The estimated occupancy in the tenant's dwelling unit is divided by the total estimated occupancy in all dwelling units regardless of the actual setimated occupancy in all dwelling units regardless of the actual setimated occupancy in all dwelling units regardless of the actual setimated occupancy in all dwelling units regardless of the actual setimated occupancy in all dwelling units regardless of the actual setimated occupancy in all dwelling units regardless of the actual setimated occupancy in all dwelling units regardless of the actual setimated occupancy in all dwelling units regardless of the actual setimated occupancy in all dwelling units regardless of the actual set occupancy in all dwelling units regardless of the actual set occupancy in all dwelling units regardless of the actual set occupancy in all dwelling units regardless of the actual set occupancy in all dwelling units regardless of the actual set occupancy in all dwelling units regardless of the actual set occupancy in all dwelling units regardless of the actual set occupancy in all dwelling units regardless of the actual set occupancy in all dwelling units regardless of the actual set occupancy in all dwelling units regardless of the actual set occupancy in all dwelling units regardless of the actual set occupancy in all dwelling units regardless of the actual set occupancy in all dwelling units regardless of the actual set occupancy in all dwelling units regardless of the actual set occupancy in all dwelling units regardless of the actual set occupancy in all dwelling units regardless of the actual set occupancy in all dwelling units regardless of the actual set occupancy in all dwelling units regardless of the actual set occupancy in all dwelling units regardless of the actual set occupancy in all dwelling units regardless occupancy in the actual set
The estimated occupancy for each unit is based on the number of bedrooms as shown in the table to the right. The estimated occupancy in the tenant's dwelling unit is divided by the total estimated occupancy in all dwelling units regardless of the actual >3 4.0 + 1.2 for each additional bedroom
number of bedrooms as shown in the table to the right. The estimated occupancy in the tenant's dwelling unit is divided by the total estimated occupancy in all dwelling units regardless of the actual 3 4.0 4.0 4.0 + 1.2 for each additional bedroom
dwelling unit is divided by the total estimated 3 4.0 occupancy in all dwelling units regardless of the actual >3 4.0 + 1.2 for each additional bedroom
occupancy in all dwelling units regardless of the actual >3 4.0 + 1.2 for each additional bedroom
75 The first of th
number of occupants or occupied units.
Occupancy and size of rental unit percent (in which no more than 50%) of the utility bill for
water/wastewater consumption is allocated using the occupancy method checked above. The remainder is allocated
according to either:
• the size of the tenant's dwelling unit divided by the total size of all dwelling units, OR
• the size of the space rented by the tenant of a manufactured home divided by the size of all rental spaces.
Submetered hot water:
The individually submetered hot water used in the tenant's dwelling unit is divided by all submetered hot water used in
all dwelling units.
Submetered cold water is used to allocate charges for hot water provided through a central system:
The individually submetered cold water used in the tenant's dwelling unit is divided by all submetered cold water used in
all dwelling units.
<u> </u>
As outlined in the condominium contract. Describe:
Size of manufactured home rental space:
Size of manufactured home rental space: The size of the area rented by the tenant divided by the total area of all the size of rental spaces.
Size of manufactured home rental space: The size of the area rented by the tenant divided by the total area of all the size of rental spaces. Size of the rented space in a multi-use facility:
