Subject: AARP Texas Emergency Action Request

Dear Shelly Botkin and Arthur D'Andrea,

Re: AARP Texas Emergency Action Request #51812

Texas suffered enough during the February winter storm. Consumers shouldn't now face sky-high utility bills, unfair contract termination fees, or be trapped by "switch holds" in expensive utility agreements.

I join AARP Texas in calling on you to take action now to protect consumers.

Please support the AARP Texas Emergency Action Request #51812 for immediate relief to Texas' residential utility consumers.

Thank you!

Sincerely,  
Mrs. Deborah DeSantis

Dear Shelly Botkin and Arthur D'Andrea,

Re: AARP Texas Emergency Action Request #51812

Texas suffered enough during the February winter storm. Consumers shouldn't now face sky-high utility bills, unfair contract termination fees, or be trapped by "switch holds" in expensive utility agreements.

I join AARP Texas in calling on you to take action now to protect consumers.

The drastic overpricing of utilities is similar to the predatory loan companies that overcharge consumers interest fees.

Common sense pricing for utilities should be a human right. Utilities should be controlled by public interest, such as the Texas legislature, not private entities.

Texas deserve better than this! We also need new leadership in Austin, starting with the governor.

Please support the AARP Texas Emergency Action Request #51812 for immediate relief to Texas' residential utility consumers.

Thank you!

Sincerely,  
Dr. Carol Jackson

I join AARP Texas in calling on you to take action now to protect consumers. In particular, rolling blackouts need to be more equitably spread. Many suffered none or very brief, while other of us had power 1/4 of the time or less for days. This situation produced home temperatures in the 50s, a real threat to the elderly and infirm. Summer blackouts also pose these risks to health, so please address the equity issue on any blackouts necessary.

Please support the AARP Texas Emergency Action Request #51812 for immediate relief to Texas' residential utility consumers.

I join AARP Texas in calling on you to take action now to protect consumers.

There is no excuse for what happened to thousands of Texas residents, including seniors like me, and voters as a result of the your agency to insure that our necessary utilities are operating and functioning in all types of inclement weather conditions.

It was evident 10 years ago during the last massive power outage that steps needed to be taken to avoid such events in the future. You failed at your job. This is a sure sign of your greed and uncaring for your fellow tax payers and citizens.

Please take the necessary actions to prevent this type of event to ever happen again in Texas. My vote counts.

Please support the AARP Texas Emergency Action Request #51812 for immediate relief to Texas' residential utility consumers.

Texans suffered enough during the February winter storm. Consumers shouldn't now face sky-high utility bills, unfair contract termination fees, or be trapped by "switch holds" in expensive utility agreements.

I join AARP Texas in calling on you to take action now to protect consumers. During the 120 hours of the so called, "rolling outages", we were without electricity for 60 of those hours. The outages were not rolling, the power companies simply kept turning off the electricity in the same neighborhoods. Then they have the audacity to charge people sky high rates for their electricity. Fix the grid, period. Stop the finger pointing and do something. I fear this grid will not be fixed as the Texas Public Utility Commission does not represent the citizens of Texas. It represents the interests of private corporations and utility companies. Everything which happened in February 2021 could have been prevented had the Texas Public Utility Commission made the power companies actually repair and prepare the Grid 10 years earlier. But this is Texas, and the people of Texas have a short attention span. We will be in this same type of mess come this summer and next winter. Nothing will be done, there will be new names on the Public Utility Commission and ERCOT, but not a thing will be done to fix the Grid -- it's disgusting.

Please support the AARP Texas Emergency Action Request #51812 for immediate relief to Texas' residential utility consumers.

Re: AARP Texas Emergency Action Request #51812

Texans suffered enough during the February winter storm. Consumers shouldn't now face sky-high utility bills, unfair contract termination fees, or be trapped by "switch holds" in expensive utility agreements.

I join AARP Texas in calling on you to take action now to protect consumers. It is unbelievable that Texas politicians have left consumers at risk of being victimized by sky-high electricity bills as a result of awful terms and things that should not even be legally allowed by the power providers. It is also inexcusable that the state has refused to regulate and oversee the Texas power grid in order to make sure that its performance is always reliable. This lack of oversight and protection of Texas citizens has resulted in death and extreme losses for many Texans. Please fix our messed up power system NOW!

Thank you!

Re: AARP Texas Emergency Action Request #51812

Texas suffered enough during the February winter storm. Consumers shouldn't now face sky-high utility bills, unfair contract termination fees, or be trapped by "switch holds" in expensive utility agreements.

I join AARP Texas in calling on you to take action now to protect consumers. Too many Galveston Island folks lost their lives and many more lost everything to frozen-burst water lines due to the lack of electric heat, which very many use for their heat source, hot water and cooking.

Please support the AARP Texas Emergency Action Request #51812 for immediate relief to Texas' residential utility consumers.

Thank you!

Sincerely,  
Mr. Dennis Jones

Dear Shelly Botkin and Arthur D'Andrea,

Re: AARP Texas Emergency Action Request #51812

Texans suffered enough during the February winter storm. Consumers shouldn't now face sky-high utility bills, unfair contract termination fees, or be trapped by "switch holds" in expensive utility agreements.

I join AARP Texas in calling on you to take action now to protect consumers. I work in the energy business and I signed up with Griddy because I thought their model made sense and that I would save some money versus the retailers that spend big bucks on advertising and celebrity spokespersons. It never entered my mind that the ERCOT deregulation price scheme could lead to a flimsy grid and legalized price gouging. I'm fortunate in the sense that I have the resources to pay a \$2,000 power bill for my 2 bedroom apartment but I know that without help many people cannot and will be hounded by collection companies and ruined credit scores in order to pay for other necessities. It is clear that deregulation in Texas has not helped consumers but instead has led to needless deaths and suffering across the state. It has FAILED and needs to be changed retroactively.

Please do your part to make this happen and return Texas to a leadership role in this changing economy instead of a third world country with unreliable utilities and a growing underclass of oppressed citizens.

Please support the AARP Texas Emergency Action Request #51812 for immediate relief to Texas' residential utility consumers.

Thank you!

Sincerely,  
Mr. Clark Worthley

I join AARP Texas in calling on you to take action now to protect consumers. Get the fat out of the folks collecting checks but not protecting the power grid and pointing fingers at each other when we the people are the ones that shouldn't be in the position of losing power for 3 or more days without heat and electricity! and having water pipes breaking and without pressure!

Please support the AARP Texas Emergency Action Request #51812 for immediate relief to Texas' residential utility consumers.

Thank you!

Sincerely,  
Mr. Steve Smith
