To whom it may concern,

Eight years ago my husband and I moved to Boerne, Texas to start our retirement life. We were blessed to find the home of our dreams in Anaqua Springs, with beautiful sweeping views of the Texas Hill Country.

Part of the joy of living in Anaqua Springs is the quiet back roads that can lead you quickly from the hustle and bustle of San Antonio, a relatively short distance away, to our lovely countryside setting.

This did not come without a price. We paid dearly for our dream home (over a million dollars) which represents a large portion of our retirement savings, which we cannot afford to lose due to depreciation of our property value. As we are not travelers, it was worth it to us to just be able to enjoy our dream home, our lovely friendly neighborhood and those spectacular views.

The thought of passing huge towers on Toutant Beauregard, or the interruption in the countryside views was not what we bargained for.

We have read the submission of others on the PUC website as well as the many emails, it is very discouraging. Business deals between developer's regarding donations of property; convoluted routes to accommodate specific individuals and changing routes midstream is an unexpected and disappointing surprise.

If the most cost effective, least interruptive route, with the fewest environmental impacts is not a consideration; surely the proximity to the school zone and proposed building of another school in the near future should in itself be reason for reconsideration. In addition the removal and replacement of the functional guard house and restructured perimeter of the Anaqua Springs Ranch should be considered.

493

We respectfully request that the PUCG seriously reconsider the route being proposed by CPS Energy. We see no way for this to be the optimum solution for the location of the proposed towers.

Sincerely,

Ronald W Catalon
