PUBLIC UTILITY COMMISSION  
FILING CLERK

July 18, 2019

Filing Clerk  
Public Utility Commission of Texas  
1701 N. Congress  
Austin, TX 78711-3326

Dear Filing Clerk:

Re: Tariff filing of Southwestern Bell Telephone Company d/b/a AT&T Texas pursuant to PURA §52.007

Attached for filing are the original and five copies of the following tariff sheets for Southwestern Bell Telephone Company d/b/a AT&T Texas. This filing is being made in conjunction with the FCC's Second Report and Order in WC Docket No. 17-84 (FCC 18-74) released June 8, 2018 (Zero Demand Forbearance). The language being added to AT&T Texas's tariffs by this filing provides that AT&T Texas is no longer required to offer certain services in geographic areas where there are no customers subscribing to those services. To be clear, no existing customers are affected by this filing, nor are any areas affected in which AT&T Texas is already providing services to existing customers. The only change occasioned by this tariff filing is that, in the event a potential customer requests one of the affected intrastate services in an area where AT&T Texas is not already providing the service and has no existing customers, AT&T Texas may decline the request for service.

#### APPLICATION OF TARIFF

Southwestern Bell Telephone Company, hereinafter referred to as "the Company", is a Missouri corporation with its headquarters in Dallas, Texas that provides telecommunications common carrier services in Texas as well as Arkansas, Kansas, Missouri, and Oklahoma. Southwestern Bell Telephone Company does business in the state of Texas under the name "AT&T Texas," effective January 4, 2006. AT&T Texas adopts all tariff references in effect on that date under its prior name "SBC Texas" until such time as those tariff references are revised.

The El Paso County portion of each section of this tariff applies only to services and facilities furnished or made available by AT&T Texas within El Paso County, Texas.

The Company may discontinue certain Company services in geographic areas for which the Company has no customers subscribing to those services. (N)  
(N)

The rates and services provided in this tariff are regulated and approved by the Public Utility Commission of Texas (Commission) in compliance with the Public Utility Regulatory Act and the rules adopted by the Commission.

This tariff hereby cancels in its entirety the Mountain States Telephone and Telegraph Company Tariff covering services offered in El Paso County, Texas, as adopted by AT&T Texas on January 1, 1982.

Whenever reference is made in this tariff to other intrastate Texas tariffs of AT&T Texas, the reference is to the tariffs in force as of the effective date of this tariff, and to amendments thereto and successive issues thereof.

Subsequent compliance tariff filings will be made as necessary to implement the provisions of the Stipulation as authorized by the Commission's Order in Docket No. 8585.

#### EXPLANATION OF SYMBOLS

The following symbols will be used in the right-hand margins of each tariff page to indicate changes made on the sheets:

- (C) Indicates a Change in Regulation
- (D) Indicates Discontinued Rate or Regulation
- (E) Indicates Correction of an Error Made During a Revision
- (I) Indicates Rate Increase
- (M) Indicates a Move of Text but no Change in Text, Rate or Regulation
- (N) Indicates a New Rate or Regulation
- (R) Indicates a Rate Reduction
- (T) Indicates a Change in Text but no Change in Rate or Regulation

#### APPLICATION OF TARIFF

Southwestern Bell Telephone Company, hereinafter referred to as "the Company", is a Missouri corporation with its headquarters in Dallas, Texas that provides telecommunications common carrier services in Texas as well as Arkansas, Kansas, Missouri, and Oklahoma. Southwestern Bell Telephone Company does business in the state of Texas under the name "AT&T Texas," effective January 4, 2006. AT&T Texas adopts all tariff references in effect on that date under its prior name "SBC Texas" until such time as those tariff references are revised.

This tariff applies to intraLATA private line services furnished or made available by AT&T Texas for private line services furnished jointly with a connecting company, to the portion of such private line services furnished by AT&T Texas to the point of connection with the facilities of another company for which that company's rates and regulations apply, over facilities wholly within or partly within and partly without the State of Texas between two or more points, all of said points being within the State of Texas.

The Company may discontinue certain Company services in geographic areas for which the Company has no customers subscribing to those services. (N)  
(N)

The rates and services provided in this tariff are regulated and approved by the Public Utility Commission of Texas (Commission) in compliance with the Public Utility Regulatory Act and the rules adopted by the Commission.

The schedules of rates and specific regulations are set forth in this tariff.

Whenever reference is made in this tariff to other intrastate Texas tariffs of AT&T Texas, the reference is to the tariffs in force as of the effective date of this tariff, and to amendments thereto and successive issues thereof.

**GENERAL REGULATIONS**

---

**2.1 Undertaking of SWBT (Cont'd)**

**2.1.4 Provision of Services**

- (A) SWBT will provide to the customer, upon reasonable notice, services offered in other applicable sections of this tariff at rates and charges specified therein, to the extent that such services are or can be made available with reasonable effort and after provisions have been made for SWBT's Telephone Exchange Service.

In the event that the customer's request cannot be fulfilled with existing facilities and equipment or the request is not consistent with SWBT's filed tariffs and technical references contained therein, alternative designs may be provided by SWBT. Additionally, SWBT will work with the customer to reach an agreeable solution.

The Company may discontinue certain Company services in geographic areas for which the Company has no customers subscribing to those services. (N) (N)

- (B) The services provided under this tariff are provided over such routes and facilities as SWBT may elect. Requests for special facilities or routing of access service will be provided in accordance with Section 11 (Special Facilities Routing of Access Services) or Section 14 (Special Construction), as appropriate.
- (C) The services in this tariff will be provided as follows:
- (1) The service will include any entrance cable or drop wiring and wiring or cable as set forth in Part 68 of the F.C.C.'s Rules and Regulations.
  - (2) The service will be installed by SWBT to a point of demarcation.
- (D) Standard Jacks, discussed in 13.3.5 (Standard Jacks-Registration Program), are used where appropriate to terminate services. Jacks other than those used to terminate services may be provided by SWBT as specified in the General Exchange Tariff.
- (E) Except as provided for equipment and systems subject to F.C.C. Part 68 Regulation at 47 C.F.R. Section 68.110(b), SWBT may, where such action is reasonably required in the operation of its business:
- (1) Substitute, change or rearrange any facilities used in providing service under this tariff, including but not limited to:
    - substitution of different metallic facilities,
    - substitution of carrier or derived facilities for metallic facilities used to provide other than metallic facilities, and
    - substitution of metallic facilities for carrier or derived facilities used to provide other than metallic facilities.
  - (2) Change minimum network protection criteria;
  - (3) Change operating or maintenance characteristics of facilities; or
  - (4) Change operations or procedures of SWBT.

#### APPLICATION OF TARIFF

Southwestern Bell Telephone Company, hereinafter referred to as "the Company", is a Missouri corporation with its headquarters in Dallas, Texas that provides telecommunications common carrier services in Texas as well as Arkansas, Kansas, Missouri, and Oklahoma. Southwestern Bell Telephone Company does business in the state of Texas under the name "AT&T Texas," effective January 4, 2006. AT&T Texas adopts all tariff references in effect on that date under its prior name "SBC Texas" until such time as those tariff references are revised.

This tariff sets forth the terms and conditions for physical collocation arrangements furnished or made available by AT&T Texas in the State of Texas pursuant to Docket Nos. 16189, 16196, 16226, 16285 and 16290 (the "Consolidated Award"), before the Public Utility Commission of Texas ("Commission").

The Company may discontinue certain Company services in geographic areas for which the Company has no customers subscribing to those services. (N)  
(N)

Whenever reference is made in this tariff to other intrastate Texas tariffs of AT&T Texas, the reference is to the tariffs in effect as of the effective date of this tariff, and to amendments thereto and successive issues thereof.

The rates and services provided in this tariff are regulated and approved by the Commission in compliance with the Public Utility Regulatory Act of 1995 (PURA), the Commission's rules and the Federal Telecommunications Act of 1996 ("FTA96").

AT&T Texas, where possible, will make available to common carriers, services provided in other AT&T Texas tariffs under the Rules, Regulations and Rates provided in those tariffs except where specific exception is made in this tariff.

## REGULATIONS

Southwestern Bell Telephone Company, hereinafter referred to as "the Company", is a Missouri corporation with its headquarters in Dallas, Texas that provides telecommunications common carrier services in Texas as well as Arkansas, Kansas, Missouri, and Oklahoma. Southwestern Bell Telephone Company does business in the state of Texas under the name "AT&T Texas," effective January 4, 2006. AT&T Texas adopts all tariff references in effect on that date under its prior name "SBC Texas" until such time as those tariff references are revised.

### 1. Scope of Service

1.1 This tariff provides AT&T Texas facilities and services for the interconnection and interchange of traffic between AT&T Texas and the providers of public mobile radio service, private land mobile radio service as well as personal communications service, as defined in Part 22, Part 24 (1) and Part 90 of the Rules of the FCC, in the State of Texas. This tariff also provides for interconnection of experimental radio service licensees who develop and test radio equipment and systems used by Part 22, Part 24 and Part 90 providers, as defined in Part 5 of the Rules of the FCC. Authorized resellers of radio services provided by Part 22, Part 24 or Part 90 licensees may also purchase interconnection services from this tariff.

1.2 This tariff is applicable to all CMCs for the provision of Type 1, Type 2A, and Type 2B trunk side interconnection arrangements, as found, for descriptive purposes only, in the Bell Communications Research Inc. Technical Reference TR-NPL-000145, "Compatibility Information for the Interface between a Cellular Mobile Carrier and a Local Exchange Carrier Network;" Technical Reference TR-EOP-000352, "Cellular Mobile Carrier Interconnection Transmission Plans;" and Technical Reference TR-NPL-000275, "Notes on BOC Intra-LATA Networks," Section 16, which is titled "Cellular Mobile Carrier Interconnection." This tariff is also applicable to all carriers for the provision of line side interconnection, as found for description purposes only, in Bell System Technical Reference Number 43303. This service is optional for providers of noncellular two-way Common Carrier Services, as defined in Part 22, Subpart G, of the Rules of the FCC. Additionally, Part 90 service providers have the option of purchasing their interconnection to the public switched network from this tariff.

This tariff also provides AT&T Texas facilities and services for Common Channel Signaling/Signaling System Seven (CCS/SS7) Service found, for descriptive purposes only, in the current issue of Bellcore TR-TSV-00905, "Common Channel Signaling Network Interface Specifications" and AT&T Texas Technical Publication, TP-76638, "SWBT Supplement to TR-TSV-000905".

1.3 The Company may discontinue certain Company services in geographic areas for which the Company has no customers subscribing to those services.

---

REGULATIONS

1. Scope of Service (cont'd)

1.4 Definitions

(T)

Access Service Tariff - SWBT's intrastate Texas Access Service Tariff on file with the Commission, offering exchange access to interexchange carriers.

Area Wide Calling Plan (AWCP) - The AWCP is an optional originating service available to eligible CMCs as a tandem connection under Type 2A Service. By subscribing to this service, a CMC's patron will be able to receive intraLATA toll calls from SWBT end user customers without the SWBT end user customer incurring a toll charge for the call, provided the call is placed to an NXX designated by the CMC as an AWCP NXX. A CMC subject to obligatory Telephone Number Portability as described in the FCC's "Second Report and Order, In the Matter of Local Number Portability," FCC 97-289, is not an eligible carrier.

Call Path Associated Signaling (CAS) - A wireless 911 solution set that utilizes the voice transmission path to also deliver the Mobile Directory Number and the caller's location to the Public Safety Answering Point (PSAP).

Cell Site - A cell site is the location of fixed radio transmitting and receiving facilities associated with a cellular system.

Cellular Geographic Service Area (CGSA) - The geographic area served by the cellular system within which a CMC is authorized to provide service.

Cellular Mobile Carrier or CMC - A common carrier provider or an authorized reseller of domestic public cellular telecommunications service, as defined in Part 22, Subpart K, of the Rules of the FCC. For the purposes of this tariff only, the term CMC shall also include providers licensed under Part 22, Subpart G and Part 24 of the Rules of the FCC and their authorized resellers.

Connecting Circuits - Circuits between a CMC's MTSO and a SWBT serving wire center or tandem office for the interchange of traffic. Such circuits may be one-way or two-way in directionality.

- (1) These tariff provisions do not apply to PCS providers that are certificated to provide local exchange service.

---

REGULATIONS

1. Scope of Service (cont'd)

1.4 Definitions (cont'd)

(T)

Demarcation Point - The point of demarcation and/or interconnection between SWBT communications facilities and terminal equipment, protective apparatus or wiring at a subscriber's premises. SWBT-installed facilities at, or constituting, the demarcation point shall consist of wire or a jack conforming to Subpart F of Part 68 of the Commission's rules. SWBT will provide one primary demarcation point for services provided through SWBT network facilities at no cost to the subscriber. Any secondary or additional demarcation point(s) requested by the customer will be provided as specified in the AT&T Texas Guidebook, Part 2, Section 5 (Construction Charges). The costs of providing these secondary or additional demarcation points include all labor and materials including cabling. Additions or reinforcements of existing facilities to secondary demarcation points will only be provided upon customer request and billed as specified in the AT&T Texas Guidebook, Part 2, Section 5 (Construction Charges)). "Premises" as used herein generally means a dwelling unit, other building or a legal unit of real property such as a lot on which a dwelling unit is located, as determined by SWBT's reasonable and nondiscriminatory standard operating practices. The "minimum point of entry" (MPOE) as used herein shall be either (1) the closest practicable point to where the wiring crosses a property line or (2) the closest practicable point to where the wiring enters a multiunit building or buildings. SWBT's reasonable and nondiscriminatory standard operating practices shall determine which of (1) or (2) shall apply. SWBT is not precluded from establishing reasonable classifications of multiunit premises for purposes of determining which of (1) or (2) above shall apply. Multiunit premises include, but are not limited to, residential, commercial, shopping center and campus situations.

(a) Single Unit Installations. For single unit installations existing as of June 9, 1994 and installations installed after that date the demarcation point shall be a point within twelve inches of the protector or, where there is no protector, within twelve inches of where the telephone wire enters the customer's premises.

(b) Multiunit Installations.

(1) In multiunit premises existing as of June 9, 1994, the demarcation point shall be determined in accordance with SWBT's reasonable and nondiscriminatory standard operating practices. Provided, however, that where there are multiple demarcation points within the multiunit premises, a demarcation point for a customer shall not be further inside the customer's premises than a point twelve inches from where the wiring enters the customer's premises.

(2) In multiunit premises in which wiring is installed after June 9, 1994, the multiunit premises owner shall determine the location of the demarcation point or points. The multiunit premises owner shall determine whether there shall be a single demarcation point location for all customers or separate such locations for each customer. Provided, however, that where there are multiple demarcation points within the multiunit premises, a demarcation point for a customer shall not be further inside the customer's premises than a point twelve inches from where the wiring enters the customer's premises.

CELLULAR MOBILE TELEPHONE INTERCONNECTION TARIFF  
Section: 1  
Sheet: 2  
Revision: 3  
Replacing: 2

---

## REGULATIONS

### 1. Scope of Service (cont'd)

#### 1.4 Definitions (cont'd)

(T)

##### Demarcation Point (cont'd)

At this time, SWBT has elected not to establish a practice of placing the demarcation point at the MPOE for multiunit premises. However, at the customer's request, SWBT will place the demarcation point at the MPOE in existing installations, and as appropriate, in new installations. SWBT will relocate multiple demarcation points to a single demarcation point at an MPOE in a manner that minimizes any resultant charges or other adverse impact to either building owners or customers.

If conforming to the twelve inch limitation is unrealistic or technically impossible, the demarcation point will be the most practicable MPOE.

End office Rate Center - An end office selected by the CMC as the end office for rating (measuring purposes) for Type 2A interconnection.

Equal Access Connections - One-way terminating circuits from a CMC's MTSO to a telephone company access tandem which allows the CMC's patrons to have equal access to interexchange carriers.

End Office Switch - An end office switch is a local SWBT switching system where SWBT exchange service customer station loops are terminated for purposes of interconnection to each other and to the network.

Exchange - Denotes a unit generally smaller than a Local Access and Transport Area (LATA) established by SWBT for the administration of communications service in a specified area which usually embraces a city, town or village and its environs. It consists of one or more end office switches together with the associated facilities used in furnishing communications service within that area. One or more designated exchanges comprises a given LATA.

Hybrid - A wireless 911 solution set that utilizes one transmission path to deliver the voice and Mobile Directory Number to the Public Safety Answering Point (PSAP) and a separate transmission path to deliver the caller's location information to the PSAP.

Interexchange Carrier or IC - A common carrier which provides the for-hire telecommunications service of connecting messages or facilities in one exchange to another exchange. An IC does not provide connections directly to end user-subscribers; local exchange carriers provide local switching functions at both ends of an interexchange call on behalf of the IC.

MTSO - For purposes of this tariff, a MTSO is the CMC's switching equipment used to provide the CMC's switching service (i.e., the mobile telephone switching office) or, alternatively, any other point of termination designated by the CMC. The MTSO is the point of interconnection between the CMC's customers within its CGSA and the end users of wireline exchange carriers and interexchange carriers.

REGULATIONS

1. Scope of Service (cont'd)

1.4 Definitions (cont'd)

(T)

Non-Call Path Associated Signaling (NCAS) - A wireless 911 solution set that utilizes one transmission path to deliver the voice and a separate transmission path to deliver the Mobile Directory Number and the caller's location to the Public Safety Answering Point (PSAP).

NXX Code - A block of 10,000 consecutive telephone numbers having the same 3-digit prefix.

Originating Traffic - For purposes of this tariff, all interchange traffic which is delivered by SWBT to a CMC for termination on the CMC's system is originating traffic.

Point of Interconnection - The first point of switching for terminating traffic in the SWBT network. For example, where terminating traffic is switched to other end offices in the LATA, interexchange carriers and operator or auxiliary services (e.g. 411, 911 and 555-1212).

Radio Transmitter Links - Dedicated voice and/or data circuits provided by SWBT between a CMC MTSO and cell site locations or between cell site locations.

Shell Record - a partial Automatic Location Identification (ALI) record which requires a dynamic update of the Emergency Services Routing Key (ESRK), Call Back Number, cell site and sector information for a Phase I deployment, and XY location data for a Phase II deployment. The dynamic update requires input from the CMC's network prior to updating the ALI records and forwarding to the appropriate Public Safety Answering Point (PSAP).

Tandem Office - Denotes a local SWBT switching unit by means of which local or access telephone communications are switched to and from an end office switch or a CMC's MTSO.

Terminating Traffic - For purposes of this tariff, that traffic which is originated by a CMC and interchanged with SWBT for termination at a point on the intraLATA wireline exchange network or for delivery to an interexchange carrier is terminating traffic.

Terminating Usage - For purposes of this tariff, the terminating usage to which terminating usage charges described in this tariff apply is only that CMC originated traffic interchanged with SWBT for termination at a point on the intraLATA wireline exchange network.

Wire Center - A wire center is a building in which one or more end offices of SWBT, used for the provision of its local exchange services, are located.
