Hi Cathy,

Due to the recent Senate Bill 3, there is additional information that is now required for water facilities applying for Critical Load. Attached is an FAQ document to assist with the application process as well as the spreadsheet that needs to be completed and returned to Oncor at criticalload@oncor.com. Please complete all the questions to avoid delays with the application review process.

Please provide as much information as possible to avoid delays but most important, we require the ES ID(s) for all of your water system/facilities. Some of the info is populated per Oncor information. The orange highlighted columns have drop down menus and the options listed are the only valid responses.

Please reply to this email if you have any questions or need assistance.

Thank you,
Marina Grady

Critical Load Application Submitted

Your Critical Load Application has been received by Oncor. The Oncor reference number for this application is **211112-001202**

Thank you for contacting Oncor. You will be notified by email once your application has been processed.

If you need to submit another application release, please select the **Critical Load Application** tab above.

Application for Critical Load Public Safety or Critical Load Industrial Customer (Non- Residential) Status

This application must be completed in order to request the designation of Critical Load Public Safety or Critical Load Industrial Customer (Non-Residential) status.

The criteria for qualification as Critical Load Public Safety or Critical Load Industrial are provided in the Public Utility Commission of Texas Substantive Rule 25.497. Designation of critical load does not guarantee an uninterrupted supply of electricity. It is the responsibility of the Retail Customer to make arrangements for alternative sources of electric power should a localized outage or load shed event occur.

Upon completion of the review of the submitted application, you will be notified of the results.

DESIGNATION OF A CRITICAL LOAD DOES NOT GUARANTEE AN UNINTERRUPTED SUPPLY OF ELECTRICITY.

It is the responsibility of the customer to make arrangements for alternative sources of electric power should a localized outage or significant load shed event occur.
