Date submetered or allocated billing begins (or began) 04/01/2021 Required											
METHOD USED TO OFFSET CHARGES FOR COMMON AREAS Check one line only.											
X Not applicable, because X Bills are based on the tenant's actual submetered consumption											
		and the best to the same of	There are neit l					d irrigati	ion syst	em	
All common areas and the irrigation system(s) are metered or submetered:											
We deduct the actual utility charges for water and wastewater to these areas then allocate the remaining charges among											
our tenants.											
This property has an installed irrigation system that is <u>not</u> separately metered or submetered:											
We deduct percent (we deduct at least 25 percent) of the utility's total charges for water and wastewater											
consumption, then allocate the remaining charges among our tenants.											
This property has an installed irrigation system(s) that <u>is/are</u> separately metered or submetered:											
We deduct the actual utility charges associated with the irrigation system(s), then deduct at least 5 percent of the utility's											
total charges for water and wastewater consumption, then allocate the remaining charges among our tenants.											
This property does not have an installed irrigation system:											
We deduct at least 5 percent of the retail public utility's total charges for water and wastewater consumption, and then											
allocate the remaining charges among our tenants.

METHOD USED TO ALLOCATE UTILITY CHARGES

Check the box or boxes that describe the allo									
Occupancy method: The number of occupants in the	ne tenant's dwelling unit is	s divided by the total number of							
occupants in all dwelling units at the beginning of the month for which bills are being rendered.									
Ratio occupancy method:		Number of Occupants for							
• ,	Number of Occupants	Billing Purposes							
The number of occupants in the tenant's dwelling unit	1	1.0							
is adjusted as shown in the table to the right. This	2	1.6							
adjusted value is divided by the total of these values	3	2.2							
for all dwelling units occupied at the beginning of the	>3	2.2 + 0.4 for each additional occupant							
retail public utility's billing period.		•							
Estimated occupancy method:	Number of	Number of Occupants for							
_ ·	Bedrooms	Billing Purposes							
The estimated occupancy for each unit is based on the	0 (Efficiency)	1							
number of bedrooms as shown in the table to the	1	1.6							
right. The estimated occupancy in the tenant's	2	2.8							
dwelling unit is divided by the total estimated	3	4.0							
occupancy in all dwelling units regardless of the actual	>3	4.0 + 1.2 for each additional bedroom							
number of occupants or occupied units.		<u> </u>							
water/wastewater consumption is allocated using the occupancy method checked above. The remainder is allocated according to either: • the size of the tenant's dwelling unit divided by the total size of all dwelling units, OR • the size of the space rented by the tenant of a manufactured home divided by the size of all rental spaces. Submetered hot water: The individually submetered hot water used in the tenant's dwelling unit is divided by all submetered hot water used in all dwelling units.									
Submetered cold water is used to allocate charges for hot water provided through a central system: The individually submetered cold water used in the tenant's dwelling unit is divided by all submetered cold water used in									
all dwelling units.									
As outlined in the condominium contract. Describe:									
Size of manufactured home rental space:									
The size of the area rented by the tenant divided by the	total area of all the size o	f rental spaces.							
Size of the rented space in a multi-use facility:									
The square footage of the space rented by the tenant divided by the total square footage of all rental spaces.
