DOCKET NO. 51407

APPLICATION OF DOS AGUAS, LLC	§	PUBLIC UTILITY COMMISSION
FOR A WATER CERTIFICATE OF	§	
CONVENIENCE AND NECESSITY IN	§	OF TEXAS
WALKER AND MONTGOMERY	§	
COUNTIES	§	

**ORDER NO. 12
REQUIRING CLARIFICATION**

This Order addresses the need for clarification regarding Dos Aguas, LLC's application, as amended and supplemented, for a water certificate of convenience and necessity in Walker and Montgomery counties.

In the June 3, 2021 letter from the Texas Commission on Environmental Quality (TCEQ), the TCEQ approved construction of Dos Aguas, LLC's proposed distribution system but stated:

Dos Aguas ([public water system identification number] 1700917) does not have adequate plant capacity approved by the TCEQ for the number of connections proposed in the submitted distribution systems. Dos Aguas must increase the approved water treatment plant capacity in accordance with [30 Texas Administrative Code § 290.45] before these lots are developed in order to meet capacity requirements.

Additionally, Dos Aguas asserts that it is capable of providing service to 583 connections.

The administrative law judge requires the following clarification or supplemental material:

1. Clarification regarding whether the TCEQ has made any determination or issued any approval regarding whether Dos Aguas' distribution system can be placed into service and whether Dos Aguas has adequate water treatment plant capacity for 583 connections.
2. A general location map of the requested area overlayed with the subdivision sections that have been approved or are pending approval.

By September 2, 2022, Dos Aguas must file clarification or supplemental material on the items outlined above.

Signed at Austin, Texas the 26th day of August 2022.
