PUBLIC UTILITY COMMISSION

FILING CLERK

June 21, 2017

Austin, Texas 78711

Public Utility Commission of Texas Filing Clerk 1701 N Congress

Re: Class B Rate/Tariff Change Application for Texas Water System Docket No. 47091 Response to Commission Staff's first request for information to Texas Water Systems, Inc. Question Nos. Staff 1-4e through Staff 1-8.

Staff 1-4 Reference Schedule III-2, page 31, of the application:

e. Please provide a sworn, written statement that no assets listed in the application were funded by developer or customer contributions in aid of construction or provide the appropriate amounts on Schedule III-8 and other appropriate schedules in the application.

Response). All customer and or developer contributions in aid have been accounted for on the revised depreciation schedule Appendix (disc)

Staff 1-5 Provide an unlocked excel spreadsheet of all depreciable assets:

Response: Appendix (disc)

Staff 1-6 Provide a copy of the utility's capitalization policy.

Response: The utility does not maintain a written capitalization policy. It is normal practice for the utility to follow the following protocol for the capitalization of assets:

- With respect to the utility's asset listing for rate making, any major end item is capitalized when acquired and deployed regardless of reason for installation (e.g. repair, expansion, compliance, or otherwise). General repair and maintenance are NOT capitalized unless the repair includes the installation of a major end item. Generally speaking, this includes items with a cost greater than \$1,000.00.
- With respect for the utility's asset listing for federal tax purposes, any major end item is capitalized when acquired and deployed regardless of reason for installation (e.g. repair, expansion, compliance, or otherwise). General repair and maintenance are NOT capitalized unless the repair includes the installation of a major end item. Generally speaking, this includes items with a cost greater than \$1,000.00.

Staff 1-7 Are all of the additions to depreciable plant since the 2010 rate case incorporated into the provided depreciation table?

Response: Yes

Staff 1-8 Please provide a reconciliation between the assets claimed and the accumulated depreciation in the 2010 rate case and this schedule

Response: appendix (disc)

Additional information provided not based directly upon a Commission question.

In developing responses to questions related to the utility's deprecation and fixed asset schedules, we determined that the originally submitted asset schedule (Schedule III-3 Utility Plant in Service) was incorrect. Included with this response is a corrected schedule. Please note that the corrected annual depreciation (Schedule III-3, Column E, transferred to Schedule I-1 Revenue Requirement, line no. 25) is approximately \$15,000 higher. Thus, our rate design should include amounts to cover this additional expense to reach break-even. However, at this time, we are choosing not to amend Schedule VI Rate Design.

This document is prepared under oath and the name of witness who can sponsor the answers is Belinda Tompkins, Office Administrator.

Original and three copies have been provided as requested
