## METHOD USED TO ALLOCATE UTILITY CHARGES

Check the box or boxes that describe the allocation method used to bill tenants.

Cocupancy method: The number of occupants in the tenant's dwelling unit is divided by the total number of occupants in all dwelling units at the beginning of the month for which bills are being rendered.

is adjusted as shown in the table to the right. This adjusted value is divided by the total of these values for all dwelling units occupied at the beginning of the retail public utility's billing period.    Estimated occupancy method:   Number of Bedrooms Billing Purposes	The number of occupants in the tenant's dwelling unit		Number of Occupants for		
is adjusted as shown in the table to the right. This adjusted value is divided by the total of these values for all dwelling units occupied at the beginning of the retail public utility's billing period.    Estimated occupancy method:   Number of Bedrooms Billing Purposes	The number of occupants in the tenant's dwelling unit	Number of Occupants	Billing Purposes		
adjusted value is divided by the total of these values for all dwelling units occupied at the beginning of the retail public utility's billing period.    Estimated occupancy method:		1	1.0		
Size of manufactured home rental spaces	is adjusted as shown in the table to the right. This	2	1.6		
Estimated occupancy method:  Number of Sedrooms  Bedrooms  Billing Purposes  O (Efficiency)  1  1.6  right. The estimated occupancy in the tenant's dwelling unit is divided by the total estimated occupancy in all dwelling units regardless of the actual number of occupants or occupied units.  Occupancy and size of rental unit  • the size of the tenant's dwelling unit divided by the total estimated using the occupancy method checked above. The remainder is allocated according to either:  • the size of the tenant's dwelling unit divided by the total size of all dwelling units, OR  • the size of the space rented by the tenant of a manufactured home divided by all submetered hot water used in the tenant's dwelling units.  Submetered cold water is used to allocate charges for hot water provided through a central system:  The individually submetered cold water used in the tenant's dwelling unit is divided by all submetered cold water used all dwelling units.  Submetered cold water is used to allocate charges for hot water provided through a central system:  The individually submetered cold water used in the tenant's dwelling unit is divided by all submetered cold water used all dwelling units.  Submetered cold water is used to allocate charges for hot water provided through a central system:  The individually submetered cold water used in the tenant's dwelling unit is divided by all submetered cold water used all dwelling units.  As outlined in the condominium contract. Describe:  Size of manufactured home rental space:	adjusted value is divided by the total of these values	3	2.2		
Bedrooms Billing Purposes  The estimated occupancy for each unit is based on the number of bedrooms as shown in the table to the right. The estimated occupancy in the tenant's dwelling unit is divided by the total estimated occupancy in all dwelling units regardless of the actual number of occupants or occupied units.  As outlined in the condominium contract. Describe:  Bedrooms Billing Purposes  0 (Efficiency)  1  1.6  1.6  2.8  4.0  2.8  3  4.0  4.0+1.2 for each additional bedroom water/wastewater consumption is allocated using the occupancy method checked above. The remainder is allocated according to either:  • the size of the tenant's dwelling unit divided by the total size of all dwelling units, OR  • the size of the space rented by the tenant of a manufactured home divided by the size of all rental spaces.  Submetered hot water:  The individually submetered hot water used in the tenant's dwelling unit is divided by all submetered hot water used in the tenant's dwelling unit is divided by all submetered cold water used in the tenant's dwelling unit is divided by all submetered cold water used all dwelling units.  Submetered cold water is used to allocate charges for hot water provided through a central system:  The individually submetered cold water used in the tenant's dwelling unit is divided by all submetered cold water used all dwelling units.	for all dwelling units occupied at the beginning of the retail public utility's billing period.	>3	2.2 + 0.4 for each additional occupan		
The estimated occupancy for each unit is based on the number of bedrooms as shown in the table to the right. The estimated occupancy in the tenant's dwelling unit is divided by the total estimated occupancy in all dwelling units regardless of the actual number of occupancy in all dwelling units.  C Occupancy and size of rental unit 50 percent (in which no more than 50%) of the utility bill for water/wastewater consumption is allocated using the occupancy method checked above. The remainder is allocated according to either:  • the size of the tenant's dwelling unit divided by the total size of all dwelling units, OR  • the size of the space rented by the tenant of a manufactured home divided by the size of all rental spaces.
