Check the box of boxes that describe the allocation method used to bill tenants.

Occupancy method: The number of occupants in the tenant's dwelling unit is divided by the total number of occupants in all dwelling units at the beginning of the month for which bills are being rendered.

Ratio occupancy method:	Number of Occupants	Number of Occupants for Billing Purposes				
The number of occupants in the tenant's dwelling unit	1	1.0				
is adjusted as shown in the table to the right. This	2	1.6				
adjusted value is divided by the total of these values	3	2.2				
for all dwelling units occupied at the beginning of the retail public utility's billing period.	>3	2.2 + 0.4 for each additional occupant				
Estimated occupancy method:	Number of	Number of Occupants for				
	Bedrooms	Billing Purposes				
The estimated occupancy for each unit is based on the	0 (Efficiency)	1				
number of bedrooms as shown in the table to the	1	1.6				
right. The estimated occupancy in the tenant's	2	2.8				
dwelling unit is divided by the total estimated	3	4.0				
,						
occupancy in all dwelling units regardless of the actual number of occupants or occupied units. Occupancy and size of rental unit percent water/wastewater consumption is allocated using the occupancy according to either: the size of the tenant's dwelling unit divided by the total the size of the space rented by the tenant of a many	rupancy method checked al size of all dwelling unit	ts, OR				
Occupancy and size of rental unit percent water/wastewater consumption is allocated using the occaccording to either: • the size of the tenant's dwelling unit divided by the tota the size of the space rented by the tenant of a manual Submetered hot water: The individually submetered hot water used in the tenant of the space rented by the tenant of the space rented by the tenant of the space rented by the tenant of a manual submetered hot water used in the tenant of the space rented by the space rented by the tenant of the space rented by the	(in which no more than supancy method checked al size of all dwelling unit ufactured home divided	50%) of the utility bill for above. The remainder is allocated as, OR all by the size of all rental spaces.				
Occupancy and size of rental unit percent water/wastewater consumption is allocated using the occupancy according to either: • the size of the tenant's dwelling unit divided by the total the size of the space rented by the tenant of a manual content of the space rented by the tenant of the space rented b	c (in which no more than supancy method checked al size of all dwelling unit ufactured home divided on it's dwelling unit is divided that the control water provided through the control water	50%) of the utility bill for above. The remainder is allocated as, OR all by the size of all rental spaces. The remainder is allocated as the space of all rental spaces. The space of all rental spaces of all rental spaces.				
Occupancy and size of rental unit percent water/wastewater consumption is allocated using the occaccording to either: • the size of the tenant's dwelling unit divided by the tota the size of the space rented by the tenant of a manual Submetered hot water: The individually submetered hot water used in the tenant all dwelling units. Submetered cold water is used to allocate charges for The individually submetered cold water used in the tenant of a manual dwelling units.	c (in which no more than supancy method checked al size of all dwelling unit ufactured home divided on it's dwelling unit is divided that the control water provided through the control water	50%) of the utility bill for above. The remainder is allocated as, OR all by the size of all rental spaces. The remainder is allocated as the space of all rental spaces. The space of all rental spaces of all rental spaces.				

The square footage of the space rented by the tenant divided by the total square footage of all rental spaces.
