

Aquilla Dam and Reservoir
Belton Dam and Reservoir
Georgetown Dam and Reservoir
Granger Dam and Reservoir
Proctor Dam and Reservoir
Somerville Dam and Reservoir
Stillhouse Hollow Dam and Reservoir
Whitney Dam and Reservoir

J. The term "Fiscal Year" shall mean Authority's fiscal year from September 1 through August 31, or such other annual fiscal year period as Authority may later determine.

K. The term "System" shall mean Authority's Water Supply System and shall include certain of Authority's facilities and properties insofar as they are related to water supply, to wit, as follows: Morris Sheppard Dam and Possum Kingdom Reservoir, DeCordova Bend Dam and Lake Granbury, Sterling C. Robertson Dam and Lake Limestone, and Authority's conservation storage in the Federal Reservoirs, together with all future extensions, improvements, enlargements and additions to and replacements of the System, and all replacements thereof, specifically added to the System by resolution of the Board; provided that, notwithstanding the foregoing, the term System shall not include (i) any of Authority's facilities and properties not specifically included in the System by the terms of this Agreement or not added by a subsequent resolution of the Board adopted pursuant to Section 13, below, and (ii) any water supply, wastewater or other facilities which have been or are declared not to be a part of

the System and which are acquired or constructed by Authority with the proceeds from the issuance of "Special Facilities Bonds", which are hereby defined as being special revenue obligations of Authority which are not secured by or payable from the revenues of the System but which are secured by and payable solely from special contract revenues or payments received from any persons or other legal entity or entities in connection with such special facilities.

L. The term "System Operation Order" shall mean that certain order of the Texas Water Commission (or its predecessor) dated July 23, 1964, as adjudicated by order of the Texas Water Commission (or its predecessor) on June 26, 1985, in the Final Determination Of All Claims Of Water Rights In The Brazos River Basin And The San Jacinto-Brazos Coastal Basin Maintained By The Brazos River Authority, Fort Bend County W.C.I.D. No. 1 And Galveston County Water Authority.

M. The term "System Rate" shall mean the rate per acre-foot of water established by Authority from time to time under the system-wide pricing methodology for water made available to FFB from the System under this Agreement.

N. The term "Total Annual Budgeted System Costs" shall mean the amounts approved by Authority as estimated costs of the System in the annual budgets adopted by Authority for a given Fiscal Year including, without limitation, amounts budgeted to meet Annual System Operation and Maintenance Expenses and Annual System Capital Related Costs.

O. The term "Total System Billing Units" shall mean the total amount of water (expressed in acre-feet per Calendar Year)

determined by Authority under accepted engineering practice as necessary to be reserved from firm yield produced by storage in the System to fulfill its commitments for which Authority receives payment under long term (in excess of five years) water sales contracts with FFB and Authority's other customers; provided, however, such term shall not include amounts of water required by appropriate governmental authority to be reserved in the System for use for bay and estuary purposes, in-stream uses, or for other similar environmental, public or beneficial uses to the extent Authority is not adequately compensated for any such requirement.

3. **EFFECTIVE DATE, CANCELLATION, AND PAYMENT CREDITS.** The 1984 Contract is cancelled as of the date of this Agreement. Any payment made by FFB under the 1984 Contract after January 1, 1992, but prior to execution of this Agreement at rates in excess of the initial System Rate provided in this Agreement under the new system-wide methodology shall be rebated or credited to FFB against payments owed pursuant to this Agreement after execution hereof.

4. **AVAILABILITY OF WATER.** While this Agreement remains in force, Authority agrees to make available to FFB for withdrawal from Lake an amount of water not to exceed 1,000 acre-feet of water per Calendar Year. While such water will be withdrawn from Lake, it may be accounted for by Authority as provided by the System Operation Order, as modified by the Final Determination. FFB represents, and Authority relies on such representation, that

all water to be made available by Authority under this Agreement to, and diverted and used by FFB shall be used solely for municipal and irrigation purposes as classified by Texas Water Commission for water use reporting.

5. **DATE AND PLACE OF PAYMENTS.** Payments to be made hereunder shall be made at Authority's office in Waco, McLennan County, Texas. Authority contemplates that by September 1 of each Fiscal Year it will have adopted budgets for Authority for said Fiscal Year and established the System Rate for said Fiscal Year. Payments for each Fiscal Year may be made under one of three payment options from which FFB will select at the beginning of each Fiscal Year. Annual payments shall be made on or before September 15 each Fiscal Year. Quarterly payments shall be made on or before September 15, December 15, March 15, and June 15 each Fiscal Year. Monthly payments shall be made on or before the fifteenth of each month each Fiscal Year. Quarterly payments or monthly payments shall include a multiplier to be applied to the annual payment to allow the Authority to recover interest lost on any unpaid balance plus a service charge for administrative costs, including but not limited to costs involving the billing, accounting and collecting for the quarterly or monthly payments. The multiplier to recover lost interest revenue and the service charge for administrative costs shall be determined on an annual basis by the Board at the time the Board sets the System Rate and shall be just and reasonable.

If the Authority increases the payment due from FFB during a Fiscal Year, it shall notify FFB of any increased amount of payment due for the remainder of the Fiscal Year and the increased amount shall be paid by FFB (i) within thirty days after receipt of notice of the increase if FFB has already paid all amounts otherwise due to the Authority for such Fiscal Year, or (ii) in approximately equal installments added to any further installment amounts owed by FFB for the remainder of such Fiscal Year if FFB has selected a payment option which resulted in FFB still having payments due to Authority during the remainder of such Fiscal Year.

6. UNCONDITIONAL NATURE OF PAYMENT OBLIGATION; PRICE.

A. Except as modified by Section 3, above, for each Fiscal Year, FFB unconditionally agrees to pay Authority annually for the water made available to FFB hereunder at a price equal to the product of multiplying the System Rate times 1,000 acre-feet of water per Calendar Year agreed to be made available to FFB by Authority from the System pursuant to this Agreement regardless of whether, or how much of, said water is diverted and used by FFB.

B. The System Rate has been initially established by the Board at a rate of \$19.15 per acre-foot of water made available annually to FFB from the System. The Authority may, and it specifically reserves the right to, revise the System Rate from time to time (usually prior to the start of each Fiscal Year) to reflect changes in Authority's cost of service to make water available from the System and to reflect changes in the number of

Total System Billing Units. Authority shall not increase the System Rate other than on a Fiscal Year basis except for reasons sufficiently unforeseeable and of such a magnitude so as to make such mid-Fiscal Year increase necessary in order to avoid jeopardizing the viability of Authority's System operations. Such reasons include Force Majeure, government legislation or regulation, or permit requirements.

C. The System Rate shall be calculated from time to time (usually prior to the start of each Fiscal Year) by the Board using accepted rate-making principles; shall be ascertained by utilizing the cash basis to determine an annual revenue requirement considering the Total Annual Budgeted System Costs and the Total System Billing Units as of the date the System Rate is adopted by the Board; shall be based on Authority's cost of service as evidenced by Authority's approved budgets; and shall be just, reasonable and non-discriminatory.

7. **INTEREST ON PAST DUE PAYMENT; COLLECTION.** In the event of failure of FFB to make any payment to Authority provided to be made in this Agreement at the time when same shall be due, the past due payment shall bear interest at the lesser of the highest rate allowed by applicable law or 10% per year.

8. **REMEDIES FOR NONPAYMENT OR DEFAULT.** Should FFB fail to make any payment to Authority when due hereunder or otherwise be in default under this Agreement, Authority at its sole option and in addition to and without impairing any other remedy available to it on account of the default, may elect to either (i)

terminate the supply of water to FFB under this Agreement until the nonpayment or other default is fully cured in accordance with the terms of this Agreement or (ii) terminate this Agreement by providing written notice of such nonpayment or other default and a statement of Authority's election to either terminate the supply of water to FFB or terminate this Agreement by reason thereof delivered to FFB on or before 30 days before the date specified in said notice for cancellation, provided that the nonpayment or other default with respect to which notice of termination of water supply or of this Agreement has been given, shall not be cured by the date thus specified in such notice. Nothing in this Agreement shall be construed in any manner so as to abridge, limit or deprive either party hereunto of any means which it would otherwise have of enforcing any right or remedy either in law or in equity for breach of any of the provisions hereof.

9. DIVERSION RATE. See Section 28. SPECIAL PROVISION.

10. WITHDRAWAL FACILITIES. The provision of facilities for diversion from Lake of the water agreed to be made available by Authority to FFB hereunder shall be solely the responsibility of FFB. Authority has granted to FFB an easement or right-of-way for FFB's diversion facilities on Authority lands at Lake at no cost to FFB subject to the conditions that the design and location for such facilities be approved by Authority; that FFB prepare and furnish all documentation necessary for FFB to retain the easement or right-of-way, including a map of convenient size

locating the point of diversion by course and distance from a survey corner or other identifiable points, which map shall at that time be made a part of this Agreement as Appendix II; and that FFB shall operate and maintain the facilities located on Authority lands in a manner acceptable to Authority.

11. **METERING.** FFB agrees that, at its sole cost and expense, it shall install, operate and maintain meters for the accurate measuring of all water diverted by FFB from Lake in order to aid Authority in accurately reporting actual water usage to the Texas Water Commission as required by applicable law or regulation. Such meter or meters shall be tested and calibrated for accuracy by and at the expense of FFB once each Calendar Year at intervals of approximately 12 months, and a report of such test and calibration shall be furnished to Authority. Authority shall be given at least two days prior notice of the time of any test and calibration of FFB's meters, or any of them, and Authority shall have the right to have a representative present at each test to observe the test and any adjustments found thereby to be necessary. Authority shall have the right to inspect and check the accuracy of FFB's meter or meters at any time during usual business hours after not less than one nor more than five days notice. In the event any question arises at any time as to the accuracy of any such meter, such meter shall be tested promptly upon demand of Authority, the expense of such test to be borne by Authority if the meter is found to be correct and by FFB if it is found to be incorrect. Readings within 2% of accuracy, plus or minus, shall be considered correct. If, as a

result of any test, any meter is found to be registering inaccurately (i.e., in excess of 2% of accuracy, plus or minus), the readings of such meter shall be corrected at the rate of its inaccuracy for any period which is definitely known and agreed upon, but in case the period is not definitely known and agreed upon, then the shorter of the following periods shall be used as the basis for correction:

- (a) a period extending back either 60 days from the date of demand for the test or, if no demand for the test was made, 60 days from the date of the test; or
- (b) a period extending back half of the time elapsed since the last previous test;

and the records of readings shall be adjusted accordingly. Following each test of a meter, FFB shall cause the same to be calibrated to register accurately.

12. **REPORTING.** FFB agrees that it will keep accurate records of the daily readings from the meter or meters installed pursuant to Section 11, above. These records shall be subject to inspection by Authority at reasonable times and places. FFB shall submit reports to Authority by the 10th day of each month showing the amount of water withdrawn from Lake each day during the preceding month (with daily diversions shown, if possible).

13. **SYSTEM EXPANSION.** FFB and Authority understand that Authority may be requested to supply water to other future customers in a manner or in an amount which may necessitate expansion or enlargement of or additions to the System and that

in connection with any such expansion, enlargement or addition, Authority may incur additional costs. FFB and Authority agree that Authority may enter into any such additional long-term water sales contracts and incur costs to expand, enlarge or add to the System to effect such sales so long as Authority has conducted detailed engineering studies to accurately reflect the cost of the expansion, enlargement or addition. The reasonable and prudent costs incurred by Authority related to such expansion, enlargement or addition shall be costs of the System.

14. **CONSERVATION OF WATER.** It is the intent of the parties to this Agreement to provide to the maximum extent practicable for the conservation of water, and FFB agrees that it is a condition of this Agreement that it shall maintain and operate its facilities in a manner that will prevent unnecessary waste of water. Authority, in accordance with applicable law or regulation, may from time to time adopt reasonable rules and regulations relating to water conservation. If required by applicable law or regulation or by Authority, FFB agrees to implement a water conservation and drought management program in accordance with a water conservation plan and that the water diverted by FFB pursuant to this Agreement will be used in accordance with such conservation plan. If required by applicable law or regulation FFB agrees that, in the event FFB furnishes water or water services to a third party that in turn will furnish the water or services to the ultimate consumer, the requirements relative to water conservation shall be met through contractual agreements between FFB and the third party providing

for the establishment and implementation of a water conservation program in compliance with such applicable law or regulation.

15. **WATER QUALITY.** As a further condition of this Agreement, FFB also agrees that it will comply with applicable water quality standards of the State in the diversion, use, reuse or discharge of water made available hereunder. Should FFB be determined by any competent legal authority to have degraded the quality of water of the State or to have violated any water quality standard established by law or lawfully adopted regulation, and subsequently fail to take action with reasonable diligence to correct such deficiency as directed by competent legal authority, such failure shall constitute an event of default under this Agreement.

Authority, in accordance with applicable law or regulation, may from time to time adopt reasonable rules and regulations relating to water quality protection. If required by applicable law or regulation, FFB agrees to implement appropriate water quality protection measures including, without limitation, a non-point source water pollution abatement program in accordance with a non-point source water pollution abatement plan.

16. **SURPLUS WATER.** FFB may not unilaterally cancel this Agreement or reduce the amounts of water it is obligated to pay for under the terms of Sections 4 and 6, above. However, should FFB ever determine that it has water surplus to its anticipated needs from water to be supplied by Authority under this

Agreement, and upon FFB's notification to Authority of the quantity of water FFB designates as surplus water, Authority will use reasonable efforts to find another party who is able and willing to purchase such surplus water upon terms and at a price not less favorable to Authority than the price and terms under this Agreement. Should Authority succeed in finding such a party and enter into a contract for sale of the surplus water at such price and upon such terms, then FFB's obligation to pay for such surplus water shall be cancelled, and the parties shall thereupon have no further obligations to one another with respect to such surplus water. Should Authority fail to find such a party at such price and on such terms, FFB may make a written request to Authority that Authority reduce the amounts of water for which FFB is obligated to pay. If such request is refused by Authority and if FFB is able to identify another party which is willing to buy any part of the water supply designated by FFB as surplus, Authority shall, unless it determines in good faith on the basis of judgment of the Board, reasonably exercised, that there are valid reasons not to do so, sell the water available as such surplus or the amounts thereof for which such party is willing to pay at such price or prices and for such periods of times as such party and FFB shall agree upon and shall apply all payments received from such party against FFB's obligations to make payments to Authority under the provisions of this Agreement. Except to the extent that FFB's obligations for payments to Authority under the provisions of this Agreement are discharged by application of payments from other parties pursuant to the sentence next preceding, or as a result of cancellation of part

of such obligation pursuant to this Section 16, FFB's obligations to make payments to Authority shall not be reduced by the provisions of this Section 16 unless Authority, in its sole discretion, grants FFB's request to reduce FFB's obligations under this Agreement. FFB agrees that if Authority shall in its discretion grant a request by any other purchaser of water from the System to reduce its obligations that FFB will not impose any objection of any nature thereto.

17. **WATER SALES BY FFB.** It is the understanding of the parties hereto that FFB is entering into this Agreement to obtain a supply of surface water for limited irrigation purposes, such as for golf courses, and to be treated by FFB and delivered to FFB's customers as potable water. FFB may not, without written consent of Authority, sell to others the water agreed to be supplied to it under this Agreement except as potable treated water or as water for irrigation purposes on lands within The Cliffs development (such area described in Appendix I, and Authority agrees to allow amendment of Appendix I to reflect any change to the area encompassed by The Cliffs development), provided, however, that if FFB desires to make all or a portion of the water available for resale as raw water on an interim basis prior to the time when it shall be needed by FFB, Authority will, upon written request from FFB, use reasonable efforts to sell such water and will apply the proceeds of any such sale in excess of Authority's costs in making such sale and any additional costs of supplying the water sold against the obligations of FFB to make payments to Authority under this

Agreement. If Authority fails to arrange such a sale within a reasonable time after receipt of such written request and FFB is able to identify another party which is willing to buy any part of the water which FFB desires to make available as raw water on an interim basis, Authority shall, unless it determines in good faith on the basis of the judgment of the Board, reasonably exercised, that there are valid reasons not to do so, sell such part of such interim surplus water as such party is willing to pay for at such price or prices and for such periods of time as such party and FFB agree upon and shall apply all payments received from such party against FFB's obligations to make payments to Authority under the provisions of this Agreement. Except to the extent that FFB's obligations for payments under this Agreement are discharged by application of payments received from other parties pursuant to the sentence next preceding, FFB's obligations to make payments to Authority shall not be released by the provisions of this Section 17. No interim sale will be made which will result in an increase in cost to FFB under this Agreement.

18. **INTERBASIN TRANSFER.** Water supplied under this Agreement shall not be transferred or used outside of the Brazos River Basin unless FFB obtains the express written consent of Authority and obtains all required governmental approvals.

19. **AVAILABILITY OF WATER; SHORTAGES AND YEARLY REPORTS.** Authority makes no guarantee that water will be available at any particular time or place or that Lake will be maintained at any

specific level at any particular time. It is fully understood by the parties hereto that the level of Lake will vary as a result of weather conditions beyond Authority's control, the use of water from Lake by other water customers of Authority and operational requirements of Authority, and that this instrument is merely an agreement to require Authority to make available water when and if water is present in said Lake, and to allow FFB to make withdrawals of the water subject to the general law on distribution and allocation of water during shortages of supply and in conformity with Authority's water rights from the Texas Water Commission and the System Operation Order.

Authority covenants that it will not sell or release any water from the storage space in Lake or other parts of the System which would impair the ability of Authority to furnish to FFB the quantities of water agreed to be provided herein. In the event of a drought of greater severity than that previously experienced, or if for any other reason water in Lake or the System becomes in short supply, Authority agrees, and FFB covenants, that Authority may fairly and equitably apportion and ration the available water supply from Lake or the System among all its several customers, including FFB.

Authority, if requested, agrees to provide to FFB on an annual basis, information indicating the amount of water that Authority has committed from Lake and the System and the amount of uncommitted water that Authority has available for contract on a long-term basis from Lake and the System. Additionally,

Authority, if requested, will provide to FFB copies of Authority's yearly audited financial reports and budgets as they are completed and approved and made available to Authority.

Unless otherwise required by emergency or urgent public necessity (as determined in the sole discretion of the Board, exercised in good faith), Authority shall provide reasonable notice, not to exceed 40 days, to FFB of any meeting of the Board to consider:

- (i) adopting annual budgets of Authority related to the System;
- (ii) changing the System Rate;
- (iii) authorizing the issuance of any bonds related to the System or expenditures for major capital improvements to the System if the issuance of such bonds or expenditures of monies for such capital improvements was not identified within the budgets or rate studies identified in (i) and (ii) above.

In connection with such notice, if requested in writing by FFB, Authority also shall promptly provide FFB with copies of any annual budgets, rate analyses, official statement or expenditure summary to be considered by the Board at such meeting.

20. **OPERATION OF SYSTEM.** The right of Authority to maintain and operate the System and at any and all times in the future to impound and release waters therefrom in any lawful manner and to any lawful extent Authority may see fit is recognized by FFB; and, except as otherwise provided herein, there shall be no obligation hereunder upon Authority to store or not to store or to release or not to release any impounded waters at any time or to maintain any waters at any specified level or to operate the System in any manner not in compliance with applicable laws or regulations, Authority's water rights and System Operation Order. Authority makes no representation as to the quality of the water in Lake or elsewhere in the System.

21. **FORCE MAJEURE.** Notwithstanding anything herein to the contrary, neither party hereto shall be under any liability or be deemed in default with respect to its obligations under this Agreement for any failure to perform or for delay in performing such party's obligations hereunder (except for the obligation to pay money) where such failure or delay is due to force majeure, while and to the extent that such performance is prevented by such cause. The term force majeure means acts of God, fire, storm, flood, war, riots, sabotage, drought, lack of availability of water due to sedimentation, low inflows of water to, or lack of water supply in Lake or other parts of the System, strikes or other differences with labor (whether or not within the power of the parties to settle same), decrees or orders of the courts or other governmental authority, or other similar or dissimilar causes not within the reasonable control of such party and not

due to negligence of such party. Each party shall use due diligence to resume performance of any obligation suspended by force majeure at the earliest practicable time.

22. **WAIVER.** Any waiver at any time by any party of its rights with respect to default under this Agreement shall not be deemed a waiver of such rights with respect to any subsequent default or matter.

23. **NOTICES AND CERTIFICATIONS.** Notices and certifications provided for in this Agreement shall be in writing. The same shall be delivered by mailing certified mail, postage paid, return receipt requested, to the respective parties at the following addresses:

Authority: Brazos River Authority
P.O. Box 7555
Waco, Texas 76714-7555

FFB: Franklin Federal Bancorp.
c/o P.M. Development Company, Inc.
Star Route, Box 19
Graford, Texas 76449

Either party may change its address as shown above by written notice to the other party. Notices shall be deemed to have been delivered on the business day following their deposit in the United States mail, postage paid and properly addressed and certified.

24. **OTHER REQUIREMENTS.** This Agreement is subject to all conditions, provisions and limitations included in Authority's water rights from the Texas Water Commission and the System Operation Order. Further, this Agreement is subject to all applicable Federal, State and local laws, and any applicable ordinances, rules, orders and regulations of any local, State or Federal governmental authority having jurisdiction. However, nothing contained in this Agreement shall be construed as a waiver of any right to question or contest any law, ordinance, order, rule or regulation of any governmental authority.

25. **SEVERABILITY.** The provisions of this Agreement are severable, and if for any reason any one or more of the provisions contained in this Agreement shall be held to be invalid, illegal or unenforceable in any respect, the invalidity, illegality or unenforceability shall not affect any other provisions of this Agreement and this Agreement shall remain in effect and be construed as if the invalid, illegal or unenforceable provision had never been contained in the Agreement.

26. **ASSIGNMENT.** This Agreement may be assigned by FFB only with the written consent of Authority, which consent shall not be unreasonably withheld or delayed.

27. **TERM OF AGREEMENT.** The term of this Agreement shall be for a period ending December 31, 2034. This Agreement shall be extended thereafter at the written request of FFB for so long as,

and to the extent that, Authority continues to have the right and ability to use storage in Lake for water supply purposes sufficient to supply the amount of water to be made available to FFB hereunder.

28. SPECIAL PROVISION. Because of the nature of water usage in The Cliffs development, with high seasonal peaks, the water to be made available to FFB under this Agreement may be diverted from Lake at daily rates desired by FFB provided that Authority shall not be required to make water available for diversion by FFB at a daily rate in excess of six times the average daily rate which would result in diversion during a Calendar Year of the total number of acre-feet of water per year then agreed to be made available for diversion by FFB.

Assignment of Water Supply Contract
By and Between
Brazos River Authority
and
Duwe Properties Company

WHEREAS, BRAZOS RIVER AUTHORITY ("Authority"), a river authority of the State of Texas, and DUWE PROPERTIES COMPANY ("Duwe") are parties to a contract dated January 16, 1984, said contract being further identified by Texas Department of Water Resources as Water Contract No. 1386 under which Authority has agreed to sell water to Duwe; and

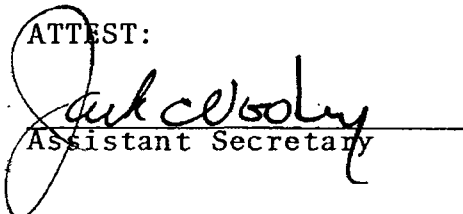

WHEREAS, Duwe desires to assign to Cliffs Development LTD., all of its rights and obligations under said contract; and

WHEREAS, Cliffs Development LTD., is agreeable to such assignment by Duwe;

NOW, THEREFORE, in consideration of the agreement of all parties, each of the parties agrees that as of May 1, 1985, said contract, with all of the rights and obligations thereunder, shall be held by Cliffs Development LTD.

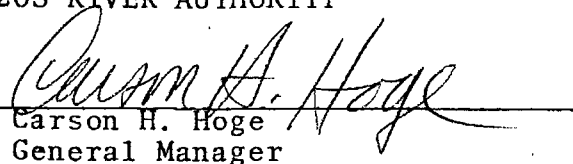

DATED as of the 3 day of June, 1985.

WATER SUPPLY CONTRACT
BY AND BETWEEN
BRAZOS RIVER AUTHORITY
AND
DUWE PROPERTIES COMPANY

Brazos River Authority ("Authority"), a river authority of the State of Texas, and Duwe Properties Company (Duwe), of Travis County, Texas contract as follows:

I.

RECITALS

Authority is authorized by the State of Texas to store State waters in Authority owned and operated Possum Kingdom Lake (Lake) and to make such waters available for beneficial use. As a result of its authorization from the State of Texas, the Authority has water in Lake which can be made available for use by Duwe. Duwe has need of water from Lake to supply the needs of its service area. The purpose of this contract is to provide for Authority to make available to Duwe from Lake water which Duwe needs and for Duwe to purchase and pay for such water.

II.

SALES AND PURCHASE

The term "Contract Year", as used in this contract means a period of one year beginning on the first day of January and ending on the 31st day of December. Beginning with the Contract Year which begins on January 1, 1984, Authority agrees to make available for withdrawal from Lake by Duwe and Duwe agrees to purchase 1,000 acre-feet of water per Contract Year for municipal water supply. Duwe shall pay for the entire 1,000 acre-feet of water per year it has the right to withdraw from Lake, whether it is actually being withdrawn or not, in accordance with the terms outlined in Article III of this contract. Duwe will give Authority written notice at least 30 days in advance of the first date on which Duwe wishes to begin withdrawals from Lake.

III.

PRICE FOR WATER

The price for water under this Contract shall be \$23.64 per acre-foot or such adjusted price as may be established by Authority from time to time in accordance with the following procedure:

Let A equal \$23.64 per acre-foot

Let X equal the Consumer Price Index for Urban Wage Earners and Clerical Workers for the month of November 1983 (1967 Index = 100);

Let Y equal Index for the month of November immediately preceding the Contract Year for which the adjusted price for water is established.

Then the adjusted price for water under this Contract shall be equal to A times Y/X.

Should Index cease to be published, the parties shall select another index, which, among the indices then available for such purposes, most nearly resembles Index for the purpose of adjusting the price for water in accordance with the above procedure.

On or before January 1, 1985, and on or before January 1 of each Contract Year thereafter during the term of this contract, Authority shall notify Duwe of the price, established in accordance with the procedure outlined above, for water during such Contract Year. On or before 15 days after February 1, 1984, and on or before 15 days after January 1 of each Contract Year thereafter during the term of this contract, Duwe shall pay Authority for the entire 1,000 acre-feet of water at the price for water set forth in the last preceding notice from Authority. Such payment shall be due whether or not Duwe withdraws any water from Lake.

IV.

IMPOSED COSTS

In addition to the adjustments in price for the water as described in Section III, above, any additional direct cost(s) or expense(s) which may be imposed on Authority in connection with fulfillment

of its obligations under this Contract by taxation or as the result of regulations or requirements lawfully imposed by the State, the United States or any State or Federal agency subsequent to execution of this Contract shall be passed through Authority to Duwe in like amount(s) and shall be included in the adjusted price for water made available by Authority to Duwe under the terms of this Contract.

V.

COMPLIANCE WITH STATE RULES

Authority and Duwe agree that the effectiveness of this Contract is dependent upon Authority's and/or Duwe's compliance with Rules 156.02.50.003, 156.02.50.004, 156.02.50.005 and 156.02.50.006 of the Rules of the Texas Water Development Board (Texas Administrative Code Sections 303.112-116).

VI.

CONSERVATION OF WATER

It is the intent of the parties of this Contract to provide to the maximum extent practicable for the conservation of water and Duwe agrees that it is a condition of this Contract that it shall maintain and operate its facilities in a manner that will prevent unnecessary waste of water.

VII.

INTEREST ON PAST DUE PAYMENT

In the event of failure of Duwe to make any payment to Authority provided to be made in this Contract at the time when same shall be due, the past due payment shall bear interest at the rate of 18% per annum.

VIII.

CANCELLATION FOR NONPAYMENT

Should Duwe fail to make payment to Authority when due hereunder, Authority may, by written notice of such nonpayment delivered to Duwe on or before 30 days before the date specified in said notice

for cancellation, provided that the nonpayment with respect to which notice has been given shall not be cured by the date thus specified in such notice, cancel this Contract.

IX.

FORCE MAJEURE

Neither party hereto shall be under any liability or be deemed in default with respect to its obligations under this Contract for any failure to perform or for delay in performing such party's obligations hereunder where such failure or delay is due to acts of God, fire, storm, flood, war, riots, sabotage, drought, low inflows of water to Lake, strikes or other differences with labor (whether or not within the power of the parties to settle same), decrees or orders of the courts or other governmental authority, or other similar or dissimilar causes not within the reasonable control of such party and not due to the negligence of such party, while and to the extent that the performance is prevented by such cause (Force Majeure) and due diligence is being used to resume performance at the earliest practicable time.

X.

WAIVER

Any waiver at any time by any party of its rights with respect to default under this Contract shall not be deemed a waiver of such rights with respect to any subsequent default or matter.

XI.

REMEDIES

Nothing in this Contract shall be so construed as, in any manner to abridge, limit or deprive either party hereunto of any means which it would otherwise have of enforcing any right or remedy either in law or in equity for breach of any of the provisions hereof, provided that this Section XI shall not be construed as excusing the parties from submitting disputes to arbitration per the provisions of Section XII, below.

XII.

ARBITRATION

Disputes between the parties arising under this Contract shall be submitted to arbitration under the rules of the American Arbitration Association.

XIII.

PLACE OF PAYMENT

All payments to be made under this Contract shall be made at Authority's office in Waco, McLennan County, Texas.

XIV.

WITHDRAWAL FACILITIES

The provision of facilities for withdrawal from Lake of the water agreed to be made available by Authority to Duwe hereunder shall be the responsibility of Duwe. Authority agrees to grant easement for such purposes over Authority land subject to the conditions that the design and location of such facilities shall be approved by the Authority, that Duwe shall prepare and furnish all documents necessary for approving the easement including a map of convenient size locating the point of diversion by course and distance from a survey corner or other identifiable point, which map shall at that time be made a part of this Contract as Appendix I, and that Duwe shall operate the facilities located on Authority lands in a manner acceptable to Authority.

XV.

METERING

Duwe agrees that it shall install, operate and maintain meters for the accurate measurement of all water withdrawn from Lake. Further, such meter or meters shall be tested and calibrated for accuracy by and at the expense of Duwe once each calendar year at intervals of approximately 12 months and a report of such test and calibration shall be furnished to Authority. Authority shall be given at least two days prior notice of the time of any test and

calibration of Duwe's meters, or any of them, and Authority shall have the right to have a representative present at each test to observe the test and any calibrations found thereby to be necessary. Authority shall have the right to inspect and check the accuracy of Duwe's meters at any time during usual business hours after not less than one nor more than five days notice. In the event any question arises at any time as to the accuracy of any such meter, such meter shall be tested promptly upon demand of the Authority, the expense of such test to be borne by Authority if the meter is found to be correct and by Duwe if it is found to be incorrect. Readings within 2% of accuracy, plus or minus, shall be considered correct. If, as a result of any test, any meter is found to be registering inaccurately (i.e., in excess of 2% of accuracy, plus or minus), the readings of such meter shall be corrected at the rate of its inaccuracy for any period which is definitely known and agreed upon, but in case the period is not definitely known and agreed upon, then the shorter of the following periods shall be used as the basis for correction:

- (a) a period extending back either 60 days from the date of demand for the test or, if no demand for the test was made, 60 days from the date of the test,
- (b) a period extending back half of the time elapsed since the last previous test;

and the records of readings shall be adjusted accordingly. Following each test of a meter, the same shall be calibrated by Duwe to register accurately.

XVI. REPORTING

Duwe agrees that it will keep accurate records of the daily readings from the meter or meters installed pursuant to Section XV, above. These records shall be subject to inspection by Authority at reasonable times and places. Duwe shall submit reports to Authority by the 10th day of each month showing the amount of water pumped each day during the preceding month.

XVII.

TERM OF CONTRACT

The term of this Contract shall be for a period of 50 years from January 1, 1984 and the Contract shall be extended at the written request of Duwe for so long as Authority continues to own and operate Lake for water supply purposes.

XVIII.

NOTICES AND CERTIFICATIONS

Notices and certifications provided for in this Contract shall be in writing. The same shall be delivered by mailing certified mail, postage paid, return receipt requested, to the respective parties at the following addresses:

Authority:

Brazos River Authority
P.O. Box 7555
Waco, Texas 76710

Duwe Properties Company:

Duwe Properties Company
1509B West 6th Street
Austin, Texas 78703

Either party may change its address as shown above by the written notice to the other party. Notices shall be deemed to have been delivered on the business day following their deposit in the United States mail, postage paid and properly addressed and certified.

DATED THIS THE 16TH day of JANUARY 1984.
