: Forest Glen Utility Company ("FGU"); Wastewater CCN Application; Docket No. 47897; Response to Oral Comments

### Dear Rick:

Helen S. Gilbert
hgilbert@gwtxlaw.com

I am writing in reference to the above-referenced application and the staff's request relayed during our telephone conversation of February 15, 2018 regarding all items needed for application sufficiency. We hereby respond as follows:

- 1. I have attached the requested responses to Item Nos. 1-7, 9 as shown on the Staff Memo dated January 22, 2018.
- 2. Applicant is confused regarding Item No. 8. Page 7 of the Instructions for the Class B Rate Application, "Attachments Required for Sufficiency," refers the applicant to the Commission's web homepage; however, no affidavit for "correctness" exists on that page nor on the "Forms" page of the Commission's website. The Applicant did previously file affidavit regarding notice, shown as Item No. 56 on the Interchange. If there is another form, please email that to me as soon as possible.

We have addressed the staff's questions. Please let me know if you need anything else.

Sincerely,

Randall B. Wilburn

### CLASS B RATE/TARIFF CHANGE APPLICATION

### Required Schedules for rate/tariff changes

\*\*Please read the "Class B Investor-Owned Utilities water and/or sewer Instructions for Rate/Tariff Change Application" completing these schedules. \*\*

These schedules are organized in a manner whereby the user can work through each section to:

- 1st Record historical test year data on Schedule I-1, Column D. Enter your test year end on the table of contents.
- 2nd Provide historical revenue information on Schedule 1-2.
- 3rd Calculate operating expenses and make adjustments (Section II).
- 4th Calculate return for rate making purposes (Section III).
- 5th Calculate adjusted taxes other than income (Section IV).
- 6th Calculate federal income taxes (Section V).
- 8th Determine revenue requirements (Schedule I).
- 9th Design proposed rates (Section VI).

These schedules are intended to assist the utility in calculation of its new rates. The process consists of a number of relatively complex steps. Utilities are required to provide all the information necessary to support amounts included in the schedules and to cross-reference all information. If the applicant does not use a schedule, it should be noted as "N/A", and an explanation provided.

### INSTRUCTIONS REV REQUIREMENT

UTILITY NAME:	Forest Glen Utility Company	
SCHEDULES - CLASS	B RATE/TARIFF CHANGE	
SECTION I - REVENUE RE	QUIREMENTS AND REVENUES	

The purpose of Section I is to summarize the revenue requirement and provide revenues and meter information for the test year.

### Instructions for Section I - Revenue Requirement and Revenues

Carefully complete the label for each workpaper. Your application docket number should be included on each page.

Schedule I-1 is a **SUMMARY**. Complete column D, historical test year information first using financial records, then work through the remainder of the sections and schedules other than the rate design, Schedule VI, to calculate the utility's changes to its historical test year in Column E. Column G provides the workpaper source for amounts in Columns E & F.

Schedule I-2 reports historical revenues collected and Schedules I-3 and 1-4 report connection information. Use historical financial data and data from recent annual reports (PUC Rpt.) to complete the schedules.

### Please complete Schedule II-3 prior to I-2.

Insert and reference additional workpapers as necessary. For example, you may wish to add schedules that apply to unique situations in your utility.

The schedules are based on NARUC chart of accounts and include sub-accounts as necessary for detail needed to determine reasonable and necessary expenditures.

UTILITY NAME: Forest Glen Utility Company

SCHEDULES - CLASS B RATE/TARIFF CHANGE

SECTION II - OPERATIONS AND MAINTENANCE

The purpose of Section II is to report expense information and allow for for the known and measurable changes to operating expenses to determine the revenue requirement in Schedule I-1.

### Instructions for Section II

Compile financial and source information to determine known and measurable changes to the test year expenses. Provide copies of source documents, such as increased utility bill notices, to verify the applicant's proposed known and measurable changes. Show calculations and explanations for all known and measurable changes on all schedules, where applicable. Attach extra workpapers if needed.

Working through Schedules II-4 through II-19, complete each and transfer test year amounts to column G of Schedule I-1. Depreciation expense, other taxes, FIT and return will be determined using later schedules. Wait until those schedules are complete, and then transfer the amounts to Schedule I-1.

Insert and reference additional workpapers as necessary. For example, the applicant may use additional schedules that address unique aspects of the utility.

FGU charges the Builder's \$2,950 per lot at closing as a connection fee. This is declared as income, not CIAC. The sewer lines that are contributed are declared as CIAC. These funds are used to pay for the costs of operating the WWT system that are not covered by rates until the number of customers and the rates have been established for normal operations as well as necessary plant expansion and repairs. There will be a total of 366 customers at build out. At the close of 2015 there were 96 customers. At the close of 2016 there will be approximately 168 customers. Between 70 and 90 homes are sold each year. Build out should occur by the end of 2018 or first quarter 2017 at which point the builder fee will cease and FGU will need to be operating with all costs of services recovered in monthly sewer charges.

<sup>\*</sup> Tap fees should be reported on Sch. III-8-CIAC, Line 1.

### II-17(a) Regulatory commission expense

List the amount spent on rate case expense for the last two years and for the Test Year. Typically, the commission seperates rate case expense from the revenue requirement and allows recovery through a surcharge. The known and measurable adjustment would decrease this expense to zero in this case. In any event, if the applicant does not file every year, the expense must be amortized over the time between filings and only one year's worth should be charged to customers. Record Commission filing fees or fees to consultants, attorneys, etc. in formal and informal rate cases, complaints, or other dealings with the Commission, which are not reported under Professional Services. Any amount paid for an item that was not incurred by the utility, such as by a customer, is deducted from the original cost. The adjusted original cost amount here, Column D-2, labeled "Adjusted Original Cost for Customer CIAC". Column D-2 will then be depreciated and the net book value will be calculated (ColumnG). For an item with the entire amount of its original cost paid for by customer(s), Columns D-2, E, F and G would be zero. See Schedule III-8 for developer CIAC.

III-5 WORKING CASH ALLOWANCE CALCULATIONS

FOR THE TEST YEAR ENDED: 12/31/2016

- 1. No working cash allowance is permitted when a utility bills its customers in advance and provides service to flat rate customers only. Sewer connections count for the purposes of this schedule.
- 2. A utility which has all metered customers and bills monthly shall divide its annual Operating and Maintenance (O&M) expenses (excluding all taxes and depreciation) by 12 if it is a Class B utility, or by 8 if it is a Class C utility filing a Class B package to calculate working cash allowance. An example follows:

	Class B	Class C

# UTILITY NAME: Forest Glen Utility Company VI RATE DESIGN INSTRUCTIONS SCHEDULES - CLASS B RATE/TARIFF CHANGE

Section VI is used for rate design.

### **Instructions for Section VI:**

Sheet VI-1 designs rates based on the requested revenue requirement. Complete the schedule using the referenced lines from other schedules. The schedule is for a simple base (customer charge) rate and one gallonage rate per each 1,000 gallons. If a different rate structure is requested, all calculations supporting the proposed rates must be included. Rates and resulting revenues for each class of customer and each rate tier included in the proposed tariff must be specified. If a different fixed/variable expense split is proposed, attached explanations of why the split is appropriate, and include any calculations not included on Schedule VI.

If the utility is setting a tiered rate, calculations for all tiers must be provided with total collections for all tiers compared to the revenue requirement requested.

With 168 customers the monthly sewer bill would be \$123. This is not affordable or competitive. At build out, there will be 366 customers and the Base Service Charge will be \$56.37 per month. FGU is requesting to postpone \$125,000 in recovered rates for 2017 and place that amount into a balancing account earning interest at 7%. It is FGU's intent to recover the \$125,000 plus interest beginning in 2020 over a five year period through a surcharge.

FGU is proposing a flat fixed rate per month. This will reduce acounting and maangement costs. The amount of vaiable costs is less than 15% of the total costs and the impact on customers will be diminimus.
