Subject: Response to Docket#51023 Oral Argument

Dear Sir,

We had planned to provide an oral argument & the understanding was that the meeting was to be held by conference call as stated in the letter issued by the PUC in September & that a 2 day notice had been changed to an in-person meeting – the 2 days-notice was not sufficient time for me to arrange my time to travel to Austin. I run a business and my schedule would not allow me to attend.

We are very concerned with the proposed power line route that would impact many residents and a school – please do not interpret the fact I could not attend the meeting as a sign we do not care.

We oppose Route Z2 for many reasons, however the most significant one is the school. Our neighborhood children should not be subject to the impact caused by the lines proposed route within 200 feet of the playground and future athletic field. If a developer was responsible for implementing the reroute, then the decision makers should look at the facts – the residents do not have the resources or influence to buy their way out of a transmission line near their neighborhood – much less a school.

We believe CPS mislead residents in a previous Town Hall meeting about possible routes, and later the routes were not available.

Please consider NOT moving forward with the Toutant Beauregard route.

Respectfully,

Clifford Stratton

Clifford Stratton
