Re: Project 52299
Style: COORDINATION OF EMERGENCY OPERATIONS PURSUANT TO TWC §13.1396(C)
Filing Party: City of Mason

Dear Sir / Madam:

On behalf of the City of Mason, Enprotec / Hibbs & Todd, Inc. is providing the coordination of emergency operations pursuant to TWC §13.1396(C). The required information is provided as follows:

- Water Utility Name: City of Mason
PWS ID: TX2150001
- Wastewater Utility Name: City of Mason
- Location and general description of all critical load water and wastewater facilities:

The location and general description information along with additional details for each facility were provided to the electric utility that provides transmission and distribution service and retail electric power to the utility (LCRA). A summary table of the critical load details is attached along with the coordination email with LCRA.

All facilities are located in Mason County.

- Emergency contact information:
The emergency contact information is attached following the critical load summary table and includes a point of contact, alternate point of contact, and mailing address.

This letter is being sent to the Public Utility Commission, the County Emergency Management office in which the utility has water and wastewater facilities that qualify for critical load (Mason County), and the Texas Department of Emergency Management (TDEM).

Subject: January 2022 EEA Load Shed and Notification

Dear Customers,

As a result of the ongoing rulemaking at the Public Utility Commission and the Railroad Commission of Texas, LCRA TSC is transitioning its method for critical load review. **The EEA Load Shed List, which was previously provided monthly, will no longer be circulated via e-mail.** Instead, we are working to develop a solution such that each entity's critical load information will be stored separately for representatives to review. In the interim, please provide any updates to your critical load list via e-mail reply to me. At the conclusion of the rulemakings, LCRA will follow up with an update to this process.

In addition to our normal monthly outreach and communication on this topic, I would like to communicate an additional request:

- Should you be in receipt of an Application for Critical Load Serving Electric Generation and Cogeneration form (**example attached**) related to critical natural gas loads that you serve via your distribution system, please provide those forms via reply e-mail. Also, for each critical load, please provide the substation, transformer, and feeder designation. This will allow us to have better visibility and situational awareness should this information be pertinent to system operations.

And finally, as always, attached are the following:

1. EEA Master List 12.29.2021

This is a way of showing you the information in our "Communicator System." Instead of three lists there is only one list—with "checks-far to the right of the screen" of the notices you receive. If you see two entries for a name, that is to allow for separate notices for e-mail and/or text messages. Focus on the "checks", e-mail address and text address for a given name for accuracy. Please review and let us know if any updates need to be made.

2. **January 2022 EEA Load Shed Email List** (The list used to produce this email)

Please let me know if any updates are needed to the distribution list.

As always, if you need information or help in understanding EEA (Energy Emergency Alerts) or any of these related topics, please contact me.

Thank you,

Bill
