**PUBLIC UTILITY COMMISSION OF TEXAS**

**PUC NO. 49795**

**REQUEST NUMBER ONE: QUESTION NO. PETTY 1-26**

**COMPANY NAME:** Rio Grande Electric Cooperative, Inc.

**INFORMATION REQUESTED:**

Petty 1-26: For the years 2015 to the present, please identify the following:

- A. The System Average Interruption Frequency Index (SAIFI) for the Brundage Line;
- B. The System Average Interruption Duration Index (SAIDI) for the Brundage Line;
- C. Whether the Brundage Line has sustained a SAIDI or SAIFI value that is more than 300% greater than the system average of all 'feeders during any two consecutive reporting years;
- D. The Brundage Line's operation and maintenance history;
- E. The cause of each interruption in the Brundage Line's service;
- F. The action taken by RGEC to address the Brundage Line's performance; and
- G. The estimated cost of remediating the Brundage Line's performance.

**REQUESTED BY:** Petty Group, LLP

**RESPONSE:**

Will supplement.

**SUPPLEMENTAL RESPONSE:**

- A. See Attachment 1-26(A,B,E)
- B. See Attachment 1-26(A,B,E)
- C. The Brundage Line has not experienced a value that exceeded 300% of the entire system SAIDI & SAIFI.
- D. See Attachment 1-26 (D)
- E. See Attachment 1-26(A,B,E)
- F. RGEC has undertaken the following:
  - 1. RGEC engaged various consultants to assess the system.
  - 2. RGEC adopted a Tariff requirement regarding IEE 519 Compliance
  - 3. Placed members on notice of compliance requirements.
  - 4. RGEC has monitored and cooperatively coordinated with members on mitigation
  - 5. RGEC has disconnected offending members
  - 6. RGEC is actively monitoring at various locations throughout the grid
- G. Rio Grande does not have a calculation of the costs to “remediate” the line. However, while the Brundage Line has not exceeded 300% of the value of the entire system SAIDI & SAIFI, RGEC has spent approximately \$750,000 to improve harmonics on this line.
