Re: Application to Change from Submetered to Allocation Billing

Dear Dr. Frankel:

The request you submitted on behalf of the ten properties to change from submetered to allocated billing is approved. This approval is based on the facts stated in your letter dated December 1, 2003. See Attachment A for a list of these properties and some of the information currently in the Texas Commission on Environmental Quality (TCEQ) records.

Blank forms are enclosed for your use in providing information to update our records on the allocation method that will be used by these properties, and on the correct name, taxpayer ID, address and phone number for the owner(s) of each property. Copies of the enclosed blank forms should be made so a separate filing can be made for each registered property.

When preparing the revised Registration form for each property (TCEQ-10363), please write "Revised" in the upper right-hand corner and enter the Registration number that has already been assigned. When returning these forms to TCEQ, please include a copy of this letter and the attachment. The forms may be faxed to us at 512/239-6190. If sent by fax, it is not necessary to also mail the forms.

If you have any questions about this letter, the information on the Attachment or the enclosed forms, please call Ms. Kate Wilkins at 512/239-6112, or if by correspondence, please include MC 153 in the letterhead address.

Sincerely,

Michelle Abrams

Re: Application to Change from Submetered to Allocation Billing

Dear Ms. Wilkins:

Management Support is applying for approval to change the properties listed below from submetered to allocated billing. All of these properties were sub-metered prior to Management Support purchasing them. These properties are experiencing various problems that prevent us from providing accurate bills to our residents. The problems include counter failures, non-replaceable battery failures, breakdown of reading systems that are no longer being manufactured or the manufacturer is no longer in business. In one particular case the reading system is Proprietary, and the manufacturer will not release the software to the new owner of the property. In all cases the cost of replacing the malfunctioning systems would be prohibitively expensive.

	PROBLEM	REGISTRATION #
Ballantyne	Non-replaceable Batteries	S2587 Now 1126
Crescent Cove	Equipment no longer manufactured	S0902 Now 0199
Carrollton Park, Phase 2	Equipment no longer manufactured	S0573
El Lago	Non-replaceable Batteries	S0664
Estates on Frankford Springs	Equipment no longer manufactured	Application Pending 54681
Lakeview at Park Side	Proprietary System	Application Pending 54681
Mira Vista	Non-replaceable Batteries	S1121
Sedona Ranch	Non-replaceable Batteries	S0940
Springs at Indian Creek	Non-replaceable Batteries	S0663
The Vintage at Medical Center	Non-replaceable Batteries	S1325

We estimate that the cost would run from \$21,000 for the smallest, The Vintage at Medical Center, to \$65,000 for the largest, Lakeview at Parkside, property.

We want to continue to recoup our water expenses by providing our residents with fair and accurate bills, and would appreciate your assistance in accomplishing this goal. If you need any additional information, please contact David Randall at Management Support (972-662-6007) or Cindy Knight/Stacie Nalls at MeterTex (972-524-5150). We look forward to hearing from you in the near future.

Sincerely,

Edward B. Frankel, M.D.
