HUNTSVILLE REGIONAL WATER SUPPLY SYSTEM

The Huntsville Regional Water Supply System provides service for a population of approximately 44,000 — 39,000 in Huntsville and 2,500 each at the Ellis and Estelle Texas Department of Criminal Justice prison units. TRA provides raw water for this project through a withdrawal facility located in the headwaters of Lake Livingston.

The raw water is processed and then pumped to ground storage facilities in Huntsville, as well as to the Ellis and Estelle Units of the TDCJ near Riverside. Additionally, an average of 3.2 MGD of clarified water is provided to the Tenaska Power Plant for cooling and process water.

In 2016, an expansion at the plant was completed, which included the construction of raw-water pump station improvements, approximately 2,000 feet of a new 36-inch diameter raw-water pipeline, new filters, chemical feed systems, high-service pumps, electrical service, and clear-well storage at the treatment plant site.

Livingston Recreational Facilities

LIVINGSTON

LIVINGSTON RECREATIONAL FACILITIES

The Trinity River Authority owns and operates several recreational facilities on Lake Livingston including one full-service camping facility, one day-use facility and multiple free public boat ramps.

Wolf Creek Park, a 110-acre park near Coldspring, Texas, opened in 1972. The park offers 102 camping sites, including 54 campsites with full hookups for RV's, complete with 50-amp service and concrete pads. There are also 48 campsites with water and electricity. Park amenities include restrooms and showers, boat ramps, fishing piers, fish cleaning stations, marina, playground, volleyball and basketball court. The park is open from March through November.

Tigerville Park is a day-use facility located in Livingston that includes a free public boat ramp, restroom facilities and day-use picnic amenities. Additionally, TRA owns and maintains four free public boat ramps around the lake including, Blanchard, Patrick's Ferry, Whiterock and Point Blank.

LIVINGSTON REGIONAL WATER SUPPLY SYSTEM

The Livingston Regional Water Supply System supplies water to the city of Livingston. Originally sized at 2.0 MGD, the system was enlarged to 3.0 MGD in 1992 in order to provide water to the Polunsky Unit of the Texas Department of Criminal Justice. Currently, the system serves a population of approximately 13,000: 9,000 in Livingston, 3,000 at the Polunsky Unit and 1,000 at the IAH Detention Facility, a privately operated prison facility adjacent to the Polunsky Unit.

In 2017, an expansion was completed, which included the construction of a new, raw-water pump station, approximately 5,000 feet of new 16-inch-diameter raw-water pipeline, new chemical feed systems, a new clarifier and rehab of the two existing clarifiers, new filters, electrical service, and a new control building at the treatment plant site.

TRINITY COUNTY REGIONAL WATER SUPPLY SYSTEM

The Trinity County Regional Water Supply System has provided drinking water to Trinity and Groveton, the Westwood Shores Municipal Utility District and the Glendale, Riverside and Trinity Rural Water Supply corporations. In early 2021, a new contract was negotiated and the city of Trinity became the sole contracting customer of the system. This innovative project draws raw water from Lake Livingston through 18 shallow wells placed in existing sand and gravel deposits on the Trinity County shoreline. The deposits act as filters and reduce ultimate treatment costs. The water undergoes additional filtration and disinfection at the plant before distribution to customers storage facilities.

RE: Senate Bill 3, 87th Legislature, Regular Session Compliance Guidance –
Texas Water Code (TWC) § 13.1396

Dear Public Utility Commission of Texas:

The Trinity River Authority of Texas (Authority) is an affected utility as identified in Texas Water Code (TWC) § 13.1396. Senate Bill 3, 87th Legislature, Regular Session requires an affected utility provider to provide written notice to key organization identifying the critical infrastructure requiring Critical Load status.

TWC § 13.1394 defines an “affected utility” as a retail public utility, exempt utility, or provider or conveyor of potable or raw water service that:

- Furnishes water service to more than one customer;
- In a county with a population of 3.3 million or more;
- In a county with a population of 550,000 or
- more adjacent to a county with a population of 3.3 million or more.

Below you will find the TRA utility that meets these criteria and has been deemed as critical infrastructure requiring Critical Load status:
