Re: Docket No. 52002: Application of CPR Water Supply Company, LLC. (CPR) for a Water Certificate of Convenience and Necessity (CCN) in Smith County

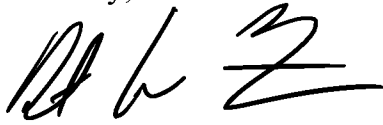

In regards to the Commission staff's motion to abate or dismiss this Docket, the Applicants strongly disagrees with dismissal of this Application. The Applicant is working to provide the latest request of the staff for approval from the Texas Commission on Environmental Quality (TCEQ) of the water distribution system that will serve the requested area. The Applicant has no control over the timeframe for the TCEQ to approve submitted plans and specifications. Per the attached TCEQ Water System Plan Review database, the estimated review date for these plans and specifications by the TCEQ is February 13, 2022.

With this Application just about at final recommendation for approval, the dismissal of this Application at this point would be a waste of the resources of both the Commission and the Applicant. This would only cause the Applicant to refile the Application and require the staff to duplicate its already review process. An abatement of the Application until the TCEQ approval of the distribution system plans and specification would be preferable to any dismissal.

The Application would request that neither an abatement nor dismissal be granted in this Docket. The Application will continue to provide the Commission with updates on the plan and specifications approval by the TECQ and submitted the approval letter form the TCEQ when available.

Should you have any further questions concerning this application, please do not hesitate to contact me at (512) 917-7541.

Sincerely,

A handwritten signature in black ink, appearing to read 'Bret W. Fenner', with a stylized, cursive script.
