Public Utility Commission of Texas

TO: Each electric utility, municipally owned utility, or electric cooperative that owns or operates overhead transmission facilities greater than 60 kilovolts or distribution facilities greater than 1 kilovolt and other interested members of the public

FROM: Davida Dwyer, Legal Division

DATE: April 26, 2021

RE: **Projects Nos. 50596 and 51890**
Filing of Annual Reports for Line Inspection and Safety Pursuant to 16 T.A.C. § 25.97(f)

Under Public Utility Regulatory Act § 38.102(d)-(f) and 16 Texas Administrative Code § 25.97(f), each electric utility, municipally owned utility, or electric cooperative that owns or operates overhead transmission facilities greater than 60 kilovolts or distribution facilities greater than 1 kilovolt shall submit to the commission an annual report for the preceding calendar year. The information that must be reported depends on the voltage of the overhead transmission or distribution facilities. Such reports are due by May 1 for the preceding calendar year, and the Commission-approved form for such reports is available on the Commission's website.¹

The Commission will open a new project each year for the filing of reports due that year. Please note that

- Project No. 50596 is the appropriate project in which to file reports, including supplemented or corrected reports, for calendar year 2019. These reports were due May 1, 2020.

- Project No. 51890 is the appropriate project in which to file reports for calendar year 2020. These reports are due May 1, 2021.

¹ As of the date of this memo, the Commission-approved form is available at the following internet address:
http://puc.texas.gov/industry/electric/forms/list/Annual_Report_Form.pdf.
