RESPONSES TO NINTH RFIS

Staff 9-1 What is the connection size of the master meter at the trailer park?

Response: Timbercrest has two meters that it utilizes to measure water quantity to the mobile home park. There is a 3-inch meter on one well and a 4-inch meter on a second well. These meters measure the water pumped from the ground to the storage tanks that flow through to the mobile home park. Work paper “WP Water Pumping” provides the water produced during the test year by each well.
