 water/wastewater consumption is allocated using the occupancy method checked above. The remainder is allocated according to either: the size of the tenant's dwelling unit divided by the total size of all dwelling units, OR the size of the space rented by the tenant of a manufactured home divided by the size of all rental spaces. Submetered hot water: The individually submetered hot water used in the tenant's dwelling unit is divided by all submetered hot water used in								
all dwelling units.								
Submetered cold water is used to allocate charges for hot water provided through a central system: The individually submetered cold water used in the tenant's dwelling unit is divided by all submetered cold water used in all dwelling units.								
As outlined in the condominium contract. Describe:								
Size of manufactured home rental space:								
The size of the area rented by the tenant divided by the total area of all the size of rental spaces.								
Size of the rented space in a multi-use facility:								
The square footage of the space rented by the tenant divided by the total square footage of all rental spaces.
