Public Utility Commission,

51870

2021 MAY -5 AM 9:17

In reply to your notice (which does not have a notice date) concerning the application for Forest Glen Utility Company to amend a Certificate of Convenience and necessity to provide sewer utility service in Medina County, Texas. In accordance with the notice, I am requesting to intervene in the proceeding. I strongly disagree with the expansion on Forest Glen Utilities. We strongly disagree with the expansion of Forest Glen Utilities. The original plan for the reuse plant was for the Potranco Ranch subdivision for approximately 350 homes (which is not represented on the attached map). The plant has since added additional houses due to the developer purchasing new tracts. The noise and odor from the plant is already unbearable so with the addition of a new subdivision, it will increase as well as all the problems with the plant. The plant cannot handle the current number of homes, so extending it for another subdivision will make matters worse. At times the sound can be heard over a mile away. We adamantly disagree with the expansion of the Forest Glen facility.

Sincerely,

Jaime Martinez
