Dear Sirs:

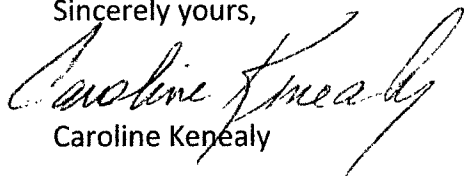

I am strongly against a rate increase for SWEPCO. Their rates are presently more than sufficient for their services now.

The EPA controls against the coal companies is being revoked, costs of providing electricity will decrease, and they can tighten their belt just like the consumer has been doing over and over.

I do not get pay raises in my salary, inflation is increasing, and my dollar does not stretch far enough as it is. I keep my thermostat at low temps in winter and high temps in the summer – and yes, if I could afford it I would get solar panels as this is becoming unsustainable for persons like myself.

Please do not allow an increase – this utility is a need, not a luxury.

Sincerely yours,

  
Caroline Kenealy
