Cedar Creek Water Supply PWS #1470021

Regarding CCN please reference docket #49714 Sale/ transfer/ Merger was filled under this docket. The previous CCN was 12677 at the time of filing.

Item #21 within the docket, Notice of Approval, III Ordering Paragraphs, #1, pg 8/24 in the pdf.

"1. The Commission approves Ms. Estes' purchase of Cedar Creek's public water system, the transfer of Cedar Creek's water service area under water CCN number 12677, the cancellation of Cedar Creek's water CCN number 12677, and grants Ms. Estes new water CCN number 13282 to include the transferred service area".

Pages 8-24 in the pdf also contain the issuance of CCN Certificate July 7, 2020, map, and tariff (included in the rate change application).

Note: a separate Class D Rate Change Application has also been filed at the same time for Big Creek West Water Supply (previous CCN 12660 before completion of Sale/Transfer/Merger). This affiliated PWS also shares the same CCN 13282, which was assigned when the Notice of Approval was completed in docket #49716.

The two systems while sharing the same CCN post Sale/Transfer/Merger, have widely varying current tariff rates. Therefore, 2 Class D Rate Applications have been submitted, one for each system.

Prior to Sale/Transfer/Merger, each system had individual CCN's assigned.

The STM was only for Sale purposes, not Merger. However, upon completion and approval the same CCN was assigned to both systems.

The new CCN number 13282 issued to both PWS's have been updated and can also be seen on TCEQ CCN Viewer online.
