RE: Appeal of the City of Celina Water Rates

Dear PUC Board Members:

Please accept seven copies of this petition (including the original), appealing the water rates approved by the Celina City Council on November 13, 2018.

The undersigned request that the Public Utility Commission of Texas review the decision of the City Council to determine if the rates charged to the Ratepayers are just and reasonable. All of the Ratepayers reside outside the corporate boundaries of the City, and most, if not all, reside within the boundaries of Collin County Municipal Utility District No. 1 (the "MUD"), which is located outside the corporate boundaries of the City. Based on the City's Code of Ordinances (the "Code"), the City charges the Ratepayers for water service at the "Out-of-City Residential Rate" which is based on a multiple of the rate charged residents located within the City. Under the Code, that multiple is currently at 1.5 times the rate charged to residents located within the City.

Typically, a municipality will charge ratepayers located outside the boundaries of the municipality a higher rate because of 1) the costs incurred by the municipality to construct the necessary facilities to extend services to reach such ratepayers, and 2) the costs to the municipality to operate and maintain such facilities at a distance greater than the municipal boundaries. The MUD, and not the City, has funded construction of the portion of both the off-site and on-site water infrastructure comprising the City System that serves the Ratepayers. This water infrastructure paid for by the MUD was designed to serve not only the area within the MUD, but areas within the City as well. Accordingly, the City did not incur costs in constructing the facilities to serve the Ratepayers that would justify a higher rate to serve the Ratepayers. Further, although the MUD is not located within the corporate boundaries of the City; its boundaries are contiguous to the corporate limits of the City on three sides of the MUD. The Ratepayers do not reside in an area remote or distant from the in-City service area. Rather, the area within the MUD acts as a "service hub" facilitating water service in the area of the MUD. Therefore, the City does not incur increased costs resulting from the location of the Ratepayers that would justify a higher rate.

In summary, the City has not and will not incur costs to provide service to Ratepayers that justify both the current Out-of-City Residential Rate and the proposed rate increases to be charged to the Ratepayers.

The ratepayers are objecting to the 1.5 multiplier charged to ratepayers within the MUD charged by the City of Celina on the grounds that it is unjust and unreasonable and it unfairly burdens the ratepayers with costs to serve new development. The undersigned ratepayers hereby petition the Commission to set interim water rates charged to the MUD equivalent to the "In-City" water Rates.

Sincerely,

## APPEAL OF CITY OF CELINA WATER RATES

We, the undersigned ratepayers ("Ratepayers") located outside the City of Celina ("City"), hereby appeal to the Public Utility Commission and protest the three-phase, water and sewer rate increases adopted by the City of Celina Council (mailing address - 142 North Ohio Street Celina, TX 75009, phone number - (972) 382-2682) on November 13, 2018, pursuant to City Ordinance No. 2018-66. We are filing this petition under Texas Water Code § 13.043(b)(3). The effective date for the water and sewer rate increases is January 2019; however, the City has not formally notified the Ratepayers of the rate increase. The proposed rates are as follows:
