Re: PUC Docket No. 49493; Application of Entergy Texas, Inc. to Adjust its Energy Efficiency Cost Recovery Factor; Errata No. 2

Dear Ms. Trevino:

The attached errata items reflect (1) small changes to the amount and allocation of the EM&V costs for review of the 2017 program to reflect Tetra tech's actual charges per program, and (2) the resulting impacts on the over-recovery amounts, bonus calculation, and rates. The overall amount of the EM&V charges decreased by \$10, but the amount allocated to the residential class based on the actual charges per program increased by about \$8,000, which results in an EECRF rate increase of \$0.000001 per kWh for the residential class over the initially proposed rates.

The attached revised errata include the following:

- Exhibit JKC-1: Corrected EM&V costs in table 10 on page 19 and corrected over-recovery amount in Section XIII on page 22.
- Exhibit JKC-8: Corrected bonus calculation reflecting a \$1 increase.
- Exhibit JKC-9: Revised Cost Effectiveness calculation.
- Exhibit JKC-10: Revised Administrative Costs Summary reflecting a \$10 decrease to the Tetra Tech charges and the grand total.
- Exhibit JCL-1: Revised EECRF rate calculation.
- Exhibit JCL-2: Revised Schedule EECRF to reflect the small change in rates.
- Exhibit JCL-3: Reflecting the change in 2018 performance bonus, 2018 over recovery, and EM&V costs for review of 2017 program.

Thank you for your attention to this matter.
