If applicable, describe the "multiple-use facility" here:									
INFORMATION ON UTILITY SERVICE									
Tenants are billed	for X	Water	r X	Wastewate	er	Submete	red <u>OR</u>	X A	llocated ★★★
Name of utility providing water/wastewater   City of Decatur									
Date submetered or allocated billing begins (or began) 2/3/2020 Required									
METHOD USED TO OFFSET CHARGES FOR COMMON AREAS Check one line only.									
Not applicable, because Bills are based on the tenant's actual submetered consumption									
There are <u>neither</u> common areas <u>nor</u> an installed irrigation system									
X All common areas and the irrigation system(s) are metered or submetered:									
We deduct the actual utility charges for water and wastewater to these areas then allocate the remaining charges among									
our tenants.									
This property has an installed irrigation system that is <u>not</u> separately metered or submetered:									
We deduct percent (we deduct at least 25 percent) of the utility's total charges for water and wastewater									
consumption, then allocate the remaining charges among our tenants.									
This property has an installed irrigation system(s) that <u>is/are</u> separately metered or submetered:									
We deduct the actual utility charges associated with the irrigation system(s), then deduct at least 5 percent of the utility's									
total charges for water and wastewater consumption, then allocate the remaining charges among our tenants.									
This property does not have an installed irrigation system:									
We deduct at least 5 percent of the retail public utility's total charges for water and wastewater consumption, and then									
allocate the remaining charges among our tenants.

## METHOD USED TO ALLOCATE UTILITY CHARGES

Check the box or boxes that describe the allocation method used to bill tenants.

X Occupancy method: The number of occupants in the tenant's dwelling unit is divided by the total number of occupants in all dwelling units at the beginning of the month for which bills are being rendered.

The number of occupants in the tenant's dwelling unit is adjusted as shown in the table to the right. This adjusted value is divided by the total of these values for all dwelling units occupied at the beginning of the retail public utility's billing period.    Estimated occupancy method:   Number of Bedrooms   Billing Purposes	Ratio occupancy method:		Number of Occupants for
is adjusted as shown in the table to the right. This adjusted value is divided by the total of these values for all dwelling units occupied at the beginning of the retail public utility's billing period.    Estimated occupancy method:		Number of Occupants	Billing Purposes
adjusted value is divided by the total of these values for all dwelling units occupied at the beginning of the retail public utility's billing period.    Estimated occupancy method:	-	1	
for all dwelling units occupied at the beginning of the retail public utility's billing period.    Estimated occupancy method:   Number of   Number of Occupants for   Bedrooms   Billing Purposes	•	2	<u></u>
Estimated occupancy method:  Number of Bedrooms Billing Purposes  The estimated occupancy for each unit is based on the number of bedrooms as shown in the table to the right. The estimated occupancy in the tenant's dwelling unit is divided by the total estimated occupancy in all dwelling units regardless of the actual number of occupants or occupied units.  Occupancy and size of rental unit percent (in which no more than 50%) of the utility bill for water/wastewater consumption is allocated using the occupancy method checked above. The remainder is allocated according to either:  • the size of the tenant's dwelling unit divided by the total size of all dwelling units, OR • the size of the space rented by the tenant of a manufactured home divided by the size of all rental spaces.  Submetered hot water:  The individually submetered hot water used in the tenant's dwelling unit is divided by all submetered hot water used in all dwelling units.  Submetered cold water is used to allocate charges for hot water provided through a central system:  The individually submetered cold water used in the tenant's dwelling unit is divided by all submetered cold water used all dwelling units.  Submetered cold water is used to allocate charges for hot water provided through a central system:  The individually submetered cold water used in the tenant's dwelling unit is divided by all submetered cold water used all dwelling units.  Submetered cold water is used to allocate charges for hot water provided through a central system:  The individually submetered cold water used in the tenant's dwelling unit is divided by all submetered cold water used all dwelling units.	,		2.2
Bedrooms Billing Purposes  The estimated occupancy for each unit is based on the number of bedrooms as shown in the table to the right. The estimated occupancy in the tenant's 2 2.8 dwelling unit is divided by the total estimated occupancy in all dwelling units regardless of the actual number of occupants or occupied units.    Occupancy and size of rental unit   percent (in which no more than 50%) of the utility bill for water/wastewater consumption is allocated using the occupancy method checked above. The remainder is allocated according to either:  • the size of the tenant's dwelling unit divided by the total size of all dwelling units, OR  • the size of the space rented by the tenant of a manufactured home divided by the size of all rental spaces.    Submetered hot water:   Submetered hot water used in the tenant's dwelling unit is divided by all submetered hot water used in all dwelling units.    Submetered cold water is used to allocate charges for hot water provided through a central system:   The individually submetered cold water used in the tenant's dwelling unit is divided by all submetered cold water used all dwelling units.    As outlined in the condominium contract. Describe:   Size of manufactured home rental spaces.	retail public utility's billing period.	>3	2.2 + 0.4 for each additional occupant
