PUC DOCKET NO. 49737

**SOUTHWESTERN ELECTRIC POWER COMPANY'S AMENDED RESPONSE TO TEXAS  
INDUSTRIAL ENERGY CONSUMERS' FOURTH REQUEST FOR INFORMATION**

**Question No. TIEC 4-7:**

If SWEPCO has not developed separate cost-benefit analyses for the Maverick and Sundance facilities, please provide the information necessary to calculate the costs and benefits.

**Response No. TIEC 4-7:**

SWEPCO acquiring all or a portion of only the Sundance or Maverick facilities by themselves is not a potential outcome based on the terms of the Purchase and Sale Agreements with the sellers, and therefore the information necessary to calculate the costs and benefits has not been prepared.

**Amended Response No. TIEC 4-7:**

SWEPCO acquiring all or a portion of only the Sundance or Maverick facilities by themselves is not a potential outcome contemplated in SWEPCO's Application filed in this case based on the minimum purchase terms of the Purchase and Sale Agreements and SWEPCO's obligation to its customers to purchase capacity in accordance with the least-cost, risk-adjusted rank order resulting from the RFP (with Traverse being the highest scoring of the three selected wind facilities). Therefore, the information necessary to calculate the costs and benefits has not been prepared.
