowance for
30	cash working capital.
31	Unless otherwise determined by the commission, for good cause shown, the following
32	items will be deducted from the overall rate base in the consideration of applications filed
33	pursuant to TWC §13.187 or §13.1871:
34	(D) C ontributions in aid of construction; and
35	(E) Other sources of cost-free capital, as determined by the Commission.

2 Q. WHAT WORKING CAPITAL ITEMS ARE INCLUDED IN THE RATE BASE

3 OF THE CLIFFS AND WHITE BLUFF SYSTEMS?

A. A cash working capital allowance, which accounts for the working capital required because of the delay between the receipt of revenues and when expenses are paid. Since

The Cliffs is a Class C utility, cash working capital is one-eighth of adjusted O&M and

A&G expenses from Schedule I-1. White Bluff is a Class B utility; therefore, its cash working capital is one-twelfth of its adjusted O&M and A&G expenses from Schedule I
1.

10

11 Q. WHAT IS THE APPROPRIATE LEVEL OF INVESTED CAPITAL PRESENTED

12 IN THE APPLICATIONS?

13 A. The appropriate level of investor-supplied capital is summarized in Table 4 below:

TABLE 4 - SUMMARY OF REQUIRED RATE BASE									
	WB Water WB Sewer TC Water To								
Net Book Value of Assets	\$ 2,188,228	\$1,642,255	\$ 785,987	\$574,728					
Working Capital Allowance	\$ 24,568	\$ 23,152	\$ 35,769	\$ 28,823					
Less: Developer Contributions	\$ -	\$ -	\$ -	\$ -					
Total Required Rate Base	\$ 2,212,796	\$1,665,406	\$ 821,756	\$603,550					

14 15

16 Q. IS THIS THE LEVEL OF RATE BASE REQUESTED IN THE APPLICATION?

17 A. No. Although under generally accepted ratemaking principles and the rules and
18 precedents of this Commission, the Company could request this full amount of used-and19 useful rate in the applications, the Company chose to exclude 80% of the cost of some the

10

SOAH DOCKET NO. 473-17-0019 PUC DOCKET NO. 46245 JOYCE—DIRECT DOUBLE DIAMOND UTILITY CO.

EXHIBIT DDU-6

- 1 utility assets. To determine the recommended level of these contributions by the parent
- company, DDU witness Mr. Randy Gracy identified those assets subject to the 80% rate
- 3 base from the asset listing produced by Dr. Harkins. These listings are presented as
- 4 Exhibits DDU-6C and DDU-6D for White Bluff and The Cliffs, respectively.

6 Q. WHAT IS THE LEVEL OF RATE BASE REQUESTED IN THE

7 **APPLICATIONS?**

8 A. The requested rate base amounts are shown on Table 5 below:

TABLE 5 - SUMMARY OF REQUESTED RATE BASE								
WB Water WB Sewer TC Water TC Sev								
Net Book Value of Assets	\$ 2,188,228	\$1,642,255	\$ 785,987	\$574,728				
Working Capital Allowance	\$ 24,568	\$ 23,152	\$ 35,769	\$ 28,823				
Less: Developer Contributions	\$(1,186,227)	\$ (137,457)	\$ (248,421)	\$ (71,898)				
Total Required Rate Base	\$ 1,026,569	\$1,527,949	\$ 573,335	\$531,652				

9 10

11 Q. DID DR. HARKINS ALSO DEVELOP THE RECOMMENDED DEPRECIATION

12 RATES?

13 A. Yes. I applied her depreciation rates to the original cost assets, resulting in the depreciation expenses shown on Table 6 below:

TABLE 6 - SUMMARY OF DEPRECIATION EXPENSE									
	WB Water WB Sewer TC Water								
Annual Depreciation Expense	\$	110,077	\$	84,700	\$	78,443	\$ 29,263		

1		VI. <u>RATE OF RETURN</u>
2	Q.	WHAT IS THE PURPOSE OF A RETURN ON INVESTMENT IN SETTING A
3		UTILITY'S RATES?
4	A.	Return on investment compensates investors for the use of their capital to finance the
5		plant and equipment necessary in providing service. Capital, like any other resource, has
6		a cost associated with its usage. By identifying this cost and including a corresponding
7		return component in revenue requirements, customers pay a fair cost on the capital
8		employed in serving them and investors are fairly compensated for the use of their
9		money.
10		
11	Q.	WHAT RATE OF RETURN IS DDU REQUESTING IN THIS APPLICATION?
12	A.	As illustrated on Schedule III-1 of the applications, DDU is requesting a rate of return of
13		8.42%. This rate of return is based on Double Diamond Delaware's ("DDD") capital
14		structure of 55.84% debt and 44.16% equity, with a return on equity ("ROE") of 11.49%
15		and a cost of debt of 6.00%.
16		
17		A. <u>Capital Structure</u>
18	Q.	CAN YOU EXPLAIN WHY DDU IS REQUESTING TO USE ITS PARENT
19		COMPANY CAPITAL STRUCTURE IN CALCULATING RATE OF RETURN?
20	A.	DDU is a wholly-owned subsidiary of DDD and currently does not obtain capital from
21		the financial markets. DDU depends completely on its parent company for its capital

financing needs. As such, DDU is requesting to utilize the capital structure of its parent company in this proceeding.

3

- 4 Q. HOW DID YOU DEVELOP THE CAPITAL STRUCTURE USED IN THE
- 5 APPLICATIONS?
- 6 A. I utilized DDD's capital structure from its 2015 audited financial statements. DDD's
 7 capital structure at December 31, 2015 is summarized below in Table 7 and excludes
- 8 short-term debt consistent with the Commission's Instructions for Rate/Tariff Change
- 9 Applications:

TABLE 7 - DOUBLE DIAMOND DELAWARE'S CAPITAL STRUCTURE							
Debt Component							
Notes Payable	\$ 166,925,768						
Less: NP due in 2016	(22,059,065)						
Debt Subtotal	\$ 144,866,703 55.84%						
Equity Component							
Total Shareholders' Equity	\$ 114,587,336						
Equity Subtotal	\$ 114,587,336 44.16%						
Total Capitalization	\$ 259,454,039 100.00%						

- 12 Q. IS THERE INDUSTRY PRECEDENT ON THE USE OF THE PARENT
- 13 COMPANY CAPITAL STRUCTURE IN DETERMINING RATE OF RETURN?
- 14 A. Yes. The American Water Works Association M1 Manual, at Page 48, states, "If the water utility is a subsidiary of another company (holding company), the parent

1	company's capital structure may be deemed to provide the appropriate weighting of the
2	costs of capital."1

4

B. Cost of Debt

- 5 Q. YOU PREVIOUSLY TESTIFIED THAT 6.00% WAS USED AS THE COST OF
- 6 DEBT IN THE APPLICATION. HOW WAS THIS AMOUNT DETERMINED?
- 7 A. The 6.00% cost of debt contained within the applications is based on the portion of
- 8 DDD's debt that is collateralized with utility assets based on a 2013 loan from First
- 9 Financial Bank.

10

11

C. <u>Cost of Equity</u>

- 12 Q. YOU PREVIOUSLY TESTIFIED THAT 11.49% WAS USED AS THE COST OF
- 13 EQUITY IN PREPARING THE APPLICATION. HOW WAS THIS
- 14 **DEVELOPED?**
- 15 A. The 11.49% cost of equity was calculated by adding the BAA Bond Yield Average of
- 16 5.49% and the risk premium of 6.00%. The BAA Bond Yield Average was provided by
- the Commission at January 2016. The risk premium is based on the instructions in the
- 18 Commission's Instructions for Rate/Tariff Change Applications. The instructions also
- state that this method of determining the ROE will be presumed reasonable if no other
- party provides opposing testimony. Given the cost associated with developing and

14

SOAH DOCKET NO. 473-17-0019 PUC DOCKET NO. 46245

¹ American Water Works Association, Manual of Water Supply Practices, Principles of Water Rates, Fees, and Charges, "AWWA MI", Sixth Edition, p.48

1		defending cost of equity testimony and the small number of customers over which to
2		spread that cost, it would be illogical and wasteful for any of the other parties to force
3		DDU to develop ROE testimony by contesting the requested ROE when the requested
4		ROE is exactly calculated on the instructions proscribed by this Commission.
5		
6		VII. <u>INCOME TAXES</u>
7	Q.	WHAT INCOME TAXES ARE ASSOCIATED WITH THIS RETURN ON
8		INVESTMENT?
9	A.	The federal income tax ("FIT") calculation begins on line 1 of Schedule V with the return
10		on investment. Synchronized interest expense is deducted on line 2 and represents the
11		product of rate base multiplied by the cost of debt. This results in the after-tax return on
12		equity. This after-tax return was then multiplied by a gross-up factor to develop the pre-
13		tax return. This produces an income tax expense associated with the return on
14		investment included in revenue requirements for The Cliffs and White Bluff systems
15		as shown on Schedule V of the RFP.
16		
17		VIII. OPERATIONS AND MAINTENANCE EXPENSES
18	Q.	HOW WAS THE REQUESTED LEVEL OF O&M EXPENSE DETERMINED
19		FOR THE APPLICATION?
20	A.	The requested level of O&M expense included in the applications is from the DDU
21		statements of operations and detailed trial balance for the test year. The 2015 statements
22		of operations for The Cliffs and White Bluff are shown on Exhibits DDU-4B and DDU-

1		4C, respectively. The first step in determining the requested level of O&M expenses was
2		to assign each DDU account to a classification used by the PUCT in the rate application.
3		Exhibit DDU-6E shows the assignment of each account maintained by DDU during the
4		test year to the appropriate PUCT category of expense. The next step was to directly
5		assign or allocate expenses to either the water or the sewer service function of DDU.
6		
7	Q.	PLEASE DISCUSS HOW EXPENSES WERE ASSIGNED OR ALLOCATED TO
8		THE WATER AND SEWER SERVICE FUNCTIONS AS PART OF THE
9		APPLICATION.
10	A.	To allocate the O&M expenses to the water and sewer systems, I obtained DDU's
11		detailed trial balance which lists each expense (see Exhibits DDU-4D and DDU-4E).
12		Using this information, I directly assigned expenses to the water or sewer service
13		functions where sufficient detail existed. The type of assignment for each account is
14		shown in Exhibit DDU-6F. For accounts where the detail was insufficient to assign costs
15		between water and sewer, I developed and applied allocation factors based on the number
16		of water and sewer customers.
17		
18	Q.	CAN YOU PLEASE SUMMARIZE THE TOTAL LEVEL OF O&M EXPENSES
19		INCLUDED IN DDU'S REVENUE REQUIREMENT?
20	A.	The O&M summary is in Table 16 below. Additional breakdowns of the amounts in
21		each account for each system are in the trial balances contained in my workpapers.
22		

TABLE 8 - SUM		01 000						
	W	B Water	N	B Sewer	T	C Water	T	C Sewer
O&M Expenses								
Power Expense	\$	12,020	\$	85,323	\$	18,275	\$	3,292

Miscellaneous A&G		26,424		55,685		22,432		18,681
Subtotal A&G	\$	53,698	\$	125,819	\$	64,320	\$	58,027
Total Operating Expenses	\$	277,819	\$	572,632	\$	286,150	\$2	230,581

3 Q. ARE ANY OF THE ABOVE O&M OR A&G EXPENSES RELATED TO

4 **AFFILIATES?**

Yes. Some of the O&M and A&G expenses recorded on the books of The Cliffs and
White Bluff are directly or indirectly charged to them from affiliated, shared services
entities. DDU witness Tim Grout addresses these charges in his testimony.

8

9

Q. DO THE O&M AND A&G EXPENSES SHOWN ON TABLE 8 INCLUDE ANY

10 IMPERMISSIBLE EXPENSES?

11 A. No. I inquired as to whether any impermissible expenditures per 16 TAC Section 24.31(b)(2), such as legislative advocacy, political contributions, or funds supporting

17

SOAH DOCKET NO. 473-17-0019 PUC DOCKET NO. 46245

1		social, recreational, fraternal, or religious clubs or organizations, are included in test year
2		O&M or A&G expenses. I was advised that there are none, and my review of the DDU
3		records did not reveal any such expenses.
4		
5		IX. TAXES OTHER THAN INCOME
6	Q.	WHAT TAXES OTHER THAN INCOME DID THE CLIFFS AND WHITE
7		BLUFF INCUR DURING THE TEST YEAR?
8	A.	As shown in the "Per Books" accounts of Schedule IV(a), the only taxes other than
9		income recorded for the Cliffs and White Bluff systems in 2015 were for property taxes,
10		payroll taxes, and TCEQ permit fees.
11		
12	Q.	WERE ANY ADJUSTMENTS MADE TO TEST YEAR TAXES OTHER THAN
13		INCOME?
14	A.	Yes. Property taxes were adjusted to reflect plant additions and retirements that
15		occurred after the tax appraisal date. Payroll taxes were synchronized to the test year
16		adjusted payroll after known and measurable changes.
17		
18		X. <u>OTHER REVENUES</u>
19	Q.	PLEASE DESCRIBE THE MISCELLANEOUS REVENUES INCLUDED
20		WITHIN THE APPLICATIONS.
21	A.	As detailed in RFP Schedule II-3, miscellaneous revenues included in the applications
22		consist of tap fees (net of expenses), late fees, reconnect fees, and other revenues.
	SOAF	I DOCKET NO. 473-17-0019 JOYCE—DIRECT

1		
2		XI. <u>RATES</u>
3	Q.	WHAT ARE THE TOTAL REQUESTED REVENUE REQUIREMENTS FOR
4		THE CLIFFS AND WHITE BLUFF SYSTEMS?
5	A.	As summarized on RFP Schedule I-1, summing the adjusted O&M and A&G expenses,
6		taxes other than income, depreciation expenses, return on investment, and federal income
7		taxes developed above produces revenue requirements for water and sewer services on
8		The Cliffs and White Bluff systems.
9		
10	Q.	ARE THESE THE REVENUE REQUIREMENTS USED TO CALCULATE
11		RATES?
12	A.	No. A portion of the total revenue requirements of the Cliffs and White Bluff systems
13		will be collected through various miscellaneous revenues as described previously and to
14		which no changes are being proposed. As shown in RFP Schedule I-1, these
15		miscellaneous revenues are subtracted from total revenue requirements to result in the net
16		revenues to be recovered through water and sewer service rates.
17		
18		<u>Water</u>
19	Q.	HOW DID YOU DETERMINE THE NUMBER OF CUSTOMERS USED FOR

WATER RATE DESIGN?

1 A. The number of customers utilized for rate design is equivalent to the customers indicated
2 in the billing records of DDU as of December 2015 (Exhibit DDU-4H). Table 9 below
3 provides a summary of the number of water customers, by meter size.

4

TABLE 9 - SUMMARY OF WATER CUSTOMERS					
Meter Size	WB Water	TC Water			
5/8" or 3/4"	606	258			
1"	18	13			
1 1/2"	6	1			
2"	10	15			
Total	640	287			

5

8

9

10

11

12

13

6 Q. HOW DID YOU DETERMINE THE WATER CONSUMPTION VOLUMES 7 UTILIZED IN THE APPLICATIONS FOR RATE DESIGN?

A. Billed consumption for the test year provided the foundation for the development of the proposed water volume charges. As required by Schedule VI-1, line 17, column C of the Commission's application, I utilized actual test year billed volumes for water rate design. The Company's billing data (Exhibit DDU-4H) provided sufficient information to separate usage into usage blocks. Table 10 summarizes the required billing determinants used for rate design purposes.

TABLE 10 - SUMMARY OF REQUIRED WATER BILLING DETERMINATES (GALLONS)				
Rate Block	WB Water	TC Water		
0 - 3,000	15,658	5,260		
3,001 - 10,000	15,417	6,142		
10,001 - 15,000	6,370	2,655		
15,001 - 20,000	4,489	1,958		
20,001 +	14,834	8,708		
Total	56,769	24,724		

2 Q. IS DDU REQUESTING ANY CHANGES TO ITS CURRENT WATER RATE

- 3 **DESIGN?**
- 4 A. No. DDU is requesting to keep its two-part rate design consisting of (1) a meter charge,
- 5 which escalates based on the size of the meter, and (2) a five-block inclining volumetric
- 6 charge. The volumetric rate blocks are as follows:
- 7 0 3,000 gallons
- 8 3,001 − 10,000 gallons
- 9 10,001 15,000 gallons
- 15,001 20,000 gallons
- 20,001 + gallons

- 13 Q. PLEASE SUMMARIZE THE WATER RATES REQUESTED IN THIS
- 14 **PROCEEDING.**
- 15 A. The requested water rates are shown in Table 11 below:

TABLE 11 - REQUESTED WATER RATES					
	WI	3 Water	TO	Water	
Monthly Meter Charge (size)					
5/8" or 3/4"	\$	39.00	\$	40.00	
1"		97.50		110.00	
1 ½"		195.00		230.00	
2"		312.00		395.00	
Volume Charge (per 1000 gals)					
0 - 3,000	\$	2.10	\$	3.50	
3,001 - 10,000		2.95		4.00	
10,001 - 15,000		3.90		6.50	
15,001 - 20,000		5.25		10.50	
20,001 +		5.76		14.45	

3

<u>Sewer</u>

5 Q. HOW DID YOU DETERMINE THE NUMBER OF CUSTOMERS USED FOR

6 **SEWER RATE DESIGN?**

7 A. The number of customers utilized for rate design is equivalent to the customers indicated in the billing records of DDU as of December 2015 (Exhibit DDU-4H). Table 12 below provides a summary of the number of sewer customers, by water meter size.

TABLE 12 - SUMMARY OF SEWER CUSTOMERS					
Meter Size	WB Sewer	TC Sewer			
5/8" or 3/4"	540	220			
1"	11	4			
1 1/2"	5	1			
2"	11	14			
Total	567	239			

3

4

5

7

8

9

10

11

12

13

HOW DID YOU DETERMINE THE SEWER BILLING VOLUMES UTILIZED 2 Q.

IN THE APPLICATIONS FOR RATE DESIGN?

A. As required in the Commission's application on Schedule VI-1, line 17, column C, I utilized actual test year billed volumes for sewer rate design. Billed sewer volumes are based on the winter water consumption of each customer. The winter average consumption is determined by averaging each customer's actual metered water usage during the months of December, January, and February. This winter average is recalculated each spring based on the customer's actual metered water use for the most recent winter months. Consistent with the current billing structure, the requested sewer rates include 3,000 of flow within the base sewer bill to minimize the impact of the rate increase on low-income users. The sewer billing determinants were developed from the Company's test year billing records (Exhibit DDU-4H) and are shown below in Table 13:

TABLE 13 - SUMMARY OF REQUIRED SEWER BILLING DETERMINATES (GALLONS)					
Rate Block	WB Sewer	TC Sewer			
0 - 3,000	10,106	4,527			
3,001 +	9,717	5,045			
Total	19,823	9,571			

14

17

IS DDU REQUESTING AND MODIFICATION TO ITS CURRENT SEWER 15 Q.

RATE DESIGN? 16

- A. No. DDU's requested rates maintain the current two-part sewer rate design consisting of
- 18 (1) a base charge, which escalates based on the size of the customer's water meter, and
- (2) a volumetric charge applied to the winter average water consumption of each 19

23

SOAH DOCKET NO. 473-17-0019 PUC DOCKET NO. 46245

JOYCE-DIRECT DOUBLE DIAMOND UTILITY CO.

customer, with the winter average being based on water consumption during the winter months of December, January, and February. DDU's proposed sewer rates keep the 3,000-gallon monthly amount that is currently included in the wastewater base charge.

4

7

5 Q. PLEASE SUMMARIZE THE SEWER RATES REQUESTED IN THIS 6 PROCEEDING.

A. The requested sewer rates are shown in Table 14 below:

TABLE 14 - REQUESTED SEWER RATES						
	W	B Sewer	TC	Sewer		
Monthly Meter Charge (siz	<u>æ)</u>					
5/8" or 3/4"	\$	56.65	\$	72.00		
1"	\$	144.00	\$	126.00		
1 ½"	\$	295.00	\$	216.00		
2"	\$	465.00	\$	324.00		
3"			\$	575.00		
Volume Charge (per 1000 ga	als)					
0 - 3,000	\$	-	\$	-		
3,001 - 10,000		11.00		12.00		

8

9

XII. RATE CASE EXPENSES

10 Q. HAS DDU INCLUDED ANY RATE CASE EXPENSES IN THIS FILING?

11 A. Yes. DDU has provided an estimate of incremental rate case expenses in Exhibit DDU12 6G for this proceeding. DDU is proposing, consistent with past Commission practice,
13 that a separate proceeding be initiated after the completion of this rate case, in which the
14 reasonableness of and recovery mechanism for DDU's incremental rate case expenses for
15 this case be reviewed.

24

16

SOAH DOCKET NO. 473-17-0019 PUC DOCKET NO. 46245 JOYCE—DIRECT DOUBLE DIAMOND UTILITY CO.

EXHIBIT DDU-6

1	Q.	WHAT PROCESS DOES DDU PROPOSE FOR REVIEW AND RECOVERY OF
2		RATE CASE EXPENSES ASSOCIATED WITH THIS PROCEEDING?
3	A.	DDU proposes that the review of the reasonableness of the rate case expenses incurred in
4		connection with this proceeding and the determination of the mechanism for their
5		recovery be severed to a separate proceeding to be convened at the conclusion of this
6		case. Rate case expenses incurred in this proceeding by the Company should be updated
7		at that time to allow review of actual rate case expenses already incurred. This approach
8		is consistent with procedures followed in recent rate cases.
9		
10	Q.	HAS DDU PREPARED AN ESTIMATE OF THE COST OF PREPARING AND
11		LITIGATING THIS RATE CASE FILING?
12	A.	Yes. I estimate that the cost for processing this case is approximately \$285,000. Exhibit
13		DDU-6G is a schedule detailing the estimated expenses for preparing and litigating this
14		proceeding. Only costs of outside consultants, legal counsel and incremental expenses
15		such as travel are included in the estimate. No separate payroll costs are being requested
16		for DDU personnel who have prepared and support the filing.
17		
18	Q.	PLEASE DESCRIBE THE TYPES OF RATE CASE EXPENSES DDU IS
19		SEEKING TO RECOVER RELATED TO THIS APPLICATION.
20	A.	DDU is seeking recovery of three categories of costs: outside consultants, outside legal
21		counsel, and miscellaneous expenses. Internal employee time associated with this case is

25

SOAH DOCKET NO. 473-17-0019 PUC DOCKET NO. 46245

excluded from the rate case expenses.

22

JOYCE—DIRECT DOUBLE DIAMOND UTILITY CO.

EXHIBIT DDU-6

2	Q.	PLEASE DESCRIBE THE OUTSIDE CONSULTING EXPENSES.
3	A.	Outside consultants were employed to develop and/or support various aspects of this
4		filing including preparation of the application, development of testimony, and responding
5		to discovery:
6 7 8 9 10 11 12		 My firm, Expergy, compiled the data and developed the Applications for filing. Dr. Victoria Harkins, Ph.D., P.E., D.WRE. of Harkins Engineering, Inc. conducted an asset evaluation and trending study to support the values and depreciable lives of the utility plant included in rate base.
13	Q.	PLEASE DESCRIBE THE EXPENSES FOR OUTSIDE LEGAL COUNSEL.
14	A.	DDU has employed outside legal counsel from the Carlton Law Firm PLLC as regulatory
15		counsel for DDU. This outside firm has worked with DDU previously and has extensive
16		experience in Texas regulatory matters. Fees are based upon the scope of the
17		engagement and the customary fees for regulatory attorneys.
18		
19	Q.	PLEASE DESCRIBE THE MISCELLANEOUS EXPENSES.
20	A.	Miscellaneous expenses incurred by DDU include expenses for travel, lodging and other
21		miscellaneous items. Travel and lodging expenses include expenses of employees
22		incurred in traveling to Austin to participate in the hearings. Miscellaneous expenses
23		may include other expenses of preparing and litigating the filing.
24		
25		XIII. <u>CONCLUSION</u>

Electric and Gas Utility Consulting

 Mr. Joyce has directed engagements associated with the following electric and gas utilities:

American Electric Power - Appalachian Power Company

American Electric Power - Public Service Company of Oklahoma

American Electric Power - Texas Central Company

American Electric Power - Texas North Company

American Electric Power – Wheeling Power Company

Arkansas-Oklahoma Gas Company

Atlanta Gas Light

Atmos Energy

CenterPoint Energy

City of Charlottesville Gas Utility

Colorado Public Service Company

CoServ

Denton County Electric Cooperative

Detroit Edison

Dominion Virginia Electric Power Company

El Paso Electric Company

Elizabethtown Gas

General Public Utilities

Houston Lighting & Power Company

Illinois Power Company

Kansas City Power & Light Company

Lone Star Gas Company

MCN Corporation

Mt. Carmel Public Utilities

New Century Energies

NewPower

Northern States Power

Oncor Electric Delivery Company

Pedernales Electric Cooperative

Puget Sound Power & Light

San Diego Gas & Electric

Southern California Gas

Southern Union Gas Company

Southwest Power Pool
Southwest Public Service Company
Southwestern Bell Telephone Company
Texas-New Mexico Power Company
Tucson Electric Power
TXU Electric Delivery
TXU Energy Retail
TXU Gas Distribution
TXU Lone Star Pipeline
Vectren Energy Delivery of Ohio
Washington Natural Gas
Western Resources
Wisconsin Electric Company

Selected Engagement Summaries:

- Directed the valuation of Mt. Carmel Public Utilities, a small investor-owned electric and gas company. The scope of the engagement included ratio analyses for comparable electric utilities, the evaluation of financial performances, analysis of strategic characteristics affecting value and regulatory environment analysis.
- Directed the valuation of CoServ's electric utility business primarily relying on a discounted cash flow analysis, and supported by per-meter analyses of market comparables. A range of overall values was developed for various growth scenarios.
- Conducted settlement negotiations on behalf of Lakeside Utilities, Inc. for the water and wastewater rate increase request before the TNRCC. Issues included valuation of plant-in-service, return, federal income tax methodology and working capital allowance.
- Directed the City of Pflugerville's valuation of the Windermere Utility
 Company's net assets relating to a potential purchase of the assets. Extensive
 research concentrated on the utility's contributed capital and corresponding
 obligations to provide current and future water service.
- Supervised a cost segregation study on behalf of Titus County Fresh Water Supply District No. 1 relating to the planned purchase of water rights in a reservoir owned and operated by Franklin County Water District. The study identified the reservoir expenses unrelated to water supply for exclusion from the cost sharing mechanism contemplated in the proposed agreement.
- Directed the litigation efforts for the City of Waco, Texas pertaining to a
 Texas Natural Resources Conservation Commission appeal of the water rates
 charged by Waco to a wholesale customer. Prepared expert testimony,
 directed cross-examination of witnesses, and participated in extensive
 negotiations and mediation
- Participated in litigation assistance for the proposed merger of Southwestern Public Service Company and Public Service Company of Colorado. Activities included development of rebuttal testimony and assistance with discovery requests before the Texas, Colorado and New Mexico regulatory commissions negotiations and mediation
- Filed expert testimony on the appropriate ratemaking treatment of \$89 million in Houston Lighting & Power Company restructuring costs. Participated in all

aspects of the case before the Public Utility Commission of Texas ("PUCOT"), including discovery; analyses of plant-in-service (post-test-year

- adjustments), labor costs and employee benefits; preparation of expert witness testimony; and assistance with settlement negotiations
- Filed expert testimony on Texas-New Mexico Power Company regulatory commission expenses before the PUCOT. Conducted prudence reviews of the construction of generating facilities at TNP One (Units 1 and 2). Directed the engagements, coordinating the efforts of in-house consultants, outside consultants, attorneys and client representatives.
- Directed settlement negotiations during the Denton County Electric Cooperative rate proceeding before the PUCOT. Managed the preparation of expert testimony encompassing financial integrity, kWh sales forecasts and treatment of G&T credits
- Directed the analysis of a potential merger of Washington Natural Gas Company with Puget Sound Power & Light. Activities included identification of available operational cost savings; financial modeling; projection of future combined financial operations; development of regulatory testimony; and litigation assistance on regulatory issues, deposition preparation and discovery questions for approval at the Washington Utilities and Transportation Commission
- Assisted Tucson Electric Power in quantifying "stranded costs" in preparation for a regulatory filing at the Arizona Public Service Commission. In connection with this filing, the company required extensive assistance with the management of the development of the stranded cost quantification and the development of the resultant effect on revenue requirements. Significant issues included the treatment of regulatory assets and the potential reclamation costs at the Four Corners Generating Facility
- Managed the development of a cash working capital analysis (lead/lag study) for TXU Electric Company. The project incorporated an in-depth review of company records to establish the revenue recovery/cost payment patterns reflected by the electric system operations and provided the material required for the potential preparation of rate filing exhibits and testimony consistent with the rate filing requirements adopted by the Public Utility Commission of
- Testified in the wastewater rate dispute between the City of Lewisville and the City of Highland Village before the Texas Natural Resource Conservation Commission ("TNRCC"). Conducted settlement negotiations and filed an affidavit on rate calculations in the subsequent TNRCC proceeding. Assisted legal counsel in the district court case involving the same dispute. Directed the preparation of expert testimony in the TNRCC case and assisted with discovery, cross-examination, closing arguments, exceptions to proposal for decision and presentation before commissioners at the final order meeting.
- Directed settlement negotiations between Culleoka Water Supply Corporation and the City of Princeton for the water rate dispute before the TNRCC. The central issue involved the premium charged by the city on water purchased from North Texas Municipal Utility District.
- Directed the filing of expert witness testimony on behalf of United Irrigation District of Hidalgo County relating to the cost of providing water transportation services to Sharyland WSC for dispute at the TNRCC. Issues included valuation of water rights and contractual requirements.
