<u>*</u> .*	INFORMATION ON UT	LITY SERVICE				
Tenants are billed f	or X Water X Wastewater	Sul	ometered <u>OR</u>	X Allocated ***		
Name of utility pro	viding water/wastewater City of Laredo Utiliti	€Ş	A REAL PLACE			
Date submetered or	allocated billing begins (or began) 08/01/2012) , , , , , , , , , , , , , , , , , , ,	Required			
METHOD USED T	O OFFSET CHARGES FOR COMMON AREAS	Check one lir	ne only.			
Not applicable, b	ecause Bills are based on the tenant's ac	tual submetered	l consumption			
	There are <u>neither</u> common areas	s <u>nor</u> an installed	l irrigation syst	em		
All common are	as and the irrigation system(s) are metered or s	ibmetered:				
We deduct the actu	al utility charges for water and wastewater to t	hese areas then	allocate the rer	naining charges among		
our tenants.						
	s an installed irrigation system that is <u>not</u> separ	•				
We deduct	percent (we deduct at least 25 percent) of	=	l charges for wa	ater and wastewater		
	allocate the remaining charges among our tena					
	s an installed irrigation system(s) that <u>is/are</u> sej					
We deduct the actual utility charges associated with the irrigation system(s), then deduct at least 5 percent of the utility's						
total charges for water and wastewater consumption, then allocate the remaining charges among our tenants.						
This property does <u>not</u> have an installed irrigation system:						
We deduct at least 5 percent of the retail public utility's total charges for water and wastewater consumption, and then						
allocate the remaining charges among our tenants.

METHOD USED TO ALLOCATE UTILITY CHARGES

Check the box or boxes that describe the allocation method used to bill tenants.

Cocupancy method: The number of occupants in the tenant's dwelling unit is divided by the total number of occupants in all dwelling units at the beginning of the month for which bills are being rendered.

Ratio occupancy method:	Number of Occupants	Number of Occupants for Billing Purposes
The number of occupants in the tenant's dwelling unit	1	1.0
is adjusted as shown in the table to the right. This	2	1.6
adjusted value is divided by the total of these values	3	2.2
for all dwelling units occupied at the beginning of the retail public utility's billing period.	>3	2.2 + 0.4 for each additional occupant

Estimated occupancy method:	Number of Bedrooms	Number of Occupants for Billing Purposes
The estimated occupancy for each unit is based on the	0 (Efficiency)	1
number of bedrooms as shown in the table to the	1	1.6
right. The estimated occupancy in the tenant's	2	2.8
dwelling unit is divided by the total estimated	3	4.0
occupancy in all dwelling units regardless of the actual number of occupants or occupied units.	>3	4.0 + 1.2 for each additional bedroom

Occupancy and size of rental unit 50° percent (**in which no more than 50%**) of the utility bill for water/wastewater consumption is allocated using the occupancy method checked above. The remainder is allocated according to either:

• the size of the tenant's dwelling unit divided by the total size of all dwelling units, **OR**

• the size of the space rented by the tenant of a manufactured home divided by the size of all rental spaces.

Submetered hot water:

The individually submetered hot water used in the tenant's dwelling unit is divided by all submetered hot water used in all dwelling units.

Submetered cold water is used to allocate charges for hot water provided through a central system:

The individually submetered cold water used in the tenant's dwelling unit is divided by all submetered cold water used in all dwelling units.

As outlined in the condominium contract. Describe:

Size of manufactured home rental space:

The size of the area rented by the tenant divided by the total area of all the size of rental spaces.

Size of the rented space in a multi-use facility:

The square footage of the space rented by the tenant divided by the total square footage of all rental spaces.
