DOCKET NO. 51481
CSWR-Texas Utility Operating Company, LLC's
RESPONSES TO STAFF'S 2nd RFIs

STAFF 2-1:

Please provide an estimate regarding how frequently the following repairs need to be done on the system (i.e. quarterly, monthly, bi-annually, etc.).

Date	Description	Quantity	Rate	Total
10/1/2020	Septic Overflowing	4	95	\$380.00
10/2/2020	Pump Septic Tank	1	1680	\$1,680.00
10/2/2020	Jetting of Collection Lines	1	1100	\$1,100.00

Response:

The repairs performed by CSWR-Texas Utility Operating Company LLC (“CSWR Texas” or the “Company”) on 10/1/2020 to remedy the overflowing septic system was a one-time repair due to the state of the system.

CSWR Texas will pump the septic tank quarterly. However, CSWR has determined that because the septic system is under-designed, there will be higher costs for pumping the septic tank going forward. CSWR Texas estimates that the quarterly cost of the pumping will range from approximately \$2,200-\$2,500 rather than the \$1,680 charged for the initial pumping.

CSWR Texas anticipates that it will need to perform a jetting of the collection line only once every five years.
