In responding with prompt corrective action, the administrative penalty to be assessed may be limited.

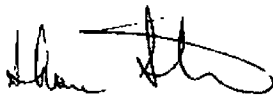

The Commission recognizes that the great majority of the regulated community wants to prevent pollution and to comply with environmental laws. We dedicate considerable resources toward making voluntary compliance achievable. But where compliance has not been met it is our duty to protect the public and the environment by enforcing the state's environmental laws, regulations, and permits.

Also, if you believe the violation documented in this notice has been cited in error, **and** you have additional information that we are unaware of, you may request a meeting to discuss this enforcement matter. To request a meeting, send a letter describing the additional information to the address shown below.

INTRODUCTION

On February 21, 2020 Texas Commission on Environmental Quality (TCEQ) Austin Region Investigator Anna

RIO ANCHO SUBDIVISION - LIBERTY HILL**2/21/2020 Inv. # - 1631482****Page 2 of 3**

Wood conducted a complaint investigation of the Rio Ancho Subdivision public water system (PWS ID 0270141). The investigation was conducted in response to a complaint received by the Austin Region Office on August 5, 2019. The complainant alleged low water pressure and service outages. The investigator contacted the water system for additional information following the investigation. No violations were alleged as a result of the investigation.

GENERAL FACILITY AND PROCESS INFORMATION

The water system is a groundwater system with 784 connections. The system has two wells. Well 3 is the primary well, located near the intersection of Jackson Street and West Front Street, across the street from the water treatment plant and elevated storage tank. Well 3 draws water from the Trinity Aquifer. Water is injected with chlorine before discharging into a 400,000 gallon ground storage tank. Two 900 gallon per minute (gpm) service pumps take suction from the storage tank and discharge to a 200,000 gallon elevated storage tank and to an additional 200,000 gallon elevated tank, located near the intersection of Jackson Street and Kelly Street.

The other well, Well 2, is currently considered a backup or emergency source of water. It draws water from the Edwards Aquifer North. It is located on property owned by the City at the intersection of Pietzich Street and Enma Street. Water from Well 2, when it is operated, is pumped to the water treatment plant at Jackson Street and West Front Street.

BACKGROUND

A complaint investigation was conducted on October 9, 2019 (Investigation number: 1602738). A pressure recording data logger was attached to a flush valve at the end of Lost Prairie Trail. The pressure recorder collected pressure readings every fifteen minutes starting September 25 at 5:31 pm and ending September 30, 2019 at 12:31 pm. The Dickson Data Logger pressure recorder downloaded information (attached in report) indicated the pressure was measured below 35 psi on two days, September 27, 2019, and September 30, 2019.

A Notice of Enforcement was sent to Aqua for failing to maintain the water pressure at a minimum of 35 psi at all times in the distribution system. This was the second occurrence of an investigator documented low pressure (less than 20psi) within a 12-month period. The active enforcement case is documented in Enforcement Case No. 58550 and TCEQ Docket Number 2019-1597-PWS-E.

ADDITIONAL INFORMATION

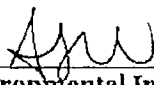

On February 3, 2020 the Austin Region contacted the complainant via email for additional information regarding the complaint. No additional information was provided.

On February 21, 2020, Austin Region Investigator Anna Wood conducted an on-site complaint investigation at the home of the complainant. A pressure reading was taken using a pressure gauge on a hose bib outside the home, and the pressure read 57 pounds per square inch. A water sample was also taken with a disinfectant residual of 2.7 milligrams per liter of free chlorine.

Ms. Wood contacted Mr. Scot Foltz, Aqua Utilities, Compliance Manager, to report the findings. No violations were alleged as a result of this investigation. The previous allegations of low pressure are already being addressed in an active enforcement case.
