To whom it may concern,

L&T water works is withdrawing from the STM case with Dal-High Water company under docket no. 46300 with the PUC.

L&T is no longer interested in the purchase of Dal-High Water due to the low rates currently in place, additional investment needed for the plant that was not apparent originally, and the turn-around time for raising rates being approximately a year. These three main concerns would result in losses for approximately a year so the investment is no longer under consideration by L&T.

Thank you for your time,

Curtis Logan-Owner and Operator
