According to Senate Bill 3 (project 52299) the City of Dalhart is required to submit information about our utility.

Name: City of Dalhart; mailing address is P.O. Box 2005 79022

Point of Contact: Mike Olvera Water/Wastewater Superintendent

Office number: 806-244-2077 Cell number 806-240-0273

Alternate Contact: Dennis Rojas Public Works Director

Office number: 806-244-7693 Cell number 806-333-3528

The City has one WWTP located southeast of Dalhart at 2408 FM 281. Our WWTP has a capacity of 1.5 million and currently we are at 60% of capacity. We have a generator on site capable of running whole plant which will transfer automatically when necessary.

The City has two booster stations. The first is located on the northwest part of Dalhart at 200 Peter's this is known as the Peter's Pump Station its pumping capacity is 4250 gpm. There is also a generator on site capable of automatic transfer.

The other site is known as Rita Blanca Station is located at the southwest part of Dalhart at 1622 Denrock. This station has four pumps capable of pumping 4000 gpm also a well 28 is on site both are on generator that transfer automatically.

We also have two wells (well 24 and well 25) located west of Dalhart. Both wells pumping capacity is 1000 gpm and both have separate generators at their locations which also transfer atomically.
