November 4, 2021

Multi-County Water Supply Corporation
Attn: Kate Timmons
PO Box 1006
Gatesville, TX 76528

Dear Ms. Timmons,

We have received your request to have the electricity accounts listed below designated as critical load accounts:

<u>Account #</u>	<u>Meter #</u>	<u>Service Address</u>
1478453500	136413223	CM-Office
13344700	142100763	Pump Station #1
13401500	135290310	Pump Stat #2
13423900	126928126	Pump Stat King
13473400	126928239	Plant #3 Izoro YL
13402300	136793458	Plant #1 & YL
13509500	126928196	King Plant #4
13528500	136792568	Evant Plant

Electric utilities across the state are currently waiting for formal guidance from the Public Utility Commission (PUC) regarding critical load designations. Until that guidance is provided, we can only document receipt of your request. Once guidance is provided, we will notify you in writing of our final determination.

Please note that being designated a critical load account does not exempt the account(s) from losing power during a load shed event. The critical load designation only ensures the account(s) will be prioritized for service and power restoration. If guaranteed continuous service is required, it is highly recommended that backup power sources be acquired and installed.

If you have any questions or concerns while waiting for final determination, please contact me or Joe Raibourn (joe.raibourn@hamiltonelectric.coop | 254-386-3123).

Sincerely,

Cody Lasater
