6.2.3 ADDITIONAL COMPANY SPECIFIC TERMS AND CONDITIONS

1. In the event that Retail Customer's monthly bill is based upon a period of less than or more than a normal billing period length any applicable \$/month and demand based (\$/kVA or \$kW) charges shall be prorated based on a 30 day billing period. However, a normal billing period typically ranges from 27 to 35 days and is typically the period between two consecutively scheduled meter reading dates. The Company determines the normal billing period and scheduled meter reading dates based on holidays, weekends and other factors which impact the schedule.
2. The Company rents certain distribution equipment to Retail Customers on a short term, emergency basis, provided the items are not immediately available from local suppliers and the Company has a sufficient quantity of such item in stock to meet operating requirements. Terms and conditions of all rental transactions are specified in a written agreement.

The Company will assist the Retail Customer to determine the appropriate service arrangements, when practical. Based on these arrangements, the Company will provide a cost basis for the rental or leasing of equipment required to receive 138,000 volt service.

3. Company calculates the labor costs included in the "As Calculated" Meter Tampering Charge under Section 6.1.2.1 of this Tariff (Uniform Discretionary Charges) based on an estimated average of the type of personnel typically involved and time typically spent in conducting an investigation and taking corrective actions in routine meter tampering cases.
4. Company will apply Section 5.5.6 of this Tariff to Retail Customers with on-site generation who comply with the notice requirements in that Section for scheduled maintenance on their generation facilities. For this purpose, Company interprets the terms "scheduled equipment testing," "equipment testing," and "testing" in that Section to include "scheduled on-site generation maintenance" and the term "test period" to include "scheduled on-site generation maintenance period."

Company may amend the Specifications at any time after the date of this Agreement consistent with Good Utility Practice, and Customer agrees that any such amended Specifications will become effective hereunder upon Customer’s receipt of notice thereof from Company pursuant to Section 11 hereof.

(b) Substation Operation. At all times during its operation and maintenance of the Customer Substation, Customer agrees to be strictly bound by the Tariff, including the Power Factor requirements, and the Company’s “Transmission & Substation Outage and Clearance Coordination Procedures” (as may be amended from time to time, the “**Procedures**”). Customer hereby acknowledges that it has received a copy of the Procedures in effect as of the date hereof. Company may amend the Procedures at any time after the date of this Agreement consistent with Good Utility Practice, and Customer agrees that any such amended Procedures will become effective hereunder upon Customer’s receipt of notice thereof from Company pursuant to Section 11 hereof. - b. *Neither Company nor Customer shall be liable to the other for damages for anything that is beyond such Party's control, including an act of God, labor disturbance, act of a public enemy, war, insurrection, riot, fire, storm or flood, explosion, breakage or accident to machinery or equipment, a curtailment, order, or regulation or restriction imposed by governmental, military, or lawfully established civilian authorities, or the making of necessary repairs upon the property or equipment of either party.*

Such indemnity shall include, but is not limited to, financial responsibility for: (a) Customer's monetary losses; (b) reasonable costs and expenses of defending an action or claim made by a third person; (c) damages related to the death or injury of a third person; (d) damages to the property of Customer; (e) damages to the property of a third person; (f) damages for the disruption of the business of a third person. 3. Customer agrees that Company is not obligated to alter or adjust any meter reading based on the equipment that Customer installs to receive the Electrical Pulses provided for herein and that Company in no way guarantees that Customer’s equipment will operate satisfactorily.

Customer shall remit payment to Company for the costs incurred under this paragraph by the due date shown on Company’s invoice.

**TERMS AND CONDITIONS FOR WHOLESALE TRANSMISSION SERVICE
APPLICABLE TO RATE SCHEDULE WTS**

1. Transmission service will be provided in accordance with the following: the Public Utility Regulatory Act ("PURA"), the Commission Substantive Rules, and the ERCOT Protocols (collectively "Applicable Legal Authorities"); the terms and conditions of this Tariff; any Interconnection Agreement; and rate schedule WTS. Any changes made by the Applicable Legal Authorities will automatically become effective.
2. The provisions of this Subsection shall apply only to the operation of Company and Customer within ERCOT. Company and Customer (collectively "Parties" or, each individually "Party") represent and warrant to each other that, except in compliance with the Orders of the Federal Energy Regulatory Commission ("FERC") in FERC Docket No. EL 79-8 et seq. issued on October 28, 1981, and subsequent orders (collectively "the Orders"), they do not, either directly or through connections with other entities, transmit electric energy in interstate commerce or sell electric energy in interstate commerce or own or operate any such facilities. Each party agrees that it will not, except in compliance with the Orders, engage, directly or through other entities, in any such interstate activities or operate, establish, maintain, modify, or utilize, directly or through other entities, any connection or facility used or to be used for the sale or transmission of electric energy in interstate commerce without one year's prior written notice to the other party. The party desiring to commence interstate operation agrees to file an application with, and use its best efforts to obtain an order from FERC, applicable to the other party, under Sections 210, 211 and 212 of the Federal Power Act, requiring the establishment, maintenance, modification, or utilization of any such connection that may be involved; provided, however, that compliance with the Orders shall not require further notice to the parties or application to the FERC pursuant to this Subsection.

It is understood and agreed that the failure of the party electing to commence interstate operations to comply with any provision of this Subsection or the Orders shall entitle the other party to disconnect its facilities.

The parties agree that it will be impossible to measure in terms of money the damages which may or will accrue by reason of any breach of the representation and warranty set forth above, or any failure in the performance of any of the obligations contained in this Subsection. For that reason, among others, the parties agree that, in case of any such breach or failure, the non-breaching party will be irreparably damaged if this Subsection is not specifically enforced, and accordingly, the parties agree that the non-breaching party is entitled to specific performance of the provisions of this Subsection, in addition to any other remedies which may exist. If the non-breaching party should institute proceedings to enforce these provisions, the breaching party waives any claim or defense that inadequate remedy at law exists.
