DIRECT TESTIMONY OF JEFFREY EASTMAN

I. BACKGROUND AND QUALIFICATIONS

Q. PLEASE STATE YOUR NAME AND BUSINESS ADDRESS.

A. My name is Jeffrey Eastman. My business address is 26926 FM 2978, Magnolia, Texas, 77354.

Q. BY WHOM ARE YOU EMPLOYED AND IN WHAT CAPACITY?

A. I am the chief financial officer of Quadvest LP ("Quadvest").

Q. PLEASE DESCRIBE YOUR EDUCATIONAL AND PROFESSIONAL EXPERIENCE.

A. I have a Bachelor's degree in accounting from Sam Houston State University. I have over 15 years work experience in various accounting and finance roles with several different companies, ranging from Deloitte and Touché, an international CPA and consulting firm, to Quadvest, a regulated water and sewer utility. I have worked at Quadvest for over four years and have attended NARUC's utility rate school during this period of employment. A copy of my curriculum vitae is attached hereto as Exhibit A.

Q. WHAT IS YOUR AREA OF RESPONSIBILITY FOR QUADVEST?

A. I oversee and manage all accounting and financial matters related to Quadvest. In addition, I manage the development of Quadvest's regulatory filings related to customer rates, customer service issues and more specifically the current complaint in this proceeding.

Q. HAVE YOU PREVIOUSLY FILED TESTIMONY BEFORE THIS COMMISSION?

A. Yes, I filed testimony in Docket 44809 and 46439.

1

2

3

0

1

- 2

1 stickers attached to each smart meter shipped. The testing results indicated that all
2 of the Complainants' meters have flow results within AWWA standards (98.5% to
3 101.5% accuracy) and overall meter accuracy for Complainants was 99.9%.

- 4 • No bill adjustments were required as all of the meters tested were within the
5 AWWA standard (98.5% to 101.5% accuracy), except for Mr. Gardaphe's meter,
6 which was under reporting flow and therefore Quadvest elected not to back bill Mr.
7 Gardaphe for such water usage.
- 8 • Quadvest was charging its approved pass-through fee, as reflected both on the
9 customer billing statements and the Commission-approved pass-through tariff.
10 Quadvest made no adjustments to Complainants' bills because Quadvest was
11 charging the properly approved pass-through fee.

12 **Q. AS AN INITIAL MATTER, WHAT ARE THE COMPLAINANTS' ADDRESSES**
13 **FOR WHICH THEY RECEIVE WATER UTILITY SERVICE?**

14 A. This testimony will address the rates and actions taken by Quadvest LP related to the
15 Complainants at the below addresses:

- 16 • Ms. Acebo's address is 10614 Serenity Sound, Magnolia, Texas 77354. Ms.
17 Acebo receives water service from Quadvest L.P.
- 18 • Ms. Barrett's address is 11018 Lake Windcrest Blvd., Magnolia Texas 77354. Ms.
19 Barrett receives water service from Quadvest L.P.
- 20 • Richard Deming's address is 10507 Crystal Cove Dr., Magnolia, Texas 77354.
21 Mr. Deming receives water service from Quadvest L.P.
- 22 • Ms. Erato's address is 32643 Green Bend Court, Magnolia, Texas 77354. Ms.
23 Erato receives water service from Quadvest L.P.

- 1 • Paul Gardaphe’s address is 9335 Clubhouse Cir, Magnolia, Texas 77354. Mr.
2 Gardaphe receives water service from Quadvest L.P.
- 3 • Gladys Floyd’s address is 10118 Clubhouse Circle, Magnolia, Texas 77354. Ms.
4 Floyd receives water service from Quadvest L.P.
- 5 • Mr. Hansen’s address is 10314 Serenity Sound, Magnolia, Texas 77354. Mr.
6 Hansen receives water service from Quadvest L.P.
- 7 • Martin Leo’s address is 10411 Serenity Sound, Magnolia, Texas 77354. Mr. Leo
8 receives water service from Quadvest L.P.
- 9 • Ashley Sanders’ address is 12130 Clara Ln., Pinehurst, Texas 77362. Ms. Sanders
10 receives water service from Quadvest L.P.
- 11 • Allyn Watkin’s address is 40610 Ithica Ln., Magnolia, Texas 77354. Mr. Watkins
12 receives water service from Quadvest L.P.
- 13 • Jill Westbrook’s address is 9426 Deer Path Ln., Magnolia, Texas 77354. Ms.
14 Westbrook receives water service from Quadvest L.P.
- 15 • Fang Yiu’s address is 29827 Edgewater Dr., Magnolia, Texas 77354. Mr. Yiu
16 receives water service from Quadvest L.P.

17 **Q. PLEASE DESCRIBE COMPLAINANTS’ RESIDENCES.**

18 A. The majority (10 out of 12) of the Complainants live on acreage lots (1+ acre lots) noting
19 Quadvest tends to see higher water usage on acreage lots due to higher irrigation
20 requirements needed to properly maintain vegetation during summer months. In addition,
21 the majority (7 out of 12) of the Complainants have pools, which can also increase water
22 usage during summer months. The following resident descriptions were obtained directly
23 from Complainants’ RFI responses.

- 1 • Ms. Acebo has a 1 acre lot in the Lake Windcrest Subdivision in Magnolia, Texas.
2 The residence does not have a pool.
- 3 • Ms. Barrett has a 2.80 acre lot in the Lake Windcrest Subdivision in Magnolia,
4 Texas. The residence does not have a pool.
- 5 • Mr. Deming has a 1 acre lot in the Lake Windcrest Subdivision in Magnolia, Texas.
6 The residence has a pool.
- 7 • Ms. Erato has a 1.48 acre lot in the Lake Windcrest Subdivision in Magnolia, Texas.
8 The residence has a pool.
- 9 • Ms. Floyd has a 1.97 acre lot in the Lake Windcrest Subdivision in Magnolia,
10 Texas. The residence does not have a pool.
- 11 • Mr. Gardaphe has a 2 acre lot in the Lake Windcrest Subdivision in Magnolia,
12 Texas. The residence has a pool.
- 13 • Mr. Hansen has a 2 acre acre lot in the Lake Windcrest Subdivision in Magnolia,
14 Texas. The residence does not have a pool.
- 15 • Mr. Leo has a 2 acre lot in the Lake Windcrest Subdivision in Magnolia, Texas.
16 The residence has a pool.
- 17 • Ms. Sanders has a 0.126 acre lot and lives in Decker Oaks Subdivision in Pinehurst,
18 Texas. The residence does not have a pool.
- 19 • Mr. Watkins has a .68 acre lot and lives in Mostyn Manor Subdivision in Magnolia,
20 Texas. The residence has a pool.
- 21 • Ms. Westbrook has a 1 acre lot and lives in Lake Windcrest Subdivision in
22 Magnolia, Texas. The residence has a pool.

- Mr. Yiu has a 2 acre lot and lives in Lake Windcrest Subdivision in Magnolia, Texas. The residence has a pool.

Q. DID QUADVEST NOTIFY ALL COMPLAINANTS OF THE ADVANCED METER CHANGE OUT?

A. Yes. Although this is not a requirement of the Public Utility Commission of Texas, Quadvest sent an email to all customers on May 11, 2016 for which we had an email address on file. We also included a message on all bills that went out in the month of May, 2016. See attached **Exhibit B (AMR Change Out Notices and AMR Change Out Notice Summary)**. The only Complainant that did not get an email notification was Gail Acebo, noting a copy of her May 2016 bill, which includes the AMR bill message, is included in Exhibit B. In addition, Quadvest's 3rd party meter installer (AUS) was instructed to announce their intention to change out the meter with resident while on site, see **Exhibit C (AUS Water Meter Installation Checklist)**.

Q. Did the tests performed by the manufacturer establish the accuracy of the Complainants meters prior to installation in accordance with 16 TAC 24.89(f)? What were the results of any tests conducted by the manufacturer on the smart meters installed at the Complainants' residences?

A. Yes. The AMRs installed were manufactured by Master Meter, a well-known and respected advanced meter manufacturer in the industry. Master Meter tests and confirms all meters meet AWWA standards prior to shipment, noting their test results are recorded on meter identification stickers attached to each smart meter shipped. Master Meter tested all Complainants' meters prior to installation and the testing results indicated that all the Complainants' meters have flow results within AWWA standards (98.5% to 101.5%

1 accuracy). See summary of Master Meter testing results at **Exhibit D (Meter Testing**
2 **Results)**, specifically the section labeled “(Pre Install) Manufacturer Meter Accuracy”.
3 See actual Master Meter stickers reporting pre installation meter test results at **Exhibit E**
4 **(“Master Meter Test Stickers”)**. Also, please find attached letter issued by Master
5 Meter’s Chief Engineer (Walt Vetter), which details the standards and procedures used in
6 the testing of their smart meters (AMRs) at **Exhibit F (“Master Meter Bench Accuracy**
7 **Test Info”)**.

8 **Q. WHAT ARE THE AWWA STANDARDS FOR METER ACCURACY?**

9 A. AWWA standards for meter accuracy are between 98.5% AND 101.5% per AWWA’s
10 Manual 6.

11 **Q. DID QUADVEST TEST THE AMR METERS FOR ACCURACY POST**
12 **INSTALLATION?**

13 A. Yes, upon receiving the initial Complaint, Quadvest hired an independent third-party,
14 Southern Flowmeter, Inc. to conduct a random sampling of 15% the meters originally at
15 issue in this complaint for accuracy. Ms. Barrett, Ms. Floyd and Ms. Westbrook’s meter
16 were the 3 meters that were selected as the 15% random sampling done by Southern
17 Flowmeter, Inc. in October 2016, noting each of these 3 meters were found to be within
18 AWWA accuracy standards. In October 2017, the remainder of the Complainants’ meters
19 were tested.

20 **Q. ARE THE COMPLAINANTS’ METERS PROPERLY READING WATER USAGE**
21 **BASED UPON THIRD-PARTY TESTING?**

1 A. Yes. As mentioned above, Quadvest hired an independent third-party (Southern
2 Flowmeter, Inc.) to perform post-installation accuracy testing on the Complainants'
3 advanced meters at issue and the respective meters were found to be 97.1% accurate on
4 average. All the Complainants' meters were found to be within American Water Works
5 Association standards (98.5% to 101.5% accuracy), except Mr. Gardaphe's meter, which
6 was under reporting usage by 25%. Quadvest did not back bill Mr. Gardaphe's for any
7 under reported water usage. If Mr. Gardaphe meter was removed from the population of
8 Complainants' meters tested, the overall average accuracy increases to 99.2%. See
9 summary of Southern Flowmeter testing results at **Exhibit C (Meter Testing Results)**,
10 specifically the section labeled "Post Install (3rd Party Testing)". See actual Southern
11 Flowmeter, Inc. meter tests reports at **Exhibit G (Southern Flow Test Reports)**". See
12 Southern Flowmeter, Inc. meter testing procedure manual at **Exhibit H (Southern**
13 **Flowmeter Testing Manual)**.

14 **Q. IF THE COMPLAINANTS' METERS ARE NOT PROPERLY READING USAGE,**
15 **WHAT IS THE PROPER BILL ADJUSTMENT TO BE MADE, INCLUDING ANY**
16 **APPROPRIATE REFUND, IN ACCORDANCE WITH 16 TAC 24.89(G)?**

17 A. Mr. Gardaphe's meter is the only Complainants' meter that tested outside of the AWWA
18 accuracy standards. Mr. Gardaphe's meter tested at 75% weighted accuracy, thus under
19 reporting his water usage. Quadvest has elected not to make any adjustments to Mr.
20 Gardaphe's bill resulting from this under reporting of water usage.

21 **Q. IS THERE ANYTHING THAT STANDS OUT ABOUT COMPLAINANTS'**
22 **WATER USAGE DURING SUMMER OF 2016?**

1 A. Yes. Upon review of Complainants' usage logs obtained from their AMR meters for July
2 / August 2016 period and review of weather patterns during corresponding time frame it
3 appears the majority of the Complainants' water usage can be linked to irrigation. The first
4 item that stands out when reviewing the usage logs is the "high and low" pattern seen in
5 many of the Complainants' water usage. This type of pattern is indicative of irrigation as
6 most acreage lot customers will use well over a thousand gallons of water on irrigation
7 days and less on non-irrigation days. In addition, I noticed that many of the Complainants'
8 water usage dramatically decreased on or about August 13, 2016, which happen to coincide
9 with a rather significant rain fall event in Magnolia area (~10 inches) starting on August
10 13, 2016. **See Exhibit I, Rainfall Patterns.** This immediate decrease is further evidence
11 that Complainants water usage is directly linked to their irrigation routine and not general
12 household usage such as washing dishes and showering. **See Exhibit J (Complainants'**
13 **Water Usage Summer 2016).**

14 **Q. COMPLAINANTS ALLEGE THAT QUADVEST WAS CHARGING AN**
15 **IMPROPER PASS-THROUGH FEE. IS THAT CORRECT?**

16 A. No. Quadvest's Commission-approved tariff for FY2016 (Docket 45548) authorizes a
17 pass-through fee of \$2.60 per 1000 gallons, see **Exhibit K (PUC Approval of \$2.60 Pass-**
18 **Through Fee).** Quadvest charged the appropriate Commission-approved pass-through fee
19 of \$2.60. As an example, see the Complainants' September 2016 bills which charged the
20 approved \$2.60, noting the pass-through fee can be calculated by taking the consumption
21 in 1000s gallons multiplied by \$2.60, see **Exhibit L (Complainants' Sept 2016 Bills)** It
22 appears that the Complainants' allegation related to a pass-through fee of \$1.93 was in
23 reference to Quadvest's older tariff, not the Commission-approved tariff for FY2016.

1 **Q. WHAT IS THE COMMISSION-APPROVED PASS-THROUGH FEE UNDER**
2 **QUADVEST’S TARIFF?**

3 A. The Commission-approved pass-through fee is \$2.60 during most of FY2016.

4 **Q. IS QUADVEST CORRECTLY BILLING COMPLAINANTS FOR ITS**
5 **COMMISSION-APPROVED PASS-THROUGH FEE?**

6 A. Yes.

7 **Q. IF QUADVEST IS NOT CORRECTLY BILLING COMPLAINANTS FOR ITS**
8 **COMMISSION-APPROVED PASS-THROUGH FEE, WHAT IS THE PROPER**
9 **BILL ADJUSTMENT TO BE MADE, INCLUDING ANY APPROPRIATE**
10 **REFUND, IN ACCORDANCE WITH 16 TAC § 24.87?**

11 A. Quadvest was charging its Commission-approved pass-through fee; therefore, no refund is
12 needed.

13 **Q. DOES THIS CONCLUDE YOUR TESTIMONY?**

14 B. Yes.

Exhibit A

Jeffrey B. Eastman CV

EXPERIENCE:

- | | | |
|-------------------------------|---|----------------------|
| December 2012 -
Current | Quadvest LP
Director Of Accounting and Finance / CFO | Magnolia, Texas |
| | <ul style="list-style-type: none">• Manage all budgeting, forecasting and financial / business reporting for one of the largest privately held water utilities in the State of Texas• Oversee all treasury functions of the company• Develop and manage relationship with banks and other financial institutions• Oversee accounting department and assist in the preparation and supporting of year-end audited financial statements• Manage company's compliance efforts as they related to customer rates. | |
| April 2006 -
November 2012 | Webber LLC
Accounting Manager / Finance & Treasury Manager | The Woodlands, Texas |
| | <ul style="list-style-type: none">• Manage all budgeting, forecasting and financial / business reporting for largest civil contractor in the State of Texas; present financial reports and analysis to both local executive management and company's foreign parent• Oversee all treasury functions of the company• Develop and manage relationship with sureties, banks, and other financial institutions• Managed staff of 10 persons required to account for multiple reporting entities with combined revenues exceeding \$800M• Prepare and support year-end audited financial statements for multiple reporting entities along with associated consolidation package due foreign parent's audit firm• Review and authorize requests for capital expenditures including annual capital expenditure plan; develop NPV models to analyze and support capital expenditure decisions• Served as project lead on the implementation of several accounting packages including SAP and Spectrum By Dexter & Chaney• Report directly to CFO and provide insightful decision support | |
| February 2005 -
April 2006 | Calpine Corporation
Senior Accountant / Accounting Supervisor | Houston, Texas |
| | <ul style="list-style-type: none">• Manage business and accounting records, including the monthly close and account reconciliation process, for seven of Calpine's power plants with assets in excess of \$1.2B and annual revenue in excess of \$830M• Prepare year-end and quarterly stand-alone financial statements• Assist in the preparation of the annual plant budgets, which are used for both internal and external purposes• Effectively obtain data from and communicate financial results to division and corporate management, commercial management, and plant personnel | |

- Assistance with and compilation of Sarbanes-Oxley compliance tests as determined by internal and external audit groups, and associated ad-hoc projects as determined by management
- Responsible for compilation and review of regional cash flow forecast originating from upwards of 26 individual plant and business unit forecasts

February 2003 -
February 2005

Continental Airlines
Internal Auditor / Audit Analyst

Houston, Texas

- Document and test operational controls at various international and domestic airport, city, administrative and corporate offices; identify areas of improvement and formulate recommendations for management
- Assist in the development and review of Sarbanes – Oxley documentation and compliance processes
- Perform audit and cost analysis procedures to facilitate the management of the regional capacity purchase agreement
- Provided ad-hoc analytical support during the negotiation of a billion dollar regional capacity purchase agreement
- Prepare both annual budget and monthly forecasts for the regional capacity purchase agreement

January 2000 -
February 2003

Deloitte & Touche, LLP
Senior Auditor

Houston, Texas

- Industry experience: construction, energy trading and marketing, venture capital
- Coordinate and plan audit engagements, which includes budgeting, identifying and assessing business risks, planning substantive testing, and communicating with both engagement management and staff
- Provide an in-depth examination of financial statement accounts for SEC clients, various-sized private corporations, partnerships, and non-profit entities
- Document and test internal controls; identify areas requiring improvement and formulate recommendations to management.
- Research authoritative accounting literature for complex accounting issues and document conclusions as they apply to client
- Develop an understanding of internal control risks and methods for improvement
- Supervise engagement teams of up to three staff auditors
- Provide feedback and coaching to staff regarding job performance
- Advise clients on the issuance of financial reports in compliance with GAAP

Subject: Installing AMR water meters
Message:

Quadvest will begin installing AMR water meters throughout its service areas beginning in mid-May, throughout the end of June.

AMR stands for Automated Meter Readers. It's a method of using communication technology to read meters without having to access the meter, which is located in a meter box in the ground.

Automated meter systems are quickly becoming the standard for utilities around the country. We've used this technology since 2014 when we initially converted 2 of our water districts. We currently have approximately 800 AMR meters in the ground. The efficiency gained in those areas will now be shared across our entire service area. These new devices allow for more accurate and faster collection of water usage readings than the current manual method and improve safety conditions for our staff.

AMR Technology

Will the electronic device on the meter interfere with other electronic equipment?

No. The radio transmission operates in compliance with Federal Communications Commission regulations to avoid interference with other electronic devices.

Has this new AMR equipment been tested for accuracy and reliability?

Yes, meters come pretested along with results directly from the manufacturer. The radio device will be tested for accuracy during the meter collection process regularly.

How will I know that you have my reading and not someone else's?

Each radio frequency device has a unique identification number, which is transmitted along with the meter reading. The unique number is compared to your account record to ensure a match.

Does this mean no more meter readers?

No, you will still periodically see Quadvest meter readers in your neighborhoods. There are times that the radio signal transmission is weak and meter readers may have to walk up to the meter before acquiring a read. Most reads will be acquired by simply driving by, or parking at certain "sweet spots" within your neighborhood. We'll continue to visit your property for routine service, maintenance or repair, and respond to water emergencies.

Installation

Do I have to be home for the meter replacement work?

No. Since the water meters are located outside of the home, you will not need to be home for the replacement work.

What happens if I have a problem after installation?

If you have a leak, low pressure or some other problem after installation, or at any other time, call 281.356.5347 during business hours to report the problem. Because your water will be turned off temporarily during the meter change process, you may experience a brief period of air or discolored water. In most cases, briefly running your cold water will clear this situation.

Can I cover up the meter after the installation?

No. Access needs to be available at all times. There will still be occurrences when meter technicians will visit the meter on-site to perform routine maintenance or verify high readings.

What if there's something in front of or blocking the meter?

Keep access to the water meter available at all times to ensure it's accessible for any potential emergency that would require the meter to be turned off.

My Bill

How does AMR benefit customers?

- Improved customer service by increasing accuracy of meter readings.
- Minimized need to access meters at the property.

Can I read the meter?

Yes, the meter looks the same as your existing water meter.

No. Access needs to be available at all times. There will still be occurrences when meter technicians will visit the meter on-site to perform routine maintenance or verify high readings.

What if there's something in front of or blocking the meter?

Keep access to the water meter available at all times to ensure it's accessible for any potential emergency that would require the meter to be turned off.

My Bill

How does AMR benefit customers?

- Improved customer service by increasing accuracy of meter readings.
- Minimized need to access meters at the property.

Can I read the meter?

Yes, the meter looks the same as your existing water meter.

Subject: Installing AMR water meters
Message:

Quadvest will begin installing AMR water meters throughout its service areas beginning in mid-May, throughout the end of June.

AMR stands for Automated Meter Readers. It's a method of using communication technology to read meters without having to access the meter, which is located in a meter box in the ground.

Automated meter systems are quickly becoming the standard for utilities around the country. We've used this technology since 2014 when we initially converted 2 of our water districts. We currently have approximately 800 AMR meters in the ground. The efficiency gained in those areas will now be shared across our entire service area. These new devices allow for more accurate and faster collection of water usage readings than the current manual method and improve safety conditions for our staff.

AMR Technology

Will the electronic device on the meter interfere with other electronic equipment?

No. The radio transmission operates in compliance with Federal Communications Commission regulations to avoid interference with other electronic devices.

Has this new AMR equipment been tested for accuracy and reliability?

Yes, meters come pretested along with results directly from the manufacturer. The radio device will be tested for accuracy during the meter collection process regularly.

How will I know that you have my reading and not someone else's?

Each radio frequency device has a unique identification number, which is transmitted along with the meter reading. The unique number is compared to your account record to ensure a match.

Does this mean no more meter readers?

No, you will still periodically see Quadvest meter readers in your neighborhoods. There are times that the radio signal transmission is weak and meter readers may have to walk up to the meter before acquiring a read. Most reads will be acquired by simply driving by, or parking at certain "sweet spots" within your neighborhood. We'll continue to visit your property for routine service, maintenance or repair, and respond to water emergencies.

Installation

Do I have to be home for the meter replacement work?

No. Since the water meters are located outside of the home, you will not need to be home for the replacement work.

What happens if I have a problem after installation?

If you have a leak, low pressure or some other problem after installation, or at any other time, call 281.356.5347 during business hours to report the problem. Because your water will be turned off temporarily during the meter change process, you may experience a brief period of air or discolored water. In most cases, briefly running your cold water will clear this situation.

Can I cover up the meter after the installation?

No. Access needs to be available at all times. There will still be occurrences when meter technicians will visit the meter on-site to perform routine maintenance or verify high readings.

What if there's something in front of or blocking the meter?

Keep access to the water meter available at all times to ensure it's accessible for any potential emergency that would require the meter to be turned off.

My Bill

 Subject: Installing AMR water meters
 Message:

Quadvest will begin installing AMR water meters throughout its service areas beginning in mid-May, throughout the end of June.

AMR stands for Automated Meter Readers. It's a method of using communication technology to read meters without having to access the meter, which is located in a meter box in the ground.

Automated meter systems are quickly becoming the standard for utilities around the country. We've used this technology since 2014 when we initially converted 2 of our water districts. We currently have approximately 800 AMR meters in the ground. The efficiency gained in those areas will now be shared across our entire service area. These new devices allow for more accurate and faster collection of water usage readings than the current manual method and improve safety conditions for our staff.

AMR Technology

Will the electronic device on the meter interfere with other electronic equipment?

No. The radio transmission operates in compliance with Federal Communications Commission regulations to avoid interference with other electronic devices.

Has this new AMR equipment been tested for accuracy and reliability?

Yes, meters come pretested along with results directly from the manufacturer. The radio device will be tested for accuracy during the meter collection process regularly.

How will I know that you have my reading and not someone else's?

Each radio frequency device has a unique identification number, which is transmitted along with the meter reading. The unique number is compared to your account record to ensure a match.

Does this mean no more meter readers?

No, you will still periodically see Quadvest meter readers in your neighborhoods. There are times that the radio signal transmission is weak and meter readers may have to walk up to the meter before acquiring a read. Most reads will be acquired by simply driving by, or parking at certain "sweet spots" within your neighborhood. We'll continue to visit your property for routine service, maintenance or repair, and respond to water emergencies.

Installation

Do I have to be home for the meter replacement work?

No. Since the water meters are located outside of the home, you will not need to be home for the replacement work.

What happens if I have a problem after installation?

If you have a leak, low pressure or some other problem after installation, or at any other time, call 281.356.5347 during business hours to report the problem. Because your water will be turned off temporarily during the meter change process, you may experience a brief period of air or discolored water. In most cases, briefly running your cold water will clear this situation.

Can I cover up the meter after the installation?

No. Access needs to be available at all times. There will still be occurrences when meter technicians will visit the meter on-site to perform routine maintenance or verify high readings.

What if there's something in front of or blocking the meter?

Keep access to the water meter available at all times to ensure it's accessible for any potential emergency that would require the meter to be turned off.

My Bill

How does AMR benefit customers?

- Improved customer service by increasing accuracy of meter readings.
- Minimized need to access meters at the property.

Can I read the meter?

Yes, the meter looks the same as your existing water meter.

Installation

Do I have to be home for the meter replacement work?

No. Since the water meters are located outside of the home, you will not need to be home for the replacement work.

What happens if I have a problem after installation?

If you have a leak, low pressure or some other problem after installation, or at any other time, call 281.356.5347 during business hours to report the problem. Because your water will be turned off temporarily during the meter change process, you may experience a brief period of air or discolored water. In most cases, briefly running your cold water will clear this situation.

Can I cover up the meter after the installation?

No. Access needs to be available at all times. There will still be occurrences when meter technicians will visit the meter on-site to perform routine maintenance or verify high readings.

What if there's something in front of or blocking the meter?

Keep access to the water meter available at all times to ensure it's accessible for any potential emergency that would require the meter to be turned off.

My Bill

How does AMR benefit customers?

- Improved customer service by increasing accuracy of meter readings.
- Minimized need to access meters at the property.

Can I read the meter?

Yes, the meter looks the same as your existing water meter.

Exhibit C

AUS Water Meter Installation checklist

Arrival at Location

1	Ensure Vehicle Hazard Lights are on and operational
2	Ensure vehicle is far enough off road to not impede traffic on roadway
3	If not already on make sure AUS provided vest is properly worn
4	Place a traffic cone on the road at the front and rear of your vehicle
5	Open lid to meter to ensure correct location based on old meter number
6	Visual inspection of meter box and contents for existing leaks and damaged components (If damaged or leaking contact project manager immediately and document on leadsheet)
7	Knock at the door most accessible to the front yard to announce your intentions to the resident or employee at that address.
8	Only enter structure if the meter is located inside and adult present.(NO EXCEPTIONS!!!!)

Procedures for meter installation

9	Observe existing meter to ensure no water consumption is occurring prior to water shutoff
10	Turn water off at curbstop
11	Inspect meter lid to ensure MXU antenna will fit in hole cut in 1/3 end of lid (if any issues with lid document on leadsheet)
12	(Job specific SENSUS) Deactivate smart point while connected to old meter; Place Comm link on smart point press start on Juno, press deactivation option display should read deactivation success (If deactivation doesn't confirm contact project manager)
13	Remove old meter (if pipes or fittings are damaged contact project manager and document on leadsheet)
14	Install New Meter ensuring correct direction of flow and install new gasket to each side of meter, ensure proper size and thickness. (Extreme attention should be placed as to not allow debris and dirt to enter service lines) Start threading meter nuts by hand it should be easy to turn by hand for 2 turns if not back it off to ensure you don't cross thread.
15	SLOWLY turn water on at curbstop and ensure it is completely turned on.
16	Visually check new installed meter and piping for leaks (make corrections if necessary)
17	Turn on closest outside faucet at structure to ensure water is flushed and clear before turning off faucet at the structure completely
18	Start Activation Process (ensure 5 min have passed from deactivation to starting activation process); Place Comm link on Smart Point, press start on Juno, choose appropriate configuration in Juno, Juno will notify installer to complete physical install at this point remove comm link from MXU and place lid correctly on meter box, place comm link on top of MXU antenna and press ok on the Juno, display should read activation success, ensure meter and MXU match paperwork, press disconnect option on Juno to disconnect MXU from comm link. (if failed to activate, deactivate and reactivate again)
19	Data collection (ensure AUS ID on leadsheet matches handheld); Update GPS coordinates, complete required field/information in handheld, completely fill all fields on leadsheet (ensure notes are clear and concise)

Pre-Departure Steps

20	Ensure yard and/or location of install is returned to the condition it was found in to the best of your ability
21	(Install depending) Box resets and re-piping pay special attention to the yard and area to return as much dirt and grass to original condition (this may require additional tools to complete, rake yard if needed)
22	Collect all tools and old meter and ensure no trash or anything is left in yard or in meter box

Installation Checklist

Explanation of Test Bench Accuracy and Water Meter Testing

Master Meter, Inc. uses state-of-the-art gravimetric test benches to test and record the accuracy of every water meter produced in the Mansfield facility. The meters are approved for service using the requirements of the applicable American Water Works Association (AWWA) standard and the AWWA Manual of Water Supply Practices (M6) manual. The AWWA C708 Cold-Water Meters – Multijet Type standard covers the Master Meter BLMJ line of water meters.

The process and tools used to maintain calibration of the test benches is traceable to National Institute of Standard and Technology (NIST). The following process is used:

1. Automatic test results are periodically compared to manual test results. Manual tests compare the registration change on a meter's dial face to the measured weight of water in a capture tank.
2. The scales measuring the weight of the captured water are routinely checked and calibrated with test weights.
3. The test weights are certified by a third party calibration service provider to be traceable to NIST standards.

**Accuracy Test Procedures
For Cold Water Meters

Of

Southern Flowmeter, Inc.**

Revised 12/2015

Accuracy Test Procedures for Cold Water Meters

Table of Contents

- 1. Scope and Application**
- 2. Summary of Method**
- 3. List of Meters**
- 4. Comments**
- 5. Procedure**
- 6. Certified meter guidelines**
- 7. References**

1 Scope and Application

- 1.1 The following test methods are applicable to various models of cold water meters, as listed, in order to establish an accuracy profile. The main goal of testing is to evaluate the performance of the meter, and recommend repairs or replacement when beneficial.**

2 Summary of Method

- 2.1 Meter accuracy will primarily be established by comparison to at least one other meter or standard, certified within no more than 12 months or kept in a stable unused condition since the date of certification.**
- 2.2 Meters will preferably be tested in batches, to allow for cross comparison to each other in addition to certified meter**

3 List of Meters

- 3.1 This method applies to the following cold water meters; Positive Displacement, Turbine (class I and II), Multi-Jet, Compound, Dual Body Compound, Fire Compound, Propeller and Mag Meter**

4 Comments

- 4.1 Accuracy tests can be performed in the field or in controlled environment.**
- 4.2 Tests performed in field may be influenced by outside variable such as faulty valves and insufficient pressure. These must be documented and mitigated as much as possible (ie. locate redundant valve).**
- 4.3 If repairs or defects are corrected at any time, changes must be noted in the report. This is true for corrections made after testing as well.**
- 4.4 Not all meter models allow for calibration changes.**

5 Procedure

- 5.1 Visually inspect meter to be tested (unknown meter) for defects, foreign materials or other noteworthy variances and record them on test form.**
- 5.2 Place meter on test bench and connect in line with test system.**
- 5.3 If meter is to be tested with other like meters simultaneously, repeat step 5.1 and 5.2 with all meters. Connect the meters in the batch all in series to allow for cross comparison. Do not test more than 10 meters in a single batch.**
- 5.4 Connect test system to a water source and pressure system if not already prepared.**
- 5.5 Verify that the outflow connection of the unknown meter batch is properly connected to allow for proper disposal of cycled or used water.**
- 5.6 Slowly open valve directly upstream of unknown meter batch to pressure up unknown meters, and allow to reach equilibrium with test system pressure (no more water movement)**
- 5.7 Remove air entrained in meters and test system by opening outflow valve. Open valve slowly until system reaches the GPM rate of the medium flow**

- test. Keep outflow valve open for 2 minutes or longer if necessary to remove entrained air.
- 5.8 Close outflow valve to suspend all flow through the test system and unknown meters.
 - 5.9 Inspect the test system and unknown meter batch for integrity issues. Leaks should be eliminated and if required pressure system down and begin again with step 5.4.
 - 5.10 With the entire system properly pressurized and in a state of no flow with pressure equilibrium, record the unknown meter information. Each meter should be recorded on a separate record. At a minimum this should include size, brand, model, serial number, test date and initial reading(s). Optional details include property address, unknown meter owner and additional details which may be pertinent.
 - 5.11 Once confident the test system is properly prepared for unknown meter testing, proceed with the following steps to obtain meter accuracy.
 - 5.11.1 Locate the correct test flow rates and quantities for low, medium (intermediate) and high flow tests. These can be found in AWWA manual M6 or in the Southern Flowmeter test chart "AWWA Requirements for New, Rebuilt and Repaired Cold Water Meters"
 - 5.11.2 Record the three flow rates, and test quantity, in each record for the unknown meter batch
 - 5.11.3 Record the meter information for the certified meter to be used as a standard on each record for the unknown meters. This information should include at a minimum the certified meter serial number and start reading. Check that the certification data is no more than 12 months prior to test date, or note that the meter has not been used since certification.
 - 5.11.4 Record other test apparatus being used. These items may not be certified but may assist following test method, including tanks with visual indicators, flow meters, scales and secondary meters
 - 5.11.5 Begin testing by opening outflow valve until flow rate matches the low flow test rate. The actual rate should nearly match the AWWA desired rate within 5% +/-.
 - 5.11.6 Allow flow through the system, until the certified meter begins to close in on the total test quantity.
 - 5.11.7 Close the outflow valve to suspend flow through the system, such that the certified meter runs the desired test quantity through (ie. 10 Gallons) within 5% +/-
 - 5.11.8 Record the final readings for each unknown meter and the certified meter, as well as any additional test apparatus used.
 - 5.11.9 Repeat steps 5.11.5 through 5.11.8 again for both medium flow and high flow rates.
 - 5.11.10 Calculate the accuracy of each unknown meter for each flow rate by using the equation:

$$\frac{\text{Unknown meter final read} - \text{Unknown meter initial read}}{\text{Calibrated meter final read} - \text{Calibrated meter initial read}} = \text{Meter Accuracy}$$

5.11.11 Evaluate accuracy values across each flow rate and each meter for the entire batch of unknown meters, to check for test integrity issues. Values over 102% should be especially concerning. If there is any doubt in the integrity of the test, start again with step 5.1.

5.12 The unknown meter batch should now be depressurized by closing the valve upstream of the unknown meters, and then opening the outflow valve.

5.13 The unknown meters can then be removed from the connection fittings and prepared for transportation back to the customer.

6 Certified meter guidelines

6.1 The certified meter will be used as a standard to obtain the accuracy of the customer provided meters.

6.2 At a minimum the meter should be certified within the previous 12 months, or have remained in an unused and stable condition since the date of previous certification

6.3 The meter must be certified to monitor flow accurately at the desired flow rates for the test. The easiest manner to ensure this possibility is to match the size and model of the meters to be tested. If this is not possible, refer to the certified meter certificate and compare the flow rates on the certificate to the desired test flow range.

6.4 Whenever possible use multiple certified meters and record the results of every certified meter along with the unknown meter results, on each individual record.

6.5 It is acceptable to augment certified meters with uncertified instruments, to assist in flow rate control and/or quantity control. These cannot be used as standards for the purpose of obtaining accuracy statements.

7 References

7.1 This test method was developed for Southern Flowmeter, Inc. and is based on guidelines set forth in AWWA Manual M6, Fifth addition

RE: Tariff Control No. 45548 – Application of Quadvest, L.P. to Implement a Pass-Through Rate Change

NOTICE OF APPROVAL

On January 26, 2016, Quadvest, L.P. (Quadvest) filed its annual true-up report for its district pass-through gallonage fee and an application to implement a pass-through rate increase for fees imposed on the utility by several water districts, with the most significant increase coming from the San Jacinto River Authority. The rate increase was effective January 28, 2016.

On February 17, 2016, Public Utility Commission of Texas (Commission) Staff recommended that the application and notice be deemed sufficient and further that application be approved, as specified in the pleading and attached memorandum of Andrew Novak of the Commission's Water Utility Regulation Division. Quadvest mailed notice to affected customers on January 21, 2016, providing the effective date of the increase, the present calculation of customer billings, new calculation of customer billings, changes in charges to the utility for purchased water or water use fees, and the necessary required language by 16 Tex. Admin. Code § 24.21(h)(4)(b). Additionally, Quadvest provided the Commission a copy for the notice sent to customers, proof that the cost of purchased water has changed by the stated amount, and the calculation of the new rate. Commission Staff stated that Quadvest has met all of the requirements set out by the Commission's substantive rules to implement the pass-through fee increase to affected customers. New tariff pages for Quadvest that reflect the rate increase were attached to Commission Staff's recommendation.

4 1

Consistent with Commission Staff's recommendation, Quadvest's application and notice are sufficient and the pass-through rate as noticed on January 21, 2016 is approved. The approved tariff pages are attached to this Notice.

SIGNED AT AUSTIN, TEXAS on the 24th day of February 2016.

WATER UTILITY TARIFF
Docket Number: 45548

Quadvest, L.P.
(Utility Name)

26926 FM 2978
(Business Address)

Magnolia, Texas 77354
(City, State, Zip Code)

281/356-5347
(Area Code/Telephone)

This tariff is effective for utility operations under the following Certificate of Convenience and Necessity:

11612

This tariff is effective in the following counties:

Aransas, Brazoria, Fort Bend, Harris, Jackson, Liberty, Montgomery and Waller

This tariff is effective in the following cities or unincorporated towns (if any):

Richmond (portion of Bridlewood Estates only - same rates)

This tariff is effective in the following subdivisions or systems:

See attached chart.

TABLE OF CONTENTS

The above utility lists the following sections of its tariff (if additional pages are needed for a section, all pages should be numbered consecutively):

SECTION 1.0 -- RATE SCHEDULE.....	2
SECTION 2.0 -- SERVICE RULES AND POLICIES.....	3
SECTION 3.0 -- EXTENSION POLICY.....	11
SECTION 4.0 -- DROUGHT CONTINGENCY PLAN.....	18

SECTION 1.0 – RATE SCHEDULE

Section 1.01 - Rates

<u>Meter Size</u>	<u>Monthly Minimum Charge</u>	<u>Gallage Charge</u>
5/8" or 3/4"	<u>\$28.75</u> (Includes 0 gallons)	<u>\$1.75</u> per 1000 gallons for the first 10,999 gallons
1"	<u>\$71.88</u>	<u>\$2.00</u> per 1,000 gallons from 11,000 to 20,999 gallons
1 1/2"	<u>\$143.75</u>	<u>\$2.25</u> per 1,000 gallons from 21,000 to 30,999 gallons
2"	<u>\$230.00</u>	<u>\$3.00</u> per 1,000 gallons thereafter
3"	<u>\$460.00</u>	
4"	<u>\$718.75</u>	
6"	<u>\$1,437.50</u>	

An additional pass through gallage charge of \$2.60 per 1,000 gallons of water will be added for fees imposed by any non-affiliated third party water supplier or underground water district having jurisdiction over the utility. Bluebonnet GRP, Brazoria GRP, City of Rosenberg GRP, North Fort Bend GRP, West Harris Regional, Harris-Galveston, Subsidence District, San Jacinto River Authority GRP (Docket No. 45548). **SEE PURCHASED WATER AND/OR DISTRICT FEE PASS THROUGH CLAUSE.**

FORM OF PAYMENT: The utility will accept the following forms of payment:

Cash X, Check X, Money Order X, Credit Card X, Other (specify) Bank Draft
 THE UTILITY MAY REQUIRE EXACT CHANGE FOR PAYMENTS AND MAY REFUSE TO ACCEPT PAYMENTS MADE USING MORE THAN \$1.00 IN SMALL COINS. A WRITTEN RECEIPT WILL BE GIVEN FOR CASH PAYMENTS.

REGULATORY ASSESSMENT.....1.0%
 PUC RULES REQUIRE THE UTILITY TO COLLECT A FEE OF ONE PERCENT OF THE RETAIL MONTHLY BILL AND TO REMIT THE FEE TO THE TCEQ.

Section 1.02 - Miscellaneous Fees

TAP FEE.....\$790.00
 TAP FEE COVERS THE UTILITY'S COSTS FOR MATERIALS AND LABOR TO INSTALL A STANDARD RESIDENTIAL 5/8" x 3/4" METER. AN ADDITIONAL FEE TO COVER UNIQUE COSTS IS PERMITTED IF LISTED ON THIS TARIFF.

TAP FEE.....\$870.00
 TAP FEE COVERS THE UTILITY'S COSTS FOR MATERIALS AND LABOR TO INSTALL A STANDARD 3/4" and 1" METER. AN ADDITIONAL FEE TO COVER UNIQUE COSTS IS PERMITTED IF LISTED ON THIS TARIFF.

TAP FEE (Large meter)Actual Cost
 TAP FEE IS THE UTILITY'S ACTUAL COST FOR MATERIALS AND LABOR FOR METER SIZE INSTALLED.

SUBDIVISION	PWS ID NUMBER	COUNTY

The rates set or approved by the city for the systems entirely within its corporate boundary are not presented in this tariff. Those rates are not under the original jurisdiction of the PUC and will have to be obtained from the city or utility.

SECTION 1.0 – RATE SCHEDULE (CONTINUED)

RECONNECTION FEE

THE RECONNECT FEE MUST BE PAID BEFORE SERVICE CAN BE RESTORED TO A CUSTOMER WHO HAS BEEN DISCONNECTED FOR THE FOLLOWING REASONS (OR OTHER REASONS LISTED UNDER SECTION 2.0 OF THIS TARIFF):

- a) Non payment of bill (Maximum \$25.00)..... \$25.00
 - b) Customer's request that service be disconnected \$50.00
- OR OTHER REASONS LISTED UNDER SECTION 2.0 OF THIS TARIFF

SEASONAL RECONNECTION FEE:

BASE RATE TIMES NUMBER OF MONTHS OFF THE SYSTEM NOT TO EXCEED SIX MONTHS WHEN LEAVE AND RETURN WITHIN A TWELVE MONTH PERIOD.

TRANSFER FEE \$45.00

THE TRANSFER FEE WILL BE CHARGED FOR CHANGING AN ACCOUNT NAME AT THE SAME SERVICE LOCATION WHEN THE SERVICE IS NOT DISCONNECTED.

LATE CHARGE (EITHER \$5.00 OR 10% OF THE BILL) 10%

PUC RULES ALLOW A ONE-TIME PENALTY TO BE CHARGED ON DELINQUENT BILLS. A LATE CHARGE MAY NOT BE APPLIED TO ANY BALANCE TO WHICH THE PENALTY WAS APPLIED IN A PREVIOUS BILLING.

RETURNED CHECK CHARGE \$25.00

RETURNED CHECK CHARGES MUST BE BASED ON THE UTILITY'S DOCUMENTABLE COST.

CUSTOMER DEPOSIT RESIDENTIAL (Maximum \$50) \$50.00**COMMERCIAL & NON-RESIDENTIAL DEPOSIT:..... 1/6TH OF ESTIMATED ANNUAL BILL****METER TEST FEE..... \$25.00**

THIS FEE WHICH SHOULD REFLECT THE UTILITY'S COST MAY BE CHARGED IF A CUSTOMER REQUESTS A SECOND METER TEST WITHIN A TWO-YEAR PERIOD AND THE TEST INDICATES THAT THE METER IS RECORDING ACCURATELY. THE FEE MAY NOT EXCEED \$25.

METER RELOCATION FEE..... Actual Cost to Relocate the existing Meter

THIS FEE MAY BE CHARGED IF A CUSTOMER REQUESTS RELOCATION OF AN EXISTING METER.

METER CONVERSION FEE Actual Cost to Convert the existing Meter

THIS FEE MAY BE CHARGED IF A CUSTOMER REQUESTS CHANGE OF SIZE OF AN EXISTING METER OR CHANGE IS REQUIRED BY MATERIAL CHANGE IN CUSTOMERS SERVICE DEMAND.

GOVERNMENTAL TESTING, INSPECTION AND COSTS SURCHARGE:

WHEN AUTHORIZED IN WRITING BY PUC AND AFTER NOTICE TO CUSTOMERS, THE UTILITY MAY INCREASE RATES TO RECOVER INCREASED COSTS FOR INSPECTION FEES AND WATER TESTING. [PUC Subst. R. 24.21(K)(2)]

LINE EXTENSION AND CONSTRUCTION CHARGES:

REFER TO SECTION 3.0—EXTENSION POLICY FOR TERMS, CONDITIONS, AND CHARGES WHEN NEW CONSTRUCTION IS NECESSARY TO PROVIDE SERVICE.

Docket No. 45548

SECTION 1.0 -- RATE SCHEDULE (CONTINUED)

TEMPORARY WATER RATE:

Unless otherwise superseded by PUC order or rule, if the Utility is ordered by a court or government body of competent jurisdiction to reduce its pumpage, production or water sales, the Utility shall be authorized to increase its approved gallonage charge according to the formula:

$$TGC = \frac{cgc + (pr)(cgc)(r)}{(1.0 - r)}$$

Where:

- TGC = temporary gallonage charge
- cgc = current gallonage charge
- r = water use reduction expressed as a decimal fraction (the pumping restriction)
- pr = percentage of revenues to be recovered expressed as a decimal fraction, for this tariff pr shall equal 0.5

To implement the Temporary Water Rate, the Utility must comply with all notice and other requirements of 16 TAC 24.21(l).

PURCHASED WATER AND/OR DISTRICT FEE PASS THROUGH CLAUSE:

Changes in fees imposed by any non-affiliated third party water supplier or underground water district having jurisdiction over the Utility shall be passed through as an adjustment to the water gallonage charge according to the following formula:

$$RVP = (E + (AP - AC)) / (JC \times AU), \text{ Where:}$$

RVP = Adjusted gallonage charge, rounded to the nearest cent

E = Estimated sum of upcoming 12 months of purchase water and groundwater conservation district costs

AP = Actual payments up to 12 months (February through January of previous year)

AC = Actual collections up to 12 months (February through January of previous year)

JC = January month end customer connections

AU = Average annual usage per connection from most recent rate case

The adjusted gallonage charge must be trued up and adjusted every twelve months.

To implement, all notice requirements must be met.

With the annual true up report adjusting the pass through for the next 12 months, the utility shall provide a five year report showing the annual and accumulated difference between pass through amounts collected from customers and amounts actually paid to the entities whose charges are included in the pass through and the formula for the estimates included in the pass through charge, the definition of all variables used in the estimate, the basis for any projections and any standard operating procedures of the utility for estimating.

SECTION 1.0 -- RATE SCHEDULE (Continued)

Section 1.01 - Rates

<u>Meter Size</u>	<u>Monthly Minimum Charge</u>	<u>Gallage Charge</u>
5/8" or 3/4"	\$17.98 (Includes 0 gallons)	\$2.29 per 1000 gallons
1"	\$44.95	
1 1/2"	\$89.90	
2"	\$143.84	
3"	\$269.71	
4"	\$449.51	
6"	\$899.02	
8"	\$1,438.43	

An additional pass through gallage charge of \$2.60 per 1,000 gallons of water will be added for fees imposed by any non-affiliated third party water supplier or underground water district having jurisdiction over the Utility. Bluebonnet GRP, Brazoria GRP, City of Rosenberg GRP, North Fort Bend GRP, West Harris Regional, Harris-Galveston Subsidence District, San Jacinto River Authority GRP (Docket No. 45548). **SEE PURCHASED WATER AND/OR DISTRICT FEE PASS THROUGH CLAUSE.**

FORM OF PAYMENT: The utility will accept the following forms of payment:

Cash X, Check X, Money Order X, Credit Card X, Other (specify) Bank Draft
THE UTILITY MAY REQUIRE EXACT CHANGE FOR PAYMENTS AND MAY REFUSE TO ACCEPT PAYMENTS MADE USING MORE THAN \$1.00 IN SMALL COINS. A WRITTEN RECEIPT WILL BE GIVEN FOR CASH PAYMENTS.

REGULATORY ASSESSMENT.....1.0%
PUC RULES REQUIRE THE UTILITY TO COLLECT A FEE OF ONE PERCENT OF THE RETAIL MONTHLY BILL AND TO REMIT FEE TO THE TCEQ.

Section 1.02 - Miscellaneous Fees

TAP FEE.....\$790.00
TAP FEE COVERS THE UTILITY'S COSTS FOR MATERIALS AND LABOR TO INSTALL A STANDARD RESIDENTIAL 5/8" x 3/4" METER. AN ADDITIONAL FEE TO COVER UNIQUE COSTS IS PERMITTED IF LISTED ON THIS TARIFF.

TAP FEE.....\$870.00
TAP FEE COVERS THE UTILITY'S COSTS FOR MATERIALS AND LABOR TO INSTALL A STANDARD 3/4" and 1" METER. AN ADDITIONAL FEE TO COVER UNIQUE COSTS IS PERMITTED IF LISTED ON THIS TARIFF.

TAP FEE (Large meter)Actual Cost
TAP FEE IS THE UTILITY'S ACTUAL COST FOR MATERIALS AND LABOR FOR METER SIZE INSTALLED.

SECTION 1.0 – RATE SCHEDULE (Continued)

RECONNECTION FEE

THE RECONNECT FEE MUST BE PAID BEFORE SERVICE CAN BE RESTORED TO A CUSTOMER WHO HAS BEEN DISCONNECTED FOR THE FOLLOWING REASONS (OR OTHER REASONS LISTED UNDER SECTION 2.0 OF THIS TARIFF):

- a) Non payment of bill (Maximum \$25.00).....\$25.00
- b) Customer's request that service be disconnected\$50.00
OR OTHER REASONS LISTED UNDER SECTION 2.0 OF THIS TARIFF

SEASONAL RECONNECTION FEE:

BASE RATE TIMES NUMBER OF MONTHS OFF THE SYSTEM NOT TO EXCEED SIX MONTHS WHEN LEAVE AND RETURN WITHIN A TWELVE MONTH PERIOD.

TRANSFER FEE\$45.00

THE TRANSFER FEE WILL BE CHARGED FOR CHANGING AN ACCOUNT NAME AT THE SAME SERVICE LOCATION WHEN THE SERVICE IS NOT DISCONNECTED.

LATE CHARGE (EITHER \$5.00 OR 10% OF THE BILL)10%

PUC RULES ALLOW A ONE-TIME PENALTY TO BE CHARGED ON DELINQUENT BILLS. A LATE CHARGE MAY NOT BE APPLIED TO ANY BALANCE TO WHICH THE PENALTY WAS APPLIED IN A PREVIOUS BILLING.

RETURNED CHECK CHARGE\$25.00

RETURNED CHECK CHARGES MUST BE BASED ON THE UTILITY'S DOCUMENTABLE COST.

CUSTOMER DEPOSIT RESIDENTIAL (Maximum \$50)\$50.00

COMMERCIAL & NON-RESIDENTIAL DEPOSIT..... 1/6TH OF ESTIMATED ANNUAL BILL

METER TEST FEE.....\$25.00

THIS FEE WHICH SHOULD REFLECT THE UTILITY'S COST MAY BE CHARGED IF A CUSTOMER REQUESTS A SECOND METER TEST WITHIN A TWO-YEAR PERIOD AND THE TEST INDICATES THAT THE METER IS RECORDING ACCURATELY. THE FEE MAY NOT EXCEED \$25.

METER RELOCATION FEE.....Actual Cost to Relocate the existing Meter

THIS FEE MAY BE CHARGED IF A CUSTOMER REQUESTS RELOCATION OF AN EXISTING METER.

METER CONVERSION FEE.....Actual Cost to Convert the existing Meter

THIS FEE MAY BE CHARGED IF A CUSTOMER REQUESTS CHANGE OF SIZE OF AN EXISTING METER OR CHANGE IS REQUIRED BY MATERIAL CHANGE IN CUSTOMERS SERVICE DEMAND.

GOVERNMENTAL TESTING, INSPECTION AND COSTS SURCHARGE:

WHEN AUTHORIZED IN WRITING BY PUC AND AFTER NOTICE TO CUSTOMERS, THE UTILITY MAY INCREASE RATES TO RECOVER INCREASED COSTS FOR INSPECTION FEES AND WATER TESTING. [16 TAC 24.21(K)(2)]

LINE EXTENSION AND CONSTRUCTION CHARGES:

REFER TO SECTION 3.0--EXTENSION POLICY FOR TERMS, CONDITIONS, AND CHARGES WHEN NEW CONSTRUCTION IS NECESSARY TO PROVIDE SERVICE.

SECTION 1.0 -- RATE SCHEDULE (Continued)

TEMPORARY WATER RATE:

Unless otherwise superseded by PUC order or rule, if the Utility is ordered by a court or government body of competent jurisdiction to reduce its pumpage, production or water sales, the Utility shall be authorized to increase its approved gallonage charge according to the formula:

$$TGC = \frac{cgc + (pr)(cgc)(r)}{(1.0 - r)}$$

Where:

TGC = temporary gallonage charge

cgc = current gallonage charge

r = water use reduction expressed as a decimal fraction (the pumping restriction)

pr = percentage of revenues to be recovered expressed as a decimal fraction, for this tariff pr shall equal 0.5

To implement the Temporary Water Rate, the Utility must comply with all notice and other requirements of 16 TAC 24.21(l).

PURCHASED WATER AND/OR DISTRICT FEE PASS THROUGH CLAUSE:

Changes in fees imposed by any non-affiliated third party water supplier or underground water district having jurisdiction over the Utility shall be passed through as an adjustment to the water gallonage charge according to the following formula:

$$RVP = (E + (AP - AC)) / (JC \times AU), \text{ Where}$$

RVP = Adjusted gallonage charge, rounded to the nearest cent

E = Estimated sum of upcoming 12 months of purchase water and groundwater conservation district costs

AP = Actual payments up to 12 months (February through January of previous year)

AC = Actual collections up to 12 months (February through January of previous year)

JC = January month end customer connections

AU = Average annual usage per connection from most recent rate case

The adjusted gallonage charge must be true up and adjusted every twelve months.

To implement, all notice requirements must be met.

With the annual true up report adjusting the pass through for the next 12 months, the utility shall provide a five year report showing the annual and accumulated difference between pass through amounts collected from customers and amounts actually paid to the entities whose charges are included in the pass through and the formula for the estimates included in the pass through charge, the definition of all variables used in the estimate, the basis for any projections and any standard operating procedures of the utility for estimating.
