Public Utility Commission of Texas

I am writing to request to be listed an "Intervenor" in Docket #51023 regarding proposed Scenic Loop 138-k V Transmission Line Project in Bexar County.

I am land owner who will be direly affected by this project.

Any "primary alternative routes" that include segment 46 (B, C, D, I, M, T, X and Z) will pass directly through my ranch property, approximately 300 feet from my home and directly through a surveyor's plat of land, which has been identified as a "club house" site on previous "surveyor's plats" of the property. This would prevent the use of this land for the "club house" noted on previous "surveyor's plats".

Any "primary alternative routes" that include segment 49 (G, J, AA) will pass directly through my ranch property as well. This will adversely affect my plans to ranch and develop this property.

Respectfully submitted
