INTERIM EFFLUENT LIMITATIONS AND MONITORING REQUIREMENTS

Outfall Number 001

| Effluent Characteristic | Discharge | Limitations | Min. Self-Monito | ring Requirements |
|---|-------------------|-------------------|--|---------------------------------|
| | Daily Avg mg/l | Daily Max mg/l | Report Daily A Measurement Frequency | vg. & Daily Max. Sample Type |
| Lethal and Sublethal Whole Effluent Toxicity (WET) limits (Parameter 22414) ² Ceriodaphnia dubia (7-day chronic NOEC ¹) | Report | Report | 1/quarter | Composite |
| Lethal and Sublethal Whole Effluent Toxicity (WET) limits (Parameter 22414) ² Pimephales promelas (7-day chronic NOEC ¹) | Report | Report | 1/quarter | Composite |
| Lethal and Sublethal Whole Effluent Toxicity (WET) limits 53% (Parameter 22414) ² Ceriodaphnia dubia (7-day chronic NOEC ¹) | 53% | 53% | 1/quarter | Composite |
| Lethal and Sublethal Whole Effluent Toxicity (WET) limits 53% (Parameter 22414) ² Pimephales promelas (7-day chronic NOEC ¹) | 53% | 53% | 1/quarter | Composite |

The NOEC is defined as the greatest effluent dilution at which no significant effect is demonstrated. A significant effect is defined as a statistically significant difference between a specified effluent dilution and the control for toxicity (lethal or sublethal effects, whichever is specified).

Page 2a

)

The WET limits become effective on September 5, 2016.

FINAL EFFLUENT LIMITATIONS AND MONITORING REQUIREMENTS

Outfall Number 001

1. During the period beginning upon the date of discharge from the new outfall location (see Attachment A) and lasting through date of expiration, the permittee is authorized to discharge subject to the following effluent limitations:

The annual average flow of effluent shall not exceed 2.13 MGD, nor shall the average discharge during any two-hour period (2-hour peak) exceed 3,000 gpm.

| Effluent Characteristic | | Discharge I | Limitations | | Min. Self-Monitoring | Requirem e nts |
|--|----------------|-------------|-------------|-------------|-----------------------|-----------------------|
| | Daily Avg | 7-day Avg | Daily Max | Single Grab | Report Daily Avg. & | |
| | mg/l (lbs/day) | mg/l | mg/l | mg/l | Measurement Frequency | Sample Type |
| Flow, MGD | Report | N/A | Report | N/A | Continuous | Totalizing Meter |
| Biochemical Oxygen Demand (5-day) | 20 (355) | 30 | 45 | 65 | Two/week | Composite |
| Total Suspended Solids | 20 (355) | 30 | 45 | 65 | Two/week | Composite |
| E. coli, colony forming units or most probable number per 100 ml | 126 | N/A | 399 | N/A | One/week | Grab |

- 2. The effluent shall contain a chlorine residual of at least 1.0 mg/l after a detention time of at least 20 minutes (based on peak flow) and shall be monitored daily by grab sample at each chlorine contact chamber. The permittee shall dechlorinate the chlorinated effluent to less than 0.1 mg/l chlorine residual and shall monitor chlorine residual daily by grab sample after the dechlorination process. An equivalent method of disinfection may be substituted only with prior approval of the Executive Director.
- 3. The pH shall not be less than 6.0 standard units nor greater than 9.0 standard units and shall be monitored once per week by grab sample.
- 4. There shall be no discharge of floating solids or visible foam in other than trace amounts and no discharge of visible oil.
- 5. Effluent monitoring samples shall be taken at the following location(s): Following the final treatment unit.
- 6. The effluent shall contain a minimum dissolved oxygen of 2.0 mg/l and shall be monitored twice per week by grab sample.
- 7. The annual average flow and maximum 2-hour peak flow shall be reported monthly.

Page 2b

TEXAS COMMISSION ON ENVIRONMENTAL QUALITY P.O. Box 13087 Austin, Texas 78711-3087

PERMIT TO DISCHARGE WASTES

under provisions of Section 402 of the Clean Water Act and Chapter 26 of the Texas Water Code

City of Seguin

whose mailing address is

205 North River Street Seguin, Texas 78155

is authorized to treat and discharge wastes from the Walnut Branch Wastewater Treatment Facility, SIC Code 4952

located at 101 East Klein Street, in Seguin, in Guadalupe County, Texas 78155

directly to the Guadalupe River Below Comal River in Segment No. 1804 of the Guadalupe River Basin

only according to effluent limitations, monitoring requirements and other conditions set forth in this permit, as well as the rules of the Texas Commission on Environmental Quality (TCEQ), the laws of the State of Texas, and other orders of the TCEQ. The issuance of this permit does not grant to the permittee the right to use private or public property for conveyance of wastewater along the discharge route described in this permit. This includes, but is not limited to, property belonging to any individual, partnership, corporation, or other entity. Neither does this permit authorize any invasion of personal rights nor any violation of federal, state, or local laws or regulations. It is the responsibility of the permittee to acquire property rights as may be necessary to use the discharge route.

This permit shall expire at midnight, February 1, 2020.

ISSUED DATE: March 13, 2015

TPDES PERMIT NO. WQ0010277001 [For TCEQ office use only - EPA I.D. No. TX0022365]

This is a renewal that replaces TPDES Permit No. WQ0010277001 issued on April 29, 2010.

EFFLUENT LIMITATIONS AND MONITORING REQUIREMENTS

Outfall Number 001

1. During the period beginning upon the date of issuance and lasting through the date of expiration the permittee is authorized to discharge subject to the following effluent limitations:

The annual average flow of effluent shall not exceed 4.9 million gallons per day (MGD); nor shall the average discharge during any two-hour period (2-hour peak) exceed 8,333 gallons per minute (gpm).

| Effluent Characteristic | Discharge Limitations | | | Min. Self-Monitoring Requirements | | |
|---|-----------------------------|-------------------|-------------------|-----------------------------------|--|---------------------------|
| | Daily Avg mg/l (lbs/day) | 7-day Avg mg/l | Daily Max mg/l | Single Grab mg/l | Report Daily Avg. & Measurement Frequency | Daily Max. Sample Type |
| Flow, MGD | Report | N/A | Report | N/A | Continuous | Totalizing Meter |
| Carbonaceous Biochemical Oxygen Demand (5-day) | 10 (409) | 15 | 25 | 35 | Two/week | Composite |
| Total Suspended Solids | 15 (613) | 25 | 40 | 60 | Two/week | Composite |
| Ammonia Nitrogen | 3 (123) | 6 | 10 | 15 | Two/week | Composite |
| E. coli, CFU or MPN/100 ml | 126 | N/A | 399 | N/A | One/week | Grab |

- 2. The effluent shall contain a chlorine residual of at least 1.0 mg/l after a detention time of at least 20 minutes (based on peak flow) and shall be monitored daily by grab sample at each chlorination basin. The permittee shall dechlorinate the chlorinated effluent to less than 0.1 mg/l chlorine residual and shall monitor chlorine residual daily by grab sample after the dechlorination process. An equivalent method of disinfection may be substituted only with prior approval of the Executive Director.
- 3. The pH shall not be less than 6.0 standard units nor greater than 9.0 standard units and shall be monitored once per week by grab sample.
- 4. There shall be no discharge of floating solids or visible foam in other than trace amounts and no discharge of visible oil.
- 5. Effluent monitoring samples shall be taken at the following location(s): Following the final treatment unit.
- 6. The effluent shall contain a minimum dissolved oxygen of 6.0 mg/l and shall be monitored twice per week by grab sample.
- 7. The annual average flow and maximum 2-hour peak flow shall be reported monthly.

ATTACHMENT 'B' Need for Service Summary

Need for Service Summary

As noted in Attachment 'A', GBRA is tasked with protecting the water resources of the Guadalupe River basin. By providing wastewater service to the proposed area, GBRA can manage water quality within reaches and watersheds of the Guadalupe River basin.

By granting the proposed amended CCN area, GBRA can provide central wastewater service in an economical and environmental friendly manner. This will eliminate the need for new development to install costly septic systems, and will eventually provide existing residents the opportunity to abandon their existing septic system. GBRA has a history of environmental stewardship and is excited to continue that effort in the proposed additional service area. As noted in GBRA's Wastewater Master Plan, the soils in the area are undesirable for onsite septic systems due to low percolation rates.

For the last several months, GBRA has met with the surrounding municipalities including the City of New Braunfels, New Braunfels Utilities (NBU), City of Seguin, Crystal Clear Special Utility District, Springs Hill Water Supply Corporation, and Green Valley Special Utility District. These local municipalities are in support of GBRA providing wastewater service to this area. Copies of the Letters of Support are provided in Attachment 'C' of this application.

ATTACHMENT 'C' Letters of Support

RESOLUTION 2017-R 29

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF NEW BRAUNFELS, TEXAS, IN SUPPORT OF THE GUADALUPE BLANCO RIVER AUTHORITY (GBRA) APPLYING TO THE PUBLIC UTILITY COMMISSION OF TEXAS FOR AUTHORIZATION TO EXPAND THEIR CERTIFICATE OF CONVENIENCE AND NECESSITY (CCN) TO PROVIDE CENTRALIZED WASTEWATER SERVICES IN AREAS OF NEW BRAUNFELS' CITY LIMITS AND ETJ ON THE EAST SIDE OF THE GUADALUPE RIVER/LAKE DUNLAP.

WHEREAS, the subject expansion area, as depicted on the attached map, is a rapidly developing area between New Braunfels and Seguin; and

WHEREAS, the subject expansion area is not presently served by centralized wastewater services; and

WHEREAS, centralized wastewater services are an important tool for communities to manage growth, development and water quality; and

WHEREAS, centralized wastewater services are an efficient, environmentally sound, and sprawl-reducing alternative to individual septic systems and private package sewer treatment plants; and

WHEREAS, GBRA's plans for expansion into the subject area do not include sewer lines crossing either above, through or under the Guadalupe River/Lake Dunlap; and

WHEREAS, with approval of GBRA's request by the PUC of Texas current and future residents and business owners in the subject area will have more efficient and reliable wastewater services.

NOW THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF NEW BRAUNFELS, TEXAS:

That the City of New Braunfels supports GBRA's request for expansion of their wastewater/sewer CCN into the subject area as depicted on-the attached map.

Passed and approved this the 26th of June, 2017.

Barron Casteel, Mayor

Patrick Aten, City Secretary

GBRA's application to amend its sewer certificate of convenience and necessity RE:

Dear Mr. Nichols:

On behalf of Springs Hill Water Supply Corporation, we want to offer our support of the Guadalupe Blanco River Authority's decision to file an application at the Public Utility Commission to amend and expand its sewer certificate of convenience and necessity. It is my understanding that a significant portion of this new area that will be incorporated into GBRA's sewer CCN boundaries overlaps with Springs Hill WSC's current water CCN boundaries; and, thus, the membership of Springs Hill is impacted by this application.

Local governments and other retail water and sewer service providers should endeavor to work together and install/operate utility service systems to ultimately benefit their end user customers, and GBRA's decision to grow its retail sewer service area and provide landowners with the opportunity to obtain centralized sewer service is certainly a benefit to Springs Hill's affected members. Once the sewer CCN amendment application is approved, Springs Hill's retail water service members located within this overlapping area could also become retail sewer service customers of GBRA.

Springs Hill looks forward to working with GBRA so that both entities can provide their respective retail service to the end user in an efficient manner. Springs Hill's billing and field Staff are ready, willing, and well versed in coordinating billing and meter reading activities with separate retail sewer service providers.

If you have any questions regarding how we can work together with billing matters or otherwise, do not hesitate to contact me at (830) 379-7683.

Very truly yours,

(CONN) Swill Sk

Jeanne Schnuriger, General Mariager

ATTACHMENT 'D' Written Description of Service Area

General Description and Location of the Proposed 7345.2-Acre Additional GBRA Sewer CCN Area

The proposed 7345.2-acre addition to Guadalupe-Blanco River Authority's (GBRA) Sewer CCN (#20892) falls within the extents of Guadalupe County and within the extents of the Springs Hill Water Supply Corporation's (WSC) Water CCN (#10666). No portion of the proposed additional area falls within an existing Sewer CCN. The additional area will extend from the eastern portion of GBRA's existing Sewer CCN from the Guadalupe River adjacent to The Bandit Golf Club, northeast to the area between FM 105 (Huber Road) & FM 140 (Schwarzlose Road).

Starting from the existing eastern boundary of GBRA's Sewer CCN at the Guadalupe River and moving clockwise, the additional 7345.2-acre area will be bound by Elley Lane to the north until the north right-of-way lane for State Highway 46 where it will then be bound by the City of New Braunfels Utilities (NBU) Water CCN (#10677) to the east/northeast and follow that boundary to the eastern most portion of NBU's Water CCN at FM 140. The new area then extends east approximately 7,900-LF to the Crystal Clear's Water CCN (#10297) near the intersection of FM 105 & FM 142 (Dietert Road). The additional area will then be bound by Crystal Clear's Water CCN approximately 6,950-LF South, then approximately 2,730-LF East, then approximately 2,950-LF South to the intersection of Crystal Clear's Water CCN and the City of Seguin's Sewer CCN (#20270). The additional area will then be bound by the City of Seguin's Sewer CCN to the south and southwest to the Guadalupe River at the starting point mentioned above.

METES AND BOUNDS DESCRIPTION FOR A 77.960 ACRE TRACT OF LAND

Being 77.960 acres of land situated in the City of New Braunfels, Guadalupe County, Texas, and being part of the William. H. Pate Survey No. 22, Abstract No. 259, and a part of the Sarah DeWitt, Survey No. 48, Abstract No. 359, Guadalupe County, Texas, and being out of 150.00 acre tract of land described in Volume 4277, Page 743 of the Official Public Records of Guadalupe County, Texas and said 77.960 acre tract of land being more particularly described as follows:

BEGINNING at a ½" iron pin found along the Northwesterly line of Klein Road, being the southerly corner of a One acre tract of land conveyed to Deborah Kraft in Volume 2648, Page 798 of the Deed Records of Guadalupe County, Texas, and being the Southeasterly corner of this herein described 77.960 acre tract of land and the POINT OF BEGINNING;

THENCE with the Northwest line of Klein Road, S 44° 08' 40" W a distance of 1311.45 feet to a ½" iron pin found for the Southeasterly corner of Lot 4, Ashby Acres, as recorded in Volume 5, Page 141A of the Map and Plat Records of Guadalupe County, Texas and being the Southernmost corner of this herein described 77.960 acre tract of land;

THENCE with the Northeasterly line of Lots 1, 2, 3, and 4 of said Ashby Acres, N 41° 12' 53" W a distance of 3305.77 feet to a ½" iron pin with cap stamped "DAM #5348 PROP. COR." set for the Northerly corner of Lot 1, Ashby Acres, and in the Southeasterly line of a 8.296 acre tract of land conveyed to Arthur Jacobsen in Volume 1228, Page 91 of the Official Records of Guadalupe County, Texas, and being the Westernmost corner of this herein described 77.960 acre tract of land;

CERTIFIED MAIL 91 7199 9991 7036 0227 2220 RETURN RECEIPT REQUESTED

Mr. Michael Urrutia Director of Water Quality Services GBRA Lake Dunlap 933 E Court Street Seguin, Texas 78155-5819

Re: Notice of Violation for Compliance Evaluation Investigation at: GBRA Lake Dunlap, 174 Century Ranch Road, New Braunfels, Comal County, Texas Regulated Entity No.: 102333820, TCEO ID No.: WO0011378001

Dear Mr. Urrutia:

On May 10, 2016, Ms. Patricia Blackwell and Mr. Chris Dziuk of the Texas Commission on Environmental Quality (TCEQ) San Antonio Region Office conducted an investigation of the above-referenced regulated entity to evaluate compliance with applicable requirements for wastewater treatment. Enclosed is a summary which lists the investigation findings. During the investigation, some concerns were noted which were alleged noncompliances that have been resolved based on subsequent corrective action. In addition, certain outstanding alleged violations were identified for which compliance documentation is required. Please submit to this office by August 29, 2016 a written description of corrective action taken and the required documentation demonstrating that compliance has been achieved for each of the outstanding alleged violations.

In the listing of the alleged violations, we have cited applicable requirements, including TCEQ rules. Please note that both the rules themselves and the agency brochure entitled Obtaining TCEQ Rules (GI 032) are located on our agency website at http://www.tceq.state.tx.us for your reference. If you would like a hard copy of this brochure mailed to you, you may call and request one from either the San Antonio Region Office at 210-490-3096 or the Central Office Publications Ordering Team at 512-239-0028.

The TCEQ appreciates your assistance in this matter. Please note that the Legislature has granted TCEQ enforcement powers which we may exercise to ensure compliance with environmental regulatory requirements. We anticipate that you will resolve the alleged violations as required in order to protect the State's environment. If you have additional information that we are unaware of, you have the opportunity to contest the violations documented in this notice. Should you choose to do so, you must notify the

Mr. Michael Urrutia Page 2 July 29, 2016

San Antonio Region Office within 10 days from the date of this letter. At that time, Ms. Lynn Bumguardner, Water Section Manager will schedule a violation review meeting to

be conducted at a specified date and time. However, please be advised that if you decide to participate in the violation review process, the TCEQ may still require you to adhere to the compliance schedule included in the enclosed Summary of Investigation Findings until an official decision is made regarding the status of any or all of the contested violations.

If you or members of your staff have any questions, please feel free to contact Ms. Patricia Blackwell in the San Antonio Region Office at 210-403-4065.

Sincerely,

Joy Thurston-Cook, Water Section Team Leader

San Antonio Region Office

OUTSTANDING ALLEGED VIOLATION(S) ASSOCIATED TO A NOTICE OF VIOLATION

Track No: 605779

Compliance Due Date: 08/29/2016

30 TAC Chapter 305.125(5)

LIC WQ0011378001, TPDES Permit Operational Requirements No.1

Alleged Violation:

Investigation: 1330291

Comment Date: 05/31/2016

Failed to properly maintain the facility. Specifically, there was excessive vegetation on the

facility fencing. The vegetation must be removed from the fence.

Recommended Corrective Action: Submit documentation indicating that the excessive

vegetation has been removed from the facility fence

Track No: 605789

Compliance Due Date: 08/29/2016

30 TAC Chapter 305.125(5)

LIC WQ0011378001, TPDES Permit No. WQ0011378001

Operational Requirement No.1

Alleged Violation:

Investigation: 1330291

Comment Date 05/31/2016

Failed to maintain the flow measurement device. Specifically, the weir crest was not level. At the time of the investigation, only about 30% of the weir had effluent flowing. There was no flow over the remaining 70% of the weir.

Recommended Corrective Action: The crest of a weir must be exactly level to ensure a uniform depth of flow. Submit documentation indicating that the weir has been leveled.

Track No: 605793

ASSOCIATED TO A NOTICE OF VIOLATION

Track No: 605784

30 TAC Chapter 305.125(11)(B) Summary of Investigation Findings

Page 1 of 2

30 TAC Chapter 305.125(11)(C)

Alleged Violation:

Investigation: 1330291 Comment Date: 05/31/2016

Failed to make all sludge documents readily available to TCEQ personnel. Specifically, the 2015 annual sludge report was not available at the time of the investigation.

Recommended Corrective Action: The required information shall be retained at the facility site and/or shall be readily available for review by TCEQ representatives for a period of five years Submit copies of the 2015 annual sludge report to verify compliance.

Resolution: On 05/31/2016 documentation was submitted to resolve the violation. See attachment #3

ADDITIONAL ISSUES

Description

Are adequate safeguards maintained to prevent the discharge of untreated or inadequately treated wastes during electrical power failure by means of alternate power sources, standby generators and/or retention structures?

Were region collected samples compliant minimum)?

Additional Comments

The generator runs the disinfection unit only. A new generator has been purchased, but has not been installed The new generator will run the entire plant. A copy of the purchase order for the new generator is attached to the report. (Attachment 3)

A follow up record review will be conducted once with the permit limits (except pH, DO and Cl2) the results of the TCEQ San Antonio Region grab samples are received for Total Phosphates. Compliance with the effluent monitoring limitations will be venfied at the time. Samples results for CBOD5, TSS. NH3N and E. coli were compliant with permit requirements

Dunlap WWTP DOC021.pdf

Good morning Patricia,

Here is a copy of the purchase order and Dunlap annual sludge report. The generator will be delivered in July I am told. I am currently looking for a contractor for the leveling of the weir on the clarifier. The signs are being constructed, they will be installed as soon as we get them. Our in house crew will be cleaning the fences, this has been scheduled but the rain has been an issue. It will probably be a month or so because crew is spilling water from Canyon lake. If you have any questions please feel free to call 830-305-0480.

Thank you and have a great day!

Joel

ATTACHMENT 'K' GBRA/NBU Wholesale Agreements

MEMORANDUM OF UNDERSTANDING

This Memorandum of Understanding ("MOU") between the Guadalupe-Blanco River Authority ("GBRA") and New Braunfels Utilities ("NBU") (collectively, "the Parties") is acknowledged by the Parties on the date indicated on the last page of the MOU. The Parties recognize that this MOU is not a contract or binding agreement, but rather an acknowledgement by GBRA and NBU, respectively, of certain objectives with respect to GBRA's provision of water from sources owned or controlled by GBRA in the Guadalupe River Basin, including Canyon Reservoir, and NBU's provision of wholesale wastewater treatment service to GBRA, including treatment at NBU's Sam C. McKenzie, Jr. Water Reclamation Facility (the "McKenzie Plant").

I. RECITALS

WHEREAS, to address anticipated future shortages in water supply to meet increasing demand in the New Braunfels area, NBU filed an application with Texas Commission on Environmental Quality ("TCEQ") for new Water Use Permit No. 12469 (the "Permit"), which, if issued, would authorize NBU to divert and reuse up to 9,408 acre-feet of its groundwater-based return flows discharged from three wastewater treatment plants in the Guadalupe River for Municipal, Industrial, and Agricultural use;

WHEREAS, the Executive Director of the Texas Commission on Environmental Quality (the "TCEQ") has issued a draft permit;

WHEREAS, GBRA requested a contested case hearing on the Permit, which the TCEQ granted on August 9, 2016, and was subsequently named a party to the contested case hearing on the Permit at the State Office of Administrative Hearings ("SOAH") on December 12, 2016;

WHEREAS, the Parties entered into settlement negotiations in an effort to resolve the issues disputed in the contested case hearing, as well as others, and agreed to request a six-month continuance of the contested case hearing, which the SOAH Administrative Law Judges granted on February 23, 2017;

WHEREAS, GBRA anticipates increased wastewater service demand in certain drainage basins outside of NBU's retail service area generally located east of the Guadalupe River along State Highway 46;

WHEREAS, GBRA anticipates a corresponding need for wastewater treatment capacity to meet the increasing demand and has requested NBU provide wholesale wastewater treatment service to GBRA with capacity up to 2.5 million gallons per day ("MGD");

WHEREAS, GBRA is developing a water supply project that will produce and treat up to 15,000 acre-feet of groundwater from the Carrizo Aquifer in Gonzales County and to deliver such groundwater to customers;

WHEREAS, the Parties wish to enter into a mutual agreement that will establish a guaranteed source of raw water supply from GBRA to NBU, a guaranteed supply of available

wastewater treatment capacity available on a wholesale basis from NBU to GBRA, and resolution of disputed issues that will avoid the expense of a contested case hearing on the Permit:

WHEREAS, this MOU outlines the general terms of the agreement in principle of the Parties to work together to identify and implement short-term and long-term water and wastewater supply options and availability; and

WHEREAS, upon acknowledgement of this MOU, NBU intends to withdraw its application for the Permit and request dismissal of the pending hearing without prejudice under the applicable TCEQ regulations;

NOW, THEREFORE, the Parties expressly acknowledge the following understandings with respect to water and wastewater supply options in the Guadalupe River basin:

II. UNDERSTANDINGS

A. Wholesale Wastewater Treatment Service

The Parties acknowledge that they will, in good faith, exercise all reasonable efforts to negotiate and enter into a formal, binding agreement with the following terms:

- 1. NBU will provide wholesale wastewater treatment service of up to 2.5 MGD of the total 10 MGD capacity of its McKenzie Wastewater Treatment Plant that allows GBRA discretion to decide which drainage basins in the Guadalupe River Basin, outside of NBU's service area, will be developed based on NBU's wholesale wastewater service capacity;
- 2. GBRA will pay to NBU \$4,081.00 per living unit equivalent ("LUE") for capital participation in existing facilities (the McKenzie Plant and related infrastructure), which will be calculated as a percentage of the actual as-built treatment capacity of the McKenzie Plant at the time of payment (the "Capital Participation Fee"). GBRA will pay the Capital Participation Fee prior to service being provided to reserve capacity up to 25% of the actual as-built treatment capacity of the McKenzie Plant at the time of payment;
- 3. For any future expansion of the McKenzie Plant, a new Capital Participation Fee per LUE payable by GBRA will be established and applied to any additional LUE connected to the expanded facility and served by the up to 2.5 MGD commitment;
- 4. NBU will calculate a fixed total LUE for any future expansion based on hourly peak/daily peak capacity of the McKenzie Plant and any such commitment by or to GBRA shall not exceed 2.5 MGD;
- 5. For purposes of illustration, based on existing McKenzie Plant capacity at the time of this acknowledgement (2.5 MGD), the capacity that is available to NBU to provide service to GBRA under the terms of this MOU (0.625 MGD, or 25 percent of 2.5 MGD) will

support 2,083 LUE, while 25 percent of the capacity of the McKenzie Plant when fully built out to permitted capacity (2.5 MGD of the permitted 10 MGD capacity) will support 8,333 LUE.

- 6. In addition to the Capital Participation Fee, NBU will charge a monthly rate for actual wholesale wastewater service provided of \$4.527 per 1,000 gallons of wholesale wastewater collected by NBU from GBRA;
- 7. GBRA anticipates that it will establish a retail rate that will result in a customer rate that is no less than \$7.80 per 1,000 gallons. To the extent allowed by regulators and to the extent allowed under applicable law, GBRA's customer rate will be greater than the rate charged by NBU to NBU's retail sewer customers in any wholesale wastewater agreement;
- 8. GBRA will comply with the requirements and limitations of NBU's pretreatment program, including prescribed fees if sewage contributed by GBRA exceeds pretreatment parameters; and
- 9. NBU will provide multiple delivery points for GBRA to deliver wastewater to NBU's system, which will be clearly and specifically designated in the final agreement, along with flow monitoring expectations and requirements for each delivery point.

B. Water Supply

The Parties acknowledge that they will, in good faith, exercise all reasonable efforts to negotiate and enter into a formal, binding agreement with the following terms:

- 1. The Parties will work together to identify and implement short-term and long-term water supply options for NBU's exclusive use;
- 2. GBRA will work with NBU to identify temporary raw water options that could be available to NBU as needed to meet any municipal water supply needs, until additional long term water supply projects are developed;
- 3. GBRA is developing up to 15,000 acre-feet per year of groundwater in Gonzales County (the "Gonzales County groundwater")
- 4. GBRA will develop the Gonzales County groundwater project to make water available to NBU, either treated water directly from the groundwater source or through raw water in Canyon Reservoir that is made available by the offset of the groundwater source, by 2023 or earlier:
- 5. The cost of the Gonzales County groundwater project will include fixed costs per acre foot for groundwater leases and fixed operating costs on a take-or-pay basis, debt service per acre foot for infrastructure related to the production, treatment, and delivery of the groundwater on a take-or-pay basis, and operation and maintenance costs of the facilities on a take-and-pay basis;

- 6. GBRA anticipates that all take-and-pay charges will commence when water deliveries commence.
- 7. GBRA anticipates that all take-or-pay charges will commence one year after execution of an agreement with the exception of debt service which shall only commence when project debt is outstanding.
- 8. GBRA will apply to the Texas Water Development Board ("TWDB") for funding from the State Water Implementation Fund of Texas ("SWIFT") program for financing the construction of the project, which will allow GBRA access to below-market interest rates or principal deferral for projects with capacity that will not be utilized for several years;
- 9. GBRA intends to provide NBU and other primary project participants with TWDB financing options available at the time that best meets their long-term financing and cash flow needs.
- 10. GBRA intends to provide NBU (and other primary project participants) the ability to structure the debt component of the water supply agreement based on NBU's needs within the parameters available from the TWDB;
- 11. GBRA's application to the TWDB for SWIFT funding will be submitted before the deadline for SWIFT applications in 2018, and all contracts necessary for water supply between the Parties will be formally and finally executed before such deadline;
- 12. GBRA's application to the TWDB for SWIFT funding will request that repayment of debt service not commence until a time concurrent with or immediately before scheduled construction completion of the project.
- 13. GBRA's preliminary estimate for delivering 8,000 acre-feet of treated groundwater to NBU from a 15,000 acre-foot project is approximately \$1,420 \$1,470 per acre-foot with TWDB SWIFT financing. GBRA's preliminary estimate for making 8,000 acre-feet of raw water available to NBU from a 15,000 acre-foot project is approximately \$1,350 \$1,400 per acre-foot with TWDB SWIFT Financing.
- 14. GBRA will provide consent if requested by NBU, as part of the water supply agreement, to NBU's subleasing of raw or treated water supply obtained from GBRA under the terms of the water supply agreement; and
- 15. GBRA, in the water supply agreement, will make available first to NBU any additional long-term water supply options that come available from downstream of NBU for a period of not less than 30 years.

C. TCEO Indirect Reuse Permit Hearing

1. Upon execution of the agreement described in Section II.B. herein by both Parties, NBU shall withdraw its application to TCEQ for the Permit and to seek from SOAH and/or TCEQ

dismissal of the application without prejudice, and NBU shall take all actions required under applicable regulations to obtain such dismissal;

- 2. NBU further agrees that, upon withdrawal of the above-referenced application, it will not file an application for indirect reuse of groundwater within the Guadalupe River Basin within the next 5 years without consent from GBRA;
- 3. GBRA acknowledges that, after 5 years, NBU intends to file a new application with the TCEQ for an indirect reuse authorization to allow NBU to divert and for NBU to reuse all of its groundwater-based return flows discharged from the same wastewater treatment facilities identified in NBU's application for the Permit;
- 4. The Parties agree that any future indirect reuse authorization application filed by NBU will be filed in full compliance with any law as it exists at the time the application is filed, including any law developed, created, or changed as a result of any legal proceedings relating to similar matters;
- 5. GBRA agrees that, after withdrawal of NBU's application under Paragraph II.C.2, GBRA will not protest or otherwise oppose an application by NBU to the TCEQ for an indirect reuse authorization for diversion reuse solely by NBU of groundwater-based return flows discharged from the three wastewater treatment facilities identified in NBU's application for the Permit; and
- 6. GBRA agrees to incorporate the agreement not to protest or oppose NBU's future indirect reuse authorization application into the terms of the binding, formal agreement.

FW: Wastewater Service in Laubach Tract Subject:

FYI - See below.

I asked for a letter confirming that NBU did not oppose GBRA providing WW Service to the southern part of the Laubach Tract (Dunlap service area along Klein Rd). Instead Michael Short instead sent an e-mail confirming NBU's support for GBRA's service of that area as well as support for GBRA's intent to include the area in a CCN expansion.

From: Michael Short [mailto:mshort@nbutexas.com] Sent: Thursday, September 28, 2017 7:30 AM

To: Alvin Schuera

Subject: RE: Wastewater Service in Laubach Tract

Alvin,

Please accept this e-mail as a response to your request as described below and as documented in your letter August 8th. NBU supports GBRA's action to move forward with providing the Laubach South Tract sewer service. In addition NBU also supports GBRA's incorporation of the tract into GBRA's CCN.

Alvin,

Yes I did receive. I am in favor I just need to craft a formal response and I will try and have that complete next week. I apologize for the delay.

Subject: Wastewater Service in Laubach Tract

Mike, I sent a letter over the first part of August related to GBRA's interest in providing wastewater service to the "southern" portion of Laubach tract of land which lies north of Klein Road across from Legend Pond. I was if you received the letter and if you and your staff have had an opportunity to discuss wastewater service in that area. If my memory serves me correctly, we had previously discussed NBU potentially serving the northern portion of the tract and GBRA serving the southern portion due to the topography of the land in that area.

I would appreciate any information or update that you can provide. Thanks.

off of a come

Executive Director/CEO

The Guadalupe Valley Hydroelectric Division operates six "low head" hydroelectric plants in Guadalupe and Gonzales counties capable of producing 16 megawatts. All electricity produced by the division is delivered to the Guadalupe Valley Electric Cooperative (GVEC) for consumption principally within the river basin. The charge for the power delivered to GVEC includes a fixed monthly charge of \$125,000 and an energy charge of 3.14¢ per kilowatt hour of energy produced. GV Hydro Division personnel are responsible for the operation and maintenance of the generating stations as well as the associated dams, lakes, ancillary equipment and adjacent properties.

The Rural Utilities Division operates and maintains six wastewater treatment plants in Comal, Hays and Guadalupe counties. These small plants serve rural areas where septic tanks do not provide proper or safe wastewater disposal and the extension of wastewater services from nearby municipalities is not cost effective. The six wastewater plants include Canyon Park, Dunlap, Springs Hill, Northcliffe, Shadow Creek and Sunfield. The most recent of these wastewater treatment plant operations is the Sunfield Municipal Utility District's (MUD) Wastewater Treatment Plant. GBRA began operating this plant in Fiscal Year 2009 utilizing personnel from the nearby City of Buda and Shadow Creek wastewater plants that are also operated by GBRA. GBRA's operation of the Buda, Shadow Creek and Sunfield plants using the same personnel provides a cost effective means for GBRA to safely and properly meet their wastewater treatment needs of both the City and two MUDs.

The development and operation of water supply sources and raw water delivery systems is the responsibility of the Water Resource Division. The division contracts with municipal, industrial and agricultural users throughout the river basin to provide a dependable supply of surface water. This division is anchored in the upper reaches of the river basin by Canyon Reservoir and in the lower reaches of the basin by the Guadalupe River Diversion Dam and Salt Water Barrier. Additionally, this division is responsible for GBRA's water quality program as well as the operation of a regional water quality laboratory located at the general office in Seguin. The regional water quality laboratory provides services to GBRA's other operations as well as to individuals, municipalities, industries and private entities throughout the region. Other operations recognized within the Water Resource Division are the Calhoun Canal System, the City of San Marcos Water Treatment Plant, the City of Buda Wastewater Treatment Plant, the Western Canyon Water Treatment Plant, and retail, treated water delivery and wastewater treatment systems in Comal County. Included within these Comal County operations are the Comal Trace, Johnson Ranch, and Cordillera real estate developments and starting in FY 2015, the Singing Hills Wastewater Plant on behalf of the City of Bulverde.

GBRA's Port Lavaca Water Treatment Plant Division operates and maintains a water treatment plant that supplies treated water to the City of Port Lavaca, the Calhoun County Rural Water Supply System, and the Port O'Connor Improvement District (ID). The division, which commenced operation in 1969, receives raw water from the Guadalupe River delivered through 20 miles of canals. GBRA then treats and disinfects the water to drinking water standards before delivering it to the City, Rural Water System, and ID.

The Calhoun County Rural Water Supply Division began in 1974 and currently operates and maintains a treated water distribution system to supply approximately 1,407 homes and businesses located throughout a large portion of the unincorporated areas of Calhoun County.

The Coleto Creek Division operates and maintains the Coleto Creek Reservoir located thirteen miles southwest of Victoria just off State Highway 59. The reservoir, which was completed and filled in 1981, serves as a cooling pond for a coal-fired electric generating plant owned by Coleto Creek Power, LP. This division also operates and maintains recreation facilities that provide grounds for camping and picnicking as well as public access to the lake for fishing, swimming, and boating.

Surface water from the San Marcos River is treated by the *Luling Water Treatment Plant Division* and delivered to the City of Luling and the City of Lockhart for distribution. The plant was constructed in 1978 and has a treatment capacity of 2.5 MGD.

the dam. This caused agricultural losses which when coupled with losses in agricultural support industries were in the billions of dollars. Fortunately, due to the effects of El Nino, rainfall during 2015 and 2016 has resulted in reservoirs recovering to full or nearly full levels for much of the State. While this is a welcome change, the State as well as various regional water providers, have recognized the need to implement additional water management strategies identified in the State's regional water planning process.

The Local Economy. GBRA's service area is geographically part of south central Texas. It stretches from the Texas Hill Country through the IH-35, IH10, and State Highway 130 Corridors and onto the Texas Gulf Coast. This geographic diversity provides economic diversity with a unique combination of agriculture, oil and gas, defense, high tech, higher education centers, tourism, seawater ports, and heavy industry. This diversity allows the regional economy to be among the State's growth leaders and outpace the national economy. For reporting purposes, the State Comptroller places most of the GBRA service area into the Alamo Region. The counties in and around the Cities of San Antonio and Austin are the most populous of this area.

The northern region of the GBRA district is lies between the Austin and San Antonio Metropolitan Statistical Areas (MSAs). This location and the vibrant economies of these two cities have correspondingly elevated the economy of the northern Guadalupe River Basin over the last several decades. Both of these cities are ranked in the top twenty nationally when judged on job growth and this will obviously float the economic possibilities of the surrounding areas of the GBRA district along with them. Consistent with the exceptional growth of its larger neighbors, the City of San Marcos has been named by Forbes magazine as "America's Next Metropolis". Forbes cites the astounding 37% growth rate as the reason for its declaration as well as the recent construction of Amazon's newest distribution center in San Marcos.

Another noteworthy growth factor for the local economy has been the oil and gas exploration boom related to the Eagle Ford Shale discovery over the last decade. This formation stretches across 23 Texas counties and two of those counties, Gonzales and DeWitt, are located in the middle stretch of the GBRA district. The impact of this discovery is still evident but due to the drop in global oil prices, the \$61 billion per year economic impact this discovery has produced in previous years has diminished somewhat. Nevertheless, the economic ripple effects can be seen in everything from new housing to new commercial developments. Just north of Gonzales and DeWitt Counties lies Guadalupe County. This is another county within the GBRA district that is experiencing considerable job growth. In an August 13, 2013 article of Money Magazine, this job growth is attributed to the construction of several new manufacturing and distribution centers including Caterpillar and Continental Automotive which in the aggregate have invested \$459 million and brought in over 2,000 jobs. Further south in GBRA's district lies the City of Victoria. With its location near the Texas Gulf Coast, the Eagle Ford oil discovery, and a number of large petrochemical plants within a 30 mile radius, the City of Victoria is an economic standout. In fact, according to the Milken Institute's 2014 report entitled "2014 Best Performing Cities: Where America's Jobs Are Created and Sustained", the City of Victoria was ranked number three in the country. Within an easy commute from Victoria, just south in Calhoun County, Formosa Plastics is in the process of expanding its petrochemical plant by more than \$1 billion which should further continue the area's economic expansion and job growth.

To continue these results and economic positioning for years into the future, it is GBRA's mission and role to assist the area's economy and population growth by providing high quality water and wastewater treatment while also developing future water supplies in order to better assure the district's continued economic vitality.

MAJOR INITIATIVES

For the Year. GBRA's major initiative for Fiscal Year 2016, is the provision of ample water resources for the Guadalupe River Basin along with the planning that is necessary to permit, finance,

31

among these possibilities is the development of groundwater from the Carrizo Aquifer in the Gonzales County area of GBRA's district. It is incumbent on both GBRA and the regional water planning group to continue to study and ultimately implement various water supply projects in order to meet the water demands of the rapidly growing population of the Guadalupe River Basin.

In addition to the effort focused on future water supply alternatives, GBRA also worked to ensure existing water supplies are used efficiently and wisely. GBRA actively worked with water users and local governments located within the Basin to educate them on water conservation efforts. GBRA also worked closely with the Edwards Aquifer Authority, Guadalupe Basin Coalition, and the Edwards Aquifer Recovery Implementation Group to ensure the Edwards aquifer was managed effectively and in accordance with state law thereby ensuring adequate springflow into the Guadalupe and San Marcos Rivers.

FINANCIAL INFORMATION

Management of GBRA is responsible for establishing and maintaining an internal control structure designed to ensure that the assets of GBRA are protected from loss, theft or misuse and to ensure adequate accounting data is compiled to allow for the preparation of financial statements in conformity with accounting principles generally accepted in the United States of America. The internal control structure is designed to provide reasonable, but not absolute, assurance that these objectives are met. The concept of reasonable assurance recognizes that: (1) the cost of a control should not exceed the benefits likely to be derived; and (2) the valuation of costs and benefits requires estimates and judgments by management. As demonstrated by the statements and schedules included in the financial section of this report as well as the Management Discussion and Analysis on pages 46 through 50, GBRA continues to meet its responsibility for sound financial management. GBRA recommends readers pay close attention to each section of this report including the oversight review provided by the management discussion and analysis in order to have a thorough understanding of GBRA, its activities, financial position and results of operations.

In addition to other internal controls, GBRA also maintains budgetary controls. The objective of these budgetary controls is to ensure compliance with contractual provisions and to properly manage resources. Since GBRA does not have the power of taxation, there is no appropriated budget or encumbrance accounting system nor any legal requirement to include comparative budget to actual expenditure statements in this report. Nevertheless, the GBRA staff diligently prepares the Annual Work Plan and Budget to assure projects are prioritized and the use of funds is effective and efficient.

GBRA's financial policies and the resulting rates and financial structure provide support to the management and decision making of the organization. Since GBRA is not a taxing district, it must rely solely upon the service rates that are adopted and the customer revenue that is generated to support GBRA's projects and operations. One strategy that GBRA has adopted through the years to mitigate the volatility of its revenue stream is to diversify operations. One group of operations are "rate-based" and these operations are structured in such a way that financial gains and losses may result. A second group of operations are "contract-based" and these operations are structured to yield an exact cost of service to customers with no corresponding financial gain or loss to GBRA. This strategy has allowed GBRA to expand its operations through the years, meet its legislative mandate of providing water and wastewater services, mitigate financial risk, while still accumulating the financial reserves important to any viable organization. Another rate strategy that GBRA has employed is the requirement of a debt coverage factor on all bond issuances that are of a regional, multi-customer nature. This coverage factor has allowed GBRA to expand its financial reserves and position the organization to better assimilate the monetary impacts of natural disasters, unscheduled repair projects, and any customer defaults while also providing funds for new project start up. These strategies have been particularly useful this past year in dealing with the effects of the flood and studies to determine the most appropriate new water supply project.

Other Matters

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis, the schedule of changes in the net pension liability and related ratios, and schedule of employer contributions on pages 38-42 and 68-70 be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Other Information

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the Guadalupe-Blanco River Authority's basic financial statements. The introductory section, other supplemental schedules, and statistical section are presented for purposes of additional analysis and are not a required part of the basic financial statements.

The other supplemental schedules are the responsibility of management and were derived from and relate directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the other supplemental schedules are fairly stated, in all material respects, in relation to the basic financial statements as a whole.

The introductory and statistical sections have not been subjected to the auditing procedures applied in the audit of the basic financial statements and, accordingly, we do not express an opinion or provide any assurance on them.

Other Reporting Required by Government Auditing Standards

In accordance with Government Auditing Standards, we have also issued our report dated December 14, 2016, on our consideration of Guadalupe-Blanco River Authority's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with Government Auditing Standards in considering Guadalupe-Blanco River Authority's internal control over financial reporting and compliance.

Certified Public Accountants San Antonio, Texas

December 14, 2016

ABIP, PZ

\$5,383,066 per year during the period. This has been further manifested in an increase of \$4,732,084 in Cash, Cash Equivalents, and Unrestricted Investments during the period. The Cash and Unrestricted Investment increase is principally reflected in the 2014 – 2016 increase in Other Assets – Investments Unrestricted of \$5,533,904. Another noteworthy item for the three year period relates to the changing pension plan reporting requirements. Starting in 2015, GASB Statement 68 requires that governmental organizations recognize in their financial statements any Unfunded Actuarial Accrued Liability associated with a defined benefit pension plan. The net result of this altered accounting includes recording in FY 2016 and 2015 respectively, a Net Pension Liability of \$6,588,043 and \$4,320,626. Disclosure requirements that further explain GBRA's pension plan and the requirements of GASB 68 are found in Footnote C. GBRA emphasizes that despite the financial statement consequences of these altered Pension Plan accounting requirements, GBRA's operations and their financial statement impacts has been positive over the period herein presented as previously stated. The following table presents a Condensed Statement of Net Position for August 31, 2016, 2015 and 2014:

| Total Liabilites | | 134,567,095 | 137,104,669 |
| DEFERRED INFLOWS OF RESOURCES | • | 35,357 7,969,798 | 6,827,070 |
| NET POSITION | | | |
| Net Investments in Capital Assets | \$ 45,21 | 12,346 \$ 43,492,246 | \$ 41,302,982 |
| Restricted for Debt Service | 4,73 | 32,175 6,916,028 | 6,874,088 |
| Restricted for Insurance | 1,30 | 00,517 1,184,715 | 1,173,475 |
| Unrestricted | • | 12,454 22,926,275 | 27,977,413 |
| Total Net Position | | 74,519,264 | 77,327,958 |
| Total Liabilites, Deferred Inflows and Net Position | \$ 221,80 | | \$ 221,259,697 |

The Total Net Position amount in the above statement is subdivided into an Unrestricted Net Position amount, two Restricted Net Positions amounts, and a final amount described as Net Investments in Capital Assets. The two restricted Net Position subcomponents include debt service payments, and insurance reservations. These reserve accounts are explained in more detail in Footnotes A and G.

adequate to offset the \$3.6M increase in Program Expenses and Interest Expense. While various factors caused this result, principal among them was a commitment to increase customer rates when necessary, an aggressive plan to control discretionary spending, and the reduction interest expense through the amortization and periodic refunding of long-term debt.

Capital Asset and Long-Term Debt Activity

As of August 31, 2016, 2015, and 2014 respectively, GBRA's total investment in Long-Term Capital Assets net of depreciation were \$165,632,254; \$169,048,256; and \$173,439,744. These capital assets which are shown in the long-term asset section of GBRA's Statement of Net Position are comprised of a number of different types of assets. Included in this asset type are water rights, dams, canals, water treatment plants, wastewater treatment plants, park facilities, hydroelectric plants, pipelines, and electric transmission facilities. The amount of capital assets recognized by GBRA declined by 4.5% or \$7,807,490 during period FY 2014-2016. The principal reason for this asset decrease is the recognition of annual depreciation costs on these assets with no corresponding large asset acquisition to offset the depreciation.

GBRA's long-term debt is comprised of outstanding revenue bond issues, bank loans, and a loan from the United States Government related to the construction of Canyon Reservoir. The total revenue bonds outstanding, exclusive of bond discounts and premiums, as of August 31, 2014, 2015, and 2016 respectively were \$117,000,000; \$111,815,000; and \$108,465,000. Between Fiscal Years 2014 and 2016, revenue bonds outstanding decreased by a net amount of \$8,535,000. During FY 2016, GBRA did issue \$2,000,000 in new revenue bonds to fund new water supply studies however this amount was more than offset by the annual principal repayment on existing GBRA bond issues as well as the refunding or replacement of other bond issues.

GBRA's long-term loans outstanding as of fiscal year end 2014, 2015 and 2016 respectively amounted to \$8,024,267; \$7,294,084; and \$6,054,591. These varying amounts represent the annual principal repayments of the various loans including a lump-sum payment on one loan in GBRA's Rural Utilities Division following the payoff of a \$2.5M Letter of Credit which was collateral from a developer on a wastewater-treatment plant expansion.

More information on GBRA's capital assets and long-term debt is available in footnotes to the Basic Financial Statements. Capital asset information is presented in Footnote E and information about GBRA's long-term debt is available in Footnote B.

Infrastructure

GBRA recognizes all equipment and infrastructure with an original cost greater than \$2,000 and with a life exceeding one year as Capital Assets. Since all of GBRA's activity is accounted for in an enterprise fund similar to the accounting businesses, GBRA has always recorded the historical cost of Capital Assets and depreciated that cost over the estimated life of the asset.

The condition of GBRA's infrastructure and capital assets is generally very good. Most of GBRA's equipment and infrastructure is generally less than 30 years old, with much of it being less than 20 years old. Additionally, this equipment is subject to an ongoing preventive maintenance program. One area of concern is the infrastructure within the Guadalupe Valley Hydroelectric System (GV Hydro). This system is comprised of six low-head hydroelectric dams, power houses and ancillary equipment all of which was originally constructed in the 1920's and 1930's. Due to the age of many of the GV Hydro components a major emphasis on repair and replacement will be required in the next few years to return this System to the level of equipment condition present in GBRA's other operations. This initiative has not heretofore been undertaken due to a lacking of funding in the System. The funding deficiency has been the result of the reduction in Hydroelectric Power Sales Revenue because of drought conditions in 4 out of the last 7 years as well as a general impediment to increased hydroelectric energy charges due to a stable wholesale electric market.

NON-CASH TRANSACTIONS SCHEDULE

The accompanying notes are an integral part of this statement.

^{1.} During fiscal year 2016 and 2015, an adjustment of \$37,281 and (\$79,655) respectively, was made to adjust investments to fair value.

- 16. Capitalization of Interest. It is GBRA's policy to capitalize not interest costs on funds borrowed to finance the construction of capital assets. GBRA recorded no interest expense or interest income for construction in progress.
- 7. Deferred Expenses/Revenue. Certain utility expenses that do not require funds currently are deferred to such periods as they are intended to be recovered in rates charged to customers. Likewise, certain utility revenue is deferred to such periods in which the costs related to that revenue is recognized. Deferred expenses and revenue will be recognized in future years by setting rates sufficient to provide funds for the related debt service requirements.
- 8. Deferred Outflows/Inflows. GBRA adopted the provisions of GASB #63 Financial Reporting of Deferred Outflows of Resources, Deferred Inflows of Resources, and Net Position. The statement requires governments to account for deferred outflows of resources, deferred inflows of resources and net position as they relate to derivatives and service concession arrangements. Under the provisions of this statement, governments will already present a Statement of Net Position and changes the caption "Net Assets" to "Net Position". GBRA has no deferred outflows or inflows of resources as they relate to derivatives and service concession agreements.
- 9 Debt Issue Costs. The Authority also adopted the provisions of GASB #65 items previously reported as Assets and Liabilities. The GASB requires that the Debt issuance costs (except for any portion that is a prepayment of insurance) should be recognized as an expense in the period incurred and no longer be reported in statements of net position. The financial statements have been restated to reflect the provisions of GASB #65.
- 30. Change in Accounting Policy. During fiscal year 2015, GBRA changed accounting policies related to reporting of net pension hability, deferred outflows of resources, and deferred inflows of resources in a statement of net position by adopting GASB Statement No. 68 "Accounting and Financial Reporting for Pensions an Amendment of GASB Statement No. 27."

JOTE B - LONG TERM LIABILITIES

\$BRA currently has \$114,519,591 of debt outstanding from long-term loans and revenue bonds. This is exclusive of defeasance, discounts and remiums associated with these bonds.

The loans and revenue bonds outstanding at August 31, 2016 mature serially through 2039 as follows.

; B - LONG-TERM LIABILITIES (CONTINUED)

RA issued in Fiscal Year 2011 General Improvement and Refunding Revenue Bonds, Series 2011. These bonds were issued to retire the neral Improvement Revenue Bonds, Series 2002 and to provide funds for the lump sum buy-out of the Water Right Subordination reement between GBRA and the City of Seguin. The refunding of the 2002 General Improvement Revenue Bonds produced an economic s of \$27,473, but was necessary to remove bond covenants in the 2002 bonds to facilitate the new money portion of the bond. GBRA's v-out of the Water Right Subordination agreement effectively produced a savings of approximately \$4,295,500. Bonds outstanding that - considered defeased as a result of the 2011 refunding are \$0.

3RA issued in Fiscal Year 2011 Regional Raw Water Delivery System Contract Revenue Refunding Bonds, Series 2010 (City of San irros portion). These bonds were issued to retire the 1998 bonds, except for the September 1, 2010 payment of \$340,000. As a result of refunding, GBRA reduced its total debt service requirement by \$842,606 and produced a net present value savings (economic gain) of 48,929. Bonds outstanding that are considered defeased as a result of the 2011 refunding are \$0.

3RA issued in Fiscal Year 2013 Contract Reveue Refunding Bonds (IH35 Treated Water Delivery Bonds). Series 2013. These bonds were used to retire the Series 2004 bonds. As a result of the refunding, GBRA reduced its total debt service requirements by \$4,307,567 and oduced a net present value savings (economic gain) of \$2,877,554. Bonds outstanding that are considered defeased as a result of the 2013 funding are \$0.

BRA issued in Fiscal Year 2013 Contract Revenue Refunding Bonds (Western Canyon Regional Water Supply Project). Series 2013A and ries 2013B. As a result of the refunding, GBRA reduced its total debt service requirements by \$9,669,586 and produced a net present lue savings (economic gain) of \$6,741,092. Bonds outstanding that are considered defeased as a result of the 2013 refunding are \$0.

BRA issed in Fiscal Year 2011 Water Supply Revenue Refunding Bonds, Series 2011 (Port Lavaca Water Treatment Plant Project). These onds were issued to retire the Series 2000 bonds. As a result of the refunding, GBRA reduced its total debt service requirements by 14,115 and produced a net present value savings (economic gain) of \$39,856. Bonds outstanding that are considered defeased as a result of a 2011 refunding are \$0.

iBRA issued in Fiscal Year 2014 Treated Water Delivery System Contract Revenue Refunding Bonds, Series 2014 (City of Lockhart roject). These bonds were issued to retire the Series 2004 bonds. As a result of the refunding, GBRA reduced its total debt service equirements by \$634,189 and produced a net present value savings (economic gain) of \$478,361. Bonds outstanding that are considered lefeased as a result of the 2014 refunding are \$0.

BRA issued in Fiscal Year 2011 Contract Revenue Refunding Bonds, Series 2010 (City of Lockhart Wastewater Treatment System Project). These bonds were issued to retire the Series 1996 bonds. As a result of the refunding, GBRA reduced its total debt service equirements by \$248,321 and produced a net present value savings (economic gain) of \$220,321. Bonds that are considered defeased as a esult of the current year refunding are \$0.

The various bond indentures, resolutions and agreements provide for the establishment of separate restricted accounts for debt service etirement, construction, contingencies, etc. These accounts are reported as restricted assets in the accompanying financial statements. The bond indentures contain flow of funds requirements which generally provide the order in which funds are to be applied. These requirements have been met. The following bond indentures of GBRA contain bond coverage requirement provisions: 1) General Improvement and Refunding Revenue Bonds, Series 2011; 2) Contract Revenue Bonds (IH35), Series 2013; 3) Combined Contract Revenue Bonds (Western Canyon), Series 2013; 4) Combined Contract Revenue Bonds (RRWDS), Series 2007; 5) RRWDS Contract Revenue Refunding Bonds (City of San Marcos), Series 2010; and 6) Treated Delivery System Contract Revenue Refunding Bonds (City of Lockhart), Series 2014.

(OTE C - DEFINED BENEFIT PENSION PLAN

Actuarial Assumptions

The total pension liability in the January 1, 2016 actuarial valuation was determined using the following actuarial assumptions, applied to all periods included in the measurement:

Inflation 3.50 percent

Salary increases 3.00 percent, plus merit and promotion increases that vary by age and service Investment rate of return 7.00 percent, not of pension plan investment expense, including inflation

Mortality rates were based on the RP-2000 Combined Healthy Mortality Tables for males and for females (sex distinct) projected to 2024 by scale AA

The long-term expected rate of return on pension plan investments is reviewed annually and was determined using a building-block method in which expected future net real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class. These components are combined to produce the long-term expected rate of return by weighting the expected future net real rates of return by the target asset allocation percentage (currently resulting in 4.25%) and by adding expected inflation (3.0%). In addition, the final 7.0% assumption was selected by "rounding down" and thereby reflects a reduction of 0.25% for adverse deviation. The target allocation and expected arithmetic net real rates of return for each major asset class are summarized in the following table:

| | Target Allocation | Long-Term Expected Net Real Rate of Return |
|-------------------------|----------------------|--|
| Equities | | |
| Large cap domestic | 30% | 5 65% |
| Small cap domestic | 7 | 5.93 |
| International developed | 12 | 6.05 |
| Emerging Markets | 3 | 7.60 |
| Hedge fund of funds | 10 | 2 75 |
| Real estate | 12 | 3.31 |
| Fixed income | 26 | 1.96 |
| Cash | 0 | 0.35 |
| Total | 100% | |
| Weighted Average | | 4 25% |

Discount Rate

The discount rate used to measure the total pension liability was 700%. No projection of cash flows was used to determine the discount rate because the January 1, 2016 actuarial valuation showed that expected contributions would pay the normal cost and amortize the unfunded actuarial accrued liability (UAAL) in nine years. That UAAL was based on an actuarial value of assets that was only 8% more than the plan fiduciary net position as of December 31, 2015. Because of the nine-year amortization period of the UAAL, the pension plan's fiduciary net position is expected to be available to make all projected future, benefit payments of current active and inactive members. Therefore, the long-term expected rate of return on pension plan investments of 7.00% was applied to all periods of projected benefit payments as the discount rate to determine the total pension liability.

Sensitivity of the Net Pension Liability to Changes in the Discount Rate

The following presents the net pension liability of the Employer, calculated using the discount rate of 7.00%, as well as what the Employer's net pension liability would be if it were calculated using a discount rate that is 1-percentage-point lower (6%) or 1-percentage-point higher (8%) than the current rate

| | 1% | Current | 1% | |
|----------------------------------|------------------|-----------------------|------------------|--|
| | Decrease (6%) | Discount Rate (7%) | Increase (8%) | |
| Employer's Net Pension Liability | \$10,350,653 | \$6,588,043 | \$3,372,519 | |

Plan Fiduciary Net Position

The plan fiduciary net position reported above is the same as reported by the plan. Detailed information about the plan fiduciary net position is available in the plan's separately issued audited financial statements, which are reported using the economic resources measurement focus and the accrual basis of accounting in conformity with accounting principles generally accepted in the United States of America. Revenues are recorded when earned, and expenses are recorded when a liability is incurred, regardless of the timing of the related cash flows. Investments are reported at fair value, the price that would be recognized to sell an asset in an orderly transaction between market participants at the measurement date

NOTE C - DEFINED BENEFIT PENSION PLAN

Amounts reported as deferred outflows of resources and deferred inflows of resources related to pensions will be recognized in pension expense as follows:

| | | Net of Deferred |
|--------------|----|------------------|
| Year Ended | | Outflows Minus |
| August 31 |] | Deferred Inflows |
| 2017 | \$ | 1,003,584 |
| 2018 | | 1,003,585 |
| 2019 | | 1.003,585 |
| 2020 | | 740,404 |
| 20 21 | | 47.404 |
| Thereafter | _ | 0 |
| Total | \$ | 3,798,562 |

3. Deferred Outflow of Resources to be Recognized Next Year

No supplemental contribution was contributed subsequent to the measurement date of the net pension liability, as shown in Section III. So there is no deferred outflow of resources that will be recognized as a reduction in the net pension hability in the fiscal year ending August 31, 2017.

NOTE D - CASH, CASH EQUIVALENTS AND INVESTMENTS

The monetary assets of GBRA are held in various forms and accounts. These assets are described and presented in the combined financial statements in two groups. One group is described as "Cash and Cash Equivalents". This group is characterized as having high liquidity with little market risk and includes cash, checking accounts, money market accounts and bank time deposits with an original maturity of less than three months. The second group of monetary assets is presented in the financial statements as "Investments". Investments are recorded at their fair value as based upon quoted market prices with the exception of bank certificates of deposit which are recorded at their historical cost which approximates fair value.

1. CASH AND DEPOSITS

At August 31, 2016. GBRA held \$2,141,147 in restricted and unrestricted cash. Included in this amount was \$1,650 of cash on hand and the remainder was on deposit at various banks in demand accounts

GBRA bank deposits were entirely insured or collateralized with securities held by GBRA's agent in GBRA's name.

2. INVESTMENTS

In March 2003 the GASB issued No. 40 "Deposits and Investment Risk Disclosures", which GBRA has implemented, Risk disclosures in previous financial reports (under the provisions of GASB 3) focused only on custodial credit risk. GASB 40 not only addresses custodial credit risk, but other common areas of investment risk as well (e.g. interest rate risk, credit risk, and concentration of credit risk)

GBRA customarily invests its funds in certificates of deposit, mortgage backed securities, direct obligations of the United States or money market investment funds such as the Texas State Treasury's TexPool Fund and the Texas Cooperative Liquid Assets Securities System (Texas CLASS). GBRA usually holds its investments until maturity.

Custodial Credit Risk: Investments which may be purchased pursuant to Texas state law and GBRA's investment policy are direct or indirect obligations of the United States of America, any "A" rated obligation of a state of the United States or political subdivision thereof, investment grade repurchase agreements, prime commercial paper rated A-1 or P-1, obligations of the Federal National Mortgage Association and Government National Mortgage Association, and bank time deposits to the extent collateral is pledged on the amount exceeding Federal Deposit Insurance Corporation (FDIC) coverage.

| | Fair Value | Weighted Average Maturity in Months |
|--------------------------------|------------------|--|
| Federal Home Loan Bank | \$ 6,998,257 | 18 07 |
| Federal Home Loan Mortgage | 1,703,655 | 6.2 |
| Federal National Mortgage Assn | 7,910,681 | 31 76 |
| Federal Farm Credit Bank | 604.212 | 27.02 |
| U. S. Treasury | 6,784,660 | 18 63 |
| Certificates of Deposit | 4,959.244 | 10.06 |
| Money Market Funds | 6,000,270 | 1.00 |
| Texas Class | 164,705 | 1.00 |
| TexPool | 4,691,309 | 1.00 |
| Total Investments | \$ 39,816,993 | 14.86 |

Interest Rate Risk. GBRA'S investment policy calls for maximum final maturity of any operating investments to be 5 years, with at least 50% of all operating investments maturing within 3 years. Bond funds may be invested with maturities of less than 5 years, and construction funds may be invested in accordance with a construction draw schedule. The weighted average maturities noted above are in compliance with this policy.

NOTE E - CAPITAL ASSETS

Capital asset activity for the fiscal year end was as follows:

| | ASSETS | | | | | | | | |
|------------------------------------|----------|---------------|--------------|-------------|----|----------|-----------------|---------------|--|

NOTE H - CONTINUING DISCLOSURE REQUIRMENTS (CONTINUED)

4. The revenues pledged to repay the debt service requirements of General Improvement and Refunding Revenue Bonds, Series 2011, General Improvement Revenue Bonds, Series 2012, and General Improvement Revenue Bonds, Series 2015 the are on parity with the pledge revenues described as follows:

The bonds constitute special obligations of GBRA, both principal and interest, payable from and secured by an irrevocable lien on and pledge of the "Pledged Revenues" and the Pledged Revenues are further pledged to the establishment and maintenance of certain funds created in the Resolution authorizing the Bonds. "Pledged Revenues" generally consist of the gross revenues received by GBRA from the sale or commitment of raw water currently stored in Canyon Reservoir and from other sources of firm, dependable supplies of water as they are acquired and developed in the "Water Supply System" of GBRA's Water Resources Division.

GENERAL IMPROVEMENT AND REFUNDING REVENUE BONDS, SERIES 2011

On September 18, 2002, GBRA authorized the issuance of General Improvement Revenue Bonds, Series 2002 in the amount of \$4,390,000 with a delivery date of September 27, 2002. The proceeds were used for the expansion and construction of the GBRA headquarters, meeting room and office facilities, and an operations warehouse.

On November 17, 2010, GBRA authorized the issuance of GBRA tax-exempt revenue bonds to be used to refund the Series 2002 General Improvement Revenue Bonds and provide funds for the lump sum buy-out of the Water Right Subordination Agreement between GBRA and the City of Seguin. The resolution was subsequently amended on March 16, 2011 related to the issuance of Guadalupe-Blanco River Authority General Improvement and Refunding Revenue Bonds, Series 2011 primarily for the purpose of amending the date by which certain proceeds of such bonds must be used to pay the "final payment" to the City of Seguin, revising the continuing disclosure requirements to comply with amended Section regulations that became effective December 1, 2010, revising the annual rate covenant, and deleting references to the General Division in certain covenants.

Moody's Investors Service, Inc. assigned an underlying rating on the Bonds of "Aa2".

GENERAL IMPROVEMENT REVENUE BONDS, SERIES 2012

On January 18, 2012, GBRA authorized the issuance of General Improvement Revenue Bonds, Series 2012 in the amount of \$4,400,000 with a delivery date of April 4, 2012. The bonds were sold to the Texas Water Development Board and as such, no rating was required on these bonds. The bond proceeds were used to complete a study and feasibility assessment related to a new firm water supply for GBRA referred to as the Mid-Basin Project. The Project is invisioned as a conjunctive use project, utilizing both surface and ground water supplies within the basin.

GENERAL IMPROVEMENT REVENUE BONDS, SERIES 2015

On October 21, 2015, GBRA authorized the issuance of General Improvement Revenue Bonds, Series 2015 in the amount of \$2,000,000 with a delivery date of December 1, 2015. The bonds were sold to the Texas Water Development Board through the SWIRFT Program and as such, no rating was required on these bonds. The bond proceeds were used to fund a feasibility study in connection with the development of an integrated water-power project (IWPP Project) along the Texas Gulf Coast to provide a regional solution that would create a new source of water supply for the Coastal Bend (Region N) and South Central (Region L) and potentially Central Texas (Region K) regional water planning areas, and to pay costs of issuance.

NOTE H - CONTINUING DISCLOSURE REQUIRMENTS (CONTINUED)

MAJOR FIRM WATER CUSTOMERS (1,000 ACRE-FEET PER YEAR OR MORE)

Municipal and Industrial customers account for the majority of the total acre-feet under contract between GBRA and purchasers, and purchasers with contracts for 1,000 acre-feet or more per year account for 94.82% of the total acre-feet currently under contract. For this reason, major firm water customers have been identified as those with contracts for the sale of firm raw water in the amount of 1,000 or more acre-feet per year. Major firm water customers, as well as, smaller customers that are part of a large regional project, for the fiscal year ended August 31, 2016 are shown below.

5. CONTRACT REVENUE REFUNDING BONDS (WESTERN CANYON REGIONAL WATER SUPPLY PROJECT). SERIES 2013A & 2013B On February 20, 2013, GBRA authorized the issuance of Combined Contract Revenue Refunding Bonds, Series 2013A and 2013B in the amount of \$55,265,000 and \$6,830,000, respectively. The proceeds were used to i) refund the Contract Revenue Bonds. Series 2003 (Western

amount of \$55,265,000 and \$6,830,000, respectively. The proceeds were used to i) refund the Contract Revenue Bonds, Series 2003 (Western Canyon Regional Water Supply Project) to achieve debt service net present value savings of \$6,741,092, ii) fund a related account in the debt service reserve fund surety policies from Assured Guaranty Municipal Corporation and iii) pay issuance costs on the current bonds. The original proceeds from the Series 2003 bonds were used for the construction and equipping a regional treated surface water supply project to serve portions of Comal, Kendall and Bexar Counties, Texas.

Moody's Investors Service, Inc. ("Moody's") and Standard and Poor's Ratings Services, a Standard & Poor's Financial Services LLC business ("S&P"), rated the bonds "Aa1" and "AA+", respectively

The bonds constitute special obligations of GBRA payable, both as to principal and interest, and secured soley by a first lien on and pledge of the Gross Revenues of GBRA, which primarily are derived from payments made to GBRA under the Water Supply Agreements entered into with the Participants in the Western Canyon Regional Water Supply Project.

7. CONTRACT REVENUE REFUNDING BONDS, SERIES 2013

On November 28, 2012, GBRA authorized the issuance of Contract Revenue Refunding Bonds. Series 2013 in the amount of \$19,470,000 Proceeds from the sale of the Bonds were used to i) refund all of the Combination Contract Revenue, Subordinate Water Resources Division Revenue, and Surplus Water Project Revenue Bonds, Series 2004A and 2004B and ii) pay issuance costs on the current bonds. As a result of the refunding, GBRA reduced its total debt service requirements by \$4,307,567 and produced a net present value savings (economic gain) of \$2,877,554. The original proceeds from the Series 2004A and 2004B bonds were used to construct and equip facilities and acquire rights-of-ways necessary for delivering treated water from a water treatment plant located in San Marcos. Texas to portions of Hays and Caldwell Counties, Texas.

Moody's Investors Service, Inc. ("Moody's") and Standard and Poor's Ratings Services, a Standard & Poor's Financial Services LLC business ("S&P"), assigned an underlying rating on the Bonds of "A1" and "A+" respectively.

The bonds constitute special obligations of GBRA that are secured by a first lien on and pledge of the "Pledged Revenues," which generally consist of the "Gross Contract Revenues," received by GBRA from various public and private entities pursuant to certain "Water Supply Agreements" related to the delivery of treated water from a water treatment plant located in San Marcos, Texas to portions of Hays and Caldwell Counties, Texas through a treated water delivery system and the interest income from funds on deposit in the Interest and Sinking Fund, the Reserve Fund and the Rate Stabilization Fund. The Pledged Revenues are further pledged irrevocably to the establishment and maintenance of the Interest and Sinking Fund, the Reserve Fund and the Rate Stabilization Fund.

NOTE L - SEGMENT INFORMATION, INCLUDING INTERFUND RECEIVABLES/PAYABLES

GBRA is comprised of ten (10) enterprise funds. These funds provide various services incliding raw and treated water supply wastewater treatment and disposal water quality monitoring, cooling reservoir operation parks and recreational opportunities, as well as hydroelectric generation. Governments that use enterprise funds accounting and reporting standards to report their activities are required to present segment information. A segment is an identifiable activity reported as or within an enterprise fund or another stand-alone entity that has one or more bonds outstanding with a revenue stream pledged in support of that debt, and the activity is externally required to maintain separate accounts

All operating revertes result from charges for services Segment information at August 31, 2016 is as follows

Required Supplemental Information

GUADALUPE-BLANCO RIVER AUTHORITY REQUIRED SUPPLEMENTAL INFORMATION AUGUST 31, 2016

B. Schedule of Employer Contributions for the Last 10 Fiscal Years¹

| | | | Plan Year Ending 12/31/2015 | En | Plan Year ding 12/31/2014 |
|----|--|----|-----------------------------------|----|------------------------------|
| 1. | Actuarially determined contribution | \$ | 1,033,464 | \$ | 984,302 |
| 2. | Contributions in relation to the actuarially determined contribution | - | 1,733,464 | _ | 1,684,302 |
| 3. | Contribution deficiency (excess) | \$ | (700,000) | \$ | (700,000) |
| 4. | Covered payroll | \$ | 7,565,168 | \$ | 7,423,408 |
| 5. | Contributions as a percentage of covered payroll | | 22.9% | | 22.7% |
| | | | | | |
| | | | | | |

Notes to Schedule:

Actuarially determined contribution amount for the plan year ending December 31 was calculated in the January 1 actuarial valuation one year earlier. Methods and assumptions used to determine the actuarially determined contributions:

Actuarial cost method
Amortization method
Recalculated amortization period
Asset valuation method
Inflation
Salary increases
Investment rate of return
Retirement age
Mortality

Entry age

Level percent of payroll, open period

8 and 10 years, respectively, for years ending in 2015 and 2014

5-year smoothed market

3.5% and 3.75%, respectively, for years ending in 2015 and 2014

inflation plus merit and promotion increases that vary by age and service

7.25% and 7.50%, respectively, for years ending in 2015 and 2014

Rates that vary by age and service

RP-2000 Combined Healthy Mortality Tables for males and for females

(sex distinct) projected to 2024 by scale AA

C. Contributions Reflected in Asset Value as of December 31, 2015 Measurement Date (Applicable for Fiscal Year Ending August 31, 2016)

| Month of Contribution | Amount |
|--------------------------|-----------------|
| July 2015 | \$ 700,000 |
| December 2015 | 1,033,464 |
| Total | \$ 1,733,464 |

D. Subsequent Contributions Made Prior to Fiscal Year End (August 31, 2016)

| Month of Contribution | Amount | | |
|--------------------------|--------|----|--|
| N/A | \$ | 0 | |
| Total | \$ | 01 | |

An amount contributed subsequent to the measurement date of the net pension liability would be a deferred outflow of resources that would be recognized as a reduction in the net pension liability in the next fiscal year.

Until a full 10-year trend is compiled, only available information is shown.

Types of Operating Systems

Several GBRA operating divisions are segregated into systems to facilitate cost accounting, internal control, and rate setting. Each system has one of two types of budgets, either "Budget-to-Actual" or "Units of Service". Budget-to-Actual systems provide services based on a budget approved by the customer and GBRA. During the course of the year, the customer is billed based on the annual budget with those billings adjusted to the total actual cost of service at each fiscal year end. Unit-of Service budgets are for the other GBRA operations where the customer pays for some type of service based on a unit of measure at a rate approved by the GBRA Board of Directors. The revenue derived from these customers pays the operating and maintenance, debt service, and capital costs of the system. In these systems, revenue is completely dependent upon the number of units sold and no customer year-end adjustment is available. The table below distinguishes the systems according to the type of operations in which they operate:

| Budget-to-Actual Operations: | Principal Customers County | | |
|---|----------------------------|-----------------------------|----------------------------|
| Northcliffe Wastewater Treatment Plant | City of Schertz | Guadalupe | |
| Sunfield Wastewater Treatment Plant | Sunfield MUD #4 | Hays | |
| Singing Hills Wastewater Treatment Plant | City of Bulverde | Comal | |
| Buda Wastewater Treatment Plant | City of Buda | Hays | |
| Port Lavaca Water Treatment Plant | City of Port Lavaca | Calhoun | |
| Coleto Creek Reservoir Luling Water Treatment Plant Coleto Creek Power, LP Cities of Luling & Lockhart | | Victoria/Goliad Caldwell | |
| | | | Canyon Hydroelectric Plant |
| Lockhart Wastewater Reclamation System | City of Lockhart | Caldwell | |
| Lockhart Water Treatment Plant | City of Lockhart | Caldwell | |

| Unit of Servicé Óperations: | Principal Customers | County |
|--|---|--------------------|
| General Division | GBRA Systems | Guadalupe |
| Guadalupe Valley Hydroelectric Division | Guadalupe Valley Electric Coop. | Guadalupe/Gonzales |
| Shadow Creek Wastewater Treatment Plant | Residential Customers | Hays |
| Canyon Park Wastewater Reclamation System | Residential Customers | Comal |
| Dunlap Wastewater Reclamation System | Residential Customers | Guadalupe |
| Springs Hill Wastewater Reclamation System | City of Seguin | Guadalupe |
| Water Sales System | Communities, industries, farmers | Entire River Basin |
| Regional Laboratory System | Residential, Industrial, City Customers | Entire River Basin |
| Calhoun Canal System | Port Lavaca Plant,farmers, industries | Calhoun |
| San Marcos Water Treatment Plant | City of San Marcos | Hays |
| Western Canyon Division | Boerne, Bulverde, Fair Oaks, Cordillera | Comal/Kendall |
| Cordillera Water Treatment Plant | Residential and Commercial Customers | Kendall |
| Cordillera Wastewater Treatment Plant | Residential and Commercial Customers | Kendall |
| Comal Trace Water Distribution System | Residential Customers | Comal |
| Johnson Ranch Water Distribution System | Residential Customers, Public School | Comal |
| Johnson Ranch Wastewater Treatment Plant | Residential Customers, Public School | Comal |
| Calhoun County Rural Water System | Residential and Commercial Customers | Calhoun |
| Coleto Creek Recreation | Recreational Customers | Victoria/Goliad |

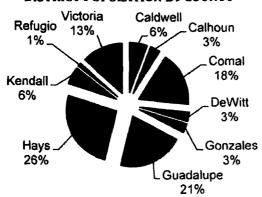

Guadalupe Blanco River Authority Third Party Debt Last Ten Fiscal Years

Pollution Control and Industrial Development Bonds

| Year | |
|------|------------------|
| 2007 | \$ 90,890,000 |
| 2008 | 90,890,000 |
| 2009 | 90,890,000 |
| 2010 | 40,890,000 |
| 2011 | 40,890,000 |

| 2013 | 40,890,000 |
| 2014 | 40,890,000 |
| 2015 | 40,890,000 |
| 2016 | 40,890,000 |

GBRA has assisted industries within the GBRA service area by acting as issuing conduit so that the user of the bond proceeds benefited from reduced debt service requirements. Fees to administer this debt are recognized as pollution and industrial financing income. In each case, the user of the bond proceeds pledge their credit, bear sole responsibility for all debt service, make all payments directly to the trustee and completely indemnify GBRA for any costs incurred. Due to the character of these bonds, GBRA considers them debts of the third party users rather than debts of GBRA. Therefore, these bonds and the related receivables have been excluded from the combined financial statements in order to avoid misrepresenting the nature of the bonds and distorting GBRA's statements. The exclusion is in conformity with the Texas State Auditor's Report dated October 6, 1986 for Water Districts and River Authorities reporting third party conduit financings.

Independent Auditor's Report In Accordance With Government Auditing Standards

INDEPENDENT AUDITOR'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED IN ACCORDANCE WITH GOVERNMENT AUDITING STANDARDS

To the Board of Directors
Guadalupe-Blanco River Authority

We have audited, in accordance with the auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the financial statements of the Guadalupe-Blanco River Authority as of and for the years ended August 31, 2016 and 2015, and the related notes to the financial statements, which collectively comprise Guadalupe-Blanco River Authority's basic financial statements, and have issued our report thereon dated December 14, 2016.

Internal Control Over Financial Reporting

In planning and performing our audit of the financial statements, we considered Guadalupe-Blanco River Authority's internal control over financial reporting (internal control) to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinions on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of Guadalupe-Blanco River Authority's internal control. Accordingly, we do not express an opinion on the effectiveness of Guadalupe-Blanco River Authority's internal control.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A material weakness is a deficiency, or a combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis. A significant deficiency is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or, significant deficiencies. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether Guadalupe-Blanco River Authority's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

Purpose of this Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the entity's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the entity's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.
