RE: Application of City of Elmendorf to Obtain a Sewer Certificate of Convenience and Necessity (CCN) in Bexar County  
Docket No. 49566  
Order No. 6 Response – Request for Supplemental Information

Dear Ms. Fuentes,

This letter is in response to Docket No 49566, Order No. 6, Commission Staff's request for supplemental information. Below you will find additional information and an update regarding the application.

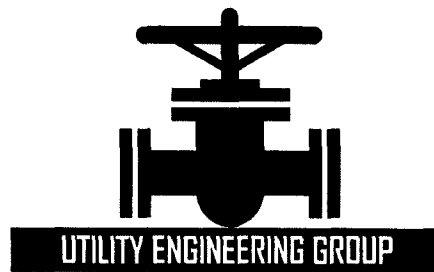

Since the original CCN application was submitted by the City, the City has purchased a wastewater treatment plant from the San Antonio River Authority (SARA), associated collection system consisting of gravity main, forcemain and a lift station and the associated Texas Pollutant Discharge Elimination System (TPDES) No. WQ0010749006. The permit has recently been renewed and transferred to the City of Elmendorf for operation and maintenance, see attached transfer documentation. The wastewater treatment plant will be expanded as needed to meet the service needs of development with the City's proposed sewer CCN.

At the January 16, 2020 Regular City Council meeting of the City of Elmendorf, City Council directed staff to amend the CCN application to cover the City Limits and additional acreage to match the San Antonio Water System Sewer CCN to the west of the City. We would like to amend our application that is the subject of this Docket No. 49566 to cover this area. We are providing updated large and small scale maps and shapefiles for the subject application.

If you have any questions or need any additional information, feel free to contact me.

Thank you.
