BUSINESS: Aqua America, Inc. is the holding company for water and wastewater utilities that serve approximately three million residents in Pennsylvania, Ohio, North Carolina, Illinois, Texas, New Jersey, Florida, Indiana, and five other states. Has 1,530 employees. Acquired AquaSource, 7/13; North Maine Utilities, 7/15; and others. Water supply revenues 2017: residential, 80%; commercial 16%; industrial, wastewater & other, 24%. Off & dir own less than 1% of the common stock, Vanged Group, 10.0%; Blackrock, Inc. 8.8%; State Street Capital, 5.0% (3/18 Proxy). President & Chief Executive Officer Christopher Franklin Incorporated: Pennsylvania Address: 762 West Lancaster Avenue, Bryn Mawr, Pennsylvania 19010 Tel: 610-525-1400. Internet: www.aquaamerica.com																		
Aqua America is pretty busy on the regulatory front. Due to its wide geographical base, the water utility is continually involved in rate cases with several state authorities. Indeed, so far in 2018, rate decisions have been made in seven states including Illinois, Indiana, Ohio, and Pennsylvania. Final decisions in four other states are pending, and are expected to be made before yearend. Meanwhile, the company is growing through acquisition. Aqua America is following the same strategy as industry leader American Water Works. That is, the utility is taking advantage of the incredibly fragmented water business to purchase some of the over 50,000 water districts in the U.S. These local entities typically don't have the financial means to spend the funds required to maintain and refurbish their antiquated infrastructure. By absorbing these smaller water districts, Aqua is able to wring significant savings from these operations due to the amount of redundancies in this industry. Most acquisitions are relatively small, so the company has to continually buy a host of small water authorities. We think that Aqua will be able to increase its customer base by at least 3% annually using this strategy. Aqua has a large capital budget. Due in part to all of the M&A activity, the utility will probably spend \$500 million this year on modernizing its water assets. The annual outlays should remain substantial through early next decade. The balance sheet remains solid. Despite the large construction program, Aqua has managed to stay in sound financial strength. Of the nine companies we follow in the industry, it is one of only two that garner an 'A' Financial Strength rating. These shares are ranked to underperform the market averages in the year ahead. Even with the company's improving fundamentals, the equity seems almost fully valued at this juncture. In addition, with the Federal Reserve announcing that it plans on raising short-term rates into 2020, yields on U.S. Treasury notes could be viewed as a more attractive option than utilities. Finally, like almost all members in this group, total return prospects out to 2021-2023 are subpar. James A. Flood July 13, 2018
